CHASING CROOKS BY RADIO

John Masefield · *Dwight Morrow* · *Floyd Gibbons*

THE HAPPIEST YEARS *by* MME. SCHUMANN-HEINK

The mouth of youth is the mouth of health

HOW CAN YOU KEEP IT?

STRANGE to say, the marching years do not alone decide the age of the mouth.

When the gums are firm and healthy, when the teeth are sound and clean—the mouth can smile at passing birthdays

But it requires care to keep the average mouth young. You cannot start too soon to use Forhan's as your dentifrice—for it meets an important need not covered by an ordinary toothpaste.

Forhan's cleans teeth, of course. You can find no finer dentifrice. Gently and safely, it keeps them gleaming with their natural beauty, because its cleansing ingredients were carefully chosen by a dentist, R. J. Forhan, D. D. S.

But in addition, when you use Forhan's, you can give your gums the scientific care they need.

Some years ago, Dr. Forhan developed a preparation for his own use in the treatment of pyorrhea. It relieved tenderness, helped to restore soft gums to healthy firmness. Dentists found its benefits so specific that the question was raised, "Why not make it possible for the patient to supplement office treatment by daily care in the home?"

To meet this need, Dr. Forhan perfected his dentifrice. In addition to recognized cleansing agents of the highest purity, it contains the advantages of the treatment he developed in his dental practice.

Used as recommended, with massage at the time of brushing, this special dentifrice tones up the gums, stimulates circulation, and helps to keep them glowing with sound good health.

NOW ON THE AIR!

New Forhan's program—featuring Evangeline Adams, world-famous astrologer—every Monday, Wednesday and Friday at 7:30 P. M. Eastern Standard Time—Columbia network.

Any mouth may have pyorrhea and at forty the odds are

4 out of 5

FORHAN'S

YOUR TEETH ARE ONLY AS HEALTHY AS YOUR GUMS

FOLLOW MY STARS OF YOUTH TO A ★ ★ Clearer, softer skin

Frances Ingram herself tells how to keep the skin lovely at its 6 vital places

"YOU are just as young and attractive, or just as old, as your skin looks," I told a charming woman who recently came to consult me. "Keep your skin immaculately clean... Keep it youthful at my six stars... And *you* are youthfully lovely."

Then I explained to her my method with Milkweed Cream.

"To cleanse the skin, spread my Milkweed Cream generously over your face and neck. Let it remain for several minutes, to allow the delicate oils to penetrate deeply into the pores, and then remove every vestige of it with soft linen.

"Now—apply a fresh film of the Milkweed Cream. With outward and upward strokes pat it into the skin at the six points starred on my mannequin.

"There are special *toning* ingredients in this Milkweed Cream. These penetrate the cleansed pores and defend the skin against blemishes and aging lines and leave it clear, soft and lovely."

* * *

This charming woman came back to see me, a day or two ago. Her skin looked *marvelously* clear and soft and fresh! She looked at least five years younger—and said she felt it!

* * *

I have recommended my Milkweed Cream and my method to so many women, and I have *seen* their skin grow fresh, clear, young. Won't *you* follow my six stars to a clearer, softer, younger skin?

If you have any special questions to ask about skin care, write for a copy of my booklet, "Why Only A Healthy Skin Can Stay Young." Or tune in on my radio hour, "Through The Looking Glass With Frances Ingram," Tuesdays, 10:15 A. M., E. S. T., over WJZ and Associated Stations.

STUDY MY MANNEQUIN AND HER "STARS" TO KNOW WHY

"Only a healthy skin can stay young"

★ THE FOREHEAD — *To guard against lines and wrinkles here, apply Milkweed Cream, stroking with fingertips, outward from the center of your brow.*

★ THE EYES — *If you would avoid aging crow's feet, smooth Ingram's about the eyes, stroke with a feather touch outward, beneath eyes and over eyelids.*

★ THE MOUTH — *Drooping lines are easily defeated by filming the fingertips with my cream and sliding them upward over the mouth and then outward toward the ears, starting at the middle of the chin.*

★ THE THROAT — *To keep your throat from flabbiness, cover with a film of Milkweed and smooth gently downward, ending with rotary movement at base of neck.*

★ THE NECK — *To prevent a sagging chin and a lined neck, stroke with fingertips covered with Milkweed from middle of chin toward the ears and patting firmly all along the jaw contours.*

★ THE SHOULDERS — *To have shoulders that are blemish-free and firmly smooth, cleanse with Milkweed Cream and massage with palm of hand in rotary motion.*

INGRAM'S Milkweed Cream

Frances Ingram, Dept. R-110
108 Washington St., N. Y. C.

Please send me your free booklet, "Why Only a Healthy Skin Can Stay Young," which tells in complete detail how to care for the skin and to guard the six vital spots of youth.

JESSICA DRAGONETTE . . . No dark fears for her at the thought of television, for besides being the best-loved soprano on the air, the diminutive CBS singer is fair . . exceeding fair! The proof's in the picture.

ANNETTE HASTINGS is a cute little Coquette. What we mean, she really is, cause that's the baby star's home program out west at Station KGO, San Francisco. You might know that she would sing soprano!

COUNTESS OLGA ALBANI knows how to flirt that Spanish shawl you see here in the approved manner. Really and truly of the Castilian nobility and possessor of a charming voice which you hear in solos over NBC.

MARIE GAMBRELLI . . . You know her better as Gamby. Remember the days when she frolicked with Roxy? She trips the light fantastic as well as she regales listeners on the air, and that's saying something!

STUDENTS WORKING ON FILM SCANNING MACHINE OF OUR MODERN TELEVISION TRANSMITTER

LEARN RADIO--TELEVISION TALKING PICTURES in 8 WEEKS

By Actual Work ~~~ In the Great Shops of Coyne

Don't spend your life slaving away in some dull, hopeless job! Don't be satisfied to work for a mere $20 or $30 a week. Let me show you how to make REAL MONEY in RADIO—THE FASTEST-GROWING, BIGGEST MONEY-MAKING GAME ON EARTH!

THOUSANDS OF JOBS OPEN

Paying $60, $70 to $200 a Week

Jobs as Designer, Inspector and Tester, paying $3,000 to $10,000 a year—as Radio Salesman and in Service and Installation Work, at $45 to $100 a week—as Operator or Manager of a Broadcasting Station, at $1,800 to $5,000 a year—as Wireless Operator on a Ship or Airplane, as a Talking Picture or Sound Expert—THOUSANDS OF JOBS PAYING $60, $70 and on UP TO $200 A WEEK.

No Books - No Lessons

All Practical Work

Coyne is NOT a Correspondence School. We don't attempt to teach you from books or lessons. We train you on the finest outlay of Radio, Television and Sound equipment in any school—on scores of modern Radio Receivers, huge Broadcasting equipment, the very latest Television apparatus, Talking Picture and Sound Reproduction equipment, Code Practice equipment, etc. You don't need advanced education or previous experience. We give you—right here in the Coyne Shops—all the actual practice and experience you'll need. And because we cut out all useless theory, you graduate as a Practical Radio Expert in 8 weeks' time.

TELEVISION

Is on the Way!

And now Television is on the way! Soon there'll be a demand for THOUSANDS of TELEVISION EXPERTS! The man who learns Television NOW can make a FORTUNE in this great new field. Get in on the ground-floor of this amazing new Radio development! Come to COYNE and learn Television on the very latest, newest Television equipment.

Talking Pictures

A Great Field

Talking Pictures and Public Address Systems offer thousands of golden opportunities to the Trained Radio Man. Here is a great new field of Radio work that has just started to grow! Prepare NOW for these marvelous opportunities! Learn Radio Sound work at Coyne on actual Talking Picture and Sound Reproduction equipment.

EARN AS YOU LEARN

Don't worry about a job! Coyne Training settles the job question for life. We often have more calls for Coyne graduates than we can supply. YOU GET FREE EMPLOYMENT SERVICE FOR LIFE. And don't let lack of money stop you. If you need part-time work while at school to help pay living expenses, we will gladly help you get it. Many of our students pay nearly all of their expenses that way.

COYNE IS 31 YEARS OLD

Coyne Training is tested, proven beyond all doubt. You can find out everything absolutely free. How you can get a good Radio job or how you can go into business for yourself and earn from $3,000 to $15,000 a year. It costs NOTHING to investigate! Just MAIL THE COUPON for YOUR COPY OF MY BIG FREE BOOK!

Coming *and* Going

Observations on Events and Incidents in the Broadcasts of the Month

MISS FRANCES COLLETTE, whose portrait adorns the cover of this November Radio Digest has been rather an inconspicuous member of the CBS staff at WABC, New York. Dramatic talent on the Radio stage is better known by voice and character than by name. Miss Collette can both act and sing and takes part in the Forty Fathom Trawlers and the Land o' Make Believe. She has a wistful type of beauty that may receive higher recognition when the television contracts are ready to be signed. The television talent story is something in store for you—but Miss Betty McGee gives you an inkling of it in this issue, tinting the skin for the scan.

* * *

The Radio Follies at WABC has made broadcast actors out of Eddie Cantor and other stars of the Vanities. Dear, Oh dear, poor old Broadway, what are we coming to! That's the lament of some of the theatrical journals. Mr. Cantor was quoted in a newspaper to the effect that he might not be available to the theatre stage for some time. "But when I do go back—if ever—Flo Ziegfeld will be the first man I'll see about it," he concluded.

* * *

In the meantime what about Mr. Ziegfeld the famous folly glorifier? (—Silence!) No response coming from Mr. Ziegfeld we wish to announce that our Miss Lillian G. Genn, who obtained the Schumann-Heink interview in this issue of Radio Digest, has promised a very important interview with Mrs. Ziegfeld, better known as Miss Billie Burke. What a wonderful screen star was Billie Burke—most bewitching mannerisms! Miss Burke is to tell Radio Digest readers what she means by "Making the Most out of Marriage" and she should be one of the most interesting wives in the world. This is scheduled for December by Miss Genn.

* * *

What is Radio talent? Whatever else it may be it is Big Money with capital letters for a score of very young boys and girls who are moving their parents out of tenements to Millionaire's Row in the Big City. Next month you will meet a new writer for Radio Digest—Miss Alma Sioux Scarberry—who will reveal a most astounding story about the Children of the Air. Take for instance Little Rose Marie of the National Broadcasting Company, daughter of an Italian teamster and a Polish waitress, who was "discovered" two years ago at the age of three. She's five now and this year her earnings will be $100,000! Oh, and that isn't all—just read Miss Scarberry's article next month

You've been reading Doty Hobart's human interest Radio articles in Radio Digest month by month for a year now. Mr. Hobart has had wide Radio experience, in the studio and as a writer. Give him almost any kind of a subject with a Radio slant to it and he'll get the right sort of a story. Take for example this month: "What is Radio doing to crime?" he was asked. He went out and came back with the story by Grover Whalen, one of the most famous crook chasers in America. Now he is scouring the country for all the old time stage celebrities who are today reaching their audiences on the air. And you can gamble it will be a whale of a good story when you read it in the December issue.

* * *

"There he goes—ten, twenty—Hallelujah—see that boy run—thirty-five, forty yards—and DOWN!" It takes Ted Husing to work the set-sitter football fan up to a lather. And these are the Happy Days! Suppose you were a Ted Husing—what would you do and how? It's a hard life, mates. Best read Mr. Husing's own story in his own words as he has written it himself for Radio Digest right here in your hands. Oh yes, Ted knows how to punch a typewriter when he gets a chance. But with airplanes and police escorts waiting to snatch him from one field of action to the next it's hard to get the chance—and Radio Digest thinks it was doggawn sporting of him to sit down and hammer out these impressions for you. Thanks a heap, Ted!

* * *

AFTER All . . . it's no more than to be expected that Around the Samovar of WABC should have been picked by Paramount for a sound short . . . Harry Horlick, chief of the A & P Gypsies, could have his tonsils and adenoids removed while Graham McNamee doesn't dare for fear of changing the tone of his voice . . . and Madge Tucker does not imitate the animals you hear in her program, Donald Bain does it . . . the Rex Cole Mountaineers won't accept NBC checks but demand cash . . . Erich Kleiber never saw the U. S. until he came from Germany to direct the New York Philharmonic Symphony although he married a California girl three years ago . . . Heywood Broun started stump speaking for Congress in New York and was able to call such pinch-hitters for his CBS Radio column as John Erskine, Alexander Woolcott, Russell Owen, Franklin P. Adams and H. I. Phillips . . . Freddie Rich, CBS maestro, will manage Young Lyons, light-heavyweight champion of the Navy . . . Stanley Bell, CBS announcer, was attacked by hiccoughs during the Fidac program in Washington and had to be relieved by Bill Doherty of the publicity staff who nervously made his debut over the air on the international program . . . a real live cow was taken to the banquet room of Hotel LaSalle, Chicago, at a dairy convention and mooed obligingly into a microphone.

Vote Four Best Stations for

STATE CHAMPIONSHIPS

WHICH do you consider the most popular station in your state? Which stations would you consider as Second, Third and Fourth choice? How do you think your opinion compares with your neighbor's or the majority of other Radio listeners in your state?

It's worth while finding out how your judgment compares with the majority. It's worth a whole lot to the station to get this information.

That's why RADIO DIGEST is presenting this opportunity to declare for a State Championship—something that has never been tried before. The contest was announced last month but as we go to press for November, just as the October number is being distributed to the news stands, we are unable to give any adequate idea as to the nominations that are bound to have been received by the time you read this.

But please do this now: Nominate your four favorite stations. Fill out the blank in the lower left-hand corner of this page and send it to the Contest Editor of RADIO DIGEST. Then fill out the ballot, on the right hand side, and put it where you can find it when the next RADIO DIGEST comes out. Save up your ballots and make them count for the bonus votes described to you in the Rules on Page 122. Then send the complete series of ballots to the Contest Editor at one time.

Remember your vote is eligible only for the state in which you reside although you may really prefer stations that you hear from some other state. This is for a State Championship. We want to find out the most popular stations in each state.

Give the stations in your own state a chance to win a prize. Support your own people. Every station is doing its best within its powers to win your friendship, no matter where you live. But you owe your voting allegiance to the stations within your own boundaries for this occasion. RADIO DIGEST is trying to present an even break for every station in the country.

To maintain a broadcasting station is a costly proposition. Equipment and maintenance is expensive. Good talent must receive good pay. To present fine programs by fine artists a successful station must have advantageous commercial relationships. There are a few, but very, very few, stations which are not dependent on the salability of their time. The most of them must depend upon advertisers. And advertisers, before they invest their money, are generally greatly concerned as to the popularity of the station with which they are to deal. And that is where YOU come in, for this contest.

No station will be harmed. But four stations in your state are going to be helped a great deal by your support. The four stations that win will have something definite to show any prospective advertiser as to their popularity in the state. The advertiser will be able to judge how to reach the greatest number of people and invest accordingly. The station will have more money to provide you the kind of programs that have won your favor. And thus everybody will benefit.

In recognition of your choice of the four winning stations RADIO DIGEST will award four beautifully designed and engraved medallions, each signifying the honor that has been achieved. And with each medallion there will be presented a scroll inscribed with the name of the winner and a memorial of the occasion.

This contest is a service conceived by RADIO DIGEST as of benefit to everybody concerned, and especially in furtherance of its policy to encourage and make possible better broadcast programs for the listener. Tastes are changing continually. A type of program that may have been leading in popularity a year ago may be entirely passé now. But who is going to know what you want unless you indicate your choice? Vote for the station that presents most nearly the kind of a program you prefer and the ballots will tell the tale.

In the case of a state where there are only a few stations, and only slight opportunity to declare a preference your vote should be registered just the same. The number of votes cast may disclose the need of a shift of stations from some of the more congested communities to the area where you live, and where there is a greater need for competitive programs. Nominate your stations and vote anyway.

Next month you will find published the first list of nominations for the State Championship honors. Perhaps a few scattering votes will also be cast by that time. At least there will be a record of the number of nominations each station has received. If you feel especially friendly toward your favorite station there is no harm in mentioning the fact to some of your neighbors and getting them to vote too. The Contest Editor would particularly appreciate a few letters from the readers indicating why they have selected the stations they nominate. Some of these letters will be published as a guide to other listeners in helping them to make their selections.

Rudy Vallee

Whose love for music is second only to his love of making people happy

Radio Roads by

Rudy Vallee

"Heigh-ho everybody! Rudy Vallee speaking." Go over the roads in the big blue car with the popular idol and his Connecticut Yankees and read, in his own words, the story of his trip among the "plain people".

MANY times this last summer while sitting behind the wheel of my big, blue car as we wound through the hills and mountains of Pennsylvania, or through the tall corn fields of Ohio, Michigan and Iowa, while I kept my eyes on my driving, I had ample time to reflect and review in my mind this almost unbelievable success that Radio had made possible for us this summer.

While it seemed so natural to have it so, yet in these moments of soliloquy which often come to me when driving my car, I paused to consider and to analyze the power of Radio.

I was in the process of a tour of almost forty towns. I use the word "town" because we avoided the large key cities. My contract with the Paramount-Publix Theatres and my own common sense told me to leave the key cities for a theatrical tour later on. In such cities as Chicago, Boston, Detroit, and Cleveland, we could easily play at least four and even eight weeks in the Paramount-Publix Theatres of each city.

This tour was intended to bring me to the dancing public of the various states of the East and Middle-West.—that public which will travel in automobiles a hundred miles to a dance usually held in some big, open-air pavilion, or some rustic hall in the woods, on the edge of a river, or possibly built next to the ocean on some beach. Of course a good percentage of our dancing public came from the key cities, but the large, theatre-attending public was still left untapped.

This tour had many unusual features. The man who runs such a large open-air place, and who engages the orchestras, is known as a promoter, very much in the same sense as a fight promoter. He is a man who takes a chance on an attraction which he subsequently advertises to appear at his pavilion or dance hall, and then prays for a good, clear night in the hope of at least breaking even. This last thought was uppermost in the minds of most of the promoters who engaged us—just to break even. We demanded a guarantee of $2,500 for each evening's appearance against 60% of the gross receipts of the evening. That means that should the gross receipts be $6.000 I would receive $3,600 for the evening; should the receipts be only $2,000 the promoter would have to dig down and foot the extra $500 to bring me to my guarantee of $2,500. In certain places we were sold outright at $3,500 with no percentage of the gross receipts. This is an unusual figure for the dance promoters to pay. Whiteman in his early days had received a high guarantee, I believe it was $1,500 per night, but here we were, beginning our tour in the summer of the worst depression that the country had ever known, and the very states in which we were touring were beginning to feel the grip of one of the worst droughts that the farmers had ever known.

IN THE coal mining sections which we played the mines were working on half time; in some places the miners had not worked for a year. Then there was an automobile town in Michigan in which the three automobile factories had been closed for over a year; they were the only means of livelihood for three-fourths of the population of the town.

Possibly some dance promoters felt that they were taking a great risk, but at least they never manifested it to me. My greatest happiness comes from the fact that the majority seemed to feel that it was a prestige to be able to play us, and that, win or lose, the satisfaction of having included us among the roster of bands who had played at their place of amusement meant more to them than making money on us.

But, and this is the most astounding point of all, what could possibly embolden the promoter to guarantee such an unusually large figure for one night's performance when we had never visited, personally, his place of amusement, or perhaps his state, for that matter?

Whiteman built his reputation on a different style of dance music which was brought to the great American public by Victor records; there is no question of that. The press played an important part in his climb to fame by supplementing his records with stories about the man and his band, but it was not his appearances at the Palais Royal in New York City, where he played to maybe five hundred people an evening, and Radio was unknown in the days when Paul Whiteman achieved his phenomenal success.

I know that in my own case my great admiration for him came through word-of-mouth gossip, and his picture on songs which found their way up to Maine, but my real knowledge of the Whiteman who was electrifying New York was brought to me through his Victor records which showed me concretely

that he had really something to give.

For the past year and a half preceding my tour my Victor records had been doing a world of good for me. I am reminded of the motorcycle cop in Pasadena, Cal., who, during the summer when I was making my picture in Hollywood, refused to give me a ticket after I had unconsciously passed a red light, because he and his wife enjoyed our Victor records so much. I had not begun broadcasting for Fleischmann then, and the only way he and his wife could have possibly known of our music was through our records, and since these are broadcast by local stations in California quite often they had come to know us real well.

Without doubt our records have done a lot towards paving the way for the tour which was so successful for me this past summer, and, as in the case of Whiteman, the press, too, has aroused public curiosity as to the individual. Most of the interviews, criticisms, and write-ups had been inaccurate, but at least they created a curiosity. My picture, simple as it was, had developed the story of eight amateur musicians in a thoroughly logical manner, and it made over a million dollars for the producers of it. It had given people a vague idea of what my boys and I were like, and the public naturally had a desire to see us in the flesh. My book, every word of which had been written by myself in an effort to present myself in a sincere and truthful light to those who wished to know something of me and my work, had been syndicated in over forty newspapers and unquestionably those who read it had some desire to watch me work before them.

But I feel quite safe in saying that no one of these things, nor all of them combined, could have brought to these small places the tremendous audiences of eight and ten thousand people, surging back and forth in a frenzy of curiosity and welcome. The fact that it was Radio was easily shown by the opening speech of nearly everyone to whom I was able to talk. Invariably their opening speech was, "I listen to you every Thursday and Saturday."

"Welcome to Rudy" read signs wherever he traveled. Left, the big blue car. Below, a typical mob-scene reception.

Unquestionably Radio can bring the music of an individual and his band much closer and much truer than a phonograph record. The three minute length of a phonograph record at best limits the artist; there is no chance for an informal talk about the music, or to bring the mood of the artist to the listeners. Again, phonographic reproduction may be bad due to a bad phonograph. If the turn table runs too fast the artist sounds effeminate, whereas Radio is controlled by men who know their jobs, and even static cannot do the damage that a turn table of a phonograph running too fast can do.

WHEN I consider that our Fleischmann audiences number between ten and forty million people, then and only then do I realize the tremendous power of Radio. If you have attended a football game in a bowl or stadium containing eighty or even a hundred thousand people, you have probably been amazed at the size of the crowd; but consider that any one Fleischmann broadcast has an audience anywhere from fifteen to twenty-five times the size of the crowd in a great bowl or stadium. That is only considering the United States. I am told our broadcasts reach Cuba, Canada, and even South America, and during the course of that hour it is possible for me to show a many-sided personality in band and individual. I have broadcast nights when I have felt in an unhappy mood; danger threatened or some parasite or group of parasites had succeeded in striking a disagreeable blow. My audience probably felt this and sympathized with me. There is nothing that will carry the mood of the artist quite as accurately as Radio.

Yet I am happy in the ability to throw off any depression that may wish to settle upon me when I begin to broadcast. My cares and woes drop off like a cloak because I am happiest when before the micro-

ne. One of the greatest reasons for my piness is the fact that I know our sic brings comfort and solace to sick ple.

Those who have read my book will say t I am only stressing something of ch I have already spoken, but I have eived so many letters since writing the book, so many that I would like to quote from, that I feel I must mention this

bject again to emphasize my point. At times when I begin to broadcast I el almost like a surgeon beginning to erate—an operation that is going to lieve someone who is unhappy and sick. nd so many of our letters say that our roadcasts do just that thing that I beeve it. Wherever it was possible for nese people to meet us along the way ney did so. In a certain city there was young woman who was a Sister Superior a convent; even she derives satisfaction rom our type of music. To know that ur programs have an appeal for such an nusual type of mind gives me great satisaction.

Crowds we met in countless numbers. specially the little children. On a long oute from Portsmouth, N. H., into Boson, a route which was printed in a promiient Boston paper and conducted under heir auspices, there were hundreds of people lined along the streets to wave is I went through. Many of them were nly children, tiny children, and to feel hat they too enjoy our work is the crownng happiness of any person whose artistic efforts bring him to the hearts of children. He may well feel proud and happy.

BUT my feeling of work well done was greater after we had played the oil and coal fields. There were those who predicted hostility and trouble in these particular places; the mining element is usually quite rough and very quick to manifest disapproval. However, I had no misgivings when we got to these particular localities.

I carried with me a fifteen piece band, composed of the seven original Connecticut Yankees with eight extra men. They were the best that I could find in the country, men who knew their instruments

Westport, Maine, greets its favorite son. Left, Rudy, Mother and Dad. Below, broadcasting from Peoria, Ill.

and who wanted to work. My boys usually played for an hour or an hour and a quarter without me. The dance started at nine and they gave the dancers plenty of dance music till I arrived on the scene at ten or ten-fifteen. The psychology of a late appearance is that the crowd is more expectant and impatient by the time the feature attraction arrives. In the second place they have had enough dancing and are willing to stand and listen to the concert if there is one.

Directly upon my arrival I unpacked my instruments and appeared on the stand. My opening speech was very much along the lines of a Radio talk, introducing first and collectively the augmented Connecticut Yankees, and then mentioning some personal details relative to the town in which we were appearing. Usually it held a certain interest for me: or if I had happened to have played there or visited there in my earlier days I mentioned that fact.

I then proceeded to tell them about the fifty-minute concert which was about to begin. Several of the numbers they would be unable to dance to; the program was really made up of old Radio favorites and a few new tunes, and I hoped that they would

Crooks Don't

Radio is Relentless in Pursuit of Lawbreakers and Uncanny in Ferreting Them From Their Hideouts

By

Grover A. Whalen

EDITOR'S NOTE: *In this article Grover A. Whalen, former Police Commissioner of New York City, makes it very plain that even though he retired from that particular office to go back to an active business career he still retains a lively interest in police work. He is especially desirous of awakening public interest in crime prevention.*

ELMIRA RUBEN didn't look exactly wicked. He was a thickset yellow-skinned Filipino with a rather high forehead. His hair was black and bushy. He met your gaze freely with black eyes that peered at you through the latest model octagon-shaped rimless glasses. Ruben was well-read and a good talker. You would have taken him for just another student sent here from his island home to get a college education.

Perhaps that is what he came to the United States for originally. I don't know. We are not particularly interested in what his intentions were prior to his activity as a forger.

On November 7th, 1928, Ruben was indicted by the Grand Jury. The charge was grand larceny. With a forged check on the Harriman National Bank for $1500, Ruben had obtained an equal amount of negotiable travelers' checks from the American Express Company. When he was apprehended by one of our detectives he called himself Joe Manalo. This was a good alias, as aliases go, but it didn't take very long to discover that Joe Manalo and Elmira Ruben were one and the same person.

The case was set for trial early in December and Judge Fawcett set the bail at $3500. With the aid of friends, Ruben was able to secure the services of a professional bondsman.

The case was called on December 7th. Ruben failed to appear. When detectives were sent to the address of the bondsman that gentleman was also among the missing. The bond was forfeited and Elmira Ruben automatically became a fugitive from justice.

This fugitive was not in any sense of the word a clever criminal. That is, he wasn't clever in covering his tracks. Perhaps his inexpertness at playing the part which the underworld calls a "hideout on the lam" made it possible for him to do the thing which no professional criminal would have done. Ruben repeated his offense!

He forged another check, the amount of which was $5000. With the forged check he purchased from an agent of the Dollar Steamship Line in New York City five thousand dollars worth of American Express Travelers' Checks!

Not until December twentieth did a special agent of the American Express Company inform the New York Police Department that the company had been swindled by a Filipino by the name of Jose Encarnation.

THE similarity of the two cases charged to Elmira Ruben and Jose Encarnation made the Department officials suspicious. A picture of Ruben was submitted to the agent of the steamship company who had sold Encarnation the checks and he immediately identified the picture as that of the person who had made the purchase from him. Ruben now had another alias. It was not his last one as we were to learn shortly.

The travelers' checks which Encarnation had cashed were traced to Chicago, St. Louis, and Kansas City. Remember, the police department did not learn of this last escapade of Ruben's until December twentieth. After that date things happened rapidly.

The Express Company cooperated with us in our man hunt. It was their money which Elmira Ruben, alias Joe Malano, alias Jose Encarnation was spending. Now, when an Oriental heads West with a pocketful of cash it usually means one thing. He is homeward bound. We acted on that assumption.

San Francisco is the natural port of embarkation for those returning to the Orient. The travelers' checks had been cashed by a Westward bound Encarnation and we decided that San Francisco was the likely place to apprehend our man.

The police chief of that city was wired on December twenty-first. A picture of the fugitive was already in his files, as photographs of Ruben had been sent out the previous week to the police departments of large cities throughout the country. The wire which the chief received requested that he check with the ticket agents of the steamship companies to see if a ticket had been sold to any person resembling the man under suspicion.

In less than an hour we had a wire from the San Francisco police! By a lucky coincidence the man detailed to the job had struck the trail at the first ticket agency he visited.

The clerk was positive she had sold passage on the Steamship Koreamaru to a young Filipino who resembled Ruben. But the name of the purchaser, according to the passenger list, was Constantino Querubin! Another alias. This traveler had paid cash for his ticket.

The clerk further stated that the Filipino had shown her his passport and that it was made out in the name of Constantino Querubin. This was the last alias we ran into, and because of the passport we assumed that Querubin was not an alias but was his real name.

When was the Koreamaru due to sail?

It had sailed. That very day.

Our man was on the high seas, probably congratulating himself that he had been a very wise young man in coming to the United States, where it had been so easy to pick up a few thousand dollars without working. We could picture him on the deck of the steamship dreaming of a future of delightful idleness in some island paradise.

But the fugitive was reckoning without the knowledge of what the air waves about his head were saying at that very moment.

The Radio operator on the Koreamaru received a message from the American Express representative in San Francisco. It was addressed to the Captain and it asked briefly if a passenger by the name of Constantino Querubin was on board.

The next morning the following message was delivered to me:

t Like Ether

Captain of Koreamaru has wirelessed that Querubin on board photograph can be radioed Honolulu if desired."

The message was signed by the American xpress representative in San Francisco.

As soon as I learned the date on which the eamship was due to arrive at Honolulu, I nt Sheriff Gleason of that port the following essage:

"Arrest Jose Encarnation Filipino twenty-five years five feet six one hundred thirty-five yellow complexion bushy hair may wear glasses Grand Jury indictment charges grand larceny forgery bench warrant issued is passenger aboard Koreamaru name Constantino Querubin due Twenty-sixth will extradite wire—Grover A. Whalen, Police Commissioner"

As a further precaution I ordered that the icture showing the side view of Ruben's face e radioed to Sheriff Gleason. This was lone.

There was nothing more that we could do ntil we heard from the Sheriff at Honolulu. And hear from him we did. This was the nessage which came to Police Headquarters n the afternoon of December twenty-sixth:

"Encarnation alias Querubin arrested being held twenty six hundred and eighty one dollars found in possession advise what action you want—Sheriff Gleason"

The sheriff was advised to hold the fugitive in custody. In spite of an attempt on the part of a local lawyer to prevent the extradition of the prisoner, Detectives Kelly and Fitzgerald of the New York force made the trip to the mid-Pacific and returned with a much dismayed culprit.

RUBEN was returned to New York and jailed on February sixth, less than two months after he had jumped his bond. He was convicted and is now serving out his sentence.

The officials of the police department are rather proud of this particular case. We were elated, not because of the capture of a hardened criminal, for Ruben was anything but that, but because of the up-to-date methods used in making the capture. It was, I believe, the first time that the photograph of a fugitive from justice was sent via Radio.

In this progressive age in which we live

Grover A. Whalen, former New York Police Commissioner

criminals as well as honest folks are aware of the uses to which science can be turned. They are quick to utilize scientific facts and methods in the commission of crime. It is up to honest citizenry, and especially police departments, to keep not only abreast of the times but just a jump or two ahead in order to combat the menace of the underworld. Science gave us the automobile and every crook, from stick-up man to bank robber, immediately accepted this form of transportation as the quickest and safest means of escape. It is impossible to keep the motor car out of the hands of a criminal but its value to him has been somewhat curtailed by a vigilant motorized police force. Indeed, the police cars of western cities, like Detroit, equipped with Radio, have been doing very splendid work in capturing hold-up men and automobile thieves. Such cars contain a receiving set tuned in on the police broadcasting station. Thus an instantaneous report of a crime reaches the cruising police officers, who are then able to give their immediate attention to the business of apprehending the fleeing criminals.

PERHAPS you wonder, inasmuch as the Police Department of New York City has its own station, why it has never made use of Radio in the way other cities are doing.

When the station was first installed some years ago, Radio, as it is known today, was an unborn child. The station was then equipped for wireless work of short range sending and was used to aid in the control of harbor traffic. It was also found to be an efficient means of directing the fireboats whenever an alarm came from ships in or near the harbor.

Today, although the station's work covers a larger territory and includes a much longer sending and receiving radius, it is still much the same as it was at the time of installation. The City Boat, "Macon," has also been equipped as a Radio station. At all times it is in direct communication with the land station and serves as a representative of the municipal station in our great harbor, teeming with commercial traffic.

We have made several experiments with receiving sets in police cars but have been forced to abandon their use. Radio is impractical for police work in New York in cars under present conditions. Present day sets function erratically in this city of skyscrapers. There are many "dead" areas which we have been unable to penetrate with our present police broadcasting station system. This condition is not alone the fault of the low power of the station. Set owners living in these "dead" spots complain bitterly because they cannot bring in the entertainment programs from the high-powered stations.

The Chief Engineer of the Department, Mr. Thomas Rochester, has spent many hours toiling over a map on which he has these areas checked. It is his contention that six or eight stations, properly located throughout the city, in a chain hook-up, broadcasting one report from the key station, will eliminate the "dead" spots, as far as police broadcasting is concerned. The chances are that this system of a city chain of police broadcasting stations will be tried in the near future. May I add that the Department has requested the federal Radio commission to assign a special wave length on which to operate these stations. Reception on the wave length we are considering would require the use of special sets.

To illustrate the unholy uses to which the lawbreakers may put the products of science and inventive genius, it is interesting to note that Radio has not escaped their attention. Only a few months ago

A RADIO RUM RING!

The underworld is using Radio for its own ends! Rum-runners illicitly set up $10,000 broadcast stations to flash news to waiting contraband ships.

Read How These Criminals Are Being Tracked By Their Own Instruments In

DECEMBER RADIO DIGEST

the New Jersey federal authorities located a fully equipped broadcasting station which rum-runners were using. An elaborate set of code signals emanating from an unknown locality on the Jersey coast first caught the attention of the government's watchdogs. They were unable to decipher the code, but they did know, that the efficiency of the coast guard cutters as rum-chasers in some mysterious way had been practically eliminated. When the federal men finally succeeded in centering their activities on the neighborhood from whence the mystery signals came, they discovered a rather pretentious but lonesome house on a little hill. They raided the place only to find it had been abandoned. There was no sign of life about the house. But once inside they were well rewarded for their labors. The very efficient broadcasting apparatus which had been used by the bootleggers to warn their runners of the whereabouts of the coast guard cutters and federal men was revealed. To supplement the Radio there was an extensive arsenal including revolvers, sawed-off shotguns and two machine guns!

Perhaps, my readers may be interested in another case in which Radio played a part in a tragedy, in the spring of 1926. For some months, residents of Brooklyn and Long Island had reported the loss of receiving sets by burglary. The facts in each case were the same. The thief had entered the house in the early evening hours after the occupants had gone out. Although silverware was usually taken, the Radio set was always listed as missing. The men on the force spoke of the thief as "the Radio burglar." Special men were detailed to hunt the man down and on March twenty-fifth, two detectives saw a man enter a home in Richmond Hill shortly after the family had left the house. The peculiar actions of the man had attracted the attention of the plain clothes men a few minutes before. He did not look as though he belonged in the neighborhood and appeared to be a suspicious idler.

Waiting until the suspect was inside the house, the two detectives approached. When the thief, who had forced a window to make his entrance, boldly opened the front door and started to walk out with a receiving set in his arms the detectives rushed forward to seize him. The burglar dropped the set and pulled a gun. In the exchange of shots that followed both officers were wounded and the man darted away.

Patrolman Arthur J. Kenny, on whose post this had occurred, heard the shots from a distance and came running toward the scene of action. At the corner of the street he nearly collided with the fleeing burglar. Kenny made a grab for the man and caught him, but before the patrolman could get the gun away from his captive, Kenny was shot and killed. The burglar escaped.

THE wounded detectives, however, had obtained a good look at the thief and a search through the rogues' gallery revealed the identity of the murderer. A comparison of the fingerprints on the receiving set he had tried to steal, with those in the bureau, made the identification positive. The man was a petty thief and drug addict who had already served two terms. He was apprehended on April thirteenth by two detectives assigned to watch the crowd at the opening game of the baseball season at the Polo Grounds. He reached for his gun but was quickly disarmed. His trial resulted in a quick conviction on the charge of first de-

murder and in June of that same year was placed in the "hot spot," as the electric chair is called by offenders of society. It may seem strange to the majority people that a petty thief will resort to rder in order to escape the law. A e number of them are drug addicts. criminal with his mind dominated by drug has a false courage that makes reckless. A gun in the hand of a p-head" is a hundred times more of a nace than in the hand of a normal nan. We could wipe out at least fifty cent of the crime in this country if traffic in drugs could be controlled. e elimination of the drug addict is one the first steps in crime prevention. other obstacle to the control of crime lack of public interest in the punishnt of criminals. We are prone to give le publicity to the commission of me, but relatively little to the punishnt. Newspapers in England give but le space to a crime until a conviction s been obtained. en the crime is viewed and stress ced upon the punment awarded. It my firm belief that story of the punment would serve a real deterrent. ghly colored acunts of a criminal's reer, tend to prote. rather than disurage, criminality. Moreover, don't ve everything to e police, who form ur first line of dense against the onughts of the underrld. Many phases police work need d demand the active operation of outle agencies. Chief hong those outside encies is the honest citizen. No police partment can function efficiently when nest citizens are apathetic.

When the Bureau of Crime Prevention as inaugurated as an active branch of e Police Department of the City of New ork, on January sixteenth of this year, was most gratifying to note the keen terest displayed and the many offers of sistance made by social agencies work- in the field of prevention and welfare.

WHAT every well governed city needs most is a socially-minded ublic. There is an old adage to the fect that what is everybody's business is obody's business. It is particularly true crime prevention. New York has a opulation of seven millions of people and e and one-half millions of daily trants. Thus the police of our city come daily contact with eight and one-half illions of people. The cosmopolitan nature of our city further complicates the police problem. Therefore I felt that every citizen of New York should pledge himself or herself to assist in the solution of the all-important question of crime prevention.

In order to get this message to the people of New York, I wanted to find the best possible medium for my appeal. Arthur B. Reeve, the well known criminologist and author of the famous Craig Kennedy detective stories, suggested the Radio. The National Broadcasting Company was approached with the suggestion that a crime prevention program be added to the already long list of sustaining hours.

The suggestion was welcomed and in June of this year a series of half-hour programs were broadcast. To our great surprise and satisfaction this program was given a feature spot in the evening hours and was broadcast over a national hookup covering most of the United States.

Rogues' Gallery pictures of Elmira Ruben, Filipino tracked down by persistence of Radio

The importance of this work must not be taken lightly for the solution of the crime problem can be found in crime prevention.

A rather interesting side light on the interest which certain malefactors have taken in these Radio programs came to light the other day. It happened shortly after an especially dramatic exposure of racketeering methods had been broadcast.

The programs are under the personal supervision of Mr. Reeve and three distinct, unmistakable overtures from the gentry "outside the law" were received by him. These overtures suggested that it might be worth his while to consider an offer to "chisel in" on their rackets. The figure was most alluring! A thinly veiled explanation was that he would be an invaluable ally in covering up their activities because of his ostensible connection with the forces of law and order.

The creator of Craig Kennedy expressed his appreciation of the left-handed compliment but declined the offers. He grinned from ear to ear as he said to me, "Say, this is great. Now I'm sure this crime prevention idea is a success. When those racketeers give anything a tumble, it must be good."

But we have sought to do more than merely educate the public to protect itself from the criminal. Our crime prevention program goes far beyond that phase.

Primarily crime prevention means attacking crime at its source. It means surrounding the delinquent child with good environmental and occupational influences and destroying the vicious influences which breed crime.

CRIME prevention in its broadest sense will result in making a delinquent child into a normal, healthy member of society, who at maturity will be able to take his or her place in our community life.

Billions are spent each year by the municipality, state and nation upon the suppression of crime. The yearly budget of the New York Police Department is over $60,000,000.00. Added to this large expenditure of public funds for crime detection are the enormous amounts required for the upkeep of the correctional institutions made necessary by crime. How much better it would be if a large portion of this money were applied to the elimination of crime at its source. Our present method is to protect society through elaborate crime detection machinery. Our future method will undoubtedly be the perfection of crime prevention machinery resulting in untold good to the city through the destruction of the breeding places of crime.

The situation is particularly serious today because, though we always have had crime, and perhaps always will, we never before have had such youthful criminals. Until recently little official cognizance was taken of this most distressing and alarming fact. A sense of individual responsibility must be felt in order to foster a larger sense of community responsibility.

Many breeding places of crime are licensed amusement resorts open to the thrill-seeking public. Because of the disappearance of the older bonds of conventionality, the youth of today rubs elbows with the criminal. While I am modern enough in thought not to desire

(*Continued on page 121*)

The

Mme. Schumann-Heink, who finds life more enjoyable after fifty.

I AM SIXTY-NINE years old and I am living the happiest years of my life!

I smile when I remember that as a young girl I believed one couldn't know any happiness at fifty. It seemed to me, as it does to the young lady of today, that it was a time to be dreaded for its emptiness and loneliness—a time when shining hopes and ambitions, pleasures and activity were all gone and there were only memories to feed upon—a time when one walked with stiff joints down the hill into the dismalness below.

Then when I realized I was not enjoying my youth, there would be a stab in my heart. "Ach," I thought to myself, "it is no use. Your life was not made to be a happy one. If you are not getting any fun from life now, surely yo cannot expect it at the decrepit age of fift Didn't even the poets and writers deplore th tragedy of age?"

But now that I look back upon the lon rough road behind, I say it not only for my self, but for women in general, that the hap piest years of life are those after fifty. An this is true even of the one who has had mor advantages than pleasures in youth than I had Take it from Mother Schumann-Heink tha youth is not as happy and as enchanted period of life as the poets and writers woul have us believe. In reality it is more a tim of many painful experiences.

FOR example, the youn haven't sense enough to value the advice o their elders or to be guided by it. They ar certain that they know everything. Even m grandchildren inform me that I know nothin about life. Ach, how time flies! It was onl yesterday that my own children were tellin me: "Mother these things may have bee true in the last century, but you don't know anything about today!"

And in another fifteen years my great grandchildren will also be imparting this wis dom to me. That is youth. It won't believe that since you have already lived your life yo can help it to choose the better way. No. i must learn for itself. So it is continually mak ing mistakes and bumping its nose.

And the things that particularly worry th young girl! There is no end to them. She worries about her looks and her figure. She worries about her love affairs and whether she is going to get married. It takes a mere word to cause her a heartache. The least little dis appointment sends her into deep despair. Ach I can recall now the salty tears I shed because someone criticized me. And how black life was because I could not go to a dance.

The young do not know the things that bring true happiness. They dash after pleasure and good times only to become bored and dissatisfied. They want to grab everything from life that they can. They haven't learned as yet that it is only in giving that one finds happiness and satisfaction.

The young have wonderful ideals; far too wonderful for this world. Consequently they suffer from bitter disillusionment. They see that the world isn't a perfect place; that glowing success isn't so easily obtained or that the career isn't what they are fitted for. The sweetheart days are brief. Ach, so brief! It does not take long before the young girl finds out that marriage does not contain

Happiest Years

Lillian G. Glenn

By Mme. Ernestine Schumann-Heink

as told to Lillian G. Glenn

"Joy comes to us after we reach fifty. Youth is not as happy as poets and writers would have us believe."

all bliss and romance and that her mate is far from a Prince Charming. There are difficult adjustments to make; bills to worry about and sleepless, troublesome nights when the babies arrive.

And so as the years pile up, the woman finds that there are many problems to encounter and troubles to shoulder. She worries about her children and frets about losing her youth. The appearance of a wrinkle or a grey hair sends a chill to her heart. Then she begins those tiring efforts to preserve her beauty and youth. Fortunately for me I never had to worry about losing my looks. My face and my figure were such that I knew from my early days they were hopeless to bother about. And so I could devote all my time and energy to my children and my career. God knows I needed ever bit of energy I had, for the years were full of hardships and struggles. But, as you know, a woman need not have eight children and a career to make her back bend. Even if she is a millionaire's wife there will be things to scar her soul.

GRADUALLY, though, the pace is less feverish and the emotional turmoil dies down. The years of fifty have come and it is the beginning of a delectable life. That is, if you are sensible enough to accept your age. The trouble is that the average woman starts to act foolishly. She spends the precious time in which she could be enjoying life in frantically pursuing youth. She goes to the beauty parlors to be massaged and to sit in reducing cabinets. She pinches her feet in tight shoes. She starves herself to be thin and tries to imitate the young. And what does she get for her pains and her efforts? Does she get youth? Does she win happiness? No, she only succeeds in making a thin, nervous, undernourished spectacle of herself. On the other hand, if she would serenely and optimistically face her age, she would find not only that life isn't over for her, but that new joys and pleasures await her. The years after fifty can be a woman's happiest.

For the first time in life you can sit back and relax. And believe me, it is a marvelous feeling. Your children are out of the house and your responsibilities and tasks are ended. If you are not ashamed of your age, you can stop the foolish dieting and exercising to keep slender and begin to eat a more substantial meal. You can dress for comfort. The dress that I am wearing right now is eight years old. That is a fact! It is wonderful not to waste your time and money in shopping, shopping, shopping, and to free yourself from the tyranny of style. Furthermore, you are free to do as you please and go where you want without wondering what your family and your friends will say about you. No one takes Grandma to task.

YOU find, too, that your whole outlook upon life has gradually changed. You aren't afflicted by needless fears and anxieties because you have learned that in the course of time things will right themselves. You take each day as it comes and you do your best with it and do not worry about tomorrow. You are through with experiments and trials. You know the good from the bad and the bad from the good; you have knowledge of life and your values are clearer. After you have struggled and suffered and collected some wisdom, you build up a philosophy that makes the years after fifty seem sweet. You would not want to give it up for anything. Not even for the shining freshness of youth which is still blindly bumping its nose. No, not Mother Schumann-Heink.

You see, the truth of the matter is that you do not begin to go down hill after fifty. You merely take a turn in the road and walk along one that is smoother and greener and without any dangers or risks. Of course you cannot run or dance as you did in your youth, but then, you have no desire to do it either. You are quite content to choose the shady path and to make your way more leisurely. But don't think for a moment that this path holds no interests and excitements for you. Ach, there are many of them if your mind is on the present and not the past.

So long as you do not attempt to imitate the things that the young do, you do not feel old. I know that many people are frankly surprised that my step is youthful, my spirits gay and my mind keen. But why shouldn't they be? If you look at life with a bright eye, if you do work you love and that keeps you planning for the future so that you forget the years, and if, most important of all, you have faith in the Father, you will remain young and buoyant until the final curtain is rung down.

Of course, if you have dissipated your vitality in your early years, and wasted your energy on parties and foolish amusements so that your health is failing, it will not be easy for you to maintain youthfulness and vivacity. For the physical condition of the body will react negatively on the mind and will destroy your spirit. The wise woman who is approaching the fifties will realize that she cannot keep up the pace of youth without having it take its toll from her health. She has to give heed to the changes of Nature and take care of herself. She has to eat the proper foods and see to it that she gets sufficient hours of sleep.

I have been following a common sense living regime for many years and that is the reason why I not only possess my voice today, but great vitality as well. It means nothing for me to travel several times a year from California to New York and back, to sing on the operatic and concert stage, to sing at the NBC studios, study my music, make victrola records, answer my mail, play with my newest great-grandchild and direct my household affairs.

ONE of the reasons why people think the body and mind must deteriorate is that they remember how their mothers and grandmothers tottered around feebly and helplessly. So they think it must be a matter of course with them. It is this belief which makes them dread age. We must realize, though, that our mothers and grandmothers did not know anything about the laws of health and hygiene; that they did not have any opportunities to do work which would keep their minds alert. These poor women had to sit by the fireside with folded hands waiting to be released from their empty lives. Naturally, mentally and physically they began to vegetate so that by fifty or sixty they were useless.

But we are living in a different age—one that gives women a chance to lead not only a healthy life, but an active one even when they are great-grandmothers. They should appreciate this opportunity and make the most of it. Let me tell you that I go on my knees every night and thank God I can still work and give a little sunshine to others. What especially touches me these days is that I am now able, through the Radio, to sing to vast numbers of people who could not afford to hear me at the concerts and opera. I am a daughter of plain people and I like to sing to plain people. Ach, I know how they need music in their lives. They and the wounded soldier boys whom I never forget. In times of despondency and grief, music always gave me deep comfort. That is why I am grateful to be living in this age of Radio so that I can be one of those to bring cheer to its wide audience.

Another ambition of mine that I will realize this year, is teaching and coaching forty young promising singers. I have long wanted to do something for the young singers of America—to give them something of what I have learned through fifty years of hard work and experience. There are many difficulties in the way of young singers who want to make a success of their profession. I want to make it a little easier for a few who have real talent. I want to use the years that I have in helping them.

However, a woman does not need a voice or talent to make herself useful. If I could not sing, I would find plenty to do. For example, I would teach young girls how to cook. Yes, I mean it! So many marriages are failures today simply because wives don't know how to make a meal. One can't thrive on delicatessen and restaurant food. What is more, if you give a man good home cooking, he will not want to stray from his hearthplace. As for the wife herself, she will not be so restless and irritable. It will mean more happiness for her if she will learn how to cook rather than to play bridge or golf.

There are many other things a woman can do if she only has the desire. Certainly the greatest joy in life comes from being useful, not only to your dear ones, but to the community at large. On every hand there is work to be done. Political clubs, social service organizations, community centers and women's leagues of every type, which have worthy ideals, will eagerly welcome the woman who not only has the leisure, but to whom the years have brought judgement and understanding.

You see, there are blessed years of living after fifty—blessed in every sense of the word. A glorious life is in your hands provided you do not stand with your eyes on the past. If the choice were offered me, I would want to have more years of life today rather than any years of youth. For there is little that youth has to offer which can equal the freedom, the happiness and the serenity of age.

* * *

Mme. Schumann-Heink started her illustrious career more than fifty years ago in a little town in Austria. Her father was a Bohemian and a poorly paid officer in the army and her mother was an Italian. The parents had an exceedingly hard struggle to clothe and feed their large brood of children. When Ernestine was twelve years old she was sent to the Urseline Convent at Prague and it was there that a nun discovered her remarkable voice. She allowed the child to sing at mass and everyone was overwhelmed by the beauty of her voice.

A YEAR after that Mariette Le Clair, the great French prima donna, happened to visit the convent. When mass was over Mme. Le Claire sought Ernestine out and told her that her voice could develop into a great contralto. She offered to give her lessons for nothing if she could come to Gratz, where she lived.

Ernestine wrote to her father and at first he refused permission. He did not want his daughter to go on the stage. But she managed to secure his consent and a well-to-do army officer provided her with some funds. She made a successful concert debut in Gratz and then went to Dresden to study under Franz M. Wuellner. It was not long before she made her operatic debut as 'Azucena' in "Il Trovatore" at the Dresden Opera. She was there about three years when she married. A year later, when her first child was born, she lost her position at the Opera House. Those years were very hard ones for the singer. She could not always procure en-

Learn About Matrimony From

BILLIE BURKE

Fifteen years ago this famous and captivating star married Florenz Ziegfeld, creator of the Follies and one of the most sought-after men in the country. Broadway predicted the romance would not last. But it did!

How she made her marriage a happy one is revealed in an interview with Miss Burke on

Making the Most of Matrimony

DECEMBER RADIO DIGEST

A RADIO COLUMN

By HEYWOOD BROUN

In which the famous columnist and candidate for Congress broadcasts intermittently over the Columbia network, discusses Bright Boys, Doctors and the Kitten that Came Back.

GOOD evening. I remember when I was in school we voted just before graduation about each other— You know . . . the handsomest and the best dressed and the brightest pupil and so on. I didn't get any votes in any of those three classes. Nobody seemed to know that I was running for "handsomest".

But I did get elected in two things. I was voted the best all round—that didn't mean the most globular. At that time I was tall and slim—fairly tall, about six feet two. I was only seventeen and I hadn't got my growth yet. I had begun to smoke cigarettes the year before. I don't believe I weighed more than a hundred and ninety pounds in those days. But I was the centre on the football team and the centre on the basketball team and the editor of the Horace Mann monthly. That was the year the February issue didn't come out till June.

I GOT voted the best all round and the laziest and only one of those has worked out true to any extent. You can't tell so far in advance. If Mr. Edison were a betting man I'd like to make him a wager about his recent competitive exam to find the brightest boy. At the end of twenty years I'll bet the boy who comes forty-ninth in the test is of more real use to the world than the one who finishes first. Questionnaires are like that. People who do terribly well in examinations in school and college sort of peter out. It's a little bit like some fighters who look very impressive when they are training and boxing around with sparring partners and then don't do anything at all in the ring—on the night of the big fight. Sporting writers have an expression about a boxer like that—they say, "He left his fight in the gymnasium." It seems to me that some pupils leave their brains in the examination room.

I am not trying to encourage people to flunk all their tests but I get a lot of letters from young men and women, terribly woebegone because they haven't done well in school or college. They are ready to call themselves stupid (I pronounce that stoopid when I am not careful). Some youngsters feel sure they will never succeed at anything just because they didn't get by in Latin or plane geometry. And here's another contributor —I don't know whether it is a man or a woman—suffering from an unfounded discouragement. She says or he says (E.H.B.) —"I am a patient in a sanitarium and there seems to be among us a good deal of scepticism as to whether one is fit for anything worthwhile after being afflicted with tuberculosis. It would be encouraging if you would point out a few of those who have made a success of life after regaining their health."

Now, of course, there are hundreds and thousands of those. The greatest of American playwrights and another man, who seems to me our best short story writer, are both men who came to their great success after winning their fight with tuberculosis.

A very large proportion of Radio letters come from people who are shut-ins, for some reason or other. They make a fine audience because after listening to the night nurse for an hour and a half almost any diversion is welcome. Naturally I mean just some night nurses. There are nurses and nurses and I have known some that I would gladly listen to hour after hour. A few. I remember I had one during the great influenza epidemic of 1918. Maybe she wasn't a regular nurse. Anybody who could fill a hot water bottle was a nurse in those days. While I was convalescing she used to sit by the side of my bed and read to me. But the book she chose was one of my own works. I was never so bored in all my life. Besides she always laughed in the wrong places. And it wasn't supposed to be a funny book. It was a very sad story. And naturally it wasn't a story in which I took much interest, I knew how it came out.

I have never been exactly shut-in but I had a nervous breakdown once that ran along for pretty nearly three years. I could do my work but I didn't get any fun out of it. I used to get very despondent. I wouldn't have given a nickel for my chance of ever going to a speakeasy again. But I did get better. It is very mysterious how people get cured. I believe in doctors. I ought to—I have been to enough of them in my time. They are nice to have around. They can tell you what you have got—or what you haven't got. But mostly people cure themselves . . . and generally quite suddenly. Everybody knows about the crisis in pneumonia and diphtheria and things like that but it's just the same in nervous breakdowns and other ailments that take longer. There is a crisis—a peak—a turning point. You go to bed sick and in the morning you wake up—well. I don't mean that necessarily you can get out and turn handsprings, but you have the feel of being well. You are off the side road and on the main highway at last. And that can happen any morning at all. It could be tomorrow.

I GOT cured in a peculiar way. Anybody can tell I am a neurotic—that is the chief symptom. We all want to get a chance to talk to somebody about our own symptoms. That is really the chief appeal of doctors. They have to listen if you pay them. But it wasn't a doctor who pulled me through the crisis. I was a cardiophobe—that is, a man who thinks he has heart disease.

(Continued on page 110)

Ted Husing in action with his "announcing board"

Ted

Famous Announcer's inside story on the mechanics of broadcasting the big game—Radio Digest's schedule of important games on the air this fall.

"SAY, you bum! Who ever told you you knew anything about football? I heard you broadcast during the ——— game, and you hardly even mentioned ——— and the great work done by ———, but continually talked about the wonderful playing of ———. Of course, everybody knows you favor ——— over any team they happen to be playing, and that ——— is your little tin god. How much are you getting out of it?"

There, ladies and gentlemen, is a sample of a letter that I received from an irate football fan following the broadcast of a certain football game two years ago, with the names of the teams and players mentioned deleted by myself. Isn't it sweet?

I might add that the letter isn't reproduced exactly as written. There is a law of the land which forbids the sending of offensive reading matter through the mails, and this little *billet doux*, which was signed with a fictitious name anyway, had to be slightly expurgated.

Well, that's just part of the lot of a sports announcer, or a sports reporter for a newspaper for that matter. I'm proud to say that I don't get many letters like that, but anyway I've long since stopped worrying about them when I do. The term "fan," I understand, is an abbreviation of "fanatic," and no fan is as blindly and unreasonably and unbelievably partisan as the football fan. The first whiff of smoke from burning leaves in the fall affects the average American citizen like a shot of dope. Everybody talks, eats and sleeps football between the first of October and the last of November. Everyone, in fact, becomes a self-appointed expert, and honestly feels that nobody knows as much about the game as he does.

And that's all right. It's what makes football the thrilling and intoxicating thing that it is. I can't rail at the public for their enthusiasm, because football affects me in the same way.

But it is because football fans are so rabid, and as I said before, at times so unreasonably partisan, that I do my level best to make every report of a football game an accurate one. I may get excited—as who wouldn't when somebody rips off eight yards through the line, or flits eighty yards through a broken field—but if I can tell listeners exactly what is going on during every minute of the game, I firmly believe that I am pleasing the majority of listeners most of the time.

Now, by accurate broadcasting I mean describing in detail every play, as it takes place. That means telling when and how the teams line up; the formation of the backfield; any shifts in the formation that might take place; the name of the player who receives the ball from the center; when and how he runs with it, or whom he passes it to; who tackles him; how many yards he makes or loses; the location of the ball on the field at the completion of the play; what down it is, and how many yards to go for first down.

That doesn't sound so difficult, does it? I know the answer is that it doesn't, and I would wager that the readers, if any, of this article, would swap a right arm and maybe a leg or two for the job of announcing football games over the air, and would feel perfectly certain that they could do it without any trouble. Well, they couldn't!

"Ha! That fellow Husing certainly has a high opinion of himself," I am sure everyone will remark after that last statement. But let me explain myself a little further. I maintain that no one could give an accurate play-by-play description of a football game all by himself. I know that I couldn't. It's an impossibility without the aid of an expert observer and operators.

I HAVE the same "team" working with me right through the season. In fact, some of our most important work is done long before the season starts. My observer for the 1930 season, who was a star football player at college, and has had a good deal of coaching experience since his graduation, certainly knows football. But just knowing football isn't enough. He has to know enough about the style of play and general ability of the individual players, especially backfield men, of the teams on our broadcasting schedule to know what to expect of them—to be able, almost, to anticipate what they do before they do it. He has been busy since late in the summer learning about these players, and if possible

Husing Tells How He Broadcasts Football

visiting with the teams at their training camps.

The observer's job is perhaps the most trying and exacting of all. Of course, I endeavor beforehand, to familiarize myself with the players' appearances, and as far as possible memorize their numbers. But when I'm chattering away at perhaps a rate of 250 words a minute, I can't stop to think whether No. 6 who carried the ball is Smith, and No. 11 who tackled him is Jones. I must depend absolutely on my observer for those details—details which offhand seen unimportant, but to me mean the difference between a good and a bad broadcast. I feel that anyone interested enough to listen in on the game in the first place is familiar with the players and their particular style of play beforehand. He hears the announcer say, "Now the ball is on the seven-yard line. It's last down and goal to go. No. 6 is going back to take the pass from center. The ball is passed, etc., etc.

NOW there you have an exciting moment in the game. Seven yards to go for touchdown! If the listener is at all familiar with the teams and players, he wants to know who is going to receive that pass from center. If the announcer says that Smith is going back to receive it, he probably knows that Smith is noted for his line plunging ability, and that he is going to make a desperate attempt to smash his way through for the touchdown. On the other hand, if the announcer says that Zilch is going back he immediately thinks, "Aha! Zilch is a sharpshooter on forward passes. He's going to try one over the goal line." In other words, in order that the listener may really visualize what is being described, the announcer must give him every detail of the play—before it happens, not after.

The old system of keeping the announcer informed on details of the game called for two extra observers, usually an incapacitated member of each team, who knew by sight the members of their respective squads. As the play got under way one or the other would call out the name of the player to the regular observer. He in turn would whisper it into the ear of the announcer. That system was bad for several reasons. In the first place the extra observers were very apt to get excited during a close play, and either yell out the wrong name or forget to say anything at all. Even if that didn't happen it was annoying for the announcer to have the observer constantly whispering something in his ear, especially when, as was frequently the case, the announcer knew who was carrying the ball or making the tackle anyway. In any case the whispering disturbed his train of thought, and made it almost impossible to talk uninterruptedly.

We have a new system now, which I devised myself, and which was worked very successfully last year. For want of a better name I call it the announcer's announcing board. It consists of a small board with red lights running down one side and green lights down the other. Alongside each light is a small card carrying the name of each backfield man—red for one side and green for the other. This board is attached by wires to another board in front of my observer.

They pack 'em in at the Yale bowl on the day of the big Army - Yale game. © Ewing Galloway

Grant P. Ward, new WLW announcer

with cards bearing corresponding names alongside buttons instead of lights. The observer has a pair of specially made field glasses with which he watches every play. Here is a sample of the way it works.

". . . The teams are lining up now, and Harvard has the ball on Yale's twenty-five yard line. It is third down and still eight yards to go for first down. There's a man going back now. It's (red flash alongside Smith's name) Smith and he starts toward right end. But suddenly he stops, wheels, and makes a lateral pass to (red flash) Brown. Brown takes the pass, but instead of running with it he hesitates a moment and then makes a long toss to (red flash) Green, who has cut over and is heading down the side toward the Yale goal. There's a Yale man covering him. It's (green flash) Jones. Jones leaps for the ball. He's got it! The tables have been turned now, and Jones is twisting and dodging up that side line. He's gotten past two men and has reached his own thirty yard line. He's gotten past another one, but now he's been forced outside about on his own thirty-five yard line as he is tackled hard and cleanly by (red flash) White."

THAT is just a sample, and maybe not a very adequate one. But I hope it gives you some idea of how the system is worked. There is no delay, and scarcely any hesitation, in giving the listener a picture of what is going on, when it is going on. That is, there is no hesitation or delay with a trained observer, and I want to say a bit more on that subject. If that rather feeble illustration of mine gives you some idea of how valuable, how absolutely indispensable, my observer is to me, then I feel that I have accomplished something. The observer, and the operators of whom I will speak later, are the men behind the man behind the gun. They are, figuratively speaking, the interference that takes out the opposing tacklers so that the man carrying the ball can romp to touchdowns and glory. Besides the signalling device that I have just described the observer has another board, with a gridiron charted out on it, upon which he manipulates colored-headed pins to show the position of the ball on the playing field, what down it is, and how many yards to go for first down.

The task of the operators, who complete our football broadcasting "team," includes the preliminary work of installing the broadcasting equipment, arranging for the positions of the microphones, etc. We usually use four microphones beside the one into which I talk. These pick-up mikes are placed in front of the rival cheering sections and bands, and it is upon the operators whom I must depend for most of the color and sound effects, as well as for the proper transmission of my voice over the air. They must be prepared at any time to switch the pick-up mikes on or off for the sounds of cheering or singing, and must know how to regulate them so that "color" will come in loudly enough to be distinct but not so loud as to drown out my voice. These mikes are numbered, and we have a system of hand signals so that when I say, "——the injured man is leaving the game, and is being assisted from the field——the Stanford cheering section has risen as one man and is giving him a tremendous hand," I hold up three fingers, and the operator switches on No. 3 microphone in front of the Stanford cheering section. With other movements of my hand I can signal him to fade it out or bring it up full.

Broadcasting a football game is about ninety percent plain, ordinary hard work. I am frequently asked whether I enjoy the games that I broadcast, and my answer is that I enjoy the broadcasting but not the game. I often can't remember most of the details of a game, and occasionally friends will compliment me on the way I described a certain play that I have no recollection of ever having seen.

And our work is not ended with the final shrill blast of the referee's whistle. Before we have a chance to relax and forget what has happened, we repair to our hotel and hold a little informal meeting, where each of us has the opportunity to tell the others how good or bad they were. I am no longer the leader of our little "team" when we assemble at these meetings. Everyone is on a par with the others, and is free to speak his own mind. There is no sparing of feelings as each points out what he believes to have been mistakes on the part of the others. A cue wrongly given, a signal misunderstood, a microphone badly placed—every little wrinkle is smoothed out with the idea of forestalling any recurrences of the incident in future games. Those little meetings aren't always pleasant, but we all leave them with a little better idea of how, or how not, to broadcast a football game.

Coach Fielding H. Yost of Michigan

Football Coaches Make Forecasts Over WLW

ADDED interest is being given several of the games broadcast over station WLW, WOR and WMAQ by the Football Forecasts program every Friday at 6:30 P. M. E. S. T.

Coaches of the Big Ten and Big Three Conferences, including Zuppke of Illinois, Yost of Michigan, Stagg of Chicago, Stevens of Yale, Roper of Princeton, Horween of Harvard, and possibly Rockne of Notre Dame, on the nights before the biggest games of the season are talking to audiences of "Quality Group" stations.

Each man gives his own ideas of the approaching games and talks about the men on his team.

To add to the college atmosphere that is being created, glee clubs, bands, and orchestras from the universities are on hand to furnish the same music that spurs on the teams in the grid struggle.

FIELDING YOST of the University of Michigan was the first coach on the air. On Friday, October 17, less than 24 hours before his eleven met the Ohio State team at Columbus, Yost told about it from the latter city. Hal Totten, veteran sport announcer of station WMAQ, went to Columbus, Ohio, to present Yost to the Radio audience. The Scarlet Mask, dramatic organization of Ohio State, furnished additional entertainment.

Bill Roper, of Princeton University,

faces the microphone on Friday, October 31, in Chicago in advance of the game between his team and the University of Chicago. The Princeton Triangle Club, famous dramatic organization that included Booth Tarkington as a member, will share honors with the glee club of the Chicago school on this forecast.

Bob Zuppke will forecast the prospects of his University of Illinois team against Army on Friday, November 7, in a talk from one of the New York studios used by WLW.

ALONZO STAGG, "The grand old man of football," will forecast the Illinois-Chicago game on November 14 as his big maroon team waits to engage Zuppke's Illini.

Arnold Horween, Harvard football coach, will precede the Yale-Harvard game on November 21. For his broadcast, the microphone probably will be set up at his camp at Haverford, Connecticut.

Final arrangements have not yet been made for the forecast on November 28, although the place tentatively is being held open for Knute Rockne whose Notre Dame team will meet Army the next day. This final broadcast will be in the nature of an all-college celebration, including music for Army and Notre Dame and for other of the Big Ten and Big Three.

For WLW's broadcasts of the Ohio State football games, a new sports announcer will make his appearance on the Radio horizon. He is Grant P. Ward.

RADIO DIGEST'S FOOTBALL BROADCAST SCHEDULE

Here is your ticket to the big football games to be broadcast by the national chains. Keep this for reference.

National Broadcasting Company

GAME	AT	KEY STATION
Saturday, November 1, 1930

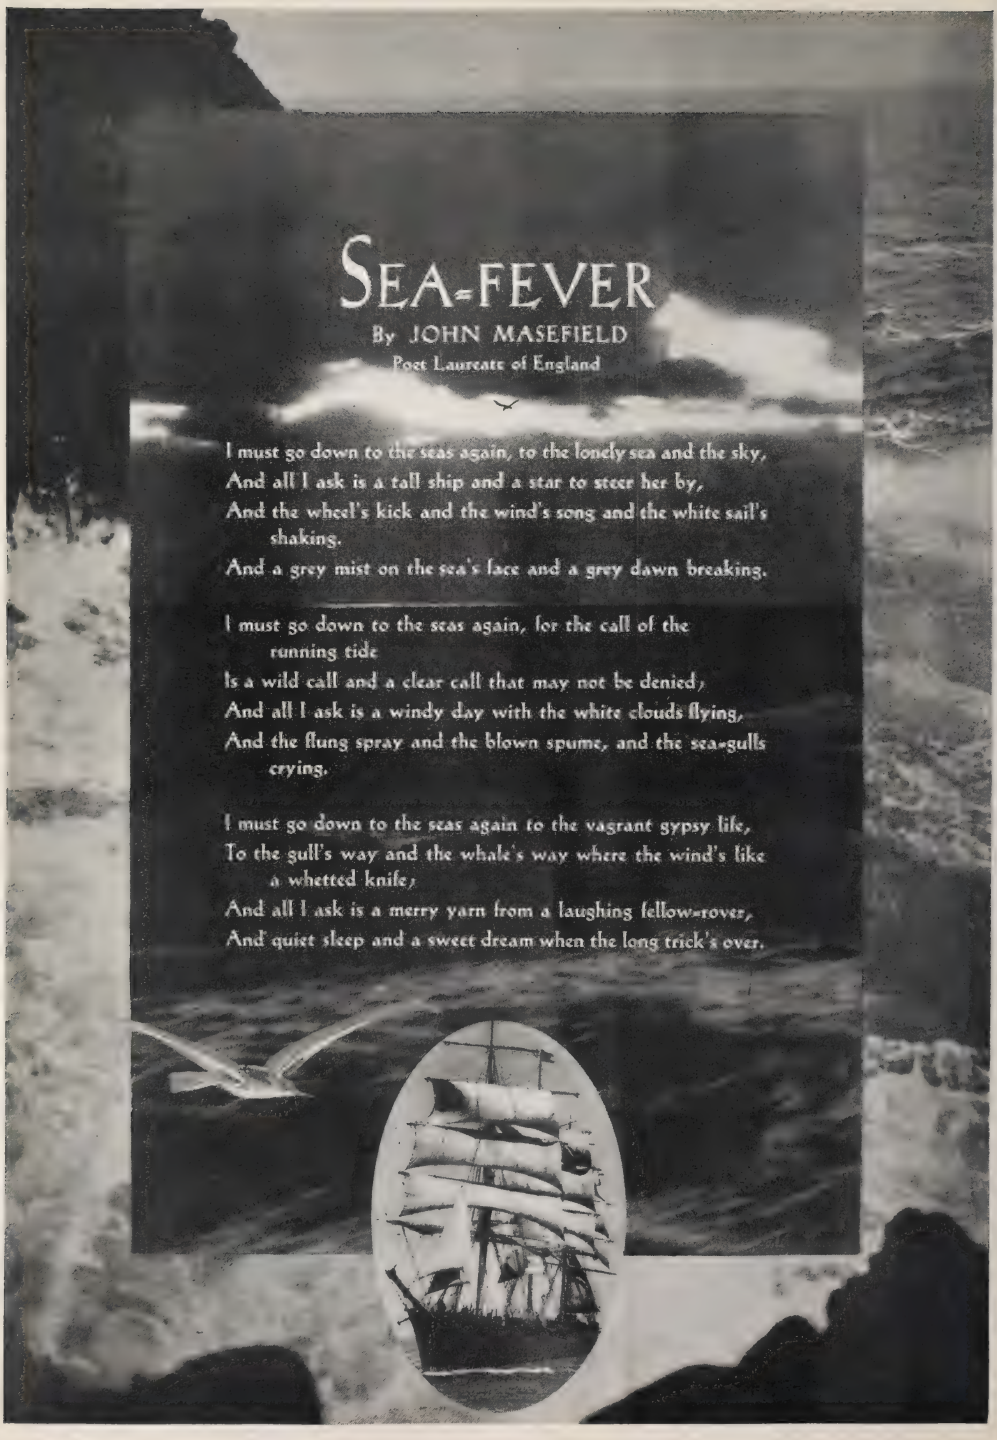
recognized all over the country as one of the greatest students of football in the United States. Although he has been since 1927 a member of the Ohio House of Representatives, Ward abandons his law practice temporarily each fall to visit all the Western Conference football games to get material for the authoritative and interesting articles he writes about gridiron prospects.



FOR ten years Ward was chief scout and assistant football coach at Ohio State University. He loves the game. He is said to have a remarkable faculty for sizing up players and retaining the mental notes he makes on the abilities of all he sees in action or reads about. As a dopester on the outcome of games, he has few peers. In 1920, he forecast correctly the outcome of 60 out of 62 games, and his record in this field for other years is almost equally astounding.

Genial, personable and sincere, he won a most favorable response in 1929 as a broadcaster of games played in the Ohio stadium. Not a showman, but a quick thinking and deeply interested student of the game, he gave the stay-at-home football fans a straight-from-the-shoulder account of the battles he witnessed. So well did he register with fans that a newspaper in Columbus (not the one for which he was writing) devoted nearly a column to praising his skill as a football broadcaster.

Radio critics already are forecasting a great future for Grant P. Ward.

Ted Husing and his "team" of assistants and observers broadcasting a play by play story

SEA-FEVER

By JOHN MASEFIELD

Poet Laureate of England

I must go down to the seas again, to the lonely sea and the sky,
And all I ask is a tall ship and a star to steer her by,
And the wheel's kick and the wind's song and the white sail's shaking.
And a grey mist on the sea's face and a grey dawn breaking.

I must go down to the seas again, for the call of the running tide
Is a wild call and a clear call that may not be denied;
And all I ask is a windy day with the white clouds flying,
And the flung spray and the blown spume, and the sea-gulls crying.

I must go down to the seas again to the vagrant gypsy life,
To the gull's way and the whale's way where the wind's like a whetted knife;
And all I ask is a merry yarn from a laughing fellow-rover,
And quiet sleep and a sweet dream when the long trick's over.

The Poet's FRIEND

Radio is Kinder to Spoken Lyric than the Cold, Silent Typeline, Says Mr. Masefield

By John Masefield
Poet Laureate of England

Speaking on the subject, The Possibilities of Poetry in Modern Life, John Masefield tells Americans in trans-Atlantic broadcast that the modern poet has an advantage in being able to reach the public audibly. He recites his famous poem, Sea Fever, as an illustration. It appears on the opposite page, from John Masefield's Collected Poems, by permission of the publishers, The Macmillan Company. Copyright by the Macmillan Company. The broadcast was conducted by the Columbia Broadcasting System.

FRIENDS—those few whom I have met and those many thousands whom I have not met—through the genius of man, I have an opportunity to speak to you across thousands of miles of stormy water, across the roaring cities and quiet country places, about the possibilities of poetry in modern life.

I am speaking to you in the heart of London, at half past five on a rather overcast September afternoon which is inclined to be wet. To you I suppose it is now very nearly middle day in that far continent.

I speak in a place haunted by poetry and by the possibilities of poetry and the memories of poets. Undoubtedly Chaucer must have been here singing his poetry many times. He married his wife possibly within these precincts. Shakespeare undoubtedly was here. Just down the road Dr. Johnson wrote. Across the road Savage got drunk. It was near here that William Blake, our poet and engraver and inventor and mystic, lived and died. Tennyson used to frequent a tavern almost within sight. Turner, our great landscape painter, was born just across the road and passed his childhood here. It was here that Lord Byron used to box with the champion boxer of England, and the champion boxer of England was quite a good water color painter.

In more recent times, there were Yates and Francis Thompson who sold matches in the street within a few yards of this building; and James Thompson sold his articles for what they would fetch and then bought Irish whiskey.

Then, quite close to this place, Charles Dickens, as a little and unhappy boy, rinsed wine bottles for some unhappy months. The whole district is peopled with the ghosts of great writers. However, we are not conscious of those ghosts at the present time. We are only conscious of two young friends who keep telling me that if I sneeze fifty thousand people will be immediately deafened. I will try not to sneeze.

But I am here tonight to speak to you about the possibility of poetry in modern life. Perhaps I had better define poetry. Poetry is an art in which the artist by means of rhythm and great sincerity can convey to others the sentiment which he feels about life. As Wordsworth said, poetry is the overflow of powerful feelings. Wherever such feelings exist, they will come out of the hearts of human beings. Another has very well said that poetry should be a friend to soothe the tears and lift the heart of man.

But poetry is infinitely various, and this generation, through various contrivances and discoveries of man, should produce an infinitely greater variety of poetry than any generation of man which has existed upon this planet before.

In times past, poetry was the delight of every member of the community. The community was small, very simple, and all ranks and classes of men met together in the King's Palace in the great living room or in the market place or at the athletic gatherings, and the poet sang or spoke to all and was listened to with rapture by all

OF COURSE, that became more complex later. There were more living rooms in the King's Palace, and the poet no longer addressed the whole community.

Then there came the printing press which at first was thought to be of great benefit to poets. I think that it has become a detriment to the poetical art though priceless as a distributor of knowledge and a preserver of knowledge.

It has had this result—that it has put away the poet from his public. Formerly the poet met his public face to face. But when the poet was kept away from his public and wrote his poems in secret, his

work was then handed to some other man who printed it, and the man who printed it handed it to someone else who sold it. And so the man who bought it might not be at all suited to it. He might not understand the poet, he might not care about the poet, and he might particularly want the poet to be there and get his meaning by the inflections of his voice and the passionate energy of his soul.

SINCE the printing press came, poetry has ceased to delight the whole community of man; it has become the amusement and delight of a limited few. People have given up listening to poetry. The poetical play has almost been banished from the stage throughout the world. The minstrel has ceased to be. He no longer goes about singing, chanting his verse. And, though a good deal of poetry is written and read, no one could pretend that it is one of the delights of life or that it can compete with the boxing match or the cinema or traveling fast in a motor car.

I speak to you this afternoon in the hope that poetry will again become one of the main delights of life and really compete once again with the other delights of the market place. It may be that broadcasting may make listening to poetry a pleasure again, though this can only come about with difficulty and with a great deal of hard work because I feel that poets will work better at verse if they work before an audience whom they can see so that they may know when their work fails and why.

Before I stop my speech this afternoon, I was asked to read to you some of my verses, but before I do that, let me thank you for the way in which you have listened to me. You have given me the impression that all my audience has been listening to me breathlessly.

Let me say this about the possibilities of poetry in modern life—that we over here look to America to produce poets greater than any yet Europe has known.

. . . .

The poet concluded by reading Sea Fever.

With a few exceptions, great poets have had lowly beginnings, and John Masefield, recently crowned Poet Laureate of England, is not among the exceptions.

At the age of fourteen he went to sea on the training ship, "Conway," and there is no doubt that the tang of the sea which pervades his poems had been preserved since this youthful experience.

At the tender age of seventeen he struck New York Harbor. Here he roomed with an Irishman, Quinn by name. It is not known if the traditional fare of poets—dried herring (and beer?—hush) was the steady diet of the budding poet, but the menu must have been slender and meagre. The divine spark, however, reached out for food and was fed plenteously for the youth knew his wants.

John Masefield, Poet Laureate of England and Mrs. Masefield.

Then came one of life's grand moments—an opportunity to earn the munificent sum of One Actual Dollar and Five Cents per day. The job was in a rug factory in Yonkers, a city famous by reflection—the grandeur of New York graciously allowing its shadows to fall on all towns skirting its edges.

"I went to Yonkers," said Mr. Masefield, in an interview several years ago, "and worked that day in a factory. At first I worked with a tin opener, a little instrument like a fork without tines, to keep straight the tin tubes on the spools of wool from which the carpets were woven. If this were not done, the carpets were irregular. I used to do forty sets a day for forty carpets. Then I got a raise and gradually my salary crept up to $8.50 a week.

"THEN I was mistake finder. I used to take a new carpet and compare it with the pattern for faults of setting or design."

One can picture Mr. Masefield earnestly going about his work in this factory with busy hands—the while catching bright visions here and there and tucking them away in the folds of his mind.

Friday was pay day for "Macy," as he was familiarly called. Dickens once said that his greatest thrill was buying a brand new outfit of clothes at one time—suit, shoes, hat—(even collar buttons—or their primitive ancestors).

But Masefield's greatest joy was to drop in at the William Palmer East Book Shop and buy volumes of poetry.

One likes to imagine young Masefield in this dusty bookshop (that is, it should be dusty to make the setting just right) fingering tenderly the pages of great works, communing here with Shelley on

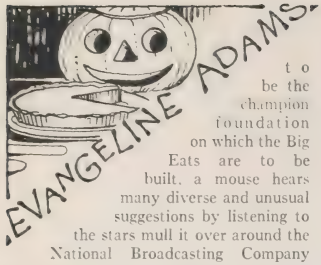
Turkey Day in STUDIOLAND

By

Evans E. Plummer

THANKSGIVING DAY, in the United States, a day, usually the last Thursday in November, set apart as an annual festival of thanksgiving for the year's blessings."—Standard Dictionary.

How'd you like to have a Radio Thanksgiving this year, my listeners, and celebrate it the way your favorite air celebrities are planning to do? Of course, 1930's general conditions may not have been so inspiring to many to give thanks, but yet it could be worse.



At least we have had a banner Radio program year to be thankful for, and the featured mike entertainers themselves are grateful for the talents they have been given and for the remunerative pinnacles to which Radio has raised them.

The stars are truly glad you like them, and just by way of showing their thanks to you, they have told me all their favorite dishes and recipes for Thanksgiving delicacies just so that I could tell you. Now let's all get busy and plan a big Radio Thanksgiving dinner a la mikesters' formulas, and by way of helping unfortunates to be thankful too, we'll invite to the fest all of our friends to whom the bugaboo Unemployment has been unkind.

Your loud speaker favorites, who in these B. T. (before television) days don't really have to diet but do so anyway, will for the most part toss their caloric calculations aside for a day. The day, of course, is Thanksgiving and the reason is that turkey, after grace has been said and pumpkin pie eaten, is still turkey, and anyway, what is the use of dieting all of the time if you can't break out of bounds every once in a while and add a few pounds so that you can start in dieting again?

It was Johnny (G. W.) Johnstone, boss glorifier for the NBC system—who incidentally has never been known to diet and looks it—that observed that things aren't any different in the Radio studios from other segments of American family life as the time for slicing the white meat approaches. The relative merits of chestnut stuffing as compared to oysters or onions and nutmeats, are roundly debated out of hearing of Mike and recipes for the tempting side dishes are swapped right and left.

While the run-of-mine, never-to-gobble-again, roast turkey is generally conceded

to be the champion foundation on which the Big Eats are to be built, a mouse hears many diverse and unusual suggestions by listening to the stars mull it over around the National Broadcasting Company and Columbia Broadcasting System key studios.

Shhh! Here comes Countess Olga Albani, one of NBC's most charming sopranos, whose excellent cooking is excelled only by her beauty of voice, face and figure. She has a new way of cooking turkey which I understand she picked up in France. Let's ask her about it.

"Take a turkey," (and who wouldn't?) said the Countess, "and put it into saucepan on a bed made of strips of fat bacon, sweet herbs, onions, carrots, thyme, bay leaf, salt and pepper, nutmeg and spices.

"Then blanket the bird with the same conglomeration," she continued. "Cover the pan tightly and let it cook for three or four hours. Then take it from the pan when cooked and remove the bay leaves and herbs, strain the liquor through a fine sieve, and serve, pouring this gravy over the turkey."

"Umm, umm, ain't dat sumpin'," I managed to get out through the moist lips of my watering mouth. "What do you call it?"

"It's name is 'Turkey en Daube'" the Countess replied, "and next day when it is cold this gravy becomes a thick, delicious jelly."

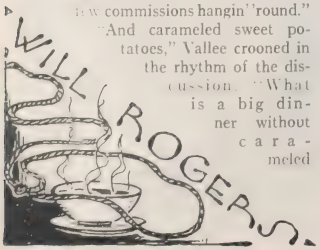
AT THIS point we were interrupted by Will Rogers, who came walking into the group arm in arm with a chap named Rudy Vallee—imagine that!

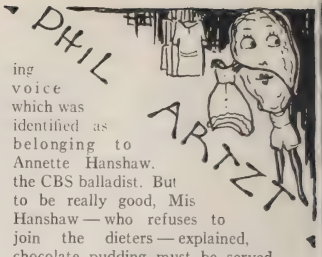
"Wall, I reckon," drawled the miking, writing, screening, acting and gum-chewing cowpuncher-at-large, "that no meal is jest what it ought to be 'nless you have at least one big, steamin' bowl of real high-seasoned chili con carne present. Even Thanksgivin' without that thar chili would be as strange and lonesome to me as Hoover would be without a few commissions hangin' 'round."

"And carameled sweet potatoes," Vallee crooned in the rhythm of the discussion. "What is a big dinner without carameled sweets. Down in Westbrooke, Maine, we used to put a cup of brown sugar and a half a cup of butter in an iron saucepan with just enough Sherry wine (address not supplied by Rudy) to dissolve the sugar. Then we'd add the mess of peeled sweet potatoes cut in half lengthwise, after covering and cooking them slowly for one hour, and turning them often so that all sides would be carameled, yum, yum!"

Rudy probably meant, "yam, yam," but before I could correct the extremely popular batoneer, along came Fiddler Toscha Seidel, the CBS violinist.

"You may talk all you want to about





Will Rogers, all set for that big, steamin' bowl of chile con carne.

turkey and its trimmings," Toscha cut in, "but as for me, I prefer the sweetmeats at the end. There are four I like so well that I can't decide which one I like best. There's baked Alaska, crepe suzette, hot apple pie with a generous portion of creamy American cheese, and pistachio ice cream.

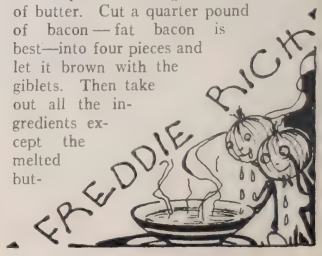
"You seldom see any crepe suzette except abroad or on one of the liners that ply between here and France," the wielder of the bow continued. "It's a pancake made very thin and rolled. It is served with a coating of sauce of an insidious orange flavor and a fluffy coating of powdered sugar. Baked Alaska is a paradox in sweets, for it is all hot and cold at the same time. I like nothing better than to see this steaming confection coming to the dinner table, and then to break unrighteously into the crust and extract the ice-cold cream."

"And chocolate pudding," was the dessert addition suggested in a "blues" singing voice which was identified as belonging to Annette Hanshaw, the CBS balladist. But to be really good, Mis Hanshaw — who refuses to join the dieters — explained, chocolate pudding must be served with copious gobs and daubs of whipped cream.

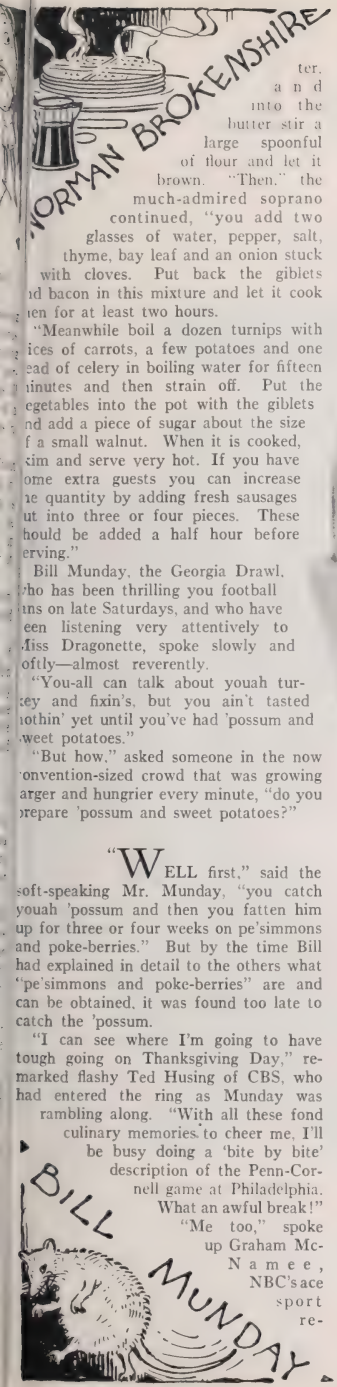
Darkness fell strangely on the growing group of Radio worshippers of Epicurus. With only the thunder and lightning missing, the general atmosphere portended rain. But someone was all wet; it was only the arrival of a blackface pair known as Amos 'n' Andy.

"Ah doan' know much 'bout cookin'," Amos Jones chimed in. "but I do know sumpin' dat is been. Dis here Thanksgibin we ain't gonna do no moah eatin' up at de house ub de poah sister ub Madame Queen. No sah!"

"And," quoth Andrew Brown, president ub de company, "Check and double check!"



As a matter of fact and not script, it developed, Messrs. Correll and Gosden are planning a pleasant little joint family dinner together on November 27 in one of their twin and adjoining cooperative apartment homes up on Sheridan Road in Chicago.



THEN Jessica Dragonette, the economical as well as pretty prima donna of NBC's Cities Service concert, contributed a suggestion for the day after Thanksgiving.

"Hash," declared Miss Dragonette, "will be just as inevitable on November 28 as a crush at the exchange counter of a department store on December 26. But there's something better than hash. The French call it 'abatis de dinde'."

The petite Jessica is of French extraction and knows. But please pardon the interruption.

"You take the giblets of the turkey, being careful to singe the wings and crush the legs, and throw them (easily) into a saucepan containing two ounces of butter. Cut a quarter pound of bacon — fat bacon is best—into four pieces and let it brown with the giblets. Then take out all the ingredients except the melted but-

ter, and into the butter stir a large spoonful of flour and let it brown. "Then," the much-admired soprano continued, "you add two glasses of water, pepper, salt, thyme, bay leaf and an onion stuck with cloves. Put back the giblets nd bacon in this mixture and let it cook ien for at least two hours.

"Meanwhile boil a dozen turnips with ices of carrots, a few potatoes and one ead of celery in boiling water for fifteen ninutes and then strain off. Put the egetables into the pot with the giblets nd add a piece of sugar about the size f a small walnut. When it is cooked, xim and serve very hot. If you have ome extra guests you can increase ie quantity by adding fresh sausages ut into three or four pieces. These hould be added a half hour before erving."

Bill Munday, the Georgia Drawl, who has been thrilling you football ans on late Saturdays, and who have een listening very attentively to Miss Dragonette, spoke slowly and oftly—almost reverently.

"You-all can talk about youah tur-ey and fixin's, but you ain't tasted othin' yet until you've had 'possum and weet potatoes."

"But how," asked someone in the now onvention-sized crowd that was growing arger and hungrier every minute, "do you repare 'possum and sweet potatoes?"

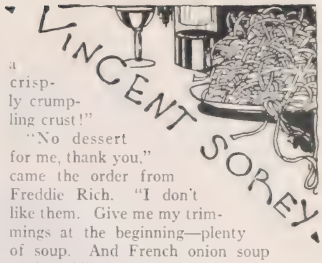
"WELL first," said the soft-speaking Mr. Munday, "you catch youah 'possum and then you fatten him up for three or four weeks on pe'simmons and poke-berries." But by the time Bill had explained in detail to the others what "pe'simmons and poke-berries" are and can be obtained, it was found too late to catch the 'possum.

"I can see where I'm going to have tough going on Thanksgiving Day," remarked flashy Ted Husing of CBS, who had entered the ring as Munday was rambling along. "With all these fond culinary memories to cheer me, I'll be busy doing a 'bite by bite' description of the Penn-Cornell game at Philadelphia. What an awful break!"

"Me too," spoke up Graham McNamee, NBC's ace sport reporter, who had just arrived from his weekly task of synchronizing his voice with a news film release. "I'm chalked up for the same tilt, but I think I'll take along a box lunch of turkey legs and cranberry sauce to nibble between the halves.. And purée of chestnuts—

"Say, people usually think of chestnuts as a stuffing for the turk," McNamee continued, "but they make a great side dish, and I don't know of anything I like better than a purée of chestnuts.

"As well as I can remember," he explained, "you soak the chestnuts in water overnight and then boil them in salt water. You can add an onion or two while they



Bill Munday's mouth is jess a-waterin' for that 'possum in the corner.

are cooking, and then when they are quite soft, press them through a large colander or sieve. You put the whole thing into a saucepan with a lump of fresh butter, stir in a cupful of milk, warm, and there you are."

The gathering was growing so large that it was decided to adjourn to one of the larger studios not then in use. Howard Barlow, Evangeline Adams, Norman Brokenshire, Vincent Sorey, Nell Vinick, Nat Brusiloff, David Ross, Joe and Vi and Freddie Rich had appeared at the end of CBS rehearsals and were bound to speak their pieces on the extremely interesting subject—to us all—of food.

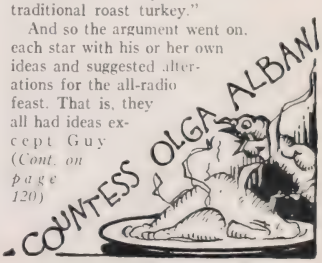
"The meal should end with the salad course," said Astrologer Adams, "But I can see by the stars in the heaven above that I was born under a constellation that cannot, on Thanksgiving Day, forego the pleasure of luscious pumpkin pie with a crisply crumpling crust!"

"No dessert for me, thank you," came the order from Freddie Rich. "I don't like them. Give me my trimmings at the beginning—plenty of soup. And French onion soup preferred."

"Please pass me the waffles, a couple of chickens cooked rarely, and about eight or ten good-sized potatoes," said Brokenshire, "and I'll not ask for more. After Radio broadcasting as my first choice, I love first, food, and second, more food."

Vincent Sorey, director of the Gauchos, was not pleased. The menu was all wrong, he asserted. "What you want," he said, "is spaghetti with plenty of wine, assorted fish and meat." But Howard Barlow, Philco batoneer and literary man as well as musician, also had his own ideas.

"My Thanksgiving dinner," he said, "will be prepared according to the directions supplied by Huysmans in his dissertation on spices and their relation to esthetics. That is important."



But a modern note rang out when Nell Vinick, the CBS beauty advisor, spoke. "Moderation will rule my feast," she said. "The traditional dinner is all right—plum pudding and all the twenty-odd things grandmother used to make—but I think, for the sake of beauty, that every course should be served in small portions."

"I'm in favor of that kind of a meal, too," David Ross gave testimony. "Except for the small portion plan. I really like large portions, if the dinner is cooked by Mrs. Ross. I'm particularly fond of cranberry sauce and dressing."

"PASS me the same," said Nat Brusiloff, "but be sure to give me the chestnut dressing."

"You're wrong," insisted Phil Artzt, who directs the Henry-George orchestra. "It should be oyster dressing. In fact, I'd just as soon have fried, stewed or raw oysters in preference to the traditional roast turkey."

And so the argument went on, each star with his or her own ideas and suggested alterations for the all-radio feast. That is, they all had ideas except Guy

(*Cont. on page 120*)

John Garland

"You're the last one saved!"

A DOZEN lanterns showed him the sea-stained, rotting steps. A chorus of hoarse, cheerful voices bade him welcome. A score of willing hands dragged him through a cloud of spray on to the wave-swept, creaking jetty. Then, as he stood for a moment to regain his breath, from somewhere behind in that thick, black gulf through which he had journeyed came the sound of a dull grinding, the crashing of timbers, the hideous, far-off shrieking of human voices. A rocket went hissing up into the darkness, piercing with a momentary splendour the black veil.

By Heaven, she's broken in two!" a voice cried. "She's gone!"

The rescued man turned sharply round. The light of the rocket was waning, yet he was just in time to see the slow heeling over of the huge, indistinguishable mass which a few hours ago had been a splendid liner.

"You're the last one saved," someone muttered at his elbow. "The boat's going back, but it will be too late. God help the others!"

The rescued man nodded solemnly.

"There are less than half-a-dozen left," he said, "and they had their chance. It was a big jump into the boats," he added. "Queer little cockle-shells they looked, too, from the deck. I've stood there for the last two hours, worrying the people in. I've thrown over a dozen, who dared not jump."

A clergyman pushed his way through the group. He was drenched to the skin, bare-headed, and breathless. He carrie an old-fashioned lantern in his left han His right he extended to the drippin man, who stood there looking like a giar amongst them.

"I've heard of you, sir!" he exclaime "You're John Waters, I'm sure. Yo did a man's work there. There's mother up at the vicarage now, with h two children saved, sobbing over the

The Deliverer

She lived alone in a secluded fishing village in England—the sea cast the strange giant upon the shores and he won her heart

By E. Phillips Oppenheim

and blessing you. You rigged up a windlass, they tell me, and let them down. I only wish that I had room at my house for you, sir, but the whole village is packed."

"You're very good," the man answered. "I'm used to roughing it, and any place'll do for me. Somewhere near a fire, for choice; your salt water's chilly."

The clergyman raised his lantern and looked anxiously around the little circle of faces. "We're seventy souls in the village," he said; "it's nothing but a hamlet, and we've found beds for over two hundred. We'll fix you up directly. I've one or two names left yet upon my list."

A slim woman's figure came battling her way along the jetty. She heard the clergyman's last words, and laid her fingers gently upon his arm. He turned sharply round to see who it was.

There were not many women about that night, and this one seemed so frail and small to battle her way alone in the storm.

"My dear Miss Cressley!" he exclaimed. "However did you get here?"

"I couldn't rest at home," was the quiet answer. "It was too terrible. And I had no one to send. I want to be of use. Can't I take someone in—a woman, or some children? I have a spare room and a fire lit ready."

The clergyman gave a little exclamation of relief.

"My dear lady," he declared, "you are just in time. Here's our last man, and I was at my wits' end to know what to do with him. A hero!" he whispered in her ear. "He has saved no end of lives there. Bless you for coming, my dear, brave Miss Cressley," he added. "It's just like you—just the sort of thing you would do."

She gave a little start, and looked doubtfully at the tall, dripping figure. In his soaked clothes, his short brown beard, and his hair tossed wildly all over his face, he presented a somewhat singular appearance.

"My dear madam," he said, in his deep bass voice, "don't please refuse me because I am not a woman or a child. I'll give you less trouble than either, I promise you. I won't smoke or swear. I'll do whatever I am told, if I can only see something to eat, a bed, and a fire."

She held on to the railing of the jetty with both hands. Her voice sounded thin and quavery against the background of the storm.

"I shall be very glad to take you, and to do what I can," she said, a little doubtfully. "I mentioned a woman or children because I know more about them and their needs, and because I live alone. Will you come this way, sir?"

HE TURNED and followed her, waving his hand in answer to the chorus of "Good-nights." They passed down the sea-soaked jetty between a little line of curious, sympathetic faces, and reached the village. She led the way up the steep street, and looked into his face a little timidly.

"My cottage is close here, sir," she said. "It will only take us a few minutes."

A gust of wind swept her off her feet. He put out a great protecting hand and steadied her.

"One moment," he said. "Let me help you. So!"

He turned for a last gaze seawards. There was no sign of light or life upon the black chaos of waters—nothing save the clouds of white foam, flung up almost into their faces, and the sullen roar of the breaking waves.

"God help the rest of them!" he said, with a sudden note of reverence in his tone. Then he turned to his companion.

"Madam," he said, "I am ready."

Together they climbed to the summit of the hill. She gently disengaged her arm from his.

"I AM so much stronger than I look," she declared, apologetically. "Really, I can manage quite well alone. My cottage is the last upon the left. You can see the light. We shall be there in a moment."

He walked by her side in silence. She wondered, with a sudden perturbation, whether he were offended. His face was invisible: she could not tell that he was laughing softly to himself. Perhaps he was mistaken in her years. He had taken her for sixty, at least.

They reached a little wooden gate, over which he calmly stepped while she fumbled with the latch, passed up a trim garden path, and into the tiny hall of the tiniest cottage he had ever seen. Despite her warning, he bumped his head upon the ceiling. She turned up the lamp, and he looked around him a little ruefully. His size made the place appear like a doll's house.

"If you will step upstairs," she said, bravely disregarding his dripping state, "I will show you your room."

He looked at the stairs, with their neat carpet and shining brass rods, and he looked down at himself.

"Look here," he said, "haven't you a back kitchen where I can strip and have a rubdown? You'll have to lend me a blanket while my clothes dry. Good Lord!"

He was looking at her in blank surprise.

"Is anything—the matter?" she asked frightened.

He burst out laughing.

"Nothing!" he answered. "Only I thought that you were a little old lady!"

SHE blushed desperately, and thrust back the curly waves of fair hair which had escaped in the wind. She was certainly not more than thirty or thirty-five, slim, with nice features, and grey eyes, colourless, perhaps a little unnoticeable.

The laugh died away. He stood and looked after her as she turned to ascend the stairs, as one might look at a ghost.

"There are some clothes here which belonged to my father," she said. "Will you go into the room on the left? It is the kitchen."

"It is the little Cressley girl, of course," he said to himself, as he stood on the red tiles and reached out toward the fire. "Little Mary Cressley! Shy little baby she used to be."

Suddenly the smile spread once more over his face.

"Great Scott! I kissed her once!" he muttered. "Good thing she doesn't recognise me!"

She came back in a few moments with a bottle and an armful of clothes. He decided that she had been practising a severe expression in the glass, but she avoided meeting his eyes.

"My father was a minister," she said, "and he was not quite so large as you; but you must please do the best you can with these clothes. There is a bottle of brandy here, and some hot water in the kettle there. When you have changed your clothes, if you will call out, I will come and get supper ready."

He laughed, "Why, I thought you were a little old lady!"

He looked at the clothes, clerical and severe in cut, with a grin. She turned her back upon him and went out. He helped himself to the brandy and hot water, and then commenced to strip off his things. All the time he laughed to himself softly. He remembered the Rev. Hiram Cressley very well indeed, and the idea of wearing his garments appealed to his sense of humor.

He called out to her as soon as he was ready. She kept her face averted when she entered, but he could have sworn that he saw the corners of her mouth twitch.

"If you would step into the sitting-room," she said, "I will prepare supper."

He shuddered at the thought of the sitting-room.

"I'm, such a clumsy fellow," he said. "I shall break half your pretty things. Couldn't we have supper in here?"

"Just as you like," she said, struggling to hide her relief.

He dragged the table into the middle of the room.

"Come on," he said; "I'm going to help."

In the night, the wind died away, and the storm passed down the Channel, leaving behind a piteous trail of disasters, small and large. John Garland opened his window, and looked out with a little exclamation of amazement.

THE sky was a soft deep blue; the sunshine lay everywhere upon the picturesque village, with its red roofs and grey cottages, its background of hills and rolling moors. From the little garden below, all ablaze with colour, came sweet rushes of perfume—of lavender, of roses and pinks, all dashed and drooping with their burden of raindrops, glittering like diamonds in the sunshine. Garland drank it all in with delight.

"England at last!" he murmured, as he began to prepare for his ablutions. "Lord, what a doll's house this is! I feel as though I were going through the floor."

He dressed rapidly and hurried into the garden! Miss Cressley was there, busy tying up some of her storm-dashed flowers. She started a little at his hearty greeting, and avoided his eyes. All night long her conscience had been troubling her. The memory of that supper was like a delightful scourge. She had been much too friendly. She had quite forgotten the impropriety of the whole thing, and had laughed and talked almost like a girl again. With the morning reflection had come—reflection like a cold douche. And with it other things! The perfume of the flowers, the soft west wind, the aftermath, perhaps, of the joyous evening, were creeping into her blood. Had she done anything so desperately wrong after all? It was the vicar himself who had sent this man to her. As she well knew, every cottage in the village was full. Still, her cheeks went furiously red at the sound of his voice.

"Why!" he exclaimed, "forgive me!

Then "Good morning" he greeted.

Her eyes questioned him.

"You look different, somehow," he explained. "Forgive my noticing it. I've been so long in a world where manners don't count, that I've forgotten mine."

Her cheeks burned. She could not remain unconscious of what he meant. She had arranged her hair differently—she was tired of the old way—and her white dress was certainly her most becoming one. The cluster of lilac, too, which she had drawn through her waistband—it was so seldom that it pleased her to wear flowers!

"Won't you come in to breakfast?" she said, shyly.

"Breakfast! Hurrah!" he answered. "I'm afraid I'm eating you out of house and home, Miss Cressley."

She led the way into the sitting-room, which seemed to him more than ever like a chamber in a doll's house. He sat very gingerly upon his chair, and was afraid even to move his legs. The moment the meal was over he escaped into the garden and produced a pipe.

"I'm off to the village," he announced, "to see some of the people. Won't you come?"

"Thank you," she answered, "I have things to do in the house."

Miss Cressley was in the garden, busy tying up her storm-dashed flowers. She started at the hearty greeting and avoided his eyes.

"I'll do the marketing," he announced. "I'll send some things up for dinner."

"It is not in the least necessary," she declared, with her chin in the air.

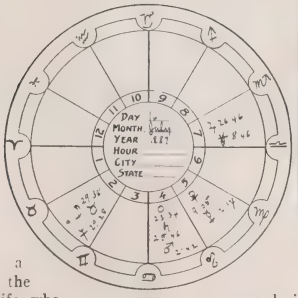
He laughed in her face.

"Necessary or not," he declared, "either I do the marketing or I dine at the inn."

He was an impossible person to argue with—so big and strong and forceful. The things he said seemed somehow right because he said them. She gave in, and the magnitude of his purchases amazed her. He brought them up himself, wearing a ready-made suit of fisherman's clothes, and carrying the clerical garments in which he had started the day, in a parcel under his arm. He took not the slightest notice of her protests, and he spent the next hour between the kitchen and the garden, strolling about with his hands in his pockets and an air of being absolutely at home.

Three days passed—four. As yet he had not even alluded to his possible departure. At first she had wondered, had been gently troubled as to what the villagers might be saying about her entertainment of this good-humoured, easy-going giant. Gradually the place was being emptied of its unusual crowds. Surely, she thought, he must speak soon of his departure! And, with a sudden start of mingled shame and alarm, she realized that she dreaded the very thought of his absence.

She fled into her room and locked the door. With blurred eyes and beating heart she looked out seawards and fought against this folly—this folly which seemed to her so egregious, so unmaidenly. For ten years—ever since her father's death—she had lived there alone a life of prim and delicate orderliness, quietly useful to many people—a life, it seemed to her now, colourless, flat, impossible. She looked in the glass. Yes, she was a young woman still! Her cheeks were still pink, her eyes bright, her hair soft and full. With trembling fingers she took it down, rearranged it more after the fashion of her youthful days, and pinned a ribbon around her throat — ribbon of the colour which matched her eyes. After all, she was a woman. She had not sought this thing — it had come unbidden, undesired, she told herself, breathlessly. She had a right to do what she was doing. Nevertheless, her cheeks were hot with shame when she saw him again.



He was standing in the garden, reading a telegram, with a frown upon his face. She went out to him shyly, and he looked at her for a moment in amazement—as one might look at a ghost.

"Why—why, what have you done to yourself?" he exclaimed. "You grow younger every day! If only I could do the same," he continued, with a twinkle in his eyes, "you might remember the farmer's son as well as I remember the minister's daughter!"

WHO is John Garland? And what is the disaster from which he delivers Mary Cressley? Read the surprising end of this romance in December RADIO DIGEST.

Floyd Gibbons *and his* Stars

by Peggy Hull

In or out of his uniform, Floyd Gibbons' horoscope (Left) forecasts a charmed life.

THERE IS hardly a man or woman in the ordinary walk of life who has not looked upon some successful person at some time or other, and wondered how he got that way!

We have all stood, with mingled feelings of curiosity and resentment, before the evidences of another's good fortune and asked ourselves how he happened to be so lucky. Why did he go straight to the top, while we, similarly endowed with ambition, determination and talent, were still struggling for recognition?

Probably in no other profession is there a more outstanding example of such a peculiar streak of luck than that of Floyd Gibbons, known to Radio fans as the famous headline hunter of the Literary Digest, whose nightly broadcasts are heard over WJZ of the National Broadcasting System, New York. Before he became identified with the Radio he was the most famous of all war correspondents, not excluding the eminent Sir Philip Gibbs of London.

Why was this? The average man will answer without hesitation, "He was better than any of the others." But a close analysis of Floyd Gibbons' stories during the war, and those written by a hundred other war correspondents will reveal that his articles were by no means unusual. As a writer it has been generally conceded that Floyd Gibbons has no particular gifts. Then why, in competition with the most talented and gifted writers of the age was this Chicago newspaper man enabled to reach heights of public acclaim denied to them?

Fifteen years ago I could not have answered this question, but today it is easy, because I have before me a small sheet of paper, curiously blocked and covered with strange symbols. It reveals the reason.

Floyd Gibbons' birthdate of July 16, 1887 takes the mystery out of his particularly fortunate career. Through the medium of that age-old science, Astrology, which is once more assuming an important place in the affairs of men, it is a simple matter to read the fate of this famous Radio star.

The Sun, giver of Life, is in the sign Cancer, which is the home of the people. Men who have had unusually successful public careers invariably have one or more of the stronger planets in this sign. The vibrations coming through this zodiacal position apparently stimulate the affection of the masses for the individual concerned. In other words they take to him, without asking any questions, or stopping to reason why. Calvin Coolidge, former President, is a splendid example of what the planetary aspects prove. His very taciturnity exercised by any other man in his position, particularly if that man's sun had been posited in the lordly sign of Leo, would have aroused the indignation and dislike of the masses. They would have felt that he was, in the parlance of the day, high-hatting them.

SO we see that Floyd Gibbons didn't have to make any special gestures to win the loyalty of the public in general. It was his from the very beginning.

There are other indications in Mr.

(*Continued on page 116*)

Bernadine Hayes

Queen of the Air

America's Most Beautiful Radio Star

HAIL the Queen!

All broadcasting stations in the country were invited to send photographs of their most beautiful feminine stars to the Court of the Radio World's Fair in New York. From these photos it was announced a queen would be chosen to reign as America's most Beautiful Radio Star.

"Oh what a cinch for our Bernadine!" chorused the people of the WBBM principality in Chicago. And a cinch it was. "Come on to New York and take your throne," chimed the judges en banc as they held Bernadine's picture up above all the rest. So fair Bernadine tilted her royal chin, stepped majestically into a Pullman and hithered Easterly where she was acclaimed amid great Pomp and Circumstance while all the great Princes, Lords, Knights and all the Little Squires of the Radio Realm waited on bended knee. She'll reign for a year and a day. Long live Queen Bernadine!

Annette Hanshaw

NOT so very long ago some of our Nicest People took rather a snooty attitude toward Sir Mike and haughtily declined to have anything to do with him. Now all that is changed. There is none too proud to stand up and take him by the ear today. And here comes Miss Hanshaw from the Exclusive Set up Westchester Way to sing and make merry with the Mikes at WABC, New York. And, take it from the Mikes, her dulcet contralto voice is a treat for All Kinds of People.

Edith Meiser

REMEMBER that Gala Program of the Theatre Guild a few weeks ago? And do you remember the Columbia announcer introducing to you Miss Edith Meiser of the Garrick Gaieties? And do you remember how you wished you could see her face to face? Well, here she is. No wonder you wanted to see her because you never would have imagined she could have been motionless long enough to have had such a dignified picture taken. Great voice and very nifty on her toes. Hope you'll be hearing her again soon.

Marion Keeler

OH HUM, Monday's wash day—but never mind here comes Marion a singin' in the suds. Or maybe not quite so literal. She's on the Maytag hour from the NBC Chicago studios. And Maytag—well, they sure do get a lot of fun out of these motor tubs. Miss Keeler is a Broadway bred contralto and an ex-Roxy Gangsterette.

Virginia Karns

WHAT'S the use of stuffing yourself into a smelly little dressing room and going through an ordeal of costumes and grease paint for musical comedy when you can get a hundred times greater audience and better remuneration for Radio broadcasting? That's a great big question a little bitta girl answered when Miss Karns joined up with WLW at Cincinnati.

Harry "Mac" McClintoc

EVERYBODY knows "Mac" as the Grand Old Man of the West Coast Radio. He has been strumming and humming his way into the hearts of the young and the old from the beginning of the listening era. The Golden State Blue Monday Jamboree with Mac and his Haywire Orchestry just couldn't be without "Mac" and his guitar.

Mountaineers

RADIO has enriched the general appreciation of true American folk songs that have been handed down from generation to generation. Above are the Rex Cole Mountaineers heard over the NBC net from WEAF, New York, daily (except Sunday) at 5:45 p.m. EDT. Their Hill Billy songs are becoming as familiar as The Sidewalks of New York.

Cuckoos

WELL, well, well, what's this thing that seems to have climbed into the Cuckoo's nest at NBC and which Ray Knight, Cuckooishly known as Professor Weems, seems to be holding so gingerly? It's a bear! Gr-rrr! This program goes as far west as WREN, Kansas City, Mo. The Wrens like the Cuckoos.

Raising Junior

PETER DIXON who has written many interesting articles of Radio celebrities for Radio Digest is becoming something of a celebrity himself. Here he is with Mrs. Dixon, formerly Aline Berry, and Junior, who is the motive for the new serial, Raising Junior. It is heard over the NBC network from New York.

Edna, Helen, and Marie Buck

AS YOU go dialing and come to Pittsburgh do not make the mistake of passing the Bucks. Here they are, (above) the three sisters, Edna Mae, Helen and Marie, who invariably delight the regular audience of KQV. They are in five programs a week and you are just as likely to hear them with their stringed instruments as you are to hear their excellently blended voices.

Jimmy M'Callion

WHATTA Boy! Imagine starting out on a professional career and numbering your regular audiences by the millions at every performance at the age of ten! But that's the record of Master Jimmy M'Callion (left) who is heard regularly from the New York studios of the National Broadcasting Company in Toddy Party, Bon Ami, Lady Next Door and other programs.

Lucille Wall (left)

SOMETIMES we slip around to the studios and peek behind the curtains to see who's what on all sorts of programs, but we never yet happened to catch Adventures of Polly Preston in the act. We had great curiosity as to the thrilling heroine. And along comes this NBC picture of Miss Lucille Wall who is none other than Polly herself.

Eloise McAllister (right)

UNDERNEATH the sheltering palms —that's where we would all like to be two months from now. So let's ask Miss Eloise McAllister who sings at WQAM, Miami, to kindly step over an inch or two and let us help hold up that tree. And, Eloise, what is the rest of that song, you know, about the sheltering palms— Umm—umm!

FIRST prom gowns for young things! Two peplums, a heart-shaped back and pink flat crepe taken all together make them the acme of innocent sophistication.

A LOVERS' knot! A long, almost-trailing skirt! A bolero! They all combine to make this simple flat-crepe evening gown perfectly devastating.

THE young lady in the close-up, right, who so cleverly shows her curls beneath her tight-fitting hat, knows her high fashions; as witness below her short black astrakhan jacket, worn with a black cloth skirt . . . and a white wool-lace blouse!

THE sheerer the wool the smarter the wearer. And when you add a white crepe gilet to these twin green marita cloth frocks, your result may double for afternoon or sport.

Peggy Norris

THEATRE audiences are already acquainted with Miss Peggy who was prima donna in such successes as The Fortune Teller, Mlle. Modiste, Going Up, and No, No, Nannette. But now she is a Radio star and provides a very good reason for stopping your dial on WOV, New York.

Grace Hayes

THE H—ayes have it—in our picture section this month; Bernadine and ıow Grace. Miss Grace Hayes, of course, has been famous in musical :omedy for several seasons. Recently you heard her as guest artist on the Nestle's program from New York over a nation-wide network.

Mary Brian

DO smile, please, Mary! She won't. And could you really believe that this little old fashioned maiden with her hand on her chin is our dashing Mary Brian, so famous on the screen and in Radio? But this is her latest photo taken at the RKO broadcast over the Columbia system from New York this autumn.

A Modern Cinderella

Bernadine Hayes

Radio Queen Rises To Sudden Fame

By

Janet Dublon

Bernadine Hayes, Copperhaired Radio Queen

THE most beautiful Radio Star stopped between sips of coffee to answer the questions of the tireless reporters.

Photographers, armed with their cameras, were in the adjoining room impatiently waiting to take more poses.

Bernadine Hayes, the Radio Queen, had stood up, sat down, crossed her legs, twisted her head in different positions, stood up, and sat down again—all to satisfy the cameramen's inordinate desire to take her picture—and still they were waiting in the next room although it seemed there just wasn't another pose left for her to take.

To lend a bit of variety to the pictures, Lady Beautiful had even slipped into a pair of bewitching black satin pyjamas which had a generous flair that swayed gracefully back and forth as she tripped daintily from one room to another.

Her very body breathed rhythm. There was just that delightful swing and spring as she walked, turned her neck and moved her head.

A delightful buoyance of spirit, a personal charm, a well-modulated voice, and a beautiful face, crowned with copper tresses—all of this and a trunkful of lovely lace and silken gowns were packed on the Twentieth Century from Chicago when the magic word came.

BABY sisters and brothers, eight in all, clapped hands and chuckled as only younger brothers and sisters know how to chuckle, at the fairy tale come true. Oh, the glorious dreams and fancies, the elves, and the pixies—they are all real! The Red, Yellow, Green and Orange Fairy Books never yielded such thrilling stories as this.

And Mother and Father, bursting with parental pride, just know that there is nothing too good that can happen to Bernadine. Who can tell what dreams they had for her when she was just a little tot?

"It is all so wonderful," said the Radio Queen, "that I'm afraid I shall wake up any moment to find that it is only a dream. Happy! My joy is indescribable. I am happy because at last I have been able to repay Mother and Father in some way for the tender care they gave us. As soon as I received the wonderful news I telephoned to my parents, who were in St. Louis at the time.

"YOU can do anything if you are just determined. Of course, there have been moments of discouragement when I thought I'd never amount to anything. But I never entertained these depressing thoughts for long. I'd shake them off and start again with a renewed vigor."

The Radio Queen had a mature philosophy for her tender years—she is only twenty-three.

"I have always had to figure things out for myself. Perhaps that is why I seem to be older. I have had to take care of my younger sisters and brothers, and they depended upon me.

"What is your recipe for beauty?" was asked.

(*Continued on page 123*)

"Thrills"

Graham McNamee And Phil Cook Tell of Their Greatest Moments

Read About the Greatest Thrills in Floyd Gibbons' Life in December Radio Digest.

GOOD evening, ladies and gentlemen of the Radio Digest audience, this is Graham McNamee speaking from his office in the National Broadcasting Company, and I am going to tell you of the two hundred and thirty-four thousand thrills I have had during my eight years of Radio announcing.

Well, you may think that that number is a little bit exaggerated, but, oh boy, if you could have been with me at the seventy-five football games I have reported by air, thirty-eight world series baseball games, or the fifteen championship prize fights, or even the four crew races, you would believe me when I say I must have lost track of at least an additional 1,000,000 spinal column tingles.

Yes, of course I am, by nature, about as enthusiastic as a school boy over everything in sports, always have been, and I hope I always will be, but how in the world could anyone see little Albie Booth push giants aside as he dashes over a gridiron like a drunken jack rabbit, or recall the wild dashes of Red Grange, or see Frankie Frisch scoop up impossible balls and turn them into world series victories, or recall Jack Dempsey at his best, and remain blasé?

Nope, it just wouldn't be human, that's all, to be a part of the indescribably spectacular and colorful crowds that attend our sporting events and just pass it off with a shrug of the shoulders.

Graham McNamee, the Demon Announcer, gets a big kick in talking to Andy Cohen of the Giants.

Well, it would be almost impossible for me to tell you what has been the greatest thrill I have had since I became a Radio announcer in May of 1922, during the noon recess of a trial on which I was a juryman. I say since I became a Radio announcer, because before that time, I didn't know much about thrills. I was just another baritone.

But boy, oh, boy, you should have been with me at any one of the sporting events that I have covered and you would know why it is that I am so wrapped up in Radio. Why it is that I say that the powers-that-be in the National Broadcasting Company office would have to kick me out bodily before I would consent to give up broadcasting.

Believe me, it isn't altogether the money I am getting out of it—though, of course, that helps a lot—it is the thrill upon thrill that I am getting out of the work. Work? Why, it is a real pleasure!

Rubbing elbows with kings and knaves, prize-fighters and princes, queens and quacks, cardinals and commons, presidents and passers-by—that has been my lot for the last eight years, and every day has brought me new thrills before the mike.

I can't drive out of my mind—and I hope I never forget—the Benny Friedmans, the Albie Booths, the Red Granges, the Paul Sculls, the Frankie Frisches, the Tony Lazzeris, the Babe Ruths, and the Lefty Groves that have made my last few years just one pleasure after another.

Benny Friedman throwing a long pass that means victory to that other famous Benny — Oosterban, 'oy Benny to Yah Benny—Oh Boy! The four horsemen and their picturesque shift that always meant yardage for Notre Dame; Grover Cleveland Alexander shuffling into the

Leonard Stewart Smith Writes Down the Most Vivid Impressions of the Air Notables Who Have Had Tingling Experiences

Jack Dempsey at the mike, while crowds of interested onlookers almost crowd Graham and the pugilist out of the picture.

box to fan Tony Lazzeri for the last out and the long end of the World Series money!

Gee. willikins, Memory—don't ever blot out the picture I carry in my mind of little Albie Booth; or Paul Scull playing his last game against Cornell, or Chris Cagle, snaking his way through the Stanford Huskies—or Light Horse Harry Wilson almost winning the last Army and Navy game in the dark of Soldier Field, in the last few seconds of play with the score tied at 21 to 21.

No, No, Memory, you can't take these pictures away from me—not the picture of the Lindbergh reception—when Vincent Callahan got me the famous "pass Graham McNamee anywhere, anytime" card from the Washington police authorities, and permitted me to broadcast from Lindbergh's side throughout the ceremonies. Memory cannot dim the supreme thrill of seeing Howard Ehmke pitch the opening game of the 1929 world series, the greatest pitched game I have ever seen —between the Philadelphia Athletics and the Chicago Cubs—and the hot dogs they passed to me in the midst of the game —or the day that Al Marsters was hurt—ending the Dartmouth star's brilliant career.

Nothing that could possibly happen to me from now on could dim the recollection of my broadcasting from a plane that kept continually circling 5,000 feet above my home at 106th street and Broadway, New York, while I was in communication with Frank M. Hawks, the transcontinental lane speed record holder. I pictured my wife, who always listens into my broadcasts, both listening in and watching the plane in which I was riding, as it circled above my home. Gee willikins, how that thought thrilled me. I wasn't talking to the millions of listeners-in that night. I was talking to Mrs. McNamee.

Yes, sir, I am right in heaven. Red Grange has the ball,—he's through—ten yards, fifteen, twenty—twenty-five—it would take a machine gun to stop that boy—it's a touchdown! Oh, boy, that was some run—let me tell you about it.

They're off! Gallant Fox is trailing! He takes the lead. What a race!

The seventh round of the second Dempsey-Tunney Fight in Chicago. Tunney is down. One—Two—Three—Tunney is out—No. What a thrill! I thought I would never recover from the excitement of that occasion. Or even the first Dempsey-Tunney fight in Philadelphia—the rain—

Here comes someone out of the bull pen—it's Alex—none other than Grover Cleveland Alexander—Old Alex—he's going to pitch to Tony Lazzeri—push 'em up Tony—Strike one—oh, boy, Alex is sure pitching his head off—two are out—the bases are loaded—and all the Cardinals have to do is to get one more man out and they will collect the winners' share of the world's series proceeds. Strike two—gee willikins, that cut right through the heart of the plate—Tony swung and if he had hit that ball the game and series would be over—the pitch—here it is—strike three—he's out! Alex struck him out—boy, oh, boy—

Here comes a little fellow out of the Yale bench—yes, its Booth. None other than Albie Booth. All right. Yale is in a huddle. They are lining up now. Booth is off—ten—they've got him—no, he's up again—snaking his way through that field—twenty-five yards—He's down—yes, sir—I don't believe he will be able to get up after that tackle—he was thrown hard —there Booth bounced up like he was a rubber ball. He was thrown hard enough to knock out a Dempsey or Tunney, but not hard enough to knock out little Albie Booth! No sir.

Grief for Phil Cook fans! His biggest moment will be when he puts his fifteen personalities in the box and takes up the silent paint-brush.

EHMKE is pitching the game of his life—He has made these big swingers of the Chicago Cubs look like inmates of the old soldiers' home. Al Simmons—it's a home run—those Athletics have staged their famous seven run rally —pulled the game out of the fire for the world series.

Say I could go on forever with reminiscences of the—say, I said it was 234,000 —but if I said a million it would be closer to the truth.

Listen folks, isn't it equal to a thousand or more thrills the way I broke into Radio? Here I was, just a juryman out during the noon recess—I stepped into the office of WEAF at 195 Broadway—they gave me an audition as just another baritone—they signed me up—and holy mackerel, eight years have passed and here I am still at it——

And think of it, think of it, folks—this year and the next I will have the unequalled pleasure of telling all you people about maybe hundreds of other sports events before I finally fold up my tent like the Arab and silently steal away.

Before the year is over I'll probably be telling you about the latest exploits of Albie Booth describing how he dashes down the field like a bat out of—the blue sky.

Before the year is over I'll be carried away with the spectacle before me a hundred or more times—and make a hundred or more mistakes—but who cares about mere details—whether Booth or Gentle or "Trick" Bennett, Jackie James of Princeton, Josh Williams of Pittsburgh, McClelland of Yale, Siano of Fordham, Vic Harding and Wood of Harvard, Link Fogarty of Brown, Charley Greene or Warren Gette of Penn or Martin Brill or Monaghan of Notre Dame fumbles or gains—is thrown for a loss—

I will have seen Al Simmons and Mickey Cochrane and Frankie Frisch and Lefty Grove—what difference does it make whether they fizzle or star—

Most Radio listeners miles away from the scene of major sporting events look to me to convey them there in imagination, to give them color, the feel of the crowd, the intensity of the atmosphere, the gaiety. They're interested in the essential drama of the situation and in the sidelights quite as much as they are in the matters of how many strikes have been called and how many yards have been gained or lost by Yale, dear old Rutgers, Notre Dame or Army.

Phil Cook

ACCORDING to Phil Cook, it was a long time between unforgettable moments.

Some fourteen years ago the Philip Cooks, Mr. and Mrs., found they had five hundred dollars in the bank. That represented savings from the small salary of $35 a week paid to a commercial pen and ink artist. Just a member of a staff of a not-too-famous advertising agency.

For more than three weeks they made daily visits to automobile row—such as it was in those days—in Newark, New Jersey. They looked at Packards, Cadillacs, Haynes's and other famous, high-priced cars of the day. They looked at them and hoped that some day they could own one. Then they carried their savings to the agency handling the Dodge four—then a funny little car, a step removed from a Ford, and with a most unorthodox gear shift. So they paid out $425 of their $500 as the down payment on the car; some $15 more for a license; $2 for gas and oil, and drove the car away. That car gave Phil his greatest thrill.

The first night the Philip Cooks of Newark had their new car they drove to down-town Newark, parked the car beside the curb in front of a motion picture theater, stood admiring it for about ten minutes and then went into the theater. Five times during the first hour Mr. Philip Cook, artist, came out of the theater to see if the car was still there. After the fifth hasty exit, the Cooks decided that they didn't want to see the show, but that they wanted to take a long ride in the country around Newark instead.

When he discovered the

LACONIA

Sinking Beneath His Feet

And he rushed to his state room for his neversink suit

Floyd Gibbons

Felt a Thrill but *Not* His

Greatest Thrill

You'll read what that was in the

DECEMBER RADIO DIGEST

"I kept reminding Philip that the sign pasted on the windshield warned the driver that the car was not to be driven faster than 25 miles an hour for the first 500 miles," Mrs. Cook told me.

"And I wanted to see how fast she could go," Phil chimed in. "'But dear,' she said to me, 'the sign on the windshield says . . .' And I kept saying 'gee, I wonder how fast.' I got her up to 35 miles an hour, but I was afraid."

We skip 14 years. Because nothing much happened, except that Philip Cook obtained a contract to do a series of cover illustrations for Collier's Weekly, and won third prize in an art exhibit in Newark, competing against such world-famous artists as Treadler and Penfield Fancher, and had a salary boost to $5,000 a year.

We find instead of Philip Cook, commercial artist for an advertising agency, a man who has become known the world over as Phil Cook, still a commercial artist, but the ether waves have superseded the paint brush—and he is "commercial artist" in the parlance of Radio broadcasting. He is now the earliest Radio comedian in the world—he starts giving his comedy to the world at 6:30 in the morning—and he has become one of the highest paid artists in the world— He is now receiving as much for a week's work as he did for a whole year's work at the time the story opens.

He is now Phil Cook, the Lon Chaney of the Air, receiving $2500 a week!

We come now to the second and greatest thrill in the life of Phil Cook—the birth of his first baby!

"At first," Phil said, "She was more of a scare to me than a thrill. But now, she is now almost a year old, she is a thrill a minute!"

"BUT tell me," I asked. "Doesn't your Radio work thrill you? Didn't your recent broadcast during which you imitated 15 persons in six minutes give you a thrill?" I asked.

"Not a bit," he replied. "I have been rehearsing my Radio work for years. Studied it as I did my art, earlier in my career. That is too commercial. Just a means to an end. There is no thrill in that except that I am fast acquiring a bankroll that will enable me to retire before I am forty—I am thirty-eight now—and spend the rest of my days just playing with Phyllis—we named her Phyllis——and drawing when I want to."

"In other words, Mr. Cook," I asked. "you plan to retire from the Radio within two years?"

"Yes," he replied most definitely, "Within two years. At present my contract—with Quaker Oats, if you don't know that—has almost a whole year to run, with an option for renewal. After that goodbye Radio—except for occasional appearances!

"Then I will return to my art—the career I had cut out for myself when I was a boy, in Coldwater, Michigan.

"It's a funny thing, but music and entertaining have cropped up at various times to check my desire to draw. You see, mother was a musician. But I had never had any musical training.

"Notwithstanding, when I was sixteen, a member of the Elks' Club of East Orange had heard me sing, and had offered me $10 if I would entertain that club at a smoker. I did give up music for all of 12 years. Then friends advised me that I ought to go into Radio."

Rockefeller's MAGIC

RADIO CITY

Up from the Dust Clouds of Crumbling Walls will arise Marble Palaces—a Dream Come True

By Bruce Gray

THOMAS A. EDISON after numberless experiments finally put a bit of cotton thread in a vacuum tube set it aglow with electric current—and thus was born the first incandescent light.

From that lamp arose a genie more important and powerful by a million times than the genie slave of the lamp controlled by Aladdin. What would the Aladdin of the Thousand Nights imagine if he could roll back the curtain of his long sleep and behold today the scene in the heart of New York where hundreds of workmen with sledges and picks are crushing down the walls and floors of whole blocks of buildings to erect the architectural triumph of the age to be known as Radio City, an evolution of the electric vacuum tube.

For Aladdin it would seem just another dream—a great vision to vanish like a mist with the morning sun of reality. But to the modern American listener it soon will be a miraculous fact. When Radio Digest first announced the sketchy outlines of the plan earlier in the year it seemed almost too fantastic to become an actuality.

But out of the clouds of flying dust and mortar will arise this prodigious enterprise of solid, concrete, limestone and marble walls. The demolition of existing buildings is in itself a great undertaking.

They are tearing down acres of brownstone houses, office buildings, restaurants and shops on an area, three blocks square, in the heart of New York City. Many famous old land-marks are being sacrificed on the altar of human progress. Phoenix-like, there will arise from the ruins a great cultural center that will far surpass anything of its kind in the world.

Radio City will be entirely complete by the fall of 1933. It will be financed by the John D. Rockefeller Jr. interests and will involve a total investment of over

Merlin H. Aylesworth

$250,000,000. The construction work is expected to alleviate to no little extent the unemployment in New York City.

This new cultural center, devoted to Radio's progress in the fields of sound and vision, will be complete in every respect—truly a city within a city. It will be erected as a complete architectural unit of great beauty and utility. It will include: four theatres, a large symphony hall, twenty-seven broadcasting studios, a sixty-story office building and numerous other structures, notably an oval building of moderate height and beautiful design, which will be located on the Fifth Avenue side of the development.

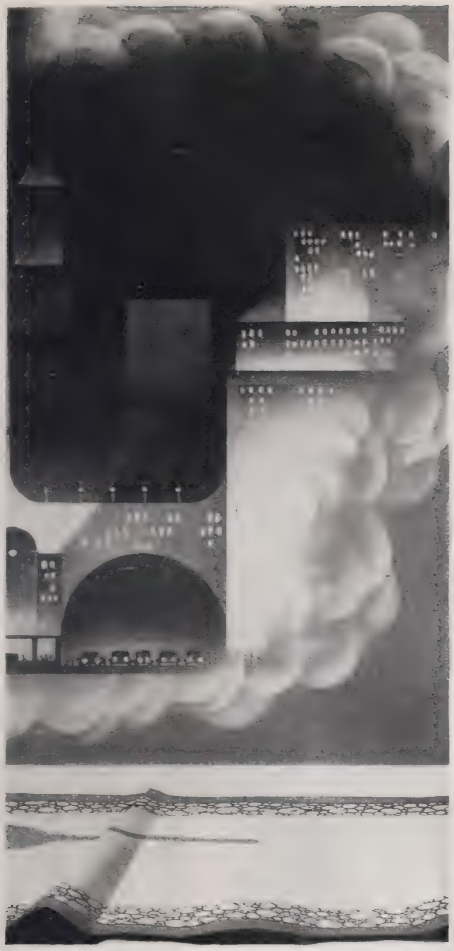
The plot on which Radio City is being built extends from 48th Street to 51st Street and from Fifth Avenue to Sixth Avenue—three square blocks the real estate value alone of which is staggering. It is this plot that was originally assembled by the Rockefeller interests and offered to the directors of the Metropolitan Opera Company for an operatic and musical center, which was to have included a new opera house—a thing New York City has needed for years. However, something went awry and this site for the operatic center was abandoned.

Mr. Rockefeller subsequently broached the subject of a Radio City to David Sarnoff, president of the Radio Corporation of America, believing that the Radio industry was the logical one to be so represented. Mr. Sarnoff admitted that such an enterprise had been a dream that he had nurtured for years. Mr. Aylesworth of the NBC and the R.C.A. officials were enthusiastic about the idea, particularly in view of the fact that the amazing growth of the lusty infant, Radio, has made it practically impossible to obtain adequate quarters in which to house her. However, definite announcement of the plan was withheld pending the acquirement of the necessary property on the Sixth Avenue side of the development, so that exits and entrances might be provided from that side.

FRONTING Fifth Avenue and forming the central structure on that side of the development will be the oval building, previously mentioned. On the first floor will be located many fine shops. The second floor will be occupied by a large banking institution. On the roof there will be a restaurant, with an outdoor promenade running around the entire building. This oval building will extend to a magnificent garden plaza, which will be cut through the development and will run parallel with Fifth Avenue, from 48th Street to 51st Street. No expense or effort

Aladdin wouldn't believe his eyes to see the real thing!

will be spared to make the plaza, which will be almost as wide as the average city block, the most impressive boulevard of its kind in the world. Fountains, statuary and beautiful garden plots will add a decorative touch.



A huge sixty-story office building will tower over the entire development and will extend from the west side of the plaza through to Sixth Avenue. From this central office building a grand corridor, about three stories in height, will run to the other surrounding office buildings. All of these structures, incidentally, will be in architectural harmony with the rest of the unit. Over a million square feet of space will be leased in the various office structures by the Radio Corporation of America, the National Broadcasting Company, the RCA Victor Corporation of America, the Radio-Keith-Orpheum Corporation and its subsidiary, Radio Pictures, and RCA Photophone, Inc. The Radio Corporation will have its executive offices in the sixty-story office building.

The 27 broadcasting studios will also be located in the sixty-story building. The technical and artistic experience which the National Broadcasting Company has gained in years of operation will be embodied in these studios. Some of the studios will be two or three stories in height and will, in effect, be concert halls. Ten of them will be designed for photography and recording, inasmuch as television looms on the horizon. Ample provision will be made for Radio fans to see the artists at work.

Of the four theatres to be included in Radio City, one will be devoted to variety, a second to sound, a third to musical comedy, and a fourth to dramatic productions. In leasing and operating these theatres the Radio-Keith-Orpheum Corporation purposes to use the technique of all the arts in the creation of its entertainment programs.

The theatre devoted to variety will seat over 7,000 and will introduce many new ideas in variety entertainment, according to Hiram S. Brown, president of R-K-O. Among the innovations will be new lighting effects made possible by recent electrical progress and a stage, built upon an engineering principle, that will make it visible from all parts of the house.

The second theatre, which will seat about 5,000, will be especially designed for sound motion pictures. Heretofore, all theatres have been built upon the acoustical and visual principles of the older forms of motion picture entertainment, although sound has since been

added to all the larger theatres. In this instance, however, a beautiful theatre will be built around the Radio and electrical developments that have recently revolutionized the motion picture art.

The third theatre will be especially designed for musical comedy productions. Sound has welded music to the screen. In this theatre creative talent will be developed and public experiments will be conducted looking to the presentation of better screen entertainment.

Finally, there will be a theatre devoted to dramatic productions of a selective character. It will be used in much the same manner as will the one for musical comedy. All of the theatres will be equipped for the broadcasting of sound and, eventually, for the broadcasting of sight directly from the stage.

The streets surrounding the new development will be widened, giving the new structures fronting them more light and air, and will also provide better curb facilities for shops and buildings. Transportation arteries from every direction will lead to and from the new Radio City, but the traffic problem will be reduced to a minimum by huge underground bus terminals and by subterranean parking arrangements that will take care of thousands of cars and will form underground boulevards for automobile traffic. In addition, plans are now being drawn for a great parking tower to give additional facilities for motor parking. All deliveries within the Radio metropolis will be effected from underground.

The architects working on this project are Reinhard & Hofmeister; Raymond Hood, Godley & Fouilhoux; and Corbett, Harrison and MacMurray.

It is not difficult to picture what a tremendous part Radio City will play in the cultural life of the city and the nation. From the decorative standpoint it will give New York City a stupendous architectural monument that will fittingly mark the rise of the Radio industry from the status of a doubtful experiment to one of the country's greatest public servants and, as President Merlin H. Aylesworth, of the National Broadcasting Company, so aptly expresses it, "the recognized means for the syndication of entertainment, education and information on a nationwide and, at times, a worldwide basis."

Furthermore, Radio City will radically alter the skyline in midtown New York and will establish new standards of city planning. It will provide an interchangeability of service and technique that should do much to advance all of the arts encompassed. It will furnish facilities for all artists who deserve a wide audience. It should prove a tremendous boon to Radio broadcasting and the screen by giving them added reservoirs of dramatic, musical and entertainment service which are not now available.

In short, Radio City will undoubtedly prove a veritable Mecca for all artists who have a legitimate claim to public attention and, likewise, to the ever-curious laymen who will likely make pilgrimages from many miles around to see this mighty Temple of the Arts.

John R. Todd, of the Todd, Robertson & Todd Engineering Corporation, New York, who acted for the John D. Rockefeller, Jr., interests in concluding negotiations with president David Sarnoff, of the Radio Corporation of America, looking to the establishment of Radio City, says:

"A development of this character, which would at once create an architectural unit that would typify American progress in city planning and would provide a center for the radiation of the best type of entertainment and of musical culture, has long been the dream of those connected with the project.

"The new electrical arts, which have enormously extended the fields of sound and vision, promise for the entertainment and educational arts the greatest possible service to the greatest possible number."

Roxy for Boss?

WILL S. L. Rothafel ("Roxy") be the master mind of the new Radio City? It has been strongly rumored in Radio circles that he will give up the management of the Roxy Theatre in New York at the termination of his present contract and that he will become actively identified with the National Broadcasting Company as supervisor of productions.

If ever there was a man whose achievements have been a chronicle of turning fanciful dreams into material realities Roxy is the man. His trail on Broadway is a row of palatial playhouses.

Roxy recently left for a two-months' trip to Europe. His rise in the entertainment field has been predicated to no small extent on the popularity he gained through Radio broadcasting, in which he was one of the pioneers. It goes without saying that the vast Radio City will require an executive head who is accustomed to dealing with tremendous projects. Roxy seems to fill the bill in every respect. Perhaps his trip to Europe may have special significance in the development of this plan.—EDITOR.

Mr. and Mrs. Morrow

Hail and FAREWELL!

By
DWIGHT W. MORROW

American Statesman Greets Countrymen from Mexico as He Bids Sister Republic Adieu During the Collier Hour

Address of Ambassador Dwight W. Morrow in Collier's Radio Hour Sunday Evening September 14, 1930.

I AM grateful to Collier's for the opportunity to speak to the large Radio audience of the United States on this, my last Sunday evening in Mexico.

Three years ago Mrs. Morrow and I came to Mexico. We have been very happy here. We have received many kindnesses at the hands of the Mexican government and at the hands of the Mexican people. As the time comes for us to say goodbye, we feel how deeply we are going to miss Mexico.

Those who have resided in Mexico for some time realize that the spell of the country enters into one's blood. It is partly the unexcelled climate. It is partly the charm of the oldest civilization in the western hemisphere.

Mexico offers delightful weather for twelve months of the year. It is cool here in summer; it is warm in winter. Flowers are everywhere. There is sunshine every day in the year. The Mexican people are hospitable and instinctively courteous. They have a native artistic gift which expresses itself in every kind of handicraft, in pottery, in weaving, in wonderful toys, and in gay songs. The land is adorned with countless old churches and other buildings, which show the artistic genius of the people.

One may see impressive remains of ancient civilization in the valleys of Mexico, in Yucatan and in Oaxaca. The landscape is marvellously beautiful. One's first sight of a little town like Cuernavaca, only fifty miles from Mexico City, lying like a golden bowl of color and sunshine at the foot of two giant snow-capped volcanoes, is never to be forgotten, nor is the first glimpse of Tecoco, a hillside town in Guerrero, its red roofs built above high precipices of red stone and rising from them a great church with a dome of orange, green and white tiles, in the bright

ght looking just like a huge flower. r tourists who make long journeys ss favored parts of the world are ting a wonderland which lies at very door and is easily accessible. e may stand in the Ameri- mbassy tonight and speak the telephone to New York and have his voice broad- by Radio throughout the d States. One hundred ago—before we had the raph or the telephone or the o. it took more than one h to communicate from the al of the United States to apital of Mexico. Today two countries are literally to face.

WE MUST not isled, however, by the growth hese mechanical appliances. increase of machinery by h man communicates with does not necessarily mean understanding will be better e future than in the past. is too often assumed that tific inventions prevent mis- rstanding. Machines, how- do not understand each r. Man may make a perfect hine, but it will still depend man himself whether the hine shall be an instrument derstanding or not.

we could all get clearly into minds that other men have uch pride in the dignity of nations as we have in our the solution of international lems would be less difficult. is the duty of every one of diplomatic representatives to reign nation to defend faith- the proper interests of his ntry and of his countrymen. t is his legal duty and his al duty. If he fails in that , no other success can com- sate for that failure. But it so the duty of the representa- of the foreign country to nd his country and people. We can best defend the rights our own country when we erstand the rights of other ntries. It is upon that funda- ntal principle that interna- al law is built.

We were told before we came Mexico that the essential g in a foreign country is to to understand how foreigners *er* from ourselves. There is nothing of value in that ad- e. But at the end of three rs, it seems to us that the ential thing to do in a foreign ntry is to study the *likenesses* men rather than their differ- es.

When it comes to the profound experiences of life, the men and women on this small earth are not very different. When it comes to the death of parents or the birth of children, or the straining of eager eyes for needed rain, or the rising and standing uncovered of great groups of people when a national anthem is played, the men and women and children of this earth behave in much the same way.

We are more like each other than we are willing to admit to one another.

There is an old story which might well be remembered by those who go to foreign lands. A religion grew up in Asia some three thousand years ago. A particular group of learned people devoted themselves to keeping that religion pure and undefiled. They observed its law. They subordinated themselves to its ritual. They carried the forms of that religion along until the appointed time had come when it might transform western civilization. And yet, by the arrogance of one man, the sect of the Pharisees is popularly judged today, not by the epistles of St. Paul, but by a single prayer to the Lord.

Could there be anything more tragic? A Pharisee and a publican pray side by side—for two thousand years their prayers have come down to the people of the world wherever the story is known. The very word Pharisee has become a byword and reproach. In the pulpit, in the study of the scholar, in the market place, on the street, the Pharisee is condemned. And everywhere, the publican is pitied or even praised!

The Pharisee, who was educated, who was efficient, who kept the law and the statutes, dared to stand erect in the presence of his God and thank Him that he was unlike other men. The publican, who had broken the laws, lowered his eyes in the presence of his God and asked for forgiveness of his sins.

ONE man exalted himself; the other humbled himself. The difference is a difference in standards. The Pharisee compared himself with other men, and boasted of his strength. The publican compared himself with his God—and asked forgiveness for his sins.

It is our fundamental likeness to other men that enables us to understand them, and to live in peace and friendship with them.

Is it too much to hope that some day the nations of this earth may pray: "Lord God of Hosts, we give Thee thanks that Thou, in Thy wisdom and Thy mercy, hast made us like other men!"

Dwight W. Morrow has been heard on various occasions over the Radio. Note his genial smile.

Percy Grainger

Famous Composer Says "Inspiration is Only a Form of Health"

NUMBER Seven Cromwell Place is just another address in White Plains, New York.

This simple house has no special sign of distinction to indicate that one of the greatest contemporary composers lives there, but that is the way with houses. They reveal nothing. They are like the covers of great books, indifferent to the great truths that sound throughout their pages, or like some of the dull rocks unaware of the brilliant diamonds that sparkle in their bosoms.

Now a dwelling that houses a great musician like Percy Aldridge Grainger might reflect some of the inspiration that throbs with such a vital force within its wooden limitations. It might devise whimsical inventions so that passers will know that here lives an immorta an individual through whom races a nations find their way to song.

The shingles might hum a little tune vagrant winds pass over them, and stairs might trip by each other merri The creak of the hammock should certa ly be able to catch some of the songs th take flight and should reproduce th when the zephyrs go for a little jaunt.

But, no. There is the house. And li every other house it is just content serve its only purpose of shelter. windows are like a blind man's emp sockets. They stare blankly at one. to be at the very heels of immortality and to remain impervious!

The cabman left me at the foot of t steps and murmured, "Oh, Mr. Grainge house."

I ran lightly up the stairs and rang t bell.

"Mr. Grainger, please," I said to t butler with a tone feigning an everyd speaking acquaintance with great compo ers.

Mr. Grainger came out to meet n He wore a white sweater and a pair tennis trousers, and looked more like athlete than a musician.

Percy Grainger, known as "Only Cheerful, Sunny Composer Living"

HE HAD the appearanc vigor and spirit of a man of thirty though he had just passed his forty-eigh birthday—all of which goes to show th birthdays are indeed no ideal measur ments of age and are, therefore, co veniently ignored by certain of my sist writers and others who refuse to bud at the onslaught of birthdays, once the are entrenched at thirty-five.

Perfect health, Mr. Grainger believe is an important element in an artist's lif "I think the vigor of one's heart beat a strong determining factor in artist inspiration," he said. "If all musician walked very fast for two hours a da they would all be more inspired. Inspir tion is only a form of health.

"Chopin and Beethoven were gre walkers in their youth. Wagner was tree climber." (This fact is no assuranc

ver, that Wagnerian genius flows gh the veins of the present-day sters who have taken to tree sitting means of achieving great heights.)

nd," continued Mr. Grainger, "when ng man, Bach walked sixty or eighty each way to hear Buxtehude, the ist."

r. Grainger has a great admiration physical prowess. It is said that he hed with glee three men laboriously g a heavy piano on a hot day and g to get it around a little old stair-

It is also said that Mr. Grainger often open a door with his foot just n outlet for his energy. The story stirred my curiosity.

personally did not have the privilege eing him go through this performance, ough I was secretly hoping that I it enjoy such a sight.

NEITHER did the famous poser slide down the enticing banisters he was leading me to his fireproof n in the cellar.

nd what a treasure house that was! shelves on each side of the room fairly groaning under the weight of products of genius, jacketed in music es and in tile portraits.

ne set of shelves was marked, "Ella". is Mrs. Grainger—and here are ed her paintings. Everything was ly wrapped and piled up on the ves. Mr. Grainger displayed a very sense of order. He did not nervously off wrappers and fling them just any-re, but untied precious little bundles repacked them meticulously.

Ir. Grainger took out his manuscript, a Nordic Princess," so that it might reproduced for this page. This com-ition is dedicated to his wife and was ved for the first time at their wedding ch was held in Hollywood some two rs ago. It was again presented on of the recent programs over the Na-al Broadcasting Company. The in-ption, or program note, which appears the music sheets, has an ineffable ten-ness:

Now and then in Scandinavia may be

This Bridal Song was a Wedding-Gift to Mrs. Grainger

met a Nordic type of womanhood, half boyish yet wholly womanly, whose soft, flawless loveliness is like that of a fairy tale princess; whose wondrous radiance makes real for us the sun goddesses of the nature of myths; whose broad shoulders, amazon limbs, fearless glance, and freedom of deed and bearing recall the Viking chieftainesses of the sagas; whose cornfield hair and cornflower eyes awaken thoughts of the silent fruitfulness of the soil and of the lowly lives of land tillers: whose graceful ease in riming, painting, singing, dancing, swimming, is the all life-embracing giftedness of an unspoiled nature race.

Such an uncrowned princess may be found in castle or cottage, in town or country-side, amongst high-born or low-born alike; for hers is dead-rock aristocraticness of race, not mere top layer aristocraticness of class, culture, and breeding.

"To meet her is to have all one's boyhood fairy-dreams and hero-dreams come true.

"Such a one is my sweet wife-to-be—Ella Viola Ström—and to her this bridal song is offered as a wedding-gift and fondly honor-tokened in pride of race and personal love."

Yes, "the silent fruitfulness of the soil" expresses Mr. Grainger's own life. The words effortlessly flow from his lips and I am sure that there is the same silent rising of song within him. Neither does the sun *thunder* its largesse onto this little planet of ours.

While we were in the fireproof room,

THE dining room of the Mortimers' house was by no means an apartment reserved only for meals. It was the centre of the family life, where Alan Mortimer, its nominal head, read his newspapers, scribbled his infrequent poems and articles, or burnt the notes from editors that accompanied their rejection; where, moreover, the wife and daughter of the genius enjoyed what comfort they could in such corners as were not littered with manuscripts; and to which Edward Mortimer, the rising hope of the house, returned as little as was conveniently possible.

Just now it presented a very characteristic appearance. At the head of the large table sat Mr. Mortimer, senior, his forehead supported on his hands, forgetful of the world in his rapt perusal of a copy of the Evening Register, one number of which he had selected from a pile of others at his elbow. Among the matters to which he was blind was the fact that Miss Irene Mortimer, assisted by the maid, had arrived at that point of the table-laying for supper when it could be carried no farther while he occupied his present position.

"Let me see," Irene was saying to herself just under her breath. "Mother and father, that's two; me, three; Mr. Gibbs, four; Miss Trixie, five; and Mr. Edward, six." She made a hurried calculation. "And for to-night, Amy, as it's his party, you must lay Mr. Edward at the top, where father is."

Amy faltered. "I didn't like to disturb the master."

"I'll do that," said Irene, with the calmness of efficiency. She placed a hand upon the velvet-coated shoulder of her parent.

"Father!"

Mr. Mortimer grunted impatiently, without looking up.

"Father, dear," continued Irene, "I don't want to disturb you but you really are quite dreadfully in the way there."

At this the other raised his head, revealing a pale and thought-clouded face under a profusion of neglected hair streaked with grey. It was this, together with the absence of collar, and the velvet jacket, which combined to produce in Mr. Mortimer a vaguely "artistic" appearance, upon which his family rather prided itself.

"Eh?" he muttered. "I'm sorry, my dear, I didn't notice."

"Nobody's going to be cross," said Irene, "so don't look miserable. Here come over here for bit." In her pra tical way she h shepherded him a chair beside t fire before he h time to protes "Now you're right. And there are the rest of yo papers, though why you should want

d five at once beats
!" she exclaimed.
'My dear!" Touched on his enthusi-
n, the spirit of the elder Mortimer was
used to instant activity. "It's this won-
rful new series of articles that I told
u about yesterday——"
"I believe," said Irene, "you did men-
n something of the kind. Are they nice?"

"They're wonderful! There are to be six altogether, ending to-night. That's why I've been running through the first five again before the paper-boy comes. He's about due now."

Irene was instructing Amy in whispers, and gave but a half-hearted attention to her parent's rhapsody. "Are they funny?" she asked, absently.

Mr. Mortimer acknowledged this only with a glare. "The title," he said, "is 'Personality and Crime.' Of course, that's old enough. But it's the point of view. There's one passage here that I was reading to your brother that seems to me absolutely inspired. Whoever wrote it is a genius."

"Don't they give the name?"

"No." Mr. Mortimer was turning over the pages. "It's only the last that is to be signed. We might know any minute now. Ah! here it is. Speaking of temptation, he says——"

But what he said was not destined to be read aloud just then, for at that moment Amy, who had opened the door, stepped back to admit the enthusiast's wife. Mary Mortimer was a woman who might once have been beautiful, and whose face, lined with years of struggle and anxiety, had still both charm and dignity. Her manner was quiet to repression, but every now and then a keen observer might have detected signs in it, a catch in the voice, or a nervous movement of the hands, that betrayed a great and growing anxiety.

"MR. EDWARD isn't back yet, is he, Amy?" she asked, as she entered.

"It's only just past his time, mother," Irene interposed, before the maid could reply.

"Of course, dear. Still, if he should be at all late we can wait supper a little."

Irene scouted the idea. "As if Ned would be late to-night, of all nights!" she cried.

Here Mr. Mortimer, who was suffering from the natural irritation of the frustrated reader-aloud, broke in peevishly.

"What on earth is to-night that there

should be all this great fuss about it?"

"Father!" Irene turned upon him with mock indignation. "You don't remember that it's the birthday of your future daughter-in-law!"

"You mean what's-her-name?"

"Exactly. In other words, Trixie. The future Mrs. Edward. This banquet is in her honor. She's coming, and young Gibbs from Edward's bank. It's a party."

MORTIMER groaned. "Oh, dear!" he complained. "I suppose that means a collar, eh?"

"Well," Irene favored her parent with an ingratiating smile. "If you could rise to that display of magnificence——"

As usual she gained her point. "Humbug, I call it," said Mr. Mortimer. But he rose as he spoke. "Don't let the boy pass while I'm upstairs, that's all," he commanded, at the door.

Mrs. Mortimer had seated herself by the fire. At the last words she looked up quickly, almost suspiciously. "What boy?"

"Oh, nothing. Only, you know how Ned is. He's the wonderfullest person in the world, of course. But he is a bit vague for a bank clerk, isn't he?"

"You ought not to say things like that, Irene."

"Sorry, mum. But you know how often Edward gets moods. Last night for instance, when father would read aloud to him out of the Evening Register. He looked so queer. Almost as though he were frightened of something."

"Nonsense!" Mrs. Mortimer rebuked her daughter with unusual sharpness. "Why should he be frightened?"

"That's what I say. But he did go perfectly white. When father was reading

upset Edward far more than he sh

altogether a bad sort, either. It
have been terrible for his people!"

"Oh!" Mrs. Mortimer answered
and her voice was startling in its su
passion. "That's what one always
without realizing in the least wha
means! Can you fancy them, as I
done lately, that evening when he d
come home? All night they waited,
he didn't come. And in the morning
was a telegram telling them what
happened. Up till then they might
saved him. Perhaps one may even
suspected, and not dared to speak.

There was a
ment's pause
Irene tore the
velope.

"Oh, nothing," said Irene. "Only the evening paper. Father's so queer," she added. "Reading seems to him quite as if it mattered."

The elder woman had relapsed again, and was staring into the fire. "Your father's an exceptionally clever man," she said, with mild reproof.

"That's what's the trouble," answered Irene. "If he wasn't a genius he'd be able to do something. And Edward's just such another. How long d'you suppose he'll stay at that bank?"

"Irene!" Once again Mrs. Mortimer looked up quickly, and this time the sudden fear on her face would have been patent to anyone less absorbed than the girl. "What—what do you mean?"

that bit about criminal temptation."

"Temptation!" it was the face of Edward's mother that was white now. She screened it from the girl with a hand that shook ever so slightly.

"I THOUGHT perhaps Edward was ill," continued Irene, thoughtfully. "Because come to think of it, he hasn't looked himself lately. Perhaps they work them too hard at that bank. He never tells us anything that goes on there, does he?"

"No, nothing," said Mrs. Mortimer, without turning.

"I believe," went on Irene, "that that affair of poor young Hughes running away

then it was too late. He was disgrac
his very name was to be hidden a

listened. After a moment a man's
e was audible in the passage. "I
ght so. It's young Gibbs from the
k; he'll liven us up."

IT WAS clear that the
ng gentleman who was immediately
rwards announced was of a character
to belie her words. Mr. Gibbs, albeit
tender years, and just at present a
erer from slight nervousness, was
rly one accustomed to shine in so-
y. He shook hands briskly with
two ladies.
"Hope I'm not too early," he said.
ut I knew old Ned would be here
how."
"Then you knew wrong," said
ne, archly. "Edward hasn't got
k from the office yet."
Mr. Gibbs was astonished at

"Oh dear me, no! Nobody brought me."

they sent him off as soon as he arrived."

"I didn't know you business men got holidays like that," said Irene.

"We don't as a rule, worse luck. But of course this time there was a reason for wanting the clerks out of the way. Someone from headquarters to go through the books. What you might call a surprise party!"

Mrs. Mortimer had been considering him attentively.

"Did they suspect anything wrong?" she asked now, in such an unexpected tone that Gibbs started.

"You never can tell with these chaps," he said. "They get ideas, that's where it is. Perhaps it would be some little wrong entry they'd find; perhaps nothing at all. But they're never satisfied."

"Thank you." She turned away as though the subject were closed. But on Irene's attention being distracted by the entrance of Amy, Mrs. Mortimer again approached the visitor. Her manner now was oddly timid, almost appealing.

"Forgive me, Mr. Gibbs," she said. "But will you tell me something quite honestly? How does my son get on—with them?"

The kindly Gibbs looked his embarrassment

"Why," he protested, "Mortimer's a rare clever chap; we all know that in the office. And one of the very best."

"You mean"—her eyes searched his face—"that they don't like him?"

"Oh, not so strong as that. But—well, I suppose we all have our little prejudices."

"But you know of nothing definite that they could have against him?"

"Certainly not," protested poor Gibbs. "What could there be? Oddly enough, though," he continued, becoming communicative, "Now Ned isn't here, I was going to ask you if he'd had any little bother on his mind lately."

Irene had again joined the group. She was the charming hostess.

"Edward is engaged to be married," she announced, proudly.

"I meant worse than that."

"Well, really, Mr. Gibbs!"

"Oh, of course, I didn't mean—" The visitor had become pink with confusion but friendship urged him forward. "Only two or three of us noticed that he's been looking sly and—and anxious these last few weeks."

"THERE, mother!" Irene was beginning. "What did I——"

But to her great astonishment Mrs. Mortimer interrupted her.

"It's kind of you to ask," she said; "but, indeed, we know of nothing."

"Well," answered Gibbs. "I'm sure I'm pleased to hear that. It can't be anything serious, or you'd have noticed before anyone."

"Yes," said Edward's mother, earnestly.

ter Ned hadn't been at the bank all day;

A Plea for Continued

"*DAMN the torpedoes, go ahead!*" "*Don't shoot till you see the whites of their eyes!*" "*Till the last man falls!*" "*Millions for defense, but not one cent for tribute!*"

History keeps its hold on the interest of generation after generation through the drama of individual heroism personified by momentous phrases that breathe the very living spirit of courage. The great material accomplishments of man often sink low by comparison with the great intellectual inspirations of leadership.

Far be it from the editors of this magazine to assume a rôle in behalf of the great Radio public which has not been duly won by popular acclaim; but equally far be it from us to refrain from pointing out paths for service which readers of our magazine may take up and develop into close-to-holy crusades. The one great thing about Radio is that it is always dealing with people and with what they are getting out of life, spiritually as well as materially. With audiences vaster by many millions than any other means of communication either so immediate or so intimate, no one, however great or small, can approach a microphone without a real fee'ing of reverence—without an impressive realization of the mighty power he or she is wielding for better or for worse on human beings.

It matters little the type of mission, so long as the purpose is worthy. Entertainment that is clean and that brings enjoyment into the lives of people of all ages, sexes a races is indeed a God-like service and is not to be laugh off lightly as relatively inconsequential. Making peopl sick and well—feel happy is a service as worthy of hon rolls and decorations as are the more conventionally rec nized services of great educators, statesmen and batt scarred warriors. We do not live for wars, for sorrows a for drudgery. We live for pleasure of body and mind, a our teachers of religion, culture and enjoyment are at c in helping attain the pleasures of life minus only th follies which are at times erroneously labelled pleasures

Until now Radio has supplied its own censorship a from the standpoints of both morality and non-partisansh it has performed in a manner that places it head and sho ders over moving pictures and the press, both of whc majority virtues have been sullied somewhat by a minori salaciously inclined. To be sure there has been some ta as to whether Radio broadcasting is becoming dominat by too much outright advertising but that issue is practic and not ethical in nature. Moreover in the end, Radio pr grams whether sponsored or sustaining must meet wi popular approval or die of their own deadliness—again matter of practical control.

But what guarantee has the American people that th same effort at cleanliness and the same impartiality on co troversial subjects will continue to endure? What insu ance has the public against abuse of a power already gre and steadily growing greater in the number influenced, the degree of influence and in the variety of life-matters i volved? May not the greedy eyes of monopolists, keen conscious of the rapidly increasing commercial possibiliti in the broadcasting business, soon seek to create monop listic control—openly or if need be covertly?

MAY not great financial or industrial interests soon reco nize in domination of broadcasting a new and poter means of extending their power? May not religious grou with tremendous resources, or fanatical but well financed fa tions (such as the Reds of Russia) see in Radio domination new, relatively inexpensive but very effective means c backing their chosen "cause"? May not political power that-be or even sinister influences such as bootleggers an racketeers behold in Radio an insidious means of inocu lating an unsuspecting public with infectious propaganda

The threat of such things may not be imminent, but th threat should not be overlooked because of a temporary feel ing of safety. The time to guard against evil is before th devil has done his work; for then it is often too late.

The press of America in times of peace has never beer subject to official censorship of any kind—praise be. It ha always possessed leaders of men so that here in America nc policy such as now obtains in Russia and in Italy has ever been contemplated. As a result, the publishing business has grown into a great and honored profession with a deep sense of its own responsibilities to the public. Publishing has prospered because of this freedom of the press. Publishing,

Freedom of The Air

withstanding the few degenerates who have tried to soil reputation, has grown into a mighty influence on the es of people. All viewpoints on all subjects have found outlet and the press, thank God, has never been domin-d at the source by monopolistic control. Anyone of any lt, creed or race with the inspiration and a moderate iount of capital can publish a magazine or a newspaper—d his success or failure depends on ability to serve the blic in a manner it approves.

When monopolistic possibilities appear on the horizon, in the recent case of newspaper buying by the Inter-tional Power & Paper Co., not only the public but the overnment and the newspaper profession itself rises up in ger to thwart any possible hidden control of the press. so with a view to providing against monopolies the nited States Postal Law provides that every six months vners of magazines and newspapers enjoying the second ass mailing privileges must publish a sworn statement of vnership showing in detail the identity and address of ondholders and stockholders owning one per cent or more. iblishers are criminally liable for any failure to present e true facts with respect to ownership and control.

WHAT has all this to do with Radio? Just this: Before a lot of well meaning but for the most part illy informed id meddling politicians take it into their heads to crusade gainst possible monopolies in broadcasting, the present wners of broadcasting stations should develop enough adership—passionate if necessary—to regulate their own fairs along such lines as will positively insure the Ameri-an public against even partial monopolies in broadcasting nd which will provide the Federal Radio Commission with nuch valuable and sound help in the matter of renewing roadcasting licenses so that as a matter of good public olicy true freedom of the air will be preserved.

It would perhaps be presumptuous on our part to lay own a code of principles, but the very subject of this edi-orial compels us to make these few suggestions: (1) Every roadcasting station should publish in a newspaper in the ity in which it is located, at regular six months' intervals, complete statement of ownership such as is now made by ewspapers and magazines. This same statement should be iled with the Federal Radio Commission and broadcast ver the station at a prescribed day and hour every six nonths to the Radio audience. (2) No company or interest hould be allowed to own more than a certain number of tations. (3) No one chain should be allowed to buy or ease over a given percentage of the total time of any given station. (4) No station should be allowed to lease out more than a given amount of its total time to chains, regardless of the number of chains, but this percentage should be higher than the amount leasable to any one chain. (5) No station should place more than a fixed percentage of its time in the hands of any agency or selling organization to sell unless it be an exclusive selling agency handling only a limited number of widely scattered stations.

We could go on, because there are many phases of possible monopoly which need conscientious and highly intelligent study for the good of broadcasting and for the good of the public. Radio broadcasting is not like the press in that the total number of stations licensed must be limited and the total amount of time which can be sold—and particularly the most sought-after hours—are definitely limited. All of which means that anti-monopoly measures are needed even more in broadcasting than in the press. Here's believing that the owners of broadcasting stations will do full justice to their own responsibilities in this matter of monopolistic control. Here's offering them the full help and cooperation of RADIO DIGEST and its great Radio audience in the realization of every high-minded objective. But if there be subtle undercover efforts to arrive at monopolistic ends on anybody's part, here's promising the full and fiery lash of an organ of the press which has chosen as its inspirational function the serving of America's great Radio public and protecting of the honor and reputation of broadcasting.

Let's hope that broadcasting will produce its own Deweys, Hales and Farraguts and its own Franklins, Roosevelts and Lincolns to carry on by deed as well as by inspiring words of leadership against the possible invasion of hoary-headed monopoly.

RAY BILL

Good Diction

Radio Demands Perfect Articulation, Says Dagmar Perkins, Expert Advisor on Committee for Diction Medal Award

By BEATRICE LEIGH

HAVE you ever stopped to consider why you like your favorite Radio artists?

Why does the busy housewife cease from her toils long enough to hear the banter of Amos 'n' Andy, the guides to shopping, the hints for beauty? Why does the speeding tourist slow down so that Rudy Vallee may be heard from the portable set? And why does the husband cancel his engagement when he suddenly remembers Floyd Gibbons?

Believe it or not—if these and many other popular artists did not know how to put their voices to work as instruments of expression, their programs would fall on deaf ears.

This is the opinion of Dagmar Perkins, President of the National Association of American Speech and member of the Committee of the American Academy of Arts and Letters which presented the 1930 Gold Medal to Alwyn Bach, NBC announcer.

Miss Dagmar Perkins, Exponent of Perfect Diction

THAT the Radio audience is receptive to pure speech is evidenced by the enormous audience which tunes in on Miss Perkins' daily programs over Radio Station WGBS, New York City. Her silver-lined voice, her effervescent personality, and her cheerful disposition, combined with her faultless diction, have been the keynote of her success.

"The rapid growth of Radio," declared Miss Perkins, "has done more than any other agency to arouse the American public to an appreciation of good speech.

"Granted the speaker has something to say—and if he hasn't he should not be allowed to annoy the public"—(neighbors, please heed)—"the first requisite on the Radio, especially, is clarity of diction so that the listener may hear clearly, without strain, whatever is being said.

"The second requisite is good tone of voice to please the ear of the listener."

This second step in the direction of good diction is a very important one. Frequently, lectures, speeches, sermons and readings "do not reach that thing whereto it is sent" simply because the voice is faulty in one way or another.

"Then come the other branches of vocal technique," continued Miss Perkins. "There is the change of pitch which is so essential, for even a good voice may become monotonous unless the pitch is varied. Then there is the inflection or shading of the voice, the tempo which changes as the subject or occasion demands, the emphasis, and last, but not least, the choice of words."

Miss Perkins has long been recognized as an authority on the subject of good diction and it is interesting to note that she was invited to coach the voices in the Winthrop Ames' productions, "Iolanthe," "Pirates of Penzance" and other shows. The results of her instruction and training were so successful that in many instances, librettos were not necessary.

Mr. Robert Underwood Johnson, former American Ambassador to Italy, and Member of the American Academy of Arts and Letters, who appeared on one of Miss Perkins' programs had this to say about her work:

"I AM deeply interested in the unique work in speech production and Radio broadcasting which Miss Dagmar Perkins is carrying on so successfully. Nothing is more important in education, or more neglected than good speech. Miss Perkins' own voice and diction are so beautiful that one could wish she might be heard by every teacher and pupil in the public schools and by everyone who has occasion to address the public vocally."

Hamlin Garland of the American Academy of Arts and Letters says:

"That the Radio is making us ear-

(*Continued on page 124*)

Washington talks to the Nation

Senator Arthur Capper from Kansas

Some Senators and Congressmen quail before the mike—Others like it.

WILLIAM H. DOHERTY

THE microphone now is deeply imbedded in the consciousness of public men as a medium for moulding public opinion, and seems destined to eliminate the lecture platform except in the cases of those who require the stimulus of personal, intimate reaction for them to exert their best efforts.

And the number who demand this personal touch with their hearers is growing smaller, at least in this writer's opinion. There are many reasons for this, but the greatest, or at least the one demonstrated most forcibly in recent months, is the convenience of the little metal discs as compared with tedious, time-wasting journeys.

WHILE Radio engineers are striving to bring television to the point where all may witness as well as hear programs, Senators, Representatives and government heads probably would prefer the development of a system whereby they might see their audiences. The fear of the microphone usually vanishes after the first appearance, but it is difficult for the average speaker to construct his audience in his mind's eye.

Senator Capper of Kansas is one man who does not need the stimulus of an audience. His Monday morning talks for feminine listeners have been a regular feature since Congress convened.

Senator Borah of Idaho, one of the most noted orators in Congress, is known to dislike the microphone, not that he does not realize the importance of speaking to a nation-wide audience, but because he receives no inspiration as in a personal appearance.

Oliver Owen Kuhn, managing editor of the Washington Star who introduced Senator Borah when the latter initiated the National Radio Forum series a year and a half ago, said Senator Borah's "dislike in speaking at a mere piece of metal is evidenced during the course of his addresses, but as all Radio listeners can testify, there is no better Radio speaker in America today. He does not dread the microphone so long as a great audience is before him. He then feels the personal touch—gathers all those strange inspirations that come from the audience to any speaker."

Andrew Mellon, the Secretary of the Treasury, has an opposite reaction to the mike. Diffident, almost shy, Secretary Mellon actually speaks better over the air than before audiences.

To those who, like Senator Borah, are not at their best unless inspired either by friends or hecklers, Senator James E. Watson of Indiana, the Republican leader in the Senate, has a method that might be commended to Radio speakers.

"I usually think of a baseball park at a World Series game," he said, "then magnify the audience as far as the eye can reach."

FOR Senators Pat Harrison of Mississippi and Hiram Johnson of California the ether waves at first proved a difficult medium for conveying their ideas. Now they can look the microphone in the eye and orate with all the vehemence and gesticulations common to their technique in debates on the Senate floor. Practice is the answer, and their present success probably will be matched by others who are certain eventually to acquire a confident microphone manner.

Two of the most forceful addresses

(*Continued on page 124*)

RADIOGRAPHS

Intimate Personality Notes Gleaned from the Radio Family of New York's Great Key Stations

By Rosemary Drachman

MADGE TUCKER, small and blonde, whom Radio audiences know as "The Lady Next Door," is certainly well named. For no matter when or where you are in the NBC studios, Miss Tucker is pretty sure to be "just next door". In addition to "The Lady Next Door", which she originated, writes, directs, and acts in, she has charge of all juvenile Radio activities at NBC. And if there is anyone who doesn't think that auditions, rehearsals and broadcasts involving more than 100 children a week between the ages of four and fourteen is enough to keep one person busy, Miss Tucker cordially invites them to change places with her for any day in the week.

Madge Tucker, "The Lady Next Door"

Personally, she loves it. As I watched her rushing about the studio at a rehearsal of "The Lady Next Door", among a room full of noisy young actors, she seemed to be having the time of her life. And she was. "It's all such fun", she confessed afterwards, "even if it doesn't leave me much time for anything else".

Since she first came into Radio work, six years ago, she has led hundreds of thousands of children to the mike. Seeming little more than a child herself with her ever bubbling enthusiasm and perpetual delight in living (and she isn't so much more, even as Father Time records such things!), she has discovered more juvenile stars than any other person in the country and many of her pupils have achieved fame not only on the air but in the Broadway theatres and the Hollywood studios as well.

She is continually looking for new child actors for "The Lady Next Door". Personality is the primary requisite. Of course, the child must have a good Radio voice, but the mere ability to sing or recite well counts for little with Miss Tucker. She writes her sketches especially to fit the children who are playing in them. Throughout the series of "The Lady Next Door" the children are called by their own first names, and it is Miss Tucker's theory that if a child reads a line wrong twice in rehearsal, it's the line that's wrong and not the child. Accordingly the line is rewritten then and there to suit the youthful artist. "I want them to be just what they are supposed to be," declares Miss Tucker, "a group of children acting naturally."

Miss Tucker's original ambitions were toward the theatre. She was born in Centralia, Ill., and graduated from George Washington University, Washington, D. C. As soon as she was out of college, however, she rushed to New York and enrolled for a course at the American Academy of Dramatic Arts. That completed, she found her first opportunity in a stock company in Washington. Then, just as she was comfortably started toward a stage career, along came the Radio. At first Miss Tucker didn't take the new medium very seriously. But like most members of a stock company she had no objection to picking up a few extra dollars. She appeared on a few programs at station WRC in Washington. Then she directed a children's program. Then another. And another. Almost before she knew it she was completely out of the theatre and into Radio, for better or worse.

It soon proved to be better. When NBC was organized Madge Tucker became the first official woman production manager. For a long time her work was mainly in the continuity and production departments. Then she began going on the air herself in connection with various children's programs, and a year ago last September she scored an outstanding success with "The Lady Next Door". In addition she conducts the Sunday Morning Children's Hour and appears on several morning programs.

For the few hours that she is permitted away from the studio she has two hobbies. One is reading in bed and the other is attending first nights in the theatre. When her work will permit she never misses a New York opening, and in the summer when shows are opening out of town she will cheerfully ride for miles in order to catch a new production on its try-out night. For months after she became "The Lady Next Door" she was robbed of her other hobby because she had to devote all of her spare reading time to children's literature. She is not married.

Peter De Rose

Ludwig Laurier

LUDWIG LAURIER, who sends graceful dinner music to you each evening except Sunday over WEAF, and soothing slumber music each night over WJZ, came to America to be a druggist. When the quiet, smiling man with the gentle eyes and the iron grey hair was a lad of only thirteen he left his native Speyer-on-the-Rhine and came to this country to join his brother and brother-in-law. They were engaged in the drug business and young Ludwig was supposed to follow in their footsteps. He brought the violin he had been practicing on since he was eight years old with him, however, and by the time he was seventeen he was out of the drug business and in the Buffalo Symphony Orchestra. Somehow he never got back to the drug counter.

For awhile he remained in the Buffalo Symphony as second violinist. Then he became first violinist. Later he left Buffalo and went to Saratoga where he became associated with an orchestra conducted by John Lund and possessing a then unknown 'cellist named Victor Herbert. When he left Lund other offers came to him, but by this time Laurier had decided that music was to be his career. In that case he needed more training. And where else for a German to get musical training but in his native country?

In Berlin he became first violinist with the Philharmonic Orchestra. For several years he remained in Germany, playing and studying, and then, the training completed, he was faced with another problem. Where to spend his life? Europe the old world, he decided, was the proper place for training, but America, the new world, was the place to build a career. Accordingly he returned to New York.

He was fired from his first job, but he laughed when he told me about it.

"Fired?" I repeated.

"Yes," he explained, "It was with the Metropolitan Opera. They employed me as one of the first violins. And they kept me for sixteen years. It was during Toscanini's time and for six years I was manager of the orchestra. "Then,"—he chuckled merrily—"they fired me."

I forgot to ask him if they gave him a letter of recommendation first, but at any rate he didn't seem to have much trouble finding something to do. Within a very short time he was associated with Dr. Hugo Reisenfeld at the Rialto Theatre in New York. Reisenfeld probably did more than any other man to introduce good music into the moving picture theatres and Laurier was his right hand man. It was work that he liked, for Laurier has never cared for jazz. As a boy on the banks of the Rhine it was the melodies of Rubinstein, Beethoven, Wagner, Strauss and Mozart that filled his dreams.

In the Berlin Philharmonic and at the Metropolitan those dreams were fed and with Reisenfeld they began to bear fruit. When he came to Radio three years ago as conductor of the NBC Slumber Hour he brought them with him, and the thousands who tune in at eleven o'clock each night for an hour of soothing rest and beauty have justified his faith in them. A year and a half ago he became conductor of the Black and Gold Room dinner music which he conducts along the same lines.

He is married and has a nineteen year old daughter. He lives in the city, but whenever he can find the time he hurries out of it to go fishing, or for a long tramp in the woods.

Ludwig Laurier

May Singhi Breen

FIVE-FIFTEEN in the evening in Studio F at NBC. Outside the heavily curtained windows, the towers of New York in the soft light of the sinking sun. Inside, the big, bare studio with the blue and grey walls. In one corner a baby grand piano and a man and a woman.

First the woman. She is sitting on a high stool in front of a microphone with a ukulele cuddled in her arms. As she sings softly into the mike she strums the ukulele with a master touch. For she is May Singhi Breen, of Breen and de Rose, whose popular ballads go forth over the air five evenings a week, and she is probably the greatest "uke" artist and authority in the country.

According to the story current around NBC she first saw a ukulele when a friend gave her one for Christmas in 1922. At that time May was so little taken with the gift that she tried to exchange it for a bathrobe. It was only when the store refused to agree to her little plan that she decided she might as well learn to play the darn thing. But that was only the beginning. Shortly after she had mastered the instrument herself she originated the now well-known ukulele arrangement in diagram which enables persons with no knowledge of music to strum out almost any popular tune. For some reason she was not murdered.

Instead she prospered. Music publishers were cool toward the diagram when they first saw it but finally one of them agreed to take a chance and gave her one of his poorer new numbers to try it out on. The number became a hit almost over night and her reputation was made. She opened a regular office for making ukulele arrangements and transcripts and soon had the largest ukulele class in the country as well as the position of ukulele instructor in several fashionable schools about New York City.

She entered Radio seven years ago with a girls' orchestra. Soon after that she met Peter de Rose. She liked Peter's playing and Peter liked her. The team of Breen and de Rose was formed, and then May became Mrs. de Rose in private life.

Shortly after she became famous as a ukulele artist she made a tour of the country playing vaudeville and moving picture theatres. Because she had a strange middle name, Singhi, and played a ukulele, snap-judging theatre managers advertised her as a native of the South Seas. Later they had some tall explaining to do when the "Ukulele Lady" turned up with blue eyes and a light complexion. As a matter of fact, she was born in New York City of Italian descent, and Singhi was her mother's family name.

She began playing the piano at the age of four and made it her profession until the kind friend presented her with the famous Christmas present. She was educated in private schools in New York and Europe. When she isn't busy playing or rehearsing, she makes ukulele arrange-

MARCELLA

Little Bird Knows All—Tells All—Ask Her about the Stars You Admire

HAVE you the loose ends of an unfinished romance tucked away in your heart? If you have, take courage and listen to the story of how Radio united a young couple after a long separation. Young Cupid had begun winging darts between John Seagle and Helen Peters when they both attended high school in Glens Falls, N. Y. Then each went to a different college. When John emerged with cap and gown from the University of Missouri, he had to set about the important task of buttering his own bread. Helen, on the other hand, with her wider interests, formed new friends and associations and in a short while they had drifted apart. But time exuded its balm and healed the broken hearts. Then one day Helen heard a solo over the National Broadcasting Company, and who was the singer but John himself. It was a song she knew well and for which she had played the accompaniment many times years before. After the program he received a long distance telephone call from Helen. The wedding was held not very long ago in Glens Falls. Continue to listen to the Radio programs, you upon whom love has left its scars, and some day—well, you never can tell.

* * *

Mrs. John Seagle

NOW, V.R.S. how could you? Just for that affectionate letter, here are Al and Cal Pearce of KFRC. They look as if they had something original up their sleeves. Al has a hand in the Golden State Blue Monday Jamboree. This program has aided much in making Monday a rainbow day. Al is evidently the business manager of the partnership as it is largely through his efforts as an active worker that the Pearce Brothers have climbed to the top in Radio fame on the Pacific Coast. For they're Barnacle Bill, the Sailor. Al is also Master of Ceremonies of the Impromptu Happy Go Luck Hour. It's harmony and personality plus.

Al Pearce

Cal Pearce

PAGE 114 of this magazine, Miss A. B. C., contains more than a little sumthin' of your Mystery Announcer. Ballots from every nook and corner of Pennsylvania, voting for him as the most popular announcer, have flooded the offices of Radio Digest ever since our contest started last March, and he has received 35,039 letters during the nine months of his broadcasts. So watch page 114.

* * *

JERRY WILFORD, known as "The Vagabond of the Air," has endeared himself to his many thousands of listeners. He handles the "Midnight Hour" over KSL, Salt Lake City, and during this program his remarkable deep bass voice booms out across the states—yes, he's the man "who keeps Western America awake!" Jerry was invited by the Victor Phonograph Company to record "When It's Springtime in the Rockies," the ballad that has won for him nationwide fame.

* * *

IT IS my pleasure, T. E. O., to refer you to the October pages of Radio Digest for a full-fledged account of Arabesque. Reynold Evans takes the part of Achmed.

* * *

WALLACE BUTTERWORTH, Chicago announcer of the NBC, earned his first money by selling shoes in a store at Wallingford, Pa. It is hard to believe, Alice M., that this is the man who substituted for Bill Hay as introducer of Amos 'n' Andy, while Bill was vacationing. He obtained funds from his job as clerk to train his voice and with his weekly salary bought two phonograph records and a seat for the performances which would be held in Philadelphia by the Metropolitan Opera Company. He used to run for blocks to get a glimpse of Caruso when the latter made frequent visits to the Quaker City. Butterworth has a very fine baritone voice. He made two successful concert tours through the eastern part of the United States and Canada. Then he became concert manager in Chester where some time before he had studied in the Victor recording laboratories. One day Butterworth stopped in at the NBC studios in New York to visit a friend and was persuaded to have an audition. He was hired and was transferred to Chicago shortly after that. Quite a career, eh, what? And then—of course—there's the prominent part he played in the

John Seagle

Jerry Wilford

broadcasts of the endurance-flying Hunter brothers and in the National Air Races programs.

* * *

CARRIE, by this time you've seen all about "Sarge" Farrell in October's Marcella. Sarge contemplates visiting seventy Radio stations in that many cities and I expect to get his schedule so that his followers will know where to tune in.

* * *

THE Radio field is a veritable marital mart. Here's another of those things, by Jove. It's Herbert Polesie, behind the fun of the Van Heusen Program over CBS. The young lady in question is a society girl from Weehawken. Herb himself hails from Hollywood—and was it Kipling who said "East is East and West is West, but never the twain shall meet"? Herb is also one of the creators of program ideas at the Judson Radio Program Corporation. He is best known as "Henry" of the "Henry-George" series over the CBS.

* * *

THIS news is for you, Elizabeth. It's John B. Gambling, the only man who knows how to get people up in the morning. The sleeper may be aroused by an alarm clock when it sounds the dreaded hour, but he can always reach out lazily for it and silence its voice, and then turn over on the other side. But when Uncle John's cheerful, sunny voice is heard, all of slumber's resistance is broken and the daily dozen is performed. Thousands of letters have been received by Uncle John, Physical Director of WOR, from persons who used to agree with Sir Harry Lauder—"Oh, it's nice to get up in the mornin', but it's nicer to lie in bed." And won't Uncle John's voice be especially welcome on these cold and murky mornin's?

AVEZ-VOUS *faim—Madame, Monsieur?* All of which only means that if you are hungry, ladies and gentlemen, and that if talking about food helps any, just make the Radio acquaintance of the Premier Chef (Charles Premmac). He's on the CBS every Tuesday evening.

* * *

ELIZABETH, did you say you wanted more gossip about announcers on WOR, NBC, CBS and WCAU? Just stop, look and listen! Lewis Reid, come forward. Drama is his middle name. He studied dramatic technique and prepared himself thoroughly for a stage career, adding to his long list of accomplishments, singing and playing the piano and trombone. And he was even among the talented group of performers who accompanied Elsie Janis on her triumphal coast to coast tours of the United States and Canada a few years ago. His resonant voice has been heard regularly over WOR since February 1928. And when he is not before the mike, he is pounding off Radio plays on the old typewriter.

* * *

THIS is about Eddie Thorgerson of the very big voice, Mrs. L. S. No—he's not married. His has been a storm-tossed career, having sailed for many years on the restless seas. He was also employed as a cow hand on Nevada, New Mexico and California ranches and served as a tourist guide and newspaper reporter. Eddie was born in Elizabeth, N. J. in which state his parents are still living. He is twenty-six years of age and has decided to settle down to a career in Radio. Wave lengths are, after all, less turbulent than the seas.

Upper: Wallace Butterworth, Edward Thorgerson
Lower: John Gambling, Frank Singiser

Charles Premmac

* * *

FRANK SINGISER is one of the youngest announcers over the NBC. Did I hear someone say that Radio was no place for a minister's son? Well, Frank's father is a Baptist minister, and not only that, but Frank also is qualifying himself for that noble profession by attending the Newton Theological Institute in Massasetts during the winter. It still remains a question as to which will have the stronger calling—Radio or ministry. At the age of ten Frank circled the world with his Dad and since then he has lived in most of our forty-eight states. He started his Radio career as a continuity writer and announcer over WGY, two years ago, and his work there won such recognition that he was drafted into the New York studios of the NBC. Among his wide range of occupations I find that he was physical instructor at a boys' camp, store clerk, ranch hand and that he ran a laundry route. At Brown University, he distinguished himself in his studies, dramatics and soccer. He is twenty-one and unmarried.

* * *

Word has just come from Boston that Howard Butler, formerly with WEAF and WOR is now announcing at WNAC Boston. His dainty little wife, Edith Thayer, commutes every week from Boston to New York just to do Show Boat. She has been Jane McGrew with this feature for 'most a hundred and twenty weeks!

Hitting The High Spots With Robert Brown

The Flying Announcer

By Natalie Giddings

IF ONE announcer were to be selected from among the independent Radio stations as most truly representative of the adventurous life the average listener imagines for every announcer, Robert Brown of the Crosley Radio stations, WLW and WSAI, probably would edge out all comers.

THE average Radio listener invests announcers with the same cloak of glamour that covers policemen, railroad engineers and firemen in the eyes of little boys. Men and women who sit at home in a quiet living room listening to broadcasts from airplanes, from the Washington monument, from submarines, from motor boats, from race tracks, and from ring-side seats at world championship prize fights, picture every Radio announcer rushing about in a world that holds only such pulse-stirring events. Few announcers, however, as most of them will tell you with tears in their eyes, ever have any excitement at all! Few of them ever get outside the quiet—if not peace—of a Radio studio, for not all of them are fitted by temperament or ability to fill the demands of "spot" broadcasting . . . reporting events as they occur.

Robert Brown of WLW and WSAI, is one of the few announcers whose life is a succession of exciting broadcasts. WLW listeners, in fact, have come to associate Brown with excitement to the extent that whenever he announces the station's call letters, nine out of ten listeners think WLW is about to put on a stunt of some kind. At WLW for three years, he has had more "breaks" than all the other announcers put together, always excepting the football and baseball dramas at which Robert Burdette officiates.

The reason for this undoubtedly lies in the fact that Brown is never at a loss. Most loquacious of all the Crosley announcers, he never fumbles for words. When he is not on the air, he talks just for the pleasure of hearing words come tumbling out of his mouth. The larger the words and the faster they tumble, the happier is Brown. He is irrepressible. On or off the air, he talks at top speed, and almost at top voice. He has an amazing fund of information on every subject imaginable. He has an additional fund of information even more amazing because it quite evidently comes out of his own head. For a year he studied French to improve his pronunciation. Now he is bi-lingual, and lapses into long harangues in a mixture of English, French, "pig latin", and Polish, which he picked up while an announcer in Buffalo. He can embroider any incident into an anecdote.

It did not surprise anyone, therefore, when Powel Crosley, Jr., president of the Crosley Radio Corporation which owns the two stations, selected Brown to go with him to Sarasota, Fla., to help him broadcast the landing of a giant tarpon in the waters of the Gulf of Mexico on June 18th.

At the microphone in Mr. Crosley's fishing boat, equipped with radio transmitter and appropriately christened "Little WLW," Brown talked constantly for almost an hour. Listeners and critics immediately dubbed him "a new MacNamee" and heaped upon him all sorts of praise for his glowing description of the scene and of the struggle with the fish that finally was pulled into the boat. Both stations WLW and WIL in St. Louis carried the story.

She is an Acadian who received her early training in Quebec and who studied piano in Europe under the tutelage of several eminent teachers in Paris and Rome.

Old Man Superstition Is Thrust Aside at WBBM

WBBM, key station for the Columbia Farm Community network, is no place for the superstitious these days.

The organization is in the midst of its third expansion within a year. Carpenters and electricians are everywhere, and he who goes from department to department must flaunt Old Man Superstition by walking ladders—not one ladder, but several ladders.

Formerly the occupants of the major portion of two floors in the Wrigley building, WBBM and the Chicago division of Columbia is now preparing to take over a large section of the main floor. While the expansion cannot be completed for several weeks to come, the miles of wire and the intricate equipment that must be moved necessitate an early start.

* * *

Dick Dixon, KGER program manager, wanted to be an artists' model. But he grew short and stumpy so that was out. So he took up the study of piano and organ.

Boyhood ambitions of others on the KGER staff . . . Kitty Brown, comedienne, took a pre-medic course, and she still knows most of the joints . . . Manager Bill Ray wanted to be conductor of a street car but the hoss-car went out of fashion before the ambition was realized.

* * *

Elvia Allman, titian haired KHJ songster, and Wesley B. Tourtellotte, organist, were secretly married early in August at San Bernardino but the news didn't leak out until September. Now they are living as cheaply as one in a Mediterranean style apartment house right next door to a Spanish garden pee wee golf course. Miniature golf, miniature radio sets, miniature motor cars . . . are new . . . miniature apartments, though, have already been well established.

Horse-Fly and His Wranglers doing their stuff

"Horse-Fly" Shakes A Leg Out West at KNX

Every night out on Marathon Boulevard in Hollywood, from one-hundred to four-hundred spectators watch "Horse-Fly" and his wranglers go through their tricks, to the accompaniment (perhaps) of sharp cracks from their six-shooters. They are real cowboys from Arizona, "no foolin' ".

Who lured them to Hollywood? No, it wasn't Bebe Daniels or any other screen vamp. It was a fellow named Sanders who owns a ranch out in wild and wooly Arizona, right near Horse-Fly's own headquarters. He tempted them with fat salaries and put them to work adding local color to his restaurants, which are all decked up to imitate a patio. Program Director Pierre Mellonino of KNX drove through one day and ordered "ham and" and decided that the Wranglers were *not* hams. He put them on the air early in August this year, and their popularity is growing by leaps and bounds. Apparently, they have an inexhaustible repertoire of the old time range tunes and Hoe-down melodies.

ALFRED MEUNIER, CJOR favorite, has had a long and varied career. Born in Portugal, with later study in Germany and Italy, his first American visit was in '22 and he has been here ever since.

A brief period in piano classics in the east was followed with theater conducting in California and finally in Canada. Now he is being heard fairly frequently over the Vancouver station, not only in orchestral directing but also in piano solo work.

Forrest E. Williams is the only man on the Radio who can tell his audience where to go and get away with it. But that is his business. He is the Kyanize Road Man of WBZ-WBZA. Morning and night, day in and day out, he instructs listeners on motoring matters. They hear all about preferred routes, avoidable detours, picturesque rides for an evening or cross-country trips, and the places to stop by tuning to his two-a-day broadcasts. Owners of radio-equipped cars are strong boosters for him!

THE other day a rare rug mad the mysterious Mayo Indians of sister republic to the south, ar at KNX, Hollywood—a gift to N Rogers, director-manager. J. H. Kno Tucson, Ariz., was the donor of the rug.

An engineer, Mr. Knost was force buiness exigencies to leave his wife little sick daughter to visit a mine in wilds of Mexico. No telegraphs, no mercial Radio stations, no telephone short no means of communication ex by courier for a distance of hundred miles existed where Knost was callec his task.

The little girl's illness was approac a crisis and the distracted father appe to Mr. Rogers.

"ISN'T there some way announcer can let me know how daughter gets along?" Knost pleaded. I depend on ordinary mail and n couriers, it might be a month or more fore I would learn about the child. I can take a Radio receiver and tun KNX."

Mr. Rogers agreed to aid the fa and on several nights a bulletin, spec prepared, was broadcast. Add to wonders of Radio—Knost's mind heart were relieved, for his child better and eventually quite well healthy.

With the rug, gift of the grateful K came a letter saying that such articles made by the Mayos for their own and are not sold. It is a black and w affair, quite soft to the touch, yet h woven on primitive looms and as w able as iron.

Snakes Alive! Rattlers Broadcast from Denver!

he words of the circus ballyhooer, and only time! Real live snakes their rattles for the edification of listeners." It happened out in r, at Station KLZ. Theodore h, who spent the last thirty years with wild animals, and is consid- n authority on natural life, was re- ble for the broadcast, on September Two live rattle snakes, who had not deprived of their poison antenna, a musical rendition to accompany Tausch. One had a high pitched while the other's deep-throated made it eligible for the bass. Al- h Master of Ceremonies Tausch as- his audience that he had them under t control, listeners nevertheless took g (if they had it) to protect them the effects of the virulent poisons l Annie and Joe decide to bite.

* * *

arlie Wellman, KHJ's "Prince of left the station Labor Day to spend me in the field of free lance Radio.

* * *

arlie K. Lindsey, first director of KNX orchestra when that station on the air six years ago, now directs Mariners concert orchestra and The liers dance group for KGER. Some- told Charlie that "Absence makes air grow longer." So he took some off. But the gag didn't work, so he went to the studio and his be- music. "Anyway," said Charlie, vas a swell idea even if it didn't "

* * *

phen Gaylord, formerly manager of V, now acts as studio director for and is writing more popular songs tone poems on the side. Love ms, Waiting, Sleepy Moon, A Canoe You and lots of others have already from his facile pen and, wonder of lers, Steve doesn't like to be photo- hed without a hat. Is he bald? No, ust be some other reason, but nobody is to be able to ferret it out.

* * *

ish I could add another job or two my present duties, sighs vivacious thy Irvine, twenty-three year old \ "utility" girl. She does the book- keeping for the station, is its secretary and chief clerk, even writes a few continuities to order, gives the women's forum program over the air, sings contralto when sufficiently urged and does a bit of drama for the studio players' weekly broadcast.

Miss Irvine was secretary of the Spokane branch of the Drama League for some time and has a cultured, Radio voice.

* * *

Ted R. Liuzza, WSMB, Does Rescue Act

Ted R. Liuzza, announcer of sports, markets and news for The Item and The Morning Tribune over WSMB, New Orleans, was one of the leading participants in the rescue of a drowning youth recently on the roof of Loew's State Theatre.

A 14-year-old boy was pulled into a high-pressure suction pipe while he and three other youths were swimming in a tank of the cooling system atop the theatre building. Seeking relief from the mid-afternoon heat, the boys climbed the fire escape to the top of the theatre building, disrobed and hopped into the tank. Then, tired of wading in the shallow water, the boys prepared to get out of the tank when one of them sat down upon the open suction pipe. Instantly the youth was sucked into the pipe until his chin rested upon his knees and all but his nose was under water.

HE screamed for help and his companions rushed to his assistance, but the pressure was too great. Two of the boys hurried into their clothing and scurried down the fire escape to summon aid.

Ted Liuzza, the announcer, and an official of the theatre, were standing in front of the playhouse discussing a program feature when they were attracted by the boys' cries for help. The boys explained the plight of their companion.

Liuzza hurried to the top of the building and realizing the situation, disrobed, and jumped into the tank. Unable to free the lad from the pipe, he instructed the theatre official and the other boys to keep the imprisoned boy's head above the water. Putting on his clothes he descended the long line of stairs, ladders and runways to the basement and instructed the engineer of the theatre to turn off the pressure.

In the meantime, a squad of firemen were summoned, and a joint in a 16-inch pipe beneath the tank disconnected before the boy was released.

Having done his act of mercy, Ted, wet as the proverbial hen, disappeared in the crowd and hurried to WSMB to do his news broadcast.

Jack and Bill of WSM, Nashville

KJR Snaps Back After Hard Luck

Henri Damski of KJR

FINANCIAL storms have caused a great deal of disturbance to many of the nation's most important broadcasting stations. One of the notable examples of how some of these stations have recuperated is the story of KJR at Seattle.

This station with its 5 kilowatt transmitter had served an important place in the Northwest, bringing the news of the world and presenting some of the most desirable programs of the country. A year ago KJR ran out of funds and was placed in the hands of a receiver who had nothing to go on.

For the first week the station was not only glad to get records but appreciated the kind consideration of friendly interests which loaned them for it did not even have the money to buy records.

The plight of the station was recognized by talented persons in Seattle and gradually they volunteered their services so that within three months time a very competent staff was organized. Feeling and loyalty for the station grew. A corporation was formed and late in November it was acquired by the present owners. Its merit was recognized by the Radio commission and by the first of the year it was a daily broadcast schedule of twenty hours—the heaviest schedule for any one station in the Northwest.

Honor for achieving this success divided by the Three Mikeroteers—A Pierce, Thomas F. Smart and H Damski, the musical director. There is operating staff of 125 employees now the KJR payroll and it is outstanc for its enterprise.

Among the most popular features the Imperial Grand Orchestra, the N politan Orchestra, Light Opera Hour ten other musical ensembles. Popu music is provided by Vic Meyers' cording Orchestra, the Harmony Aces. Whirlwinds and the Six O'clock Stepp

* * *

Although Ginger Rogers often sings Got It but It Don't Do Me No Good Radio audiences don't seem to agree. neither do studio program directors. "It" brought about her recent enlistm in a new feature entitled "A.S. Beck Br ties" which will be chock-full of the star's stuff.

Ilima Islanders Now at WTIC, Hartford

The Ilima Islanders, who twang Hawaiian songs over the wave-length WTIC, Hartford, are newcomers to C necticut. They have given up Broadw and plan to stay in the insurance c permanently. The "Islanders", led Mike Hanapi, hail from and are nati of tropical islands in the Pacific. Th bring the alluring music of the South S to Western climes . . . and were actu the first group of Hawaiian musicians perform a national network. Before th entrance into Radiodom they played New York under the direction of Vinc Lopez at the St. Regis, a season at Mount Royal in Montreal, and three w ters at the Baltimore, in Miami. I Hope they don't find the rigors of N England winters too stern after tropi nights!

* * *

Young Dan'l Cupid shot not only bow but a whole sheath-full up in northwest at KJR. It seems as thou Sydney Dixon sort of started the hia when he was married to Guinevere Bo ford just a day or so before he left KJ in Seattle, to go with KYA at San Fr cisco.

Then more knots were tied . . . G U. Munjar, assistant manager of Northwest Broadcasting system, w picked out Betty Woodward, of KE Portland, as his life's mate.

John Pearson, announcer, was hitch to Mae Lowther . . . Glen Eaton, ten to Madeline Kinney . . . Donald Johnston, continuity writer, and Ja Deetken . . . and Isadore Schaefer, p licity impresario, and Yette Eisbert.

Cupid did a pretty good job and n takes a well earned rest.

WQAM Puts on Program for Santo Domingo Sufferers

WQAM, "The Voice of Tropical America", at Miami, Florida, was the first Radio station in America to come to the relief of the storm sufferers in Santo Domingo with a benefit broadcast. Two days after the hurricane struck, WQAM had raised over $500 in cash to be sent for relief work.

Musicians, artists and speakers donated their services during the four hour program and contributions were acknowledged over the air as phone calls and telegrams arrived. A draft for the cash was sent to Theodore Roosevelt, governor general of Porto Rico, who in turn delivered it to Montgomery A. Stuart, head of relief activities in Santo Domingo.

* * *

The power of Radio in police work, as demonstrated by the Fargo police department and WDAY, Fargo Radio station, is shown in a report just compiled by Inspector Andrew Quam, who handles the police bulletins for the Fargo department.

During July and August—the period covered in the report just issued—36 cars were reported stolen locally. Of this number 22 were recovered by means directly traceable to the Radio announcements, Mr. Quam says.

During the same peroil 29 persons were reported missing and 23 of these were found directly through the Radio announcements.

* * *

Gene "Frenchie" Ticoulat of KROW is gaining a world-wide fan following during his tour of Europe. He is broadcasting from all the prominent stations on the Continent.

This month Gene is singing over VITUS, the Eiffel Tower station in Paris. Later this summer he will be heard in Monte Carlo and over RFN in Leningrad, Russia. This is a 50,000 watt station as is also VITUS.

oodlesockers
urlesque
nnouncers

UT to set a record as the "goofiest" program on the air, the Doodlesockers at the Crosley o station, WLW, have succ-d in getting their program nny that they can't perform

dney Ten Eyck, morning an-cer, writes the continuity for program which is broadcast :30 A. M. every week day at 12:30 Saturday night. hiatrists reading the lines suggested that Ten Eyck r is a master comedian or quite bright. Some of the are so funny that the Doo-ckers, intent on being seri-go off into gales of laughter ad of playing.

e Doodlesockers are Hor- Rose, pianist, George Hall, nist, and Carl Clauve, banjo er. Ten Eyck introduces individually as Purlosa, well, and Cletus, with the ctive title of Jugheads. It ficult to decide from the fan which is the more popular, announcements or the Doo-ckers' special brand of syn-ted harmony.

ey burst forth every morn-with "Hail, Hail" as their e song. Ten Eyck says it is en from the celebrated opera ffa Can,' from the pen of the d Russian composer, "Drink-ki". Another favorite selec-is "from the ptomaine scene e opera, "La Cafeteria". Still her, suggested "by the deep nasal tones of a hibernating tempered with the sweeter ings of a reindeer at day-k" is "a folk song of ancient umbria."

THIS introduc- to a love song, recently pped the broadcast for 40 sec-s:

The Doodlesockers' program ld never be complete without it of well-baked banjo music n that old medicine show r, Cletus. In order to use successfully in a broadcast, s first necessary to gag him.

The Doodlesockers, left to right, are George Hall as "Duckwell" (he really is not cross-eyed), Hortense Rose as "Purlosa", and Carl Clauve as "Cletus". . . . cuckoos all!

"Vun dollar vor you, Karl," says Henry (Heinie) Schneiders. "Thanks," shakes Herb (Karl) Feierman of WOW, Omaha.

His deep abiding love for violets and daffodils prompted the playing of 'Only a Rose'."

* * *

Leo Mannes continues as KMPC's most versatile performer and adds the new studio organ to the list of his accomplishments. He plays several string instruments, piano, sings and now the organ.

* * *

Eddie Holden, who fashioned the Radio character of Frank Watanabe, has moved bag and baggage from KFRC down to KNX in the south. Eddie doesn't like to drive in city traffic, so he immediately sold his family chariot and hired an apartment right across the street from the studio. In seven minutes he can dress, gulp down a cup of coffee, firmly grasp a hunk of toast in his pudgy fist and amble over to KNX.

* * *

Heinie and Karl Give "Choiman" Skits

Feierman and Schneiders, two good old German cognomens, give authenticity to the "Heinie and Karl" fifteen minute interludes of fun, "Choiman" and English songs and comic poetry that go out from WOW at Omaha.

Henry Schneiders (who takes the part of Heinie) writes the entire continuity as well as the poems. He sings "denor" und is der virst denor of the Omaha Kiwanis Quartette, which drafels all over dese Unided States to sing at conventions and over the Radio.

Herb Feierman (Karl in the act) is an accomplished pianist and for the past four years has been conductor of the Krug Park Orchestra in Omaha. He speaks only "United States" in the act; for the German dialect is taken by "Heinie", who can also double as impersonator. Although four characters are often heard in the act, thorough search of the studio would only reveal two people near the mike . . . the other two are hidden in Mr. Schneiders' vocal cords.

WBAL Celebrates Fifth Birthday Anniversary

Elise Lee Cohen Recitalist

Edward Jendrek Operatic Singer

Jane Kirby Soprano

John Lederer "Marylander" Leader

Henriette Kern Symphony Soloist

WITH everything and everybody at Station WBAL taking part, Baltimore's only high power broadcaster celebrates its fifth birthday anniversary this month and, according to advance program announcement by Frederick R. Huber, director, this is going to be a gala occasion for Radio listeners—one which they are not likely to forget for many moons. WBAL will begin its fifth birthday celebration just one hour before midnight on November 1 and run it over to one A.M., November 2.

Every member of the staff has been recruited for this two-hour broadcast and each one has been notified to come prepared to put a brief program on the air. Not only are the individual soloists to appear, but various studio groups of entertainers—the "Baltimoreans" (who are to open the program), the "Romany Trail," the "Masqueraders," the "Merry-Makers," the WBAL Concert Orchestra, the WBAL String Quartet, the "Calvertons," and the "Marylanders" (scheduled to close this broadcast)—will also be heard in brief programs; and there will likewise be special features by those who appear in "Around the Melodeon" and "Musical Memories" programs.

One of the features of the evening will be the presentation of an anniversary poem written especially for WBAL's birthday by Sally Bruce Kinsolving, a Baltimorean. Mrs. Kinsolving will present this reading herself. The speaker of the evening will be Herbert A. Wagner, president of the Consolidated Gas, Electric Light and Power Company, which owns and operates WBAL.

WBAL is the station which, in 1925, made a public announcement of a no-jazz policy. That, when the air was full of practically nothing else, was considered a radical step indeed. However, Frederick R. Huber, Director, remained adamant in the face of a storm of protest against this unique policy, and soon after the first furore and torrent of opposition had passed and the station had begun to get its feet, so to speak, the no-jazz protestants turned to praise the programs broadcast from this station, with the result that WBAL gained a national reputation. Now jazz is not banned, but only the best goes out from WBAL.

* * *

The afternoon program supervisor at WBAL is Elsie Lee Cohen, and she does a good job in securing and arranging the various features for daytime broadcasting. But that isn't all that she can does do. She is a widely known recita having studied voice culture and drama in New York and London. While liv abroad, she frequently appeared as g artist for various fashionable teas salons, one of her European appearan having been at a garden tea given Lady Beck at Monte Carlo. In spite her venture into society, she doesn't e attempt to high hat the rest of the st

The dramatized short stories which on the air from Baltimore every so o are broadcast by Miss Cohen in t entirety. She assumes the role of e person whose voice is heard in the st

* * *

Henriette Kern, soprano, is one WBAL's stars in constant demand concert work. Mrs. Kern has alwa sung, but never gave her voice mu serious thought until one evening a frie called to see her who hadn't been arou for some time. In the course of evening there was some musical ent tainment, and Mrs. Kern's voice ma such a deep impression that the frie immediately went to the telephone a made an appointment for her with Geo Castello, a member of the Faculty Peabody Conservatory of Music.

"And, more to please my friend th anything else, I kept the appointment the next day, and so enthusiastic w Mr. Castello regarding my voice that immediately started to study music se ously," Mrs. Kern says.

* * *

If you went downtown to one of t big churches in Baltimore every Sund you would recognize the tenor soloi voice as one that has been heard re larly from WBAL. For two years E ward Jendrek has been dividing his ti between that station and serious musi endeavors in oratorios and Baltim operatic productions. He is married a wouldn't change the freshly scrubb white steps of his home for the marb entrance to a mansion.

* * *

She came "near as a hair" not bei a singer at all—we mean Jane Kirb soprano at WBAL. In fact, she h fully determined to be a professio dancer and was studying the terpsichore art with that idea in mind when t music teacher at school heard a love clear soprano voice rising high above the others in the large assembly!

He investigated and "discovered" Ja Kirby. Through his enthusiasm and terest, Miss Kirby commenced to stu singing, and it wasn't long before s had decided that her voice was her r career. Yes, she still dances—loves in fact, but now devotes practically of her time to singing.

Steamboat Whistle is Station Call of KTRH

HROUGH the blue and grey ether a long, deep, resonant steamboat whistle penetrates and the announ- voice comes through with something his: "Good evening, everyone! This RH, the station owned and operated e Rice Hotel, Houston's welcome to world." And you wonder why a boat whistle was chosen to sym- this new Radio station.

uston, Texas, is located on the is Ship Channel that converted ton into one of the most important l ports of the world; and perhaps a large factor in making Houston econd largest city in the South. ton feels that if it hadn't been ble to hear those deep-throated boat whistles as their ships plied Channel, they couldn't be so proud eir new population. In consequence, steamboat whistle was selected by H as their station call.

e station is owned and operated by Jesse H. Jones interests, who, of e, needs no introduction to Radio st readers. He is the man who ght the Democratic National Con- on to Houston, and was largely re- sible for the gigantic Sam Houston ention Hall, where the seething po- l activities of the Nation's Demo- took place. In addition to owning Rice Hotel, he has erected miles of rapers in New York as well as in ton. In the days of the Republic exas, Houston was the capital city the Rice Hotel now stands on the ric spot that was the site of the ol; which is indeed a far cry from modernism as a Radio station.

* * *

he scene is laid in the studios of RH.

ou peek into the studio and for a ent you believe that you must be sported to the realms of Mother se Days, for there is the Old Woman he Shoe with so many children she 't know what to do. But upon her investigation, you discover that it young lady, somewhere in her twen- surrounded by children. She is t Pat, and when she thrusts aside role about the studio, you find that is Margaret Britton, Assistant Pro- n Supervisor of KTRH.

he can jump into a dramatic sketch do exceptional work whether in char- r parts or as a sweet girl graduate. one play, she enacted the part of a ng girl's mother and in one spot where young girl was supposed to sing a song, Margaret Britton changed from role of a stately mother to sing a song as a seventeen-year-old girl ld sing it.

* * *

Guy Savage, young and blond, is wn over the air as the "Whispering Tenor," but around the studios as an announcer. Guy conducts all of the morning programs and has one of the most popular features on the station, during his broadcast, which is the KTRH Mothers' Program. This feature is dedicated to "Your Mother and Mine" and Guy receives a heavy average of letters each day requesting dedications to mothers or to their memory.

An incident of his broadcast is the quarter-hour ring of an alarm clock with the supplement of "Time to get up," followed by a strain of "Reveille" as further inducement to greet the sun.

Guy says the only hard part about this is that there is no wide-awake announcer to persuade him to get up!

* * *

KTRH has an operatic star on its calling list. One Mary Carson, who like a thin flame shot up in European Opera and expanded into a resplendent fire of dramatic ability and voice perfection.

Miss Carson studied in Milan, Italy, under several of the foremost maestros until she was prepared for opera. After her début, she sang in opera in all the important cities of Italy, England, France and Germany, and at one time she was with Max Rabinoff and Anna Pavlowa's Boston Opera.

* * *

The Texas oil fields have contributed to KTRH two harmonizers of the first degree, who have won a wide following by the perfect blend of their voices. Sloan and Threadgill, whose names have appeared on many Brunswick Phonograph Records, are the gentlemen in question. Jerry Sloan, tall and slender, and Frank Threadgill, not so tall, are inseparable friends as well as singing partners. If the fame of Damon and Pythias, the Gold Dust Twins and Check and Double-Check are measured by their devotion as friends, then this harmony team should be added to the list.

Jerry and Frank met each other in 1913, and since that time have remained friends in harmony, both figuratively and literally. Frank's father was a Methodist minister and it was from him that Frank inherited his musical tendencies.

Both of these boys work at Baytown, Texas, and when KTRH programs demand a harmony team for a spot, a wire is dispatched post-haste to "Sloan and Threadgill" at Baytown, and the mistake of addressing them individually is never made by a wise program director! Jerry and Frank sing "Countryside Style" songs.

Guy Savage
Announcer

Mary Carson
Soprano

Jerry Sloan
Harmonizer

Margaret Britton
"Aunt Pat"

Frank Threadgill
Jerry's "Pard"

Tom Breneman of KFVD

Tom Breneman, who accepts full responsibility for the Tom and Wash team, moved from KFVD over to KFWB and, just a few days later rushed eastward on a wild goose chase of some sort. But back he came and began to do his two characters all over again. Although some of the skits are available a la electrical transcription, Breneman is doing the KFWB noonday programs himself.

* * *

Elsie Taylor, San Diego and Los Angeles Radio artist, has joined the KJR and Northwest Broadcasting System artists' staff. She will be heard in concerts over KJR regularly hereafter. Miss Taylor became known to California listeners by her appearances over KFSD.

Marillah Olney Comes to KTM from Stage

Marillah Olney, director of KTM's Little Theatre, Los Angeles, is just another proof that Radio is making a deep in-road into the theatrical profession, taking for its own many of the stage's most talented artists.

Beginning her stage career in Salt Lake City in 1926, Miss Olney played in stock there until the summer of that year when she went to Los Angeles. She got the idea that she wanted to be a business woman, so went to business college for six months, but the call of the footlights was too great, and her brief quest of a business career ended, and her stage triumphs in Los Angeles began. She has appeared there in many parts, in roles varying from that of the sweet, demure little homebody to that of a hardened woman.

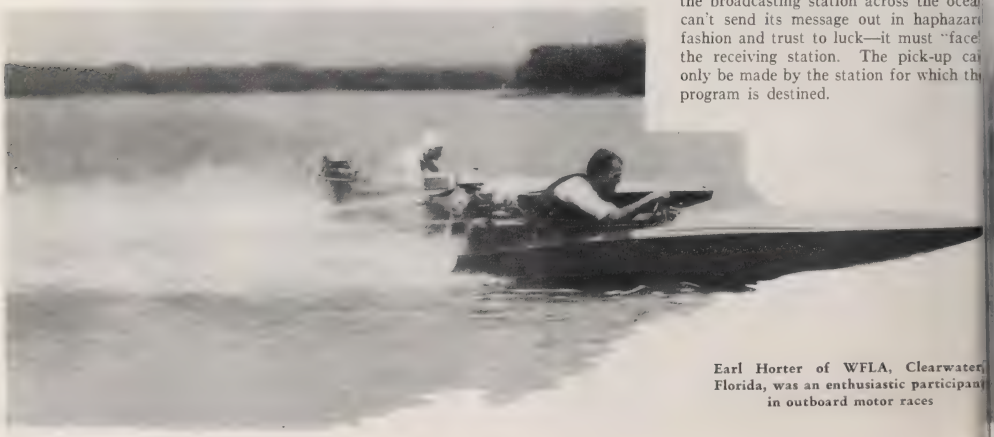
Then she switched her allegiance. Marillah Olney has been with KTM since December, 1929, and her play productions over that station every Thursday night are among the most popular features of that type on the Coast. AND—Believe it or not—Marillah Olney is only 22 summers young!

* * *

We have many women entertainers, serious and frivolous, but few women in the Radio world have attained the heights that Grace Raine, WLW, Cincinnati, assistant musical director, has reached. Besides being in charge of all vocal music for that station and WSAI, Mrs. Raine conducts the Crosley Concert program frequently. Before WSAI was taken over by the owners of WLW, she was musical director of the former station. In that capacity, she accompanied many orchestras that played at the station, always directing, however, from her seat at the piano. For some time she has been studying orchestra conducting with William Stoess, musical director of the two stations, who has turned his baton over to her for some of the Sunday night concerts.

* * *

Julian C. Riley, KOA traffic manager returned from rod and reel vacation days with a weirdly fantastic tale about catching a fish with his hands when the pool broke.



Riley later explained to intimate friends that, after all, the pool was shallow and besides the fish was blind in the lee-side eye.

* * *

We hung the flag out down here at Radio Digest's offices the other day, for a distinguished visitor. Our caller was none other than Major William C. Borrett, of Station CHNS, Halifax, Nova Scotia. He believes that television will remove the romance from Radio, but then, it will give Canadian listeners-in the pleasure of meeting this gallant gentleman in person as we did. Mrs. Borrett, who often appears on their Women's Programs, accompanied the Major and said that although New York and The Radio Show were very exciting, Halifax is the place to live.

* * *

The broadcast of the Canadian Marconi Company on October 1st, which was relayed from Station 2LO, London, England, employed the "beam" system, rather than the wave system. That means that the broadcasting station across the ocean can't send its message out in haphazard fashion and trust to luck—it must "face" the receiving station. The pick-up can only be made by the station for which the program is destined.

Earl Horter of WFLA, Clearwater, Florida, was an enthusiastic participant in outboard motor races

Two Real Indians Go On Air in Oklahoma

It's a far cry from the blood-curdling war whoops of their ancestors to the pleasant, dulcet tones of Wesley Robertson and Eli Wamego. Where do they hail from? Oklahoma, of course . . . the Heap Big Injun state.

Wesley Robertson, who sings his native songs in five different Indian languages over WKY, Oklahoma City, is a half breed Choctaw, with an allotment of rich farm land that goes with such a birth, and revenue from said farm has been used to cultivate his beautiful baritone voice. This Indian not only knows how to dress in his native costume, but wears evening clothes with the suavity of Mayor Jimmy Walker. He does not smoke or indulge in cocktails. He has a wild sense of humor; drinks iced tea with cream and

Wesley Robertson

no sugar, and Lillian Gish is his idol both personally and on the screen. Otherwise he cares little about the girls.

* * *

Eli Wamego, Pottawatomie Indian tenor, has been featured over Radio Station KCRC at Enid, Oklahoma, for more than a year. He joined the staff of this station as a member of the "Champlain Indian Service" in September, 1929.

He possesses a most unusual and pleasing tenor voice, that registers perfectly over the microphone. Mr. Wamego sings in 6 different languages besides English—

Eli Wamego

German, Italian and Sioux, Ojibwa, Pottawatomie, and Chippewa Indian tongues—and is a graduate of Haskell Institute, the largest Indian school in the United States. He also took work in the Fine Arts Department of the University of Kansas. For a time he was on Chautauqua; later he toured with an "all Indian" orchestra, in which he not only sang, but played saxophone and violin.

* * *

What makes the Marylanders' dance programs so different? It's the views of John Lederer, conductor of that popular Tuesday evening feature of Station WBAL. He is one of the few modern dance orchestra conductors who believes that syncopation is not necessarily jazz. He claims that the best dance music is quietly rhythmic rather than noisily jazzy. Of course, lots of dance fiends would disagree . . . but many listeners as far away as Canada and Cuba like his stuff. Mr. Lederer is also a pianist and sometimes steps down from the conductor's dais to broadcast a piano recital all "on his own." He was one of the first Radio dance orchestra conductors on the air. (Picture on page 78.)

* * *

Lou Bode, Jr., a member of the Band of a Thousand Melodies heard every afternoon on an NBC program, needs a "boarding-house reach" to perform his duties. He plays three instruments, the saxophone, clarinet and the baritone saxophone during the performance and is kept very busy reaching for each.

We'll All Be Russian

Fashion takes a hint from the Bizarre Tzigany Gypsy and the Picturesque Cossack

By Jeanne duBois

NO. THE U.S.S.R. won't be in power in the old U.S. this year. But, Shades of the Cossack and the Russian Gypsy and perhaps the Samovar Hour over the Radio! According to what we hear over the ether, fashions have certainly gone Russian with a vengeance this year. There is the long tunic blouse with the high belted waistline that is so reminiscent of the jacket worn by the former Czar's wild horsemen. The long tunic may be of the same shade as the full skirt which peeps out so coyly for six or eight inches beneath its hem, or it may be of a contrasting shade. And when the tunic takes unto itself fur collar or a fur band at the bottom, it is ever so smart, and still more really and truly "Roosian".

Another straw that shows that the winds of fashion blew over the vicinity of old St. Petersburg, now Leningrad, is the big loose sleeve, caught in at the wrist with gay peasant embroidery or smocking. It's really awfully colorful, becoming and an interesting relief from the always-the-same tight sleeves of the past few seasons.

Coats, which have taken on a flare, use astrakhan . . . black, grey or beige, depending upon the color of the fabric which you choose . . . and usually belt themselves. With the high, stand-up collars so many of them affect, they look as if they could stand the rigors of long, cold winters in Siberia, but they are just too precious-looking to be cast to the wolves! (By the way, take heart if you need a new cloth coat this year. From several sources of information, it seems that coats with fine furs will be more reasonable than ever this year. After the market crash, prices of raw skins went way, way down, and this enabled the manufacturers to use furs in great plenty and still keep their smart coats at prices kind-to-the pocketbook.)

ABOUT the only things not Russian are hats. No tight, straight caps for us. We wear instead tight little "bunnits" that come way, way down to cover those just-a-growin' locks or those cute little "buns" and show all of our foreheads except, perhaps, a corner. But no matter how much hat there is, it never is big, because it must not collide with our coat collars. If you'll look at the pretty picture on our Rotogravure Fashion Page 45, you'll see the only proper way to wear these new hats. You must show your curls. Bring them out in orderly little waves on your forehead and then cram the "bunnit" down in bewitching fashion.

Another thing which you'll see on that page, although you catch only a glimpse of it, is the wool lace blouse that has just come to the forefront. What a paradox that is—wool, which one associates with warmth and heavy sports clothes, and lace, which brings to mind pictures of frothy afternoon and evening frocks. Well, because clever designers have evolved this delightful new fabric, they've had to come to a compromise about its use. Blouses and frocks of this fabric, because they're wool, may attend all but the roughest of sports functions. Because they're lace, they may appear at office, bridge, luncheons, or even tea.

Best & Co.

Black crepe tunic frock with crisp grosgrain collar.

IF YOU are looking for a practical dress—one that is actually very, very swanky-looking and yet has almost all the virtues of Mother's gabardine which she turned four times, take this recommendation. Buy a wool crepe or any of the variations of the thin wools or thin tweeds that are appearing now. They don't crush, they are sheerish and swirl gracefully; they can approach the rather formal afternoon dress if you want them to, with intricacy of cut and line; they are warm and comfortable but not at all bulky. See the dark green marita cloth dress with the lovely, flattering white vest on Page 45.

Just one more look at that page before you lose your place. Notice carefully that black astrakhan jacket, because you're going to see a lot of those short fur jackets this winter. It doesn't matter what fur they utilize . . . caracul, beaver, lapin (which is French for rabbit, if you don't know it, but ever so flattering even if it is inexpensive), astrakhan or squirrel. Some of them have belts, some haven't, some have peplums (those little flares from the waist), and some are even so short as to take on the proportions of a bolero jacket. Brr! you say. How can I be expected to wear one of those pretty, but not very protective jackets when the snow is on the ground and the wind is whistling through my skirts? Here's a secret . . . many of them are made so that they can be donned *over* one's winter coat. So if you're smart you'll have one which can be used in spring and fall by itself; in winter, perhaps, ice-skating, with a warm skirt: and *over* the furless coat which you'll bu

This Winter!

Tunics *Flare Skirts*

Dolman Sleeves *Stand-up Collars*

accompany it.

If you're one of those fortunate souls o has a husband who insists (at your uest) on seeing his wife warmly clad furs so that she'll not catch pneu- nia; or if you've saved up enough ney for a brand new fur coat this nter, you'll want to know all about at's what. In furs, there is nothing w. It's the same old line-up of flat and nost flat furs; caracul, broadtail, mink, tria, beaver, squirrel (that's coming in its own this season), lapin, Persian nb, astrakhan, leopard-skin and of urse, raccoon for young sorority mem- rs. But be very careful of the cut of ur new coat. It should flare ever so ghtly so as to suggest the natural waist- e; whether or not it is belted will de- nd upon your figure and the bulkiness the fur you choose. Its collar should me high around your neck and fasten some novel way not quite like anything u saw last season . . . a scarf which mes in and out, a little rolling collar, cape collar of fur. In length, it should long enough to be one or two inches low your dresses.

BY NOW dress lengths ve been straightened out and that it s been a question of the survival of e fittest. Paris now turns up her se and says that her couturiers nev- said we should wear the wispy un- en "rags" and the extremely long day- me frocks that so many extremists went for at first. You can believe her or t, as you choose, but dress lengths this ear look mighty like the result of a firm and on the part of the American woman. his year one's daytime skirts come only a moderate length below the knee. ports dresses can be an inch or two be- w, more formal frocks four, five or six, s you please.

But—have you a favorite evening or ance frock from last year? If you have ears, prepare to shed them, because un- ess you were very lucky and extremely dvanced, you'll find it short compared o this year's frocks, no matter how long t seemed last year. Just put it on and ou'll see that though it may be long in ack, it allows a good deal too much of our shapely limbs to be seen in front. his year's dresses are absolutely even ll around, and just as demurely long as they can be, covering the very ankle! Look at the prom frocks for young things and the crepe evening gown on Page 44. Don't they bear out these words? But perhaps if you're clever with the needle or know a smart little dressmaker, you can save . . . not the day . . . but the evening.

Everything else about the offerings for Christmas and New Year festive gatherings remains much as it did last year. Fabrics are stiff moire or taffeta, glittering lame or gold or silver cloth, soft velvet, crepe or satin. What to wear out in the frosty night over these so-long confections? Anything from a little short "bunny-wrap" of white fur if you're very young; to a sophisticated, draped wrap that is almost as long as the dress itself. And anything in between is just as good, too, just so long as it is flatteringly furred and charmingly feminine.

That's the word for these new things we've talked about . . . charmingly feminine. Remember that when you take that fat little pocketbook down to the stores and if you look that way when you "try on" . . . don't search any further. Take the article of clothing unto your bosom and keep it. for you'll be both attractive and smart if you do.

* * *

PYJAMAS are still very much the thing, and you can wear them (if you have nice enough ones) to make your friends envious next time you entertain at a bridge, or at home to loll around in at your ease. They are much more inexpensive than they were at first, and if somebody asks you what you want for Christmas, have some little bee whisper in that person's ear, "py-jamas!"

Transparent velvet 'jamas are much the latest thing, but flat crepe, rayon crepe and milanese rayon are just as good. You usually run across them in the shops with cute little yoke tops on the 'trous" or often they will tie at the side with a big bow. Indulge your taste for wild gypsyish combinations of colors as freely as you please, for the pyjamas one sees combine black and orange, pale green and bright green, and other color duets we can't normally use.

Best & Co.

Deep Cossack cuffs of black persian lamb, a frame-the-face collar and a wide, wide flare label this coat "Born Fall 1930."

Lessons in Loveliness

The Modern Girl is Not Nearly as Black as She is Painted—Nor Even As Pink

By Nell Vinick

CBS Beauty Advisor

MAKE-UP is the final aid to facial beauty and its purpose is to make one look more attractive *naturally*.

It has been my observation that the younger girls usually use entirely too much make-up and thereby often make themselves look "cheap", and that the woman of mature years—the woman past her first youth—generally uses little or perhaps no make-up and thus often looks faded. Neither extreme is commendable nor up to date.

Make-up for the Young Girl—Perhaps the most common fault in selecting the three principal items of make-up—powder, rouge and lipstick—is to use something because you like the package—or because a friend uses it or because it is endorsed by your favorite screen star. What if it is? You may be an altogether different type; you may have a different coloring, a different personality. In selecting make-up the question is: will it bring out your best points—will it lend expression to your eyes—will it give a tempting curve to your lips—or will it make them look like a bloody gash? There are thousands of beautiful "extra girls" in Hollywood, striving for recognition, who never get to be anything except "extras"—because they "come by the dozen" so to speak. They have no distinction—no individuality. The ones who become stars are usually featured because they are *different*—because each is a distinct type. So if your eyes are dark, don't use a blue eye-shadow even if blue does happen to be the vogue. Dark eyes can be made more alluring with a brown eye-shadow. And don't use cherry, raspberry or any other vivid shade of rouge and lipstick if you are the brunette type.

Here is another thing to consider, make-up for the stage and for the screen must necessarily be different than make-up for personal use. It must be applied more heavily to give a natural effect across the foot-lights and through the movie camera, and those who tell you so are the biggest stars of the stage and screen—some of whom you may have heard on the air with me last season—and who will be on the air with me again quite soon.

A true example of loveliness and wisdom in the art of personal make-up. Bernice Claire, First National Studios' Star

MAKE-UP for the Older Woman—We are not so very far away from those days when any lady who used powder and "paint" was whispered about—yet I find quite a few of my Radio friends of sophisticated years who are reluctant to use any rouge or lipstick—or even powder—and consequently they do not do justice to their appearance. There are few skins so flawless—few complexions with enough natural color in cheeks and lips—that they can do without the protection of a good face powder and the vitalizing warmth of a bit of good rouge and lipstick. Since a bit of good rouge will lend depth to your eyes and expression to your lips and emphasize the beauty which is truly yours, why not use it? No woman is condemned now for vanity—for beautifying herself. She is really under an obligation to do so—society requires that she improve her

A CONVERSATION I had recently with a charming old set me to thinking our modern way of rating Thanksgiving. o, my dear, Thanksg is not what it was y day. Why, I reber cooking three big ys once, and I fixed allon of cranberry , and twelve pumpies. Oh, we had a elous feast."

Well," I said to her, "if is what you mean, I Thanksgiving is not it once was. But you think the modway of celebrating the ion might be just as as the old?"

t's a disgrace," she "You never serve than you would for a Sunday dinner. That's way to celebrate ksgiving! You should heaps and heaps of . Of course, you can't t all, but it looks right —and it's proper."

THANKSGIVING DINNER MENU

Mixed Fruit in Apple Cups
Pimento Bisque Toasted Crackers
Sweetbreads and Mushrooms in Potato Cases
Roast Turkey Stuffed with Oyster Dressing
Mashed Turnips Baked Tomatoes
Cranberry Sauce Celery Olives
Endive with Roquefort Dressing
Thanksgiving Pudding with Hard Sauce
Nuts Fruit
Cider Coffee

All measurements are level. Recipes proportioned to serve six.

Pimento Bisque

2 tablespoons butter	2 cups white stock	Few drops tabasco sauce
2 tablespoons flour	1 small can pimientoes	1 teaspoon salt
2 cups milk	Few drops onion juice	⅛ teaspoon pepper

Melt the butter; add the flour; and blend. Gradually add the stock; and stir until the mixture thickens. Add the milk. Put the pimentoes through a fine sieve; and add to the sauce together with the seasonings. Serve in cream soup bowls; and garnish with whipped cream. Serves six.

Thanksgiving Pudding

3½ cups flour	2 teaspoons baking powder	½ cup chopped candied orange rind
1 teaspoon ground cinnamon	½ cup chopped walnut meats	½ cup molasses
1 teaspoon ground cloves	1¼ cups chopped raisins	½ cup sugar
½ teaspoon salt	3 cups currants	⅓ cup melted shortening
¼ teaspoon soda	½ cup chopped figs	1 cup sour milk, 1 egg

Sift the dry ingredients together; and add the nuts and fruit. Mix the molasses, sugar, milk, and egg together; and combine with the first mixture. Transfer to an oiled and floured mould or several small moulds; and steam an hour for individual moulds, three and a half hours for a large mould. Serve with hard sauce.

It seemed to me from what she said that there must have been considerable waste in her method, and there might be some reasons for the change modern women had effected. And so I decided I would find out what they were from one who would really know. I would interview Ida Bailey Allen, President of the National Radio Home-Makers Club, who talks over the Radio to hundreds of thousands of women every week.

"Why of course things have changed," said Mrs. Allen in answer to my first question. "Things have changed radically. And I'm glad they have. Women used to spend so much time preparing huge quantities of food for Thanksgiving that they never had any enjoyment themselves; and often they lost the real spirit of the occasion. But I'm sure modern home-makers still celebrate Thanksgiving—they just express their

gratitude differently—the spirit is the same.

"Don't you think that the proper setting of a table has a great deal to do with the spirit of Thanksgiving?" I asked.

"Yes it has, and I am going to give you a few directions: When serving with one maid, put a dinner or service plate on for each person, in the center of the space allowed to them. Arrange the forks needed for the meal in their order of use from left to right, at the left-hand side of the plate; put the spoons and knives in their order of use, from right to left, at the right-hand side of the plate—placing them all within a half inch of the edge of the table. Put the water glass or goblet at the tip of the knife, the bread and butter plate at the tip of the fork, with the bread and butter spreader placed across the lower edge horizontally. Put the napkin at the left; if it is a large dinner napkin, and it should be, fold it over into oblong shape. Allow a set of salts and peppers for each two persons, or for more formal service, allow a set apiece, using individual size.

WHEN the meal is announced, whether for home or company service, the water glasses should be filled, and the ball or tube of butter should be on each bread and butter plate with the bread or crackers needed for the first course.

"The appetizer, if cold, should be already served on a small plate set on the service plate. If the appetizer is hot, it is placed after the guests have been seated. Soup is always served from the pantry. The turkey is usually carved by the host, the waitress standing at the left taking the plates. When the turkey has been apportioned, she then passes the vegetables, either in a double compartment vegetable dish or separately. Whenever passing any food, a folded napkin should be between her hand and the dish. The dish should be held at a height convenient for the guests to help themselves. For small articles, as cream and sugar, a little tray may be used, but a doily should be placed on it, so that the dishes cannot slide around.

"Serve to the left," Mrs. Allen continued. "When foods are to be passed, as a plate with turkey or salad, it may be either from the left or right according to the convenience of the guest. If two guests are sitting side by side and are talking, for instance, leaning toward each other, it would be necessary to place a salad at the left of one and the right of the other to avoid interruption.

The waitress should replenish the butter and water without being reminded to do it. A good waitress need not be told anything by the hostess during the service of a meal. She should watch to see what is needed, and when guests have finished any course, she should clear the table and serve the next course. A side or serving table, on which can be put extra water, butter, relishes, and food for succeeding courses, will save many trips to the kitchen or pantry." With one of her characteristic gestures, Mrs. Allen finished.

"But the decorations! How about those?" I asked.

"Oh, Joan Barrett, our Interior Decorator, has corking ideas. Go down there and ask her for them."

I dropped into Miss Barrett's cheerful office and asked her what she considered of prime importance in Thanksgiving table decoration. She replied without hesitation, "Cranberry sauce."

Then she explained that at the home where she has visited for twenty-two Thanksgivings, the hostess one year forgot to put the cranberry sauce on the table—an oversight which apparently made Miss Barrett miserable. She hated to embarrass her hostess by asking for the missing dish, which might, she reasoned, have met with an accident in the kitchen. Nor could she very well leave the table to ransack the refrigerator. Searching for a means of introducing the subject, Miss Barrett began detailing the story of a Thanksgiving comic strip she had noted in the paper, emphasizing the food angle, especially the cranberry sauce. With a shriek that echoed through the dining room, the hostess jumped up and ran to the pantry, where the dish had been since its preparation the day before, and with profuse apologies for the oversight, brought it to the feast. Since then the Thanksgiving table has each year held two bowls of cranberry sauce, one for the guests at large, the other for Miss Barrett.

"Seriously though," Miss Barrett said, "I have one very strong opinion about Thanksgiving table decorations. I think that they should be dignified. Crepe paper strips, Jack o'lanterns, orange and black paper caps and the like are perfectly appropriate for Hallowe'en. But Thanksgiving dinner, if it is of the traditional sort, is a more solemn feast. Happy, yes. But never frivolous."

"Could you suggest a few such arrangements?" I asked.

"Why, yes," Miss Barrett replied, "although I do think that settings should vary to suit the hostess' linen, silver, and glassware, and the size of the table.

"One of the most effective treatments I have seen was arranged upon a large, oval table, spread with a green tinted damask cloth. The centerpiece consisted of a graceful, opaque black glass bowl with solid, ear-like handles projecting at each side. The bowl was heaped with vivid green and purple grapes. Somewhere the hostess had procured a twining spray of grape leaves that she hung from one side. This she balanced by placing a small, wedge-shaped bunch of grapes on the green cloth at the base of the bowl. Four tall, bright silver candlesticks, with concord purple candles flanked this group. Gleaming silverware, black glass service plates, and crystal goblets with black bases complete a study at once chaste and forceful.

WITH a white cloth you might use old English china. The sort that pictures pastoral scenes in green on an ivory background is newly popular. With this pale green but bled glassware, a centerpiece of any old-fashioned flowers that can be obtained, such as, delphinium, painted daisy, columbine, asters, and baby's breath

Thanksgiving Pudding

Hard Sauce Garnish

THANKSGIVING SUPPER MENU

Toasted Giblet and Bacon Sandwiches
Cabbage and Pineapple Salad — Cheese Crackers
Peanut Brittle Mousse — Cookies
Tea

All measurements are level. Recipes proportioned to serve six.

Cabbage and Pineapple Salad

2 cups canned, drained, shredded pineapple
2 cups finely shredded white cabbage
1/8 teaspoon pepper
1/2 cup sour cream
Juice 1/2 lemon
1/2 teaspoon salt

Combine the cabbage and pineapple, and marinated with the sour cream, lemon juice, salt and pepper, mixed together. Serve in nests of lettuce.

Peanut Brittle Mousse

1/4 pound peanut brittle
1 pint heavy cream
2 tablespoons powdered sugar
1 teaspoon gelatin
1/2 teaspoon vanilla
Grated rind 1/2 orange

Crush the peanut brittle by putting through the food chopper; and add the orange rind, sugar, and vanilla. Soak the gelatin in one tablespoon cold water, then melt over steam. Combine with the cream, whipped stiff. Fold into the first mixture; and transfer to a mould. Pack in equal parts ice and salt, and bury for three hours, or freeze in an electrical refrigerator.

Toasted Giblet and Bacon Sandwiches

1 cup cooked minced chicken giblets
1/2 cup finely diced celery
6 slices chopped crisp cooked bacon
1/8 teaspoon salt
Hot buttered toast
Mayonnaise to blend mixture
1/4 head shredded lettuce

Combine the chicken giblets, bacon, celery, and salt; and blend with the mayonnaise. Spread on slices of hot buttered toast; place shredded lettuce on each, and cover with a second slice of toast. Serve hot.

nged in a green bowl would be effec-

My own ideal for a Thanksgiving table," tinued Miss Barrett, "would be the sort ch the pilgrims probably used; a crude . trestle table, either bare or covered a handwoven red and white cloth pew- utensils and wooden dishes. The food ld probably serve as the only decora- . I'd have the traditional sort; a e browned turkey; bowls piled high n maize, potatoes, creamed onions, and ash, two kinds of pie and—cranberry ce."

"WHAT is new in the of dinner cloths?" I asked.

That is the question that ran through head recently as I hunted through eral of the New York shops," Miss rnell replied. "I had half expected to something startling and bizarre in ign or color. But apparently, the ex- and unusual is no longer in favor. tead, I found prominently displayed st exquisite examples of fine linens. broidered or trimmed with beautiful s of lace.

"My choice was a handsome cloth, de from the most delicate quality of sh linen, the threads so firmly and sely woven that it lay like a smooth rror on the table. Rectangular in pe, the edge was bordered by a deep d of hand-made filet lace. At the ners and along the sides the linen had n cut away and heavy lace represent- baskets of flowers and fruit had been in. These motifs in turn were em- asized and adorned by graceful sprays embroidery and small curves of cut- rk.

"Conservative in effect, beautifully cuted, this cloth would form a rich ckground for the silver and china of y formal dinner."

I left Miss Cornell to go down to the tchen-Laboratory of the National dio Home-Makers Club and watch Miss ace White, Club Dietitian, beginning eparations for Thanksgiving. She was aking out a menu for Thanksgiving nner, and one for Thanksgiving supper. e gave me both, and I came away forti- d against all questions that anyone can k about how the modern home-maker ll celebrate the original American holi- y this year.

* * *

AND while the turkey is eaming away in the oven and the cran- rry sauce is set out to cool, there is a ysterious shuffling in the garret—sup- essed laughter—gasps of excitement— apping of hands. What is happening? Although roast turkey, cranberry sauce d plum puddings are very important in ohnny's and Mary's Thanksgiving Day, eir crowning glory is dressing up like own folks. Father's suspenders myste- ously disappear, mother's Sunday dress

Underwood and Underwood

Three Generations gather at the bountifully set Thanksgiving board.

is missing and big sister's best pocketbook suddenly develops legs.

And hearing great shrieks of glee, the family put their heads out of the window only to find the younger generation, wrapped up in the family's best and parading themselves along the avenue in elegant style.

There is Suzy with the rim of her mother's hat flapping against her freckled nose as she is making vain efforts to hold up the folds of the wide dress to keep from tripping the hundred and fifty-first time.

Then follows Timothy, Jr., rigged up in a harlequin's outfit that bespeaks the ingenuity possible at a dozen years. How he rigged up the costume remains a mystery forever to Time's family, but there is no mistaking the clown's suit. Of course, Sister will find next summer that her white Sunday dress is off its hanger and she will be deceived into believing that she left it at the seashore, quite forgetting that Tim's Thanksgiving disguise conveyed to her a resemblance to something faintly familiar to her.

Such an array of patches, costumes and designs would stagger any style specialist. And they topple over one another in a splash of colors and get up again with a surprising poise and self-possession.

And here comes Fido, barking away in his greatest of holiday spirits, and rushing merrily against a mass of colored petticoats only to have this avalanche fall over him; and tugging at Mary's ruffled pantaloons and tearing off its lace edges.

What has your garret to yield to the curious youngsters? Already they may be half bent over old trunks chuckful of cherished memories. At this moment Margie may be half buried in a pile of stuffs which she has taken out from one of the old trunks and opening and shutting the faded pink parasol with its rows of ruffled edges, with Buzzie, the cat and her family of well-cleaned kittens staring with open-eyed wonder at this modern spectacle.

And if there are no garrets, you may be sure that the smallest corner of the house even though it be a tiny cupboard will contain a mountain of ecstasies for the children.

A cartoon of several years ago comes to mind of two little boys on the street on Thanksgiving Day. The one, dressed up in Daddy's clothes with the legs of the trousers trailing behind him and the coat-tails reaching the ground; the other boy, dressed up in his brand new outfit, being helped into the great big automobile by his nurse maid. Each boy looked at the other wistfully.

But it can be said with certainty that the little masquerader was infinitely happier that day than the little rich boy.

THE roast turkey, the cranberry sauce and puddings are important for Thanksgiving Day, but if the Maries and Johnnies and Suzies and Sadies, especially those of the city, could not masquerade, it jes' wouldna be Thanksgivin' for 'em.

Feed the children up on brown roast turkey, stuffed with bread crumbs and oysters, on the cranberry sauce, the salad and olives and all the varied trimmin's that go with a grand and glorious Thanksgiving dinner; but don't forget that they need the fun of masqueradin' as well as the pleasures of the festive board.

Dad Dailey, known to Radio pioneers as One Bulb Bill.

Menus *for* MEN

Dad Dailey answers the Eternal Feminine, "What shall I have for Dinner?"

ARE men coming into their dietetical own?

For the first time in the history of Radio the masculine palate is being catered to from the viewpoint of actual masculine taste. Every Friday morning at 9:45 during the Hecker program, "Care and Feeding of Men" over WABC and a special network, Dad Dailey advises housewives on the plain menus their husbands most enjoy.

. . .

During a long period of time, in the interest of his brothers and their long neglected desires for certain dishes, Dad made a study of this subject, eating in restaurants and dining clubs which exclude women patrons, ferreting out masculine preferences, cajoling the cooks into revealing the secrets of their preparations and then probably in the quiet of his home concocting these tempting delicacies. One can imagine Dad stirring the ingredients in a variety of pans, and sniffing at this and tasting of that.

Some two years ago Dad Dailey got to playing around with a manuscript that he called Dad Dailey's cook book and which, he insists, contains many helpful hints on the care and feeding of men. It also lists about one hundred masculine menus for these virile creatures.

He dedicated this literary effort to the millions of men who have been sacrificed on the altar of the feminine viewpoint. In its foreword the writer states that he has but one ambition in life and that is to answer the questions which millions of women put to their husbands every morning, "What would you like for dinner tonight, my dear"—a question which ordinarily elicits an incoherent, unsatisfactory grunt, or a carefree "Oh, I don't care, any old thing will suit me", and then the "any old thing" would turn out to be last Sunday's roast beef in disguise, or the leg of lamb incognito.

While the manuscript of this some-day-to-be-famous cook book was in the making, Dad conceived the idea of carrying his message to the women of the land over the Radio. With the advertising instinct that motivates his every thought, he said to himself, "Why not make this a commercial Radio program?"

In July of 1929, Dad Dailey broke loose on the air at Station WODA in Paterson, N. J. The results of his broadcast proved interesting in more ways than one. He was flooded with letters from women who were interested in keeping their husbands at the home table. He gave menus that erased the furrows in the feminine brow, and his listeners applauded him for standing alone midst the mighty army of feminine broadcasters on food.

That is why Dad Dailey and his new line of chow chatter is booked for a lengthy stay on a split network of the Columbia Broadcasting System, every Friday morning at 9:45. This program is sponsored by the millers of Hecker's flour.

Dad receives in his voluminous mail letter after letter requesting recipes of the many oven delicacies which he now includes in his menus for men. And it seems fair to predict that Dad is going to shame many women back into the old-fashioned occupation of home baking, for Dad is telling the wives that nothing will give greater delight to men, husbands in particular, than a batch of hot rolls or biscuits for dinner, and that every big-hearted woman in his audience need only try it to prove it.

So if any husbands who have long been patient in enduring the wares of the delicatessen shop will ask their wives to tune in on this program, they may find a radical change in the next dinner at home.

One of the courses might even be ham baked in milk which is one of Dad's latest creations.

Dad Dailey is really Wm. J. E. Dailey who for many years has been a conspicuous figure in the advertising agency business.

Seven years ago Bill, as he was familiarly known, built—that is his wife built—a one-tube Radio set. In those pioneer days of Radio, Bill would go to his office after listening in most of the night on nearby and distant stations and dictate to his secretary his impressions of the Radio programs. These impressions finally developed into full-grown comments which found their way into the columns of one of New York's leading newspapers. And so he became known to the pioneers of Radio as One Bulb Bill. He claims credit to the distinction of being America's first Radio columnist, and so far there have been no other claimants to this honorable title.

And now Dad Dailey stands alone on the battlefield, engaged in a single-handed warfare in bringing men back into their dietetical own and in placing the sovereign crown again on the home-made biscuit's brow.

"What will you have for dinner, my dear?"

"Nightingales tongues trimmed with Queen Bee's honey and scalloped with fresh cut orchids."

WITH Dad Dailey's interpretation she will now know exactly what that means.

MAKE-UP for TELEVISION

By Betty McGee

John Gihon, production manager of WMAQ and W9XAP, makes up Dorothy Drum of "Artists and Models" for television. First a base of grease paint in a warm, deep ivory tint, spread out over the face. Then brown eye-pencil. Last . . . imagine it . . . chocolate-brown for lips!

HORRORS!" exclaimed Betty McLean one night in early ember in the studios WMAQ and its attentelevision station. XAP, Chicago. "How I ever go through my act like this?" nall wonder that Betty distraught. There in mirror she saw that usually creamy skin taken on a pale green-brown hue, her nose actually shiny, and lips were unmistak-, hideously green! nd that, my dears, the fate of all who ld appear beautiful—is, those who would ear beautiful in tele-on receiving sets all wo months ago. No, unately, it was not a mical change in the lermis of the indi-ual. Merely a unique type of make-which television brought into being. ing the past two months, however, preparations have been made which not a whit less unique but more in oing with the usual standards of hu-n, especially feminine, beauty. But e of that anon.

TO RETURN to the plight Betty McLean. We were speaking of night of her first appearance on a chronized Radio-television broadcast ough WMAQ and W9XAP. Of course was not the first time Betty had had horrid stuff on her face. Not at all. had endured it many times when she been a subject for make-up experi-nt. But it was one thing to have ious peculiar colors dabbed on one's e for purely "experimental purposes" quite another to be nonchalant in face of an audience, though unseen, knowing that your looks would put a circus freak to shame. Betty confessed afterwards that she had had no idea that she would feel so, oh, so—sea-sick. Something psychological about the green probably. Of course it only lasted a minute, and then she remembered how she would appear on the screen in soft sepia tones.

Betty's experience is probably typical of the effect of the green make-up on the average entertainer. Temporarily, at least, it is poise destroying. I visited the W9XAP dressing rooms when five or six Radio entertainers and show-girls were making-up for a television try-out. They dabbed the green paint on daintily, surveyed themselves in the mirror distastefully, and sat around self-consciously awaiting try-out. Not until they had applied the good old red and white paint where it belonged did they become their usual vivacious selves . . . True enough that the girls don't like it, but ask any woman if *some* make-up isn't better than *none*, and you'll have the answer to the question as to whether or not make-up for television will last

When the directors of WMAQ turned to television they discovered, as have many others, that television often does strange things to the human face. Primarily, the great difficulty is that the features are apt to appear blurred through television. In experiments it was discovered that sometimes a nose was completely lost, and we'll all admit that a face without a nose is not a thing of beauty; sometimes blue eyes seemed to have faded away into almost no eyes at all; sometimes the outline of the whole face was indistinct.

THEN the production manager, John Gihon, and the casting director, Vinton Haworth, put their heads together and said, "Let's do something about this. The whole thing is in an experimental stage. Why not experiment with make-up?" And they began their experiments in earnest. A number of make-up experts were called in and Davis Factor, who is said to be the foremost make-up authority in Hollywood, tore himself away from the movie stars to study the problem of television make-up

Jean East and Carol Lynn, the Honey Girls, appear over WIBO and W9XAQ. Imagine these darlings daubed with green!

He began with powders, running the gamut of shades and textures from the thinnest white to the deepest, heaviest ochre. His conclusion was that powder was definitely out since it produces a too dry and flaky surface. After trying seven different kinds of grease paint he discovered one that produced very satisfactory results. It was a light brown with a green cast and one that did not create too decided high lights.

"The whole problem of television make-up is a red washout," explained Mr. Factor. "Television takes the natural red from the skin, changing it into black. Therefore the idea is to cover up all reds. The grease paint acts as a mask, completely covering the face."

WHEN Mr. Factor hit upon green as the ideal color to superimpose on ruby lips he levelled quite a blow at feminine vanity. However, when he returned to Hollywood to put his chemists to work on some new preparations for television he took into account this weakness usually accredited to the female sex. The new make-up evolved is a grease paint of a warm, deep ivory tint—this for women. That for men is two or three shades darker, running into the browns. There is, too, another dark shade which is used to bring high lights where they are needed, as for instance, around the nose. For the lips he created a nice chocolate brown paint which is, to the unaccustomed eye, hardly alluring but far more pleasing than the former green.

Now as to the application. It takes about an hour to apply the make-up properly. First you put on a base of the panchromatic grease paint—a little dab on the cheeks, the nose, the forehead and chin. (And by the way, girls, the paint that the men use is a far nicer color than that for the women.) You spread this coat out over the face with plain, unadulterated water — always moving your hands in the same direction. This is a half-hour job in itself. The base must be very smooth, very even and very thin. On some faces it is a good idea to use high lights on the nose, gradually darkening the color as you reach the outer cheeks. This is to prevent the possible "loss" of a nose too small to take distinctly.

After this is done, you line your eyes slightly, according to individual requirements, and pencil your eyebrows with a brown pencil. Black is too dark. Now, everybody knows that the proper way to pencil your eyebrows is to use the deepest color near the nose, and gradually lighten it as the eyebrows narrow. For television, they do just the opposite—barely touching the eyebrows close to the nose, and using the pencil more heavily as you go outward. The reason for this is that television sometimes plays tricks with the eyes and eyebrows, making eyes look crossed if the brows are too close together. If your eyes are blue you place a dash of brown under them, to bring out their depth, but no eye shadow is used. Mascara, if you wish, although it is relatively unimportant.

If your face has a tendency to be a little too broad you will dab a little white paint on either side just above the jawbone. If it is thin you place a little of the darker paint there instead.

And now we turn our attention to the lips. The chocolate brown is applied quite lavishly, emphasizing the natural curves, as television requires over-emphasis.

And there you have the story of the application.

Many people who have been experimenting with television rather extensively feel that make-up is not worth the expenditure of time and money. The results they have had are satisfactory enough and would not be materially affected if make-up should be eliminated, they s

"I suppose that make-up for televis cannot be reckoned a necessity," s Vinton Haworth, casting director WMAQ and W9XAP. "Its reason being is an artistic one and we feel t it is a very important factor in the velopment of the new art of televisio

MR. John Gihon, p duction manager of the station, belie that the promoters of television groping around to discover just the ty of thing that it is best adapted to, a he is confident that some particular fo of entertainment will become the "te vision program."

"We are continually bringing beaut of the theatrical and Radio world bef the microvisor in an endeavor to find t best types for television. Undoubted there will be a distinct type known as t 'television beauty' but it is hard prophesy just what type she will Generally speaking, the girl with a rath broad face and clearly defined featur will take well.

"The 'television beauty' will not ha a rosebud mouth. It is certain that s will be a strong, vigorous type, and s will probably be characterized by flashi eyes and a flashing smile."

The development of television w bring about many changes. For one, new type of beauty expert will arise. new vanity case, resembling an artist palette will be added probably to t feminine television artist's accessories.

"Oh, dear, don't you think that n nose needs a little more green?" will the oft-repeated question in studios. Ar who knows but that our flapperettes w follow suit with green noses and blue lips

Marcella Lally of Station WMAQ. No, those aren't soap bubbles behind her . . . they are the "eyes" of the television microvisor.

Why Look Like a Wife?

"Any woman can be lovelier . . . simply by never looking unattractive, even to herself."

"THIS is the beginning of a series of articles by the well-known consultant on care of the skin. You may have a booklet, "Why Only A Healthy Skin Can Stay Young", by writing to Miss Ingram in care of this magazine, or if you have some special beauty problem, Miss Ingram will be very glad to advise you by letter.—EDITOR.

By

FRANCES INGRAM

Consultant on care of the skin, who broadcasts regularly over CBS.

HOW to be lovelier. This question is put to me in every one of the hundreds of letters which come to me each week. These letters are from young girls, middle-aged women, grandmothers—all of them interested in the same subject—how to be lovelier.

I doubt if all these women who ask this question know just why they want to be beautiful, but after all, that is important. The reasons for wanting to be attractive are so natural that I'm sure many women have never expressed them even to themselves. The point is, there is no woman who would not improve her appearance if she knew how.

Perhaps no woman is more interested who has a more pertinent reason for wanting to be beautiful than the wife. After all, men do like beauty—they always have. Men see in beauty an ideal—an inspiration—and as beauty does mean so much to men and to the world, I think it follows that it's a wife's privilege as well as duty to be as attractive as she can.

MANY weeks half of the letters I receive are from wives. The following is typical:

"I am thirty-five years old and the mother of three children. Since I've been married, I haven't had time to bother about anything so trivial as my appearance. I have sacrificed myself to my husband, my household duties, and to my children. I've given them the best years of my life. But my husband seems to have lost all interest in his home and me. He spends very few evenings at home and he doesn't tell me where he goes. Of course, I imagine everything. You can't blame me. I could be more attractive if I only had the time. And from now on I'm going to have the time. I'm going to leave my husband and get a job. If all my years of sacrifice mean nothing to him, I'm through. I won't talk any more about my situation, but I wish you would tell me how to improve my appearance enough to get a job which will support me and my children. Even in business nowadays it seems that looks count for more than ability."

I remember when this letter came in. Marion, my secretary, read the letter to me and said in a disgusted tone of voice, "I don't think much of her husband, Miss Ingram. I'm glad she's leaving him." I told her that I wasn't sure that it was all the husband's fault. It seemed to me—and it still seems to me—that one of the reasons why that marriage was going on the rocks was because that woman was neglecting her appearance. In other words, she was looking entirely too much like a wife. We've all seen this happen. Attractive young girls marry and in just a few years they change into unattractive, discontented, matronly looking women. Most of these women, I'm sure, had promised themselves before they were married that they would not allow this to happen to them—that they would be different from the average run of wives. But they begin to backslide a little, and as the years go by, they unconsciously backslide more and more until finally they are content to look like a cartoonist's impression of a breakfast-table wife.

Now there's nothing alluring about a breakfast-table wife. Of course a man likes to know that his wife is helping him by being domestic. But he likes to see her in more attractive aspects, too. He likes to see her pretty. He likes to be proud of her. And why blame him for this? Since the beginning of time, attractiveness has been one of woman's most outstanding virtues. Before she's married, a woman is punctilious about her appearance. She tries hard to be as attractive as she can to get a job—or a husband—or to keep a job. If a woman will make this effort to keep a job, I wonder why it doesn't seem equally important to her to make the same effort to keep a husband.

ANYWAY, preserving her looks has a decidedly mental reaction on the woman herself. It gives her an air of alertness—a sense of confidence in herself—in other words, poise. Psychiatrists say that neglected wives are frequently suffering from inferiority complexes and that these complexes often can be traced back to an unattractive appearance. Women get this sense of inferiority when they realize that they are not attractive and that other people are not attracted to them. Then they lose their belief in themselves and their ability. When this happens, other unfortunate things occur in rapid succession. These women develop a spirit of martyrdom. They sacrifice themselves, their husbands, and their children to household duties. They thrust aside every opportunity that offers relief from household monotony. As a result, they are more apt

How to Comprehend Symphony Music

Keener Enjoyment of Good Radio Music Comes to the Listener With Better Knowledge of The Orchestra

By

WILLIAM BRAID WHITE

Doctor of Music

Dr. William Braid White, Author, acoustical engineer and national authority on musical instruments and music has been engaged to write a series of articles on the inspirations and appeals of good music—Editor

WITH the permission of my readers, I shall not talk this month about actual programs on the air. For various reasons it appears to me that there is quite a bit of preliminary ground clearing to be done before we start off full-tilt on music arguments. There is a great public just beginning to find good music attractive, but it is still almost entirely without knowledge either of the history, or of the styles of the art of musical expression. Where knowledge is not, any man's opinion is as good as any other's; and precisely there the uninstructed taste gets into trouble. Anyone can cover reams of paper with high-falutin' talk about the emotional side of a piece of music, but after the eager unlearned amateur music lover has ploughed through a square mile or so of stuff like that he is just about where he was at the start. Suppose on the other hand that here, in this department of Radio Digest, I try to do something a little different. I shall not use the awful word "educate", and indeed shall not for a moment try to uplift, or to "teach" anybody. I shall however try to give some needed information on points concerning which there is an immense amount of misunderstanding, even among those who really should know better. If I can manage to convey the information in a way that shall not bore you and that at the same time shall really tell you some things that you must know if you ever intend to get real significant pleasure out of listening to the great programs which are now being broadcast by the best musical organizations of the country, then indeed I shall feel that something worth while has been accomplished, even if we do agree not to call it "educational".

Music as a form of expression.

Long before Homer sang the Fall of Troy, magnificent poems were composed in India and China, which have come down to our own age to awake our admiration and envy. Then, later on, men sought a still more perfect form of expression which should enable them to say that which could not be said in words. The Church during the Middle Ages took the complex but inexpressive musical experiments the Greeks had made in music, and began to build up the art of choral singing. I have heard music which was written nine hundred years ago. One can only wonder at the inspiration of men who, without a scientific scale of musical sounds, without a notation whereby to write down the sounds without musical instruments to give them out, without trained musicians to play the instruments, nevertheless were able, because they loved God and desired to worship Him rightly, labored unceasingly to find out how to make different voices move together so as to produce a tolerable tune and make a harmony at the same time. We smile today at the child-like simplicity of their efforts; but let one of us moderns sit down with a blank sheet of paper, with no piano, with no sheet music, with no science of harmony, with nothing but the ear and the brain, and try to invent a tune, arrange it so that a high soprano and a low tenor may sing in harmony.

he history of music is the history of great struggle to master this problem, problem of making sounds move to er so as to express emotion that can be so well expressed in any other way. has taken nine centuries to perfect ical form. To-day it is right to say neither with pen, nor with brush, nor chisel, have men been able so to ex- s the depths of heart and mind as have with music. Five hundred years when music was young and struggling a place in the sun, the great art was nting. To-day the great art, the great lern form of expression, is Music.

What is musical form?

good many people seem to think that sic is something which a dreamy ec- tric called a composer writes down in a zy of emotion and of inspiration, not wing how it comes and hardly knowing t he is doing. Nothing could however more absurd. The art of musical com- ition goes by the strictest of technical s. To acquire a mastery of these rules that one can apply them in writing vn one's musical ideas, takes years of y hard work. No matter how much piration a man may have unless he has rned the rules of the art he is out of k. One hears wonderful tales of ob- re geniuses who play by ear; but those tales. A man who has the mental lities which shall enable him to write great symphonic composition for the nd orchestra must have mental capa- y of the highest order. To appreciate sic, to listen to it understandingly, one d know only a few simple facts; but to ite music . . . well that is another matter tirely. Music is the easiest of all arts love and to appreciate, but the hardest all to master.

How Does an Orchestra Work?

When a composer writes a piece of music, he conceives it mentally as something to be performed (as all music must be to bring it from dead notes into life) by some one instrument or group of instruments, by one voice or a group of voices, or by some combination of instruments and voices. He does not write down a lot of notes and then leave it to some one else to decide what instruments are to be used. The conductor of the Boston Symphony Orchestra, or the Philadelphia Orchestra or the NBC Orchestra or the Roxy Orchestra, has nothing to do with arranging the music for various instruments, save in very exceptional cases. When the score (as you call the manuscript or printed pages of a symphony) comes to him, he sits down to study it, but he finds on its pages every note that is to be played by every instrument in his orchestra. His tack then is to have the orchestra play over that music and to make them play it exactly as he wants it played. Over and over again, if it is new music especially, and often when it is music old and well known, the conductor will have the orchestra go through a certain passage until it sounds as he wishes it to.

Don't think that it's done by inspiration, not at all. When you heard the great Boston Symphony orchestra playing on October 4th from Symphony Hall in Boston during the New England Tercentenary festival, what you heard was the carefully prepared result of repeated rehearsals. The performance of fine music by an orchestra is a matter of continued, steady and difficult labor, involving the highest kind of executive ability on the part of the conductor and the most strenuous training on the part of the musicians.

Dr. William Braid White, who explains with great clarity and interest, the symphony orchestra in this article. Dr. White is one of the few possessors of the accredited title of Doctor of Music.

What are the Divisions of an Orchestra?

A symphony orchestra, such as the big one which Walter Damrosch conducts for the NBC symphonic broadcasts, or the New York Philharmonic Symphony, the Boston Symphony, the Philadelphia Orchestra, the Chicago Orchestra or the Cleveland Orchestra, is a very different thing from the group of players who form what is called a dance or a jazz orchestra. The symphony orchestra has evolved into its present size and shape through the efforts of the composers, who have written their masterpieces for certain definite numbers and groups of instruments which seemed to them to be the best for their special purposes. Gradually, during the last hundred and fifty years, composers have tacitly agreed upon a general lay-out of instruments for which to

(*Continued on page 118*)

The Philadelphia Symphony Orchestra arranged as explained in this article . . . Conductor Leopold Stokowski in the center. To your left, the strings, center the wood wind instruments; right rear the brasses, and the tympani.

Voice of the

THE VERY IDEA!

WE THINK Big Brothers Bob and Willie are the most clever comedians on KMBC, but here is the thing that seems funny to me. Big Brother is always correcting Willie for saying words wrong and then he insists on saying "That's an idear," instead of idea.

I thought someone would tell him about it, but I guess they have not, as he still says "idear."—Mrs. S. C. Munson, Leavenworth.

* * *

WE ACQUIRED a Graham McNamee complex, several years ago, and we have never gotten over it. He is our favorite announcer. And when we are granted the privilege to hear him sing, well, we never pass up such an opportunity for any other entertainment. We sincerely hope that he is awarded this honor by the greatest majority of listeners. —Mrs. Winifred Coplien, Brodhead, Wis.

* * *

WE'LL TRY TO DO BETTER

I BOUGHT my first copy of RADIO DIGEST a couple of weeks ago and find it very interesting.

There is only one complaint I have to make and that is that you didn't mention WSB of Atlanta in this issue; one of the strongest and best stations on the air. Everyone is familiar with the voice of Lamdin Kay and the rest of WSB's staff.—George C. Holland, McRae, Ga.

* * *

HOPE YOU WIN MORE PRIZES

ON SATURDAY I was unexpectedly surprised when I received a check for one hundred dollars from you, as the prize winner of the Dubronsky mystery story.

I wish to express to you, and to the judges my most sincere thanks and appreciation, and let me add too, that RADIO DIGEST magazine is one of the cleanest and finest books ever published. —Margaret J. Ayatte, Watervliet, N. Y.

* * *

WE'LL TRY TO FILL YOUR ORDER

JUST finished reading the article "Dawn of Radio" in the August RADIO DIGEST. I surely did enjoy it and the pictures. I hope you will run more articles and pictures of the early days of radio.

I, too, think that we have been having too much of Amos 'n' Andy. Amos 'n' Andy gave me many a laugh but they have gone stale, now; while Jake and Lena (when they were at WTAM) were funnier with each broadcast. I can truthfully say that Gene's clean, wholesome humor and Glenn's infectious laughter gave me more enjoyment than anything or anyone I have ever heard on the air.

And now I'm going to make some suggestions for pictures. The first is for that of John McGovern, who, each Sunday, plays the title rôle of "The Globe Trotter" over CBS from 6.30 to 7.00 and the hero in "Mystery House" over NBC from 7.00 to 7.30. On August 10, he spoke his last lines over CBS at 6.58 and his first over NBC at 7.08. How does he do it? I would like pictures of the WCAU announcers, and the WCAU Kiddies. When the Kiddies played Wildwood, N. J., they drew the biggest crowd of the season.

I would like to have pictures too of Little Mitzie Groff who does Belle Baker, Fannie Brice, Sophie Tucker, etc., Martie Zisserman, who does Henry Burbig (I wish you could hear these two) and the rest of these talented youngsters.

The tree sitting bug has hit this part of the country so strongly that even the radio entertainers are not immune. However, Jackie Mack of WPEN, who has been sitting in a tree in Woodside Park, doesn't let it interfere with his Radio work. He broadcasts several times a day from his lofty perch.—Miss Florence Haist, Box 157, Lindenwold, N. J.

* * *

SEE OCTOBER, KATIE

I SUGGEST that you print a story of the life of Gene and Glenn, those two famous Radio artists. Something like your Amos and Andy stories. I am sure our readers would like to read something about these two boys in your wonderful paper.—Kate E. Gordon, Mentor, Ohio.

* * *

QUICK! BRING THE DICTIONARY

NOW that orbal transmission is imminent as an adjunct of aural broadcasting, discussion of the topic will become of proportionate interest, as speculation arises and doubts are instilled by the quizzical whose interrogations delve into the hazy and who seek information on the subject because of its very pertinence to their future aberrations in the field of entertainment.

Let it be here quoted that radio as a deliverer of music and speech is still unapproached to realism. Visit a concert hall, dance to the rhythm of a dance orchestra or attend a social function where music in any of its forms predominates. Then you are in contact with the true source in actuality. There is no static or intrinsic disturbance to mar the performance as we wish to hear it. Mayhap engineers will soon be able to evolve a cure for this woe.

With television extant the question of its being a commercial competitor with the talking movies, the theater or vaudeville will be advanced. The same, or virtually identical, question arose when Radio was being developed in competition with the silent drama. Everyone now knows of the innovation of speech and music in the motion picture and the lack of conflict between the two industries. And there never will be.

With the initiation of television will probably come the separation of the two into two different departments. Television will turn into the broadcast of sport news as it occurs, in addition to providing the drama and prepared program as it does now, while for the talking picture will remain the depictal of only the present type of drama that it offers us. It may be added that the two will never merge, although there may be a similarity in the output.

Assuming that the predictions do matriculate it must be admitted the details will not be minute, for when one seeks to propound the future, the eyes of the present can be easily confounded by interluding time and its accompanying unforeseen incidents.—Algird Truska, Newark, N. J.

* * *

YOU'RE SO NICE, MAYBE WE WILL

I HAVE three things to accomplish as I write you this letter. The first is that of most importance. It is that I want to praise the staff and editor of RADIO DIGEST for the wonderful magazine they put out to the Radio listener Second, also important to me, is that I wish to become a member of the V. O. L. The third is that I wish you would give us a write-up on Thompkins Corner.—Ralph Berry, Kan[illegible] City, Okla.

* * *

DARN CLEVER, THIS "CHINESE"

THE article in the Sept. issue, "Try Singing to Speak Well," by Drake Evans, was very interesting. However, I beg to differ with Mr. Evans as to his pronunciation of "Chinese", rhyming with fleece as being the only proper pronunciation. He evidently uses the Funk and Wagnall dictionary, which gives the pronunciation to rhyme with fleece. The Oxford, Stormonth, Encyclopedic Dictionary and Worcester give but one pronunciation —that rhyming with breeze.

The Century gives both ways, preferring the one rhyming with fleece, while Webster's International gives both ways, but gives preference to the pronunciation rhyming with breeze Now those reading the article who have always said "Chinez" need not feel bad (not badly) about the matter of faulty pronunciation. Both are evidently correct on equally good authority.—Mrs. Lizzie M. Roberts, Sterling, Ill.

* * *

JEWELED PHRASES FOR JESSICA DRAGONETTE

FIRST, let me congratulate you on your very excellent magazine—especially the rotogravure section which I immensely enjoy. Second, to praise my favorite Radio artist, Jessica Dragonette. Not only does Miss Dragonette possess unquestionably the finest, purest, sweetest voice on the air, but she is an extremely talented actress, as she proved on the Philco hour, and is now proving on Cities Service. Her naïve, unaffected personality broadcasts as effectively as her voice, due to its magnetic quality. As far as her looks are concerned, she certainly need have no fear of television.—Marjorie Goetschins, Manchester, N. H.

* * *

128 NOW—COUNT 'EM!

WHY so much fiction in the Digest?—and only 96 pages when there were 128 all through the winter and spring? I'd certainly appreciate seeing more about Radio and less fiction—none at all as far as I am concerned. There are so many magazines full of fiction but only one Radio magazine so far as I know. I'd like to see something about Roxy again. Cheerio!—Mrs. B. C. de Mercado, Columbus, Indiana.

* * *

PLEASE WRITE TO MR. ARNOLD

SINCE 1926, when I became a Radio Fan and began subscribing to RADIO DIGEST, I have had a desire to know what reception is like in other states. The finest sport I can think of would be to tour the states in a Radio-equipped car and get that information. That being impossible I would like to receive reports from listeners in every state, giving the stations you receive best, what stations interfere in your state, whether you depend on electricity or batteries for power and the make of your Radio. Every letter received will be answered

Listener

...ptly with like information.—A. C. Arnold, ... o. 4, North Topeka, Kan.

* * *

...E YOU LIKE THESE WINNERS, ROSE

...HE August DIGEST was overflowing with ...tems of interest and long-looked-for pic... I especially enjoyed the article about ...ney and the one on Vacation Follies. ...am an ardent fan of the network features. ...lieve I could get along with very few but ...n programs. Gene and Glenn's Song Shop, ...n-Sanders' Knights and Ladies of the ...n and certain broadcasts of WENR, how... are priceless. The truth is, I've read ...ral letters knocking the NBC and CBS ...orks so I am inspired to express my whole...ted support of their superior programs. ...n very eager for the outcome of the Dia...d Meritum Award contest although I was ... disappointed in the result of the last two. ...ehow it doesn't seem very representative of ... listening public—loyalty is the ruling ...or, I believe, not the number of fans.—...e Gergen, Turtle Lake, N. D.

* * *

FLOYD GIBBONS

...ever, please, forever,
... us hear at eventide,
...he many news bits
...i tell the world so wide.
... your stuff—how we enjoy it,

...at have been your daily chats
...erspersed with wit and oft—mishaps.
...t all those swell detective yarns
...ause they happened in your own life
...thrilling happenings in this recent strife.
...w, Thorgy, you for the blue ribbons
...long as you announce "Floyd Gibbons."
—A Group of Radio Listeners.

* * *

THANK YOU!

...AVE been a reader of RADIO DIGEST ever ... since we have had a Radio—a little less ...n a year, and the only bad thing about this ...e magazine is the wait, from one issue to the ...xt.

We would especially enjoy any pictures or ...ories from our favorite stations WTAM, ...eveland, WJR, Detroit, WENR, Chicago, ...LW, Cincinnati also Larry Larson, WGN, ...icago and others.

I am enclosing our vote in the Digest Popu...rity contest for Gene and Glenn, WTAM. ...ey are to us the "Idols of Radioland." ...ve the 7 coupons. We would surely be ...ppy if they should win this honor, and they ...ould for I believe theirs is one of the most ...pular midwest programs.

With every best wish for the success of ...ADIO DIGEST, we are—Mrs. Ruth Avery and ...mily, 2011 Ashman St., Midland, Mich.

* * *

...N THE AUTOMOBILE CITY—DETROIT

...E HAVE had station WNYZ which ... broadcasts on a frequency of 1240 kilo...cles, several times. Both of the Grand ...apids stations broadcast at 1270 kilocycles. This somewhat interferes with getting station WNYZ. We have seen this station listed in radio programs but it doesn't give the city. We are rather curious to know where this station is.—Thelma Winter, Grand Rapids, Mich.

* * *

STATE AND CITY INDEX IN THIS ISSUE

ENJOY every bit of RADIO DIGEST, but as it is a Radio Magazine, wouldn't it be possible to help the DXers by putting back the "State and City Index with wave length?" I use the "Official Wave Length" to log my dial readings.—Mrs. J. H. Morris, Box 204, Richmond, Va.

* * *

FLOWERS FOR GORMAN AND CUMMISKEY

I WOULD like to invite the attention of the other listeners and yourself to Gorman and Cummiskey who broadcast from WWRL. They sing harmony in a manner that, I think, is far ahead of anyone else on the air.

Their announcer once stated that they were proteges of the former team of Van and Schenck and while I cannot vouch for this statement I certainly do know that I was amazed at the similarity that this team possesses to the former champion harmony team.

I therefore nominate Gorman and Cummiskey as the world's champions at male-harmony and predict that in a few months they will be recognized as such. Please, Mr. Editor, print their pictures. If they look as well as they sing John Gilbert will be worrying about his job.

Hoping to see the photographs in an early edition of your magazine, I remain, a devoted reader.—Joseph Kane, 215 Johnson Ave., Brooklyn, N. Y.

* * *

INFORMATION WANTED ON "IKKO" STAMPS

I AM a collector of verification and "ikko" stamps of broadcasting stations. I would like to know if you could tell me how, or tell me where I could get a list of broadcasting stations that issue ikko stamps?

In order to get ikko stamps now I have to write to the station and ask if they issue them. —Ernest Jessop, Box 166, Oakland Beach, R. I.

* * *

YES—MONDAY AT 10:00 P.M.

JUST a line to show my appreciation of RADIO DIGEST. It is indeed a marvelous Radio magazine and the Radio fans like nothing better than to see pictures and read the gossip of our favourites.

Although we enjoy Amos 'n' Andy, don't you think the public is getting a little tired of them? It seems that way around this part of the country.

I enjoy nothing better than a good singer and the True Story Hour and speaking of dance orchestras, I don't think any can compare with Guy Lombardo and his Royal Canadians; their slow dreamy tempo seems to have won the hearts of many. Would it be asking too much to let us have a real good picture of this orchestra? We haven't seen one since the Spring issue and then it wasn't very clear. I understand another brother has joined them, making four Lombardos. Will you let us have a picture of him? Will you let us know through RADIO DIGEST when the Lombardos will again be heard on the Robert Burns programme over the Columbia Broadcasting System?—Lenore Churchill, Oil Spring, Ont., Can.

* * *

CONSOLATION PRIZES FOR MERITUM ENTRIES WHO DIDN'T WIN!

DURING the present heavy static, the daylight stations are about all that we get at night, though usually WENR and KTHS struggle through, and KMOX now comes big since the installation of the new transmitter. But why worry about distant stations when we have one we can count on for all the best National broadcastings; one that has the *Best* studio orchestras; a nationally known quartet, the Bel Canto; one of the finest organists; the livest studio programs; the peppiest early features; and absolutely the nicest announcers anywhere! This may sound very enthusiastic and positive, but we have reason to be proud of Our Own WFAA.

An act that has everything, I mean pep, vim, speed, humor, and "aliveness" if I may so express is our Quaker Oats man, Mr. Phil Cook. It takes a real blond to get the fast ones over, in my opinion, so I say *THREE LOUD CHEERS* for Phil. He is without a rival as being the best act on any network. Sorry we could not vote for him also, but our home folks come first.

I think the real test of how peppy they are is the dead hour of early morning. I often play the Radio until 3 a.m. but I never miss an "Early Bird" Orchestra program. I am hoping you will be kind enough to let this burst into print and give the boys a hand.—M. E. Huebetter, Austin, Tex.

* * *

I AM enclosing five votes for the Farm Hour Program at WAIV, Columbus, Ohio. This is the best program on the air and I hope to see it win. Neighbor Fred Palmer is a real neighbor, although we can't see the grin. We can hear his hearty laughter and his cheery, "Hello neighbor!" It certainly goes a long way toward making this old world a better and more cheerful one. It puts pep and sunshine into the whole day.—Thelma F. McKitrick, Reinersville, Ohio.

* * *

YESTERDAY I mailed six coupon ballots to you, but found this morning I had failed to include the seventh, so here it is, one more vote for the best of 'em all—The Dutch Master's Minstrels! My husband and I would rather miss a good dinner (and HOW we like to eat), than miss hearing the Dutch Masters—they are all artists and it would be difficult to say which one we enjoy most. Here's hoping they win the contest.—Mr. and Mrs. W. W. Flynn, Detroit, Mich.

* * *

MON cher Editor—Some voix, eet may lead . . . Some voix, eet may sing . . .
And some, just don't mean a thing. But oh! mon Dieu, when zat glorious voix of "Palm Oliver" take wing . . .
Some voix, eet may whisper . . . Some voix eet may shout
But zat charming voix of Palm Oliver. Eet sure will get you, if you don't watch out.
Who knows?
Pozee, Paree.—U. S. A. Today.

* * *

WE HAVE numbers and numbers of fine entertainers, numbers of fine announcers, but no one like our little old Texas Cowboy Crooner Marc Williams at W. A. C. O. Waco, Texas. I could gladly turn off of any other program to listen to Marc.

I thank the RADIO DIGEST for helping us out on our NBC Entertainers and letting us know them better.—Pearl Spann, Celina, Texas.

Out of the AIR

HITS—QUIPS—SLIPS

By INDI-GEST

At last! Indi-Gest has come to fame. This columnist is ready to compete now with Amos 'n' Andy, Jessica Dragonette, Rudy Vallee, and all the others who receive such stacks of fan mail. Some one wants my picture. I'm going to take the letter in to the boss and tell him that now that my popularity is proven, he'll have to give me a raise. Well, Frances Cherry, here is my picture, just for you.

The only trouble with my picture is that the artist who drew it either broadcast it on one of these distorted (not balanced-unit) Radio sets, or else he sent it by Radio across the ocean. You can't tell whether I am male or female. Frances calls me Mr. Indi, but maybe I am Mrs. Indi, or Miss Indi. Or maybe I'm Will Rogers or Bernadine Hayes, the Most Beautiful Radio Artist.

Indi-Gest in Person

Here's a giggle I gleefully ran across some time ago during a program broadcast from a middle-western station.

Jones (perhaps you know him?) was discussing, as neighbors are wont to do, local happenings with his friend Smith (I'm *sure* you know *him*). As was quite natural under the circumstances, they were conjecturing in regard to Neighbor Brown's recent purchase of a dog; according to reports, an exceptional and valuable animal.

"He says he paid $800 for the dog — says it's part bull, part setter."

"Which part do you suppose is bull?"

"That about the $800."—*K. M. Gergen, Turtle Lake, N. D.*

Cash for Humor!

IT WILL pay you to keep your ears open and your funny bone oiled for action. Radio Digest will pay $5.00 for the first selected humorous incident heard on a broadcast program, $3.00 for second preferred amusing incident and $1.00 for each amusing incident accepted and printed.

It may be something planned as part of the Radio entertainment, or it may be one of those little accidents that pop up in the best regulated stations. Send your contribution to Indi-Gest, Radio Digest.

A LISTENER'S LIFE

(Being a parody on An Announcer's Life as featured by Mac, and Lennie, and Walter Samuels over CBS.)

We tune, and tune, and try to get
station
For a program which we want s
much to hear;
In despair we tear our hair,
We can't get them on the air . . .
A listener's life is not a happy one!

We get all set to listen to a hook-up,
A weekly feature that is bound t
please;
Then we could commit a crime,
When locals: "Sorry, trouble on th
line . . ."
A listener's life is not a happy one!

We keep our sets tuned to a certai
station,
We like the things that it puts on th
air;
Then commissions change its wave
Cut its time . . . an early grave! . .
A listener's life is not a happy one!

We listen daily to the cooking experts
One says: "Never, ne'er cook sou
all day long!"
Another, that same day,
Says: "Cook it just that way!"
A listener's life is not a happy one!

We enjoy the music that is coming to us
We are ready for an hour or more o
it;
Then the announcer starts to blat
About the sponsor's this and that . .
A listener's life is not a happy one!

By request we send in fan mail to broad
casters,
Telling what we like, and do not lik
to hear;
If it's praise, their hats they doff,
If it isn't . . . how they scoff! . . .
A listener's life is not a happy one!

But, always hoping for the best w
keep on listening,
Perhaps, someday we'll get a lucky
break;
Till we do, I'm telling you
(Though it's sad, it's really true) . .
A listener's life is not a happy one!
—Niagara Nel

INDI'S OWN PUZZLE

pit.

Vell, it's all right, now, my favorite rpewriter fix-it man just came up and e located the trouble. He said the eason the space bar wouldn't work was iat it was jammed on a pile of twenty-ve contributions to Indi-gest's column iat I had (with a sad heart) rejected, nd then placed under my typewriter by iistake instead of in the files where ney belong. According to the new psy-hologists, that error was just an un-onscious wish-fulfillment. I hate so iuch not to send each one the dollar e craves that it hurts me to file those 'rejects" away.

As office critic and observer, I submit . . . ne of the feminine proof readers in Radio Digest's print shop got an advance thrill rom this issue . . . I peered over her shoul-ler and what did I see? Rudy Vallee's picture carefully clipped and placed under he glass on her desk.

Elmira Ruben, the Crook Who Didn't Like Ether, should have been a fiction writer . . . he picked so many plausible names for his aliases . . . you know finding plausible names is the author's greatest trouble. He picks one, and then all of a sud-den, some one by that name telegraphs and threatens to sue for libel. Is there a John Garland, Mr. Oppenheim?

Just changing an old adage . . . Mme. Schumann Heink says it's the first *fifty* years that are the hardest . . . Talk about excitement and Thrills, Len Smith sure got me panting for breath with those dashes he used in his Graham McNamee story. He gets paid by the word . . . won-der if he expects us to count the dashes.

There must be something in this Mystery business . . . just look at the Mystery An-nouncer and his Diamond Meritum medal . . . if remaining incognito pays with spar-klers, I'll stay that way.

Well life can't be all pickin' on things and people. Here is a little of the salt of philosophy with the pepper:—

RADIO

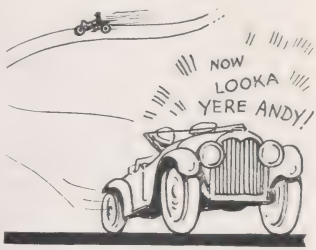
The salt sprays fling where the seamen cling
Clutching close to rigging and spar.
And though ocean-wide be the rolling tide
'Tween the sailor and friends afar—
Aye, though leagues away, where the loved lands lay
By the billow's rocky rim;
A message will come from his far-off home,
Bearing hope and cheer for him.
—*Renice Radcliffe.*

Everett Mitchell at WENR announced, "Swinging in a Hammock with Frank Westphall and the studio orches-tra." Some hammock full don't you think?—*Mrs. J. E. Wells, Bloomington, Ind.*

FLYING NOTES

During the Cheerio half hour over WEAF, the soprano started valiantly on an aria. She sang about four lines—then, suddenly, she stopped! The or-chestra carried on alone to the end of the number. But not a word of explan-ation came from the master of cere-monies, Russell Gilbert, except a brief remark about an accident that had occurred.

Next morning the secret was out. Gilbert said it was a trivial accident—



nothing more than a fly which had flown into her very throat as she opened her mouth for a high note!—*M. Dowd, New Rochelle, N. Y.*

That reminds Indi-Gest of a favorite tongue twister. Say it, I dare you. "A flea and a fly in a flue were impris-oned one day. Said the flea to the fly, 'Let us flee!' Said the fly to the flea, 'Let us fly!'" So together they flew, the flea and the fly from the flue.

BELIEVE IT OR NOT

We almost had heart disease the other day when an officer on a motor cycle followed us for several minutes. And when he finally caught up to us we found out that he only wanted to hear Amos 'n' Andy—which gave us a grand and glorious feeling because we had equipped our car with a Radio just the day before.—*Mollie Zacharias, Kansas City, Mo.*

THE ASININE FOOL!

Heard during the WENR Minstrel Show.

Gene—"Ray, how do you like my new hat?"

Ray—"How much did you pay for that hat?"

Gene—"Fifteen dollars."

Ray—"Where are the holes?"

Gene—"Holes! What holes?"

Ray—"Why, the holes for the ears of the jackass that would pay fifteen dol-lars for a hat."—*Leila Eppley, Wyan-dotte, Mich.*

THE RADIO FAMILY

Monday

Wife—"Come on, let's all go out to-night,
So long since we have seen a show."
Tired man—"This age in which we live is new,
Stay home and tune the radio."

Wednesday

Wife—"Ma sent me two seats for the opera,"
Annoyed man—"Well I, for one don't care.
I can't be bothered going out—
When there's music in the air.

Friday

Wife—"Now dear, tonight is my birthday,
I've asked some folks we know,"
I'll open the ol' piano—
And we'll sing of the long ago."

The Week End

Weary man—Families are so selfish
They're forever on the go
When weary man comes home
He *needs* his radio! ! ! !
—*Rhea Sheldon, Kansas City, Mo.*

After you read the story below you'll learn that stenos and Will Rogers haven't a patent on gum-chewing . . . Radio entertainers can do a little jaw work as well.

Station W I. B. W. at Topeka has a "Sunshine Hour" in which each of the staff adds his bit of entertainment. They seem to make quite a picnic of it among themselves; and the announcer, a peppy, clever, young man has a genial way of letting the listeners in on the studio fun.

While announcing one morning, this summer, he stopped suddenly as though greatly disturbed and said that if the loud smacking in the studio weren't stopped he would be unable to go on. He informed us the "Massey Family," a group of five musicians, were all chewing gum and that the audience would now be favored with the chorus from "Lew-Chew-ia" with variations from "Yucatan".

The five obeyed and stepped up to the mike and smacked their gum with all their might. The effect was uproarious.—*Mrs. Allyn Hartzell, Rossville, Kansas.*

Once upon a time Indi-Gest was a distance fiend and sat up until 1 G.M. o'nights trying to get Cuba and Chile and San Francisco but lately, Indi has been content to just twiddle the dials to our own New York locals. But on seeing the picture of Frank Watanabe and his cheery saffron smile, the old urge arose and after several alarms, the KNX Los Angeles station came in through my set. It took a while, but Frank (Eddy Holder) was worth it. He's hilarious.

Weener Minstrels (WENR). Bill.—"The girls were all dressed swell."

Gene.—"How do you know? What do you know about women's garb?"

Bill.—"Well, I guess I know swell garbage when I see it."—*Florence Haist, Box 157, Lindenwold, N. J.*

HOT DOG!

The Weenies have it again. If you look carefully, you'll see that the last one, from our keen-eared reporter in New Jersey, comes from the same perpetual spring of humor as this, reported from Kentucky.

(*Weener Minstrels, Station WENR*).

Gene:—*Chuck, where were you going with those cuspidors, last night?*

Chuck:—*I was taking them home to my dog.*

Gene:—*To your dog! why, what kind of a dog have you?*

Chuck:—*Spitz.—Sue Dickerson, 329 Clifton Avenue, Lexington, Ky.*

MISTAKEN INDENTITY

Being a 'cellist on WCAE—Gimbels in Pittsburgh, I have heard many amusing statements by the announcers.

During the vacation season, a substitute announcer, apparently unfamiliar with composers and compositions, was announcing a program presented by a concert pianist which included a composition by the great German composer, Richard Wagner, from the opera "The Flying Dutchman."

The announcer, anxious to make some comments, inquired of one of the experienced announcers who (in a joke) stated the composition was written by that famous ballplayer (shortstop) Hans Wagner who was often termed "The

Frank Watanabe Himself

Flying Dutchman." This was given with the utmost sincerity on this dignified piano recital.

Much to the announcer's surprise, the Radio editor of a local newspaper who happened to be in the control room, rushed into the studio and inquired again, who composed the number, as he couldn't believe his ears.—*William L. Roberts, 312 N. Graham St., Pittsburgh, Pa.*

That poor substitute announcer probably said good-bye to Gimbel's the next day. Undoubtedly he was sorry he didn't go to school now, when all children listen in to Walter Damrosc on Friday mornings and will grow up s musically erudite that jazz will b banished from Radio.

Gather round me, and I'll tell you secret, but don't broadcast it. I wa told this by an announcer over Newark, but promised on my word o honor not to reveal any names.

It seems there was a very, very, ver distinguished personage who was sched uled to broadcast on a holiday prograr in that Jersey city. At the close of hi address Paul Whiteman (the joke' not on him, so it's all right) was t burst into the strains of the "Sta Spangled Banner", with his band. O course, Paul Whiteman has his tim scheduled down to the last second, bu the speakers before the Distinguishe Personage talked on and on and on until Paul grew fidgety.

Just after the Chief Speaker started the big band leader told the statio manager that he would have to leave i fifteen minutes to make a New Yor engagement. It looked as though th D. P. would talk at least a half hour

---

"*Excuse, please! Mr. and Mrs. Ma dame.*

"*It is to orriving upon Los Angeles fo tropping a work of job. I one high clas domesticated scientist with brains, sant you! Most duty of recent are usefu sweeping and dish to wash also put ou milk bottles, nudge away cigar butt an smear dirt from window.*

"*Hoping you are the same, Frank Watanabe.*"

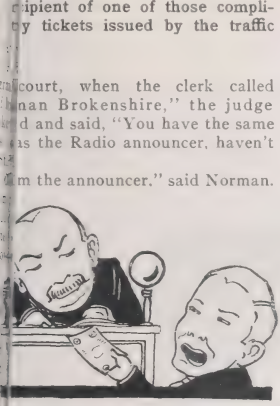
---

and he was not a man whom one could ask to "make it snappy." The tactful Station Manager was not phased, however. He just had the speaker's microphone disconnected at the end of an appropriate sentence and Whiteman's band concluded the program, as scheduled. When Whiteman had finished his program and was in the tubes on the way back to Manhattan, the speaker was still talking into his disconnected mike!

Station WENR, Weener Minstrel Show:

"I was driving by the County Asylum when a woman inmate put her head out of a window on the third floor and shouted:

"I want a bucket of beer, I want it right now and I don't mean maybe."



At that time a colored man, walking by, heard her and said:

"Lady, you might 'a' been crazy when they put you in there, but you is sho' talking sense now."—*W. D. Mackenzie, 406 Woodland St., Nashville, Tenn.*

Indy took Marcella out to lunch the other day but discovered only 50c in the exchequer! So Marcella had to pay the check, and while she didn't mean to insinuate that Indy had Scotch characteristics, she said the incident reminded her of this one.

A Scotchman who uses the umpteen dollar a minute telephone to London on business quite often, paid a call on Floyd Gibbons the other day. He wanted to negotiate with a view to obtaining Floyd's services on his twice-weekly long distance conversations!

At W L W the other evening, the announcer introducing the Plymouth Motor Car program said, "The first selection to be played on this evening's program is "Through."—*Helen O'-Brien, Cincinnati, Ohio.*

IT WAS A GAS-EATER

Not so long ago, on an NBC network program, an announcer whom I shall call Mr. Smith and a guest artist who might have been named Miss Jones held a colloquy.

Mr. Smith asked Miss Jones if she had given her car a name. "I call her Shasta," answered Miss Jones.

"Ah," said Mr. Smith, "she must be a daisy, then. Does the name indicate that your car has any connection or relation to the Shasta daisy?" "No connection, whatever," answered Miss Jones. "I call her Shasta because Sh'-hasta have air, sh'hasta have water, sh'hasta have oil, sh'hasta have gas, sh'hasta have a whole lot of things."—*W. E. Brown, Fort Worth, Texas.*

MALAPROP ON THE AIR

Amos—"Did yo' really love Susie?"

Andy—Well, prepsodent and prepsodid?"

Here are a few from a Milwaukee man who enjoys Quinn Ryan so much that he must sit down with a shorthand notebook and take down Quinn's remarks verbatim, to gloat over and chuckle upon when there is a big S.O.S. and aerial silence. Or perhaps he doesn't know shorthand and has bought one of those new Victor recording thingamajigs that Indy saw at the Radio show. You know, you just put the needle on and let your power (or plain) speaker mouth its words into the ear of this clever invention. Or you can talk into it yourself and preserve your inflections for your posterity. But to get back to Quinn Ryan:—

Here are some of the amusing excerpts from Quinn Ryan's sport broadcast. Quinn must believe that "Variety is the spice of life".

"Hack Wilson is picking up dirt again. He will do dirt to the next pitch. He only picked up an acre or two. Whee—it's a home run into the right field stands. His thirty-fifth home run with Kiki on first base. Boy! oh boy!" (Whistles)

"Don't collide, boys. McCarthy ought to teach his players some football signals. That is the second time they collided.

"I wonder where Earl Richard is today. He told me this one.

'There was a man, who while walking along the shore of a lake in Wisconsin, always kept on saying, "No—no—no. No, that isn't it. No—no, no no no. I say NO." Upon inquiring he found out that this man was a Yes-man from a big Chicago corporation, on his vacation.'"—*M. D. Wallner, Milwaukee, Wis.*

Scientific Progress

By Howard Edgar Rhodes, Technical Editor

Conductor Stokowski Improves Quality of Symphony Orchestra Broadcasts

TO OUR minds one of the outstanding events of the Radio year 1929 was the broadcasting of the symphony concerts by the Philadelphia Symphony Orchestra under the direction of Mr. Stokowski. The Philadelphia Storage Battery Company deserves credit for the sponsoring of programs of such merit and the engineers of the National Broadcasting Company who were responsible for the transmission of these programs to the listener must also share in this credit. In these days when almost any aggregation of musicians is likely to be called a symphony orchestra, when anyone who wields a baton is a maestro, it is enjoyable to listen to Mr. Stokowski's orchestra because of its excellence—and because Mr. Stokowski, perhaps more than any other conductor, has taken to heart the problems of broadcasting large symphony orchestras and has worked closely with the broadcast engineers to improve the quality of these programs.

Conductor Leopold Stokowski of the Philadelphia Symphony Orchestra

One of the major problems involved in the broadcasting of a symphony concert is that of compressing the volume range of the orchestra within limits that can satisfactorily be transmitted by present-day broadcasting apparatus. Normally this responsibility is assumed by an engineer who adjusts controls to keep the very loud passages from overloading the apparatus, and the triple piano passages from becoming so weak as to be lost to the listener during broadcasting.

Mr. Stokows reasoned that the dynamic ran of an orches must be reduc that the pers most qualified do this is the co ductor. He ther fore undertook so conduct t orchestra as make it unnece sary to have a engineer monit the program. H did this with th aid of an electr cal instrumer mounted on t music stan which continuou ly indicated th volume of th music. Mr. St kowski was th able by caref conducting to ke the volume with the required rang As a result th music, as the li tener heard seemed muc more natural. had no sudden artificial chang in volume; it w more nearly exact reprodu tion of the soun being produced the orchestra.

During the tim that has elaps since Mr. Stokowski's Radio concer of last fall, he has been in almost co stant touch with NBC engineers. As result we understand certain new devic have been developed, probably to be us by Mr. Stokowski in his second series Radio concerts to be broadcast this f under the sponsorship of the Philadelph Storage Battery Company.

of the Radio Arts

Experiments with High Power

THE WESTINGHOUSE Electric and Manufacturing Company was recently granted permission by the Federal Radio Commission to ...riment with broadcast transmitter ...r up to 400 kilowatts, which is eight ...s as much power as is used by the ...st existing broadcasting stations. ...se experiments will be made at the new ...KA station being ...t near Saxonburg, Pa. ...uccess of these ex...ments will depend ...ely upon a new tube ...gned by Westing...se engineers. This ...e is rated at 200 ...watts, it is six feet ...h, and weighs 60 ...nds. Quite a tube! ...t operation it is nec...ry to cool the tube, ...he same manner that ...automobile motor is ...led, by means of cir...ating currents of cold ...er.

Approximately five ...s of cooling water ...st be passed through ... water jacket of the ...e each hour it is in ...ration — one hour's ...eration of the tube ...uld heat enough water ... supply the require...nts of an average ...me for several weeks. Whenever a broad...sting station desires to ...rease its power, or ...ke experiments with ... use of high power, ...meone always seems ... raise the cry of ...uper-power", forget...ng that the only reason ...at a station desires ...ore power is to im...ove its service to the ...blic. When the term ...uper-power" is applied ... a large power station, ...ch as is to be erected ... South Carolina, with ... capacity of 200,000 ...lowatts, the phase has ...me significance. Back ...n 1924 Mr. David Sarnoff very sensibly suggested that broadcasting stations using considerable amounts of power could more properly be referred to as "long range stations".

After all, the success of any station depends largely upon its ability to supply a large number of listeners with a signal strong enough for satisfactory reception at all times of the year. This means that the signal must be strong enough to override local noise and static, for no simple, cheap, and effective device to eliminate static has ever been invented—not that such a device wouldn't be of great utility!

The Institute of Radio Engineers, an organization which numbers among its members many of the most prominent Radio engineers throughout the country, has laid down some very specific recommendations regarding the most desirable location of broadcasting stations. These recommendations include one to locate a broadcasting station at such a distance from the nearest populous center as to make the interference produced by the station negligible in comparison with its service area. Although the recommendations are based on definite technical considerations, they really consider the old adage, "the greatest good to the greatest number".

The new tube, designed by engineers of the Westinghouse Electric and Manufacturing Company, to be used in experiments with high power at the new KDKA station being erected at Saxonburg, Pa. This monster tube is six feet tall, weighs 60 pounds, and is cooled by five tons of water each hour of its operation!

The British Broadcasting Corporation is at present constructing a new building which when completed will be the new center of broadcasting in England, replacing the present headquarters at Savoy Hill. The design of the new building will be simple, almost severe, depending for its effect more on the grouping of masonry than upon profusion of detail.

The estimated cost is between two and two and one-half million dollars. The enterprise is being financed by a syndicate on terms favorable to the British Broadcasting Corporation which retains an option to purchase if and when this appears desirable.

Scientific Progress *of the* Radio Art

Electrical Musical Instruments

FROM the earliest days the production of sounds by musical instruments has depended upon one of three things; a current of air, as in the case of horns and the organ, or upon friction, used in instruments which are bowed, or upon percussion, in the case of drums. Some time ago there was announced the RCA Theremin, an instrument utilizing Radio vacuum tubes for the production of musical sounds. This instrument was a development of the Thereminvox, an invention of Professor Leon Theremin, of the Institute Physico-Technique of Leningrad. It was first demonstrated before a select audience of musicians and critics; later, before a much larger audience at the Metropolitan Opera House in New York.

The RCA Theremin has no stops or keyboards and is operated entirely by the motion of one's hands with respect to two metal bars, one of which controls the pitch and the other the volume. The hands are not placed in contact with the metal bars but are simply brought nearer to or further away from the bars to control the pitch and volume. The highest tone corresponds very nearly to the top note of an oboe. The lowest note is about the second G below middle C.

More recently we read of another instrument of somewhat similar design. It is known as the "Martenot", named after its inventor, and is said to permit legato, detached or staccato playing. By means of switches a very delicate "attack" is possible, or the attack can be made to resemble that of a saxophone. The instrument has the advantage possessed by the organ of continuous tone and practically unlimited pitch, but in addition can produce vibratos impossible with the organ. A series of "stops" gives the instrument sixteen distinctly different timbres. Although this instrument is operated by a so-called "keyboard" (for want of a better name) it has not the tempered scale of a keyboard instrument. A theoretically infinite number of pitch gradations can be obtained.

What will be the future of these instruments, that had their birth in the laboratory of the physicist and engineer, and which can be produced as simply a Radio receiver? About them can be no of the glamour of a skilled instrum maker, of a Stradivarius. Professor The min stated, according to an interview p lished some time ago in La T. S. F. P Tous, "This is not at all a plaything me. It is much more a concrete pro an incontestable demonstration, of conception of the arts and sciences . To prove that science can render greatest services in the development the arts, to demonstrate the fertility an intimate collaboration of the arts a sciences, is my aim."

IT IS reported that Ra maninoff turned to a member of the au ience that witnessed the first demonst tion of the Theremin apparatus and sa when she shouted "Bravo!"—"Madam you exaggerate." But the future of a device is seldom forecast by the fi crude demonstration. In the future . who knows? One need look no furth than his Radio receiver.

The Voice of The Roxy

IT WILL surprise many, who disparage "mechanical music" to learn that the voices and music they hear when they visit the "Roxy", New York's largest theatre, do not come altogether directly from the stage but also reach the audience through a system of loud speakers, located on either side and above the stage. They add volume to the singer's voice and regulate the amount of sound coming from the orchestra and organs. Individual voices can be selected and strengthened above others. Certain orchestral instruments, either singly or in groups, can be brought to greater volume than the others. These results are possible with the aid of microphones located at a number of different positions. There are five microphones in the orchestra pit, one in each of the three organ consoles, and five along the footlights of the stage. In addition there are five microphones on the stage itself, six in the choral boxes and stairways and one more on the stage, hanging overhead. The circuits connecting these microphones make it possible to mix the output of as many as ten mikes.

In addition there is a complete microphone and loud speaker system throughout the theatre, which makes it possible for Roxy or his assistants to talk from any one of the microphones and have his voice heard by the stage-manager, the switchboard operators, the electricians and spotlight operators, and the motion picture operators. In this way he can guide the lighting, modify the tempo or volume of the music, direct the curtain opening and closing and change of scenes.

DURING dress rehearsals Roxy takes a position in the orchestra, with a desk-like arrangement before him, containing a microphone, with which he can speak directly with the operators of the various lighting systems, with the dancers, orchestra conductors, organists, stage hands, and motion picture operators.

Supplementary systems make it possible for the stage-manager to call t performers to their places. The stag manager speaks into a microphone at h post on the stage and his orders a heard through loud speakers located in t cafeteria, musician's lounge, rehears rooms, and six floors of dressing rooms

Unintentionally we were given a goo demonstration of the effectiveness of the intercommunication systems when we e amined the installations a few weeks ag As we watched the stage performance wi our guide, a yellow spotlight was suddenl and in error, thrown on the stage fro one of the spotlight booths. Our guid with a short exclamation, leaned ove picked up a microphone and said, "C off the yellow light." A moment later th yellow spot disappeared from the stag

We must not close without giving cred to the Western Electric Company, wh designed and installed all the loud speake systems throughout the Roxy Theatre. It was the Western Electric which pe fected recording for the sound pictures.

Here they are, the Smiling Announcers of KMOX. Reading from left to right: Delmar King, lately of Kansas City; Woody Klose, the youngest announcer on the air (he came to KMOX a year ago and was then not quite nineteen); France Laux, sports announcer; and Capt. Charles Lewis of London and Australia.

Mystery Announcer Wins
Diamond Meritum Award

Still in disguise, the Mystery Announcer smiles behind his mask on receiving news

ANOTHER great national popularity contest has been decided by the readers of Radio Digest. The Diamond Award for the most popular individual or program of the air goes to the Mystery Announcer of WPEN, Pittsburgh.

Of course the Mystery Announcer does not claim, nor does Radio Digest infer, that he has the largest audience in America. But the results of the contest show that he had more friends who took the trouble to vote for him than did any other entertainer of the air.

We are not even informed as to his true name. But we do know something of his career and it is with extreme regret that the contest editor of Radio Digest does not have the space at his disposal to tell the dramatic history of this extraordinary favorite.

He has seen life—and he has been close to death—so close that he seemed to be in the very jaws of death in the course of his experiences as a ship wireless operator during the World War and various conflicts with German submarines. Once he was on a vessel loaded with high test gasoline consigned to American fliers in France when fired upon by a U boat. Again his ship was set on fire and escape seemed absolutely impossible—but escape he did.

The Mystery Announcer conducts the WPEN Musical Clock, which began in a very modest way in October, 1929, and now has become one of the strongest features of any individual station in the country. From the time it started to August 1, 1930 a check-up showed that 50,000 letters had been received by M. A. from his ardent listeners.

Mystery Announcer, still incognito

The Mystery Announcer comes on the air each morning at 6:30 throughout the week. He sends the world off to its day of duty with appropriate suggestions to the "works, the clerks and the shirks" as the day advances. He is assisted through the various phases by his main standby, High Pressure Charlie, who also is "Charlie the Horse" greeting the audience with a "good morning" whinney. Others to be introduced are Officer Dan, Pete the Rooster, Polly Penn, the Parrot; Melody Mae of the tiny Tom Thumb piano; black Jackie Mack the comic, and Billy Penn the Police Dog. Other characters are introduced at various intervals. The program continues until 10:15.

Rudy Vallee, author of the opening article in this issue of Radio Digest, is the winner of the Gold Award for the East. Mr. Vallee's popularity has never waned. His career and that of his famous Connecticut Yankees have been discussed frequently in these pages.

There was a great deal of rivalry in the Mid West but Gene and Glenn of WTAM, Cleveland, soared over An 'n' Andy and other great f tures from Chicago, Cinc nati, Milwaukee and otl powerful and popular static in that area. You read about Gene and Glenn in yo October Radio Digest.

Shreveport brought ho the bacon again to Mr. W. Henderson who has a habit winning Radio Digest popul ity awards in the South. M Henderson's militant pers ality and fearless broadcasti has made him a rabid favor with his KWKH audience. H position is secure. Adver ries who have opposed h have found him hard to bud His enemies have made h friends.

Mr. Henderson has nev been satisfied to be merely t owner of an important static He has aimed to make it t clear sounding call of a peop He has taken the responsibili on himself to articulate th call. Because he has do this he has established a de nite sympathetic accord wi an audience that stands a votes for him in Radio Digest contes The staunchness of such Radio characte becomes evident when leadership is que tioned.

Swinging into the West a very clo rivalry developed between Henry a Jerome of KGBZ, York, Nebraska and L Brinkley, former Radio Digest conte winner, at KFKB, Milford, Kansas. seemed that Henry and Jerome had some very strong partisans, so that leadership between them and Dr. Brinkley rested first with one and then with the other. Dr. Brinkley may have suffered somewhat from a campaign of unfavorable newspaper pub-

Rudy Vallee, Gold Medal Winner

ity, although complaints that he used
station for unethical purposes did not
nd up after an investigation by the
deral Radio commission. The final
bulation showed the York boys had won
e contest and they will be presented
th the Radio Digest Gold Meritum
ward.

We are advised by Dr. George R. Miller
at Jerome's full name is Jerome DeBord.
e is 31 and has been singing in Radio
r nine years—which is a pretty long
me considering the history of Radio
oadcasting. He is well known through-
ut the West as the original "Whispering
enor". For the past two years he has
en teaming witn Henry Peters at KGBZ.
enry is 25 years old and has been a
adio entertainer for the past four years.
hey are known
n the air as
Doc's Yodeling
wins".

Flitting over
he mountains
nd scanning
he sunny slopes
f the federal
adio district
nown as the
ar. Far West
e find the in-
erest of Radio
Digest readers
ocused on Long
Beach, Cali-
ornia, where
Hal Nichols and
his station,
FOX, rolled up
he second larg-
st vote in the
ountry for their
Buttercream
chool program.

The keenest
ivalry in the
ar. Far West
was right in the
KFOX camp it-
self, for the vo-
ters were divided
on the proposi-
tion of casting
in favor of the
entire program
staff or the But-
tercream pro-
gram in particu-
lar. The entire
staff could hardly
have been con-
sidered as a con-
testing unit ac-
cording to the
intents and pur-
poses of the
contest which
was seeking the
artist or pro-
gram with the
greatest follow-
ing.

Just what the

Heary and Jerome, the gold medal winners from KGBZ, York, Neb.

Buttercream School program is, and why it is so popular on the Pacific coast has not been revealed to the contest editor as these lines are written. We know that Mr. Nichols is particularly enterprising and appreciates a good contest. If KFOX goes in to win you may depend on a real showing at the finish of a race. The station is always alert and quick to act. It is always entertaining and has no time at all for mediocre talent, which probably accounts for a surprisingly large vote for the "KFOX Staff".

The Diamond Meritum Award contest aroused great enthusiasm throughout the country. The closing days were particularly exciting. Packages of ballots came in by the bagful with every mail. Then as the final hour approached they came by special delivery registered mail. Some even came from California by airmail.

Girls were put to work counting the ballots and making their careful tabulations so that every vote was counted. At midnight on September 20th the ballot was declared closed except for those ballots that should come in with postmarks registered before that hour.

The jewelers are putting the inscriptions on the medals as this report is written and before you received this book it is expected every medal will have reached its successful contestant. The Diamond Award according to the plans in hand, will have been presented to the Mystery Announcer at the Radio Show in Chicago.

He won his contest as the Mystery Announcer and a mystery he must continue to be, in all probability wearing a mask

(Continued on page 122)

Floyd Gibbons And His Stars

(*Continued from page 32*)

Gibbons' chart which reveal his extraordinary luck, and no one who is even faintly acquainted with the details of his life can overlook the prominent part this usually fickle goddess has played in his career. Astrologers never speak of luck among themselves. The aspects either indicate good or bad conditions and to them there isn't any luck about it. But to the average man, luck is something quite real and most desirable and from the looks of Mr. Gibbons' horoscope he was born with a world of it.

As a matter of fact, his luck is traditional in the newspaper world and one of the first things I heard about him, when he came to the Mexican Border, was in regard to his exceptionally good fortune in getting any story he went after, no matter how difficult it was, or how many men had failed before him.

This "protection" as it is sometimes called in the mystical lore of the stars communicated itself to every department of his life, and he took chances that certainly would have meant death for anyone else, only to come through harrowing experiences, smiling and unscathed.

One of these adventures with death concerns his first meeting with Pancho Villa, desperate, half-savage mountaineer, whom historians may yet make the greatest patriot south of the Rio Grande.

Villa had enjoyed the support and friendship of the American Government for some time, when a sudden change of policy excluded him from the frequent councils held along the Mexican Border. He was an illiterate, primitive man, totally lacking in statecraft or diplomatic intrigue and he could understand the actions of the U. S. officials. Villa fought with men, and he suspected anyone who fought with his wits. None of his advisers could dissuade him from thinking that his former American friends had entered into a plot with his arch enemies, Generals Obregon and Calles, to rob him of his power in Mexico.

WHEN Villa evacuated Juarez, across the river from El Paso, Tex., Calles was in Nogales, Mexico, over the border from Nogales, Ariz., and Obregon, with 2,000 Yaqui Indians, was far behind him at Eagle Pass, Tex., in the Big Bend country.

In his usual impetuous way, Villa had decided on his long, weary march across the desert waste of Northern Mexico, to stop at Nogales and put Calles forces to rout. He had never failed before to defeat him in a military encounter and he determined to make this victory one that General Calles would never forget.

But while Villa was out of touch with the world, Obregon had negotiated with the State Department and received permission to transport his Indians over the Southern Pacific railway to Nogales. They had been in camp a couple of days, when Villa threw his exhausted forces against what he considered Calles' inferior army.

His onlaught was met with a murderous fire and in the swift battle which followed, Villa suffered the worst defeat of his career. Bewildered and infuriated, he retired into the desert, where his couriers brought him the news of the Yaqui re-enforcements. He flew into a terrible rage, threatening death to every white man who came within the range of his gun. The American Government had betrayed him to his enemies and for that reason every American citizen unwise enough to venture into his territory, must die!

And just about this time, the managing editor of the Chicago Tribune wired Floyd Gibbons, directing him to get an interview with Pancho Villa!

THE other correspondents read the telegram and their faces blanched. They knew Villa, and they knew there was no man in Mexico more capable of carrying out that terrible threat, "death on sight to the white man!"

"Of course, you're not going," they chorused.

"Of course, I am," replied Floyd, "and don't you worry, I'll live to write the interview."

They pleaded, they argued, they cajoled and then they watched him leave, never expecting to see him again.

A member of Villa's staff told me about that meeting, months later in the lobby of the Paso del Norte at El Paso, Tex.

"Gibbons was lucky," he said, "he came into camp at dusk, and Villa, who was sitting outside his adobe house talking to several of his aides, did not see him until he was directly in front of him. Gibbons had dismounted when Villa recognized the white skin of the American. His hand flew to his holster. We all jumped aside, expecting a hail of bullets, but Floyd was smiling at Villa and calling him friend. 'Let me talk to you first,' he said, 'then if you still feel like it, you can shoot me later.' His daring, his cool courage . . . that dynamic, overwhelming magnetism . . . won Villa instantly. He liked Gibbons in a split second of time, and his hand dropped away from his holster."

What followed was in keeping with the fiery temperament of the Mexican outlaw. He ordered up an elaborate dinner and every once in a while, he would pat Floyd on the back and laugh, "You took a long chance, my friend, a long chance."

Mars, which even school children recognize as the planet of war, is posited in Cancer in Mr. Gibbons' chart. This indicates his career as a war correspondent and the revolutions and wars which he was to survive.

If Floyd had been a student of astrology, or a believer in the science he might still be in possession of the eye which he lost at Belleau Wood during the War.

A competent astrologer could have told him that he was in danger of losing an eye if he ventured on the battle field for the Moon was in conjunction with the Pleaides in Taurus, in his birth chart, the most dangerous of all aspects to the eyes. More than one person has been blinded by what would ordinarily be a slight accident under any other configuration.

But knowing Mr. Gibbons as I do, and recalling all the times he has deliberately walked straight into the face of death, I doubt if he would have taken the astrologer's advice. He is the kind of man who would prefer the experience of a wound than to go unscathed through life.

I remember when Floyd was sailing on the Laconia. Again his friends and relatives begged and implored him to take the risk. He had information that the Germans intended to sink the Laconia and he wanted to write the story of that sinking. He made all preparations to be sunk and when one of the correspondents, viewing his equipment exclaimed, "Listen, Gib, you talked Villa out of shooting you, but for heaven's sake get wise to yourself. You'll never be able to talk a German sub out of sinking a British ship!"

"I don't expect to," was Gibbons answer. "I'm going down with the ship, but you just wait and see, *I'll live to write the story.*"

AND everyone knows that he did, and everyone knows what a story it was. It still gives me the cold chills when I think of it, for I crossed the Atlantic a short time later with the first contingent of the American Expeditionary Force and Floyd's vivid report was responsible for ten sleepless, terror-stricken nights which I put in between New York and Liverpool. But then, my stars are not so fortunately grouped and my fate runs an uneven course. I have never dared to take the same chances, for the position of Saturn in my chart shows that Villa would not have given me a chance to even say, "Amigo."

If you are wondering, then, why Floyd Gibbons tops the list of famous newspaper men, why his income is greater than the President of the United States, go outside and look at the heavens. Those twinkling little stars have greater power over our lives than any other force in the Universe, and in Floyd's chart, they are all in right places for success and fame.

o written several poems. Here is one
them, entitled "Intentions and Fears."

I meant to sing my lover's praise,
Describing lovingly his face,
The color of his eyes and hair,
But think of naught but my despair
And I despair because he is
On this our earth my only bliss,
To look at him is what I crave;
He is my master, I his slave.
Is he so fair? I must say yes!
But of his beauty you must guess;
I cannot tell exactly how
My lover pleases me just now.
Yet I despair, as I have said,
Because forever in my head
Such silly thoughts keep whirling round;
I fear to lose the love I found.
—Ella Ström-Grainger.

Copyright, 1928, by Percy Grainger.

In addition to turning doorknobs with his nimble feet, Mr. Grainger likes to swim, run, play football and deck tennis and to wrestle. He loves walking because it gives him a greater opportunity to observe nature's prodigality.

It is not, then, surprising that "sunshine and fresh air" are said to be the "constituents of his art" and that he is described as "the only cheerful sunny composer living." He said:

"I think that the object of all art is to approximate the freedom and tolerance of nature. I like Walt Whitman's phrase, 'broad and tolerant is nature'."

One's grasping for the comprehension of the infinite is satisfied when Mr. Grainger talks of music.

"A COMPOSER who is inspired does not feel himself a person. He is merely recording something that is being dictated to him. I am content to feel that when one is inspired that one is carried along on the stream of human necessity. There is something in the race that wants to find expression. The artist is nothing at all. He is the means by which a race becomes conscious of itself."

Mr. Grainger pointed out that millions of people have lovely melodies running through their minds, but that only one in thousands is able to write them down properly, and that very few are able to write them down at all.

"Isn't there some way of simplifying the writing down of music?" I asked, seized with the sudden ambition of coming to the world's rescue in helping to release its song.

"The great value of art," rejoined Mr. Grainger, "is its complexity. The trouble with civilization is that it makes life too simple and therefore impoverishes it. Nature is lavish and complex.

"Printing has helped to simplify existence. Take the expression, 'I'll tell the world.' This phrase spread around the world through the aid of printing. It is the same, "I'll tell the world' in every valley and district of the country. Civilization tends to destroy local color. But local color is in tune with the lavishness and complexity of nature."

This is the man who not very long ago trundled a wheelbarrow with his trunks to the railroad station. He did it for the exercise, he said, and added humorously, "A penny saved is a penny earned."

I WAS eager to know why he was so keenly enthusiastic in the Nordic Race and in its literature, as I know that he reads or speaks Danish, Swedish, Jutish, Norwegian, Landsmaal, Icelandic and Faerose.

Because there is no place where religion, patriotism and morality are so little publicly regarded as they are in the Scandinavian countries. If religion, patriotism and morality are to be of any value they must come from within.

"The Scandinavians are not afraid to hear anything and they are never shocked. They are primitive without being ignorant. They have retained their original primitive instincts. They are tolerant and highly cultured.

"The strongest source of artistic inspiration, for the Nordic Race, is what we call nature itself—rivers, trees, rocks, soil and the sea—rather than people.

"Everywhere one is continually brought in sight of virgin nature—nature that has not been despoiled by man. My two Hill Songs express feelings aroused by the

Tile painting made by Mrs. Grainger.

thoughts of the hills." So speaks a poet.

Nature was wise in having chosen this favorite son, who loves her so dearly, as one of her grand interpreters. Poets have sung her praises and artists have outlined her graces since day began. But it is doubtful if more than a select few have ever so completely worshipped and exalted her as has Percy Grainger.

In marked contrast to Mr. Grainger's indifference to persons and his adoration of nature, are Mrs. Grainger's utter dislike for forests, parks and other settlements of Nature and her keen interest in human nature. That Mrs. Grainger finds her inspiration in people is evidenced by her preference for portrait painting.

"Do you notice the luminousness," Mr. Grainger asked me, "of those paintings? The lines never mix. They remain individual and clear. Now let me show you what I mean by luminousness in music. It is gained by the use of bells and percussion instruments."

Mr. Grainger then played on the piano and instructed his wife to hammer (for want of the musical term) on the bells when he looked at her. He played from his composition, "Spoon River," and as the bells sounded, the rings stood out clearly and separate from each other and from the piano tones until they gradually faded out.

It was glorious hearing him play at close range. I can understand now what he meant when he said he objected to personal music—music played by persons other than the composer. "The performer is very apt to concentrate on the emotions aroused rather than the thought. Musical thoughts are perhaps better than the emotions they awaken. All we need is a composer's message. It does not have to be interpreted. Let us have all statements without embellishments."

Mr. Grainger finds beauty in anything that has been left alone—even in vacant lots.

"Even with the tin cans?" I ventured, hoping that I would be saved the pain of cultivating a taste for a junk-dealer's traffic.

"Even with the tin cans," was the peremptory reply.

AFTER all, things can be worse than lots strewn with rusty tin cans. And they aren't so ugly at that—well—that is, they really are not.

The Grainger's were expecting friends on the next train. Off flew Mr. Grainger down the steps in two bounds, disappearing like a phantom, and leaving me with a lapful of ideas.

I find here on the last page of my notebook one of his statements, "It does not seem necessary that a composer should come in contact with classical music for more than a few years in his early youth to become a first class composer. So I deduce that what is necessary to make a great artist is a great human nature. Experience comes in a few years."

Symphony Music

(*Continued from page 93*)

write their largest works, basing the plan upon what they have found to be the best and most generally efficient grouping. Thus, the orchestra has come to consist at bottom of four groupings of instruments, known respectively as the strings, the wood-wind, the brass and the percussion. Each of the first three groups contains instruments which will play in the high, the middle, or the low ranges of sound, so that full chorus can be played by one single group. An orchestra, in fact, consists of a string band, a wood-wind band and a brass band, with percussions in the way of drums, cymbals, tambourines, triangles, and the like, for occasional use.

THE string group consists of viols, violins, violas, 'cellos, and stringed basses. The violins are always divided into two groups, first and seconds, not because there is any difference in the instruments, but to take respectively the highest notes and those next to the highest. The notes next lower are given to the violas, the next lower to the violoncellos, or "cellos" as they are usually called and the lowest to the stringed basses, usually called "double basses" or "contrabasses" or just "basses". All these instruments are played by means of bows. The violin is held under the chin and so is the viola, which is just a little larger than the violin. The 'cello is played seated, and is held between the player's knees. The bass is played standing, for it is very large and bulky. There are more individual instruments in the string section than in any other, because the wood-wind and brass instruments are often very powerful and a big body of strings is needed to counterbalance them. Thus, an orchestra like the Boston Symphony will probably have all told, nearly seventy instruments in the string section, sixteen first violins, sixteen second violins, fourteen violas, twelve cellos and ten basses, or sixty-eight in all.

The wood-wind section comprises two or three each of flutes, oboes, clarinets and bassoons, with bass clarinet, contra-bassoon and English horn (tenor oboe) when called for. The flute and the oboe are high treble instruments, the one with a woody and the other with a bitter-sweet sort of tone. The clarinet has a somewhat lower range of notes and its tone is very smooth, quietly rich and noble. The bassoon is the bass of the wood-wind section and there is a contra-bassoon which plays an octave lower.

The brass section is easy to understand. There are the bright pealing trumpets (rather finer and cleaner in tone than the cornets used in brass bands), the lovely mellow French horns, the splendid solid trombones and the majestic bass tubas.

The drums need hardly be desc

Heywood Broun's Radio Column

(Continued from page 17)

rs told me I did not, but that didn't it all. Then one night I got into a ht with a chum—quite a big one—I think I was right) and he blacked yes and broke my nose.

ad an engagement to meet a friend was dancing in a cabaret, and I ht, "I am not going to let a little like this stand in my way." Of I put my head under the pump while. But there wasn't anything for the black eyes. All the butcher were closed. I couldn't get any eef steak. She was a very nice lady, my friend the dancer, be- when I peered out through the portholes still left to me and said, ou mind going out with a man who like this?" she said, "Why, not at

And so we joined another party ent to an all night restaurant.

l about six in the morning when we all discussing the protective tariff ve at first sight or one of those that you do get talking about at the morning, I suddenly realized ought to be home in bed having ous breakdown. In fact I felt that likely I ought to be dead. Nobody wo black eyes, a broken nose and a eart ought to be arguing about love st sight in an all night restaurant at the morning.

BUT I had forgotten all it. The next day—or maybe, to ore exact, noon of the same day—te up to find that I only had vision e left eye. But I could see one very plainly. I could see that I was

of course there are a lot of other ods. You don't have to take that

ere is one terrible thing about being Some people get along with their nt—a sense of shame. As far as I oncerned every sort of illness just s under the head of hard luck. I se there are healthful and unhealth- ays of living—but lots of us haven't at deal of scope in choosing the way re going to live. And not one of us his fundamental constitution. If are robust by nature you can live unhealthfully and have a lot of fun. aside from that there comes a time ery man's life when he has to say, s thing I must do. I have got to do Health or no health it is up to me." in times of peace there are occa- when there is nothing to do but h right out and charge the machine If you get wounded nobody ought ame you . . . least of all yourself.

ere have been a good many letters h made me want to see the person wrote, face to face. But just now I am thinking of a particular one. The initials don't matter. I have forgotten. It was from a man in a hospital and he said that he had tuberculosis—and then this terrible sense of shame burst out—he said, "Don't worry—you can't catch it from this letter." I wanted to go to his bed and slap him on the shoulder and say, "Don't be silly. Don't be so sensitive. Get rid of that notion that you are a public menace. You are sick, just as all of us have been or will be sometime or another. In this respect we certainly are all in the same boat."

And why should there be this squeamishness about tuberculosis? Doctors tell me that practically everybody encounters the germ at one time or another and it tosses some of us and the rest of us toss it. Tough luck—good luck. There is no point in being mysterious or ashamed about it. There isn't any disease which can be licked by saying "shush!" Anyhow—what are a few germs between friends.

But I have a lot of letters telling me I ought not to wander around so. How did we get here? I mentioned Edison and his questionnaire. And I have some questions I want to ask those bright boys on my own account. I am in need of advice again. I want to know what you do about cats? And after my Radio vacation is over I am very much afraid I will have to ask, "What do you do about kittens?" And there is an even more perplexing problem that I would like to put up to the young scientists. It goes like this, "What is the biological explanation for the fact that when a stray cat wanders into your house she always turns out to be female if you keep her long enough?"

I didn't really feel morally responsible for Marion the first time she meowed her way into the penthouse apartment. I had never seen her before. There was no chance of her taking up permanent possession. Captain Flagg, the Airedale, will be back in a couple of months. She couldn't seem to grasp that. She stayed on and on and finally at my suggestion Miss Whipple offered to give her a good home. That is she offered to take Marion to her own house. They started off in the elevator together but down at the corner Marion leaped out of Miss Whipple's arms and ran into a family hotel and disappeared. Miss Whipple tried to follow but the doorman wouldn't let her go through all the corridors of the hotel calling out, "Here, Kitty! Here, Kitty." He said it might annoy some of the guests. Make them feel self conscious, I suppose. When I heard about what had happened I took it very calmly. I said, "Marion has chosen her two hundred beds with private bath and southern exposure, let her lie in them."

AND exactly two days later she came back. It was Marion all right. Even in a big city like New York there aren't many gray cats with three inches cut off the tail and green paint on the right front foot. I did not need to call in any council of medical experts to make sure that I had the right cat. But I will never understand how she did it. I suppose she spent the forty-eight hours looking for the right address. But I live on the tenth floor and they don't let stray cats ride up in the elevator. Not without special permission anyway. There's a back stair but she would have to reach up and turn all the doorknobs. They are a little bit high for her. And she couldn't possibly have said to the doorman, "I want Heywood Broun's apartment."

I don't believe she even knows my name and certainly she doesn't know how to pronounce it. But she seemed to sense that I might use her for material in a Radio column. In her cunning and feline mind that entitles her to salmon and cream for the rest of her life. Just one mention on the Radio. Maybe she has an exaggerated idea of what people get paid for working on sustaining programs. Sometimes there are six kittens—all female in time—and not so much time—that makes thirty-six female cats. And then—well, after that I moved out— I don't suppose anybody wants a kitten? No! Well, good night, just the same.

Radio Roads

By Rudy Vallee

(*Continued from page 9*)

find it up to their expectations. I further told them that I considered our tour a Radio good-will tour, one which we had chosen in preference to a trip to Europe or to Hollywood to make another picture, in the hope that it would bring us face to face with our Radio friends and fans. It had done just that; everywhere we went we found friendly and cordial audiences. In the one or two cases where I had a sense of vague hostility on the part of a few, it disappeared before the evening was half over. Psychologically I felt it couldn't be otherwise.

DURING the fifty minutes (it usually took an hour) of the concert, parts of which the crowd danced to, I was either singing or playing the saxophone or clarinet; even on the hottest of nights we all worked extremely hard. During the concert I sang over thirty songs and had a long monologue in our comedy number, "It Ain't Gonna Rain No Mo!" At the end of the concert on the warm nights the boys were wringing wet, and we had only a short rest after the concert, and from then on we played twenty and tweny-five minute stretches of dance music with two and three minutes rest between.

I stayed with the boys until the end of the dance, working every minute to make the dance a success. Every fourth or fifth song was a wild, hot number for those who love the Hoosier Hop, or for those who like to be lost in an ecstacy of wild dancing for the moment. The entire fifteen men I had chosen were men who enjoyed working and who threw themselves into every evening's work with complete abandon; such also was the way I worked, and the reaction upon our audience couldn't help but be felt. A band that works for the love of working, and gives plenty of what they are producing and gives it in a varied style, cannot help but please the audience.

I will leave it to the dance promoters who engaged us, and use their words to express what I cannot say personally. Every dance promoter was enthusiastic concerning our appearance and in every case asked us when we could play a return engagement; that is very unusual at the price we received. Several wanted to play us a few weeks after our first appearance, but I preferred to wait for a year or two years.

The prices charged varied from $1 to $3 per person; the average price was $2 and $2.50 per person. That is a lot of money to ask in these days of business depression in towns where the mines have been closed for weeks, where factories have been shut down and where some families are actually starving.

The fact that Radio can create such a tremendous interest is shown by the immense crowds outside the dance hall as well as in. In every place there were from 3,000 to 5,000 people lined up along the way to the dance hall, or surging around it in the hope of hearing and seeing for nothing. Many of these were well-dressed and genteel looking people. The answer was that as much as they wanted to be inside they couldn't afford it; times were hard, the drought was in its worst stages in the middle of our tour, and yet the terrific, cordial crowds inside showed that in spite of all the depression whatever could be done was done to the satisfaction of everyone.

IN MANY cases the crowd outside was permitted to hear and see. The dance hall promoter realized one thing—that these people couldn't afford to be inside, or, of course, they would be, because the only thing that keeps a person on the outside is the fact that he cannot afford to be inside. That is common sense. The fact that he is there on the outside shows that his curiosity is great enough or he wouldn't be there.

It made me very happy indeed to have hundreds of young, burly men, some in a very shame-faced, eyes downcast attitude, approach me between dances and after the dance and ask to shake hands, saying that they had changed their opinion. Whenever I had the opportunity to ask them, I generally questioned them saying, "Why did you form an opinion before you had seen me? Why be so unfair?" To this they could only do what any person could do—shrug their shoulders and admit that they didn't know. Human nature was ever thus, and will always be! People will form opinions before they have any reasonable right to do so; they will form it from write-ups, from pictures, and from stories brought by word of mouth. Nothing is more unfair, yet nothing is more a fact; that is human nature in its stark reality.

I feel that our tour did more good than anything else could have done, as it brought the Connecticut Yankees and myself very close to those who knew us only through our Radio work. They had learned to love our music through ... Radio work or they never would ... turned out to see us, but the tour ... mitted them to see in action the men ... had brought them musical happi... month after month; it enabled them ... see that these boys and I were just ... human, just as regular and hard worl... in our own particular way as they w... in theirs.

As I left the last town in Pennsylv... and turned the nose of my big, blue ... towards New York, leaving early in ... morning of the day that we were to bro... cast from the Times Square Studios ... realized that this had been a summ... that had joined Radio and actual appe... ances in a perfect unity. The 7,000 m... which were clocked on my speedome... had been 7,000 miles of wonderful ... laxation and change for my boys and m... self. After a year and a half of an ei... teen-hour schedule which had kept ... from the sun, being indoors in the th... atre from twelve noon to ten-thirty ... night, and in the Villa Vallee from elev... until three, never seeing another sho... never getting out into the sunshine, t... beaches, the golf and tennis clubs, ... needed such a change as this, and Rad... made it possible for us to take it, a... take it in a triumphant, friend-makin... sensational tour.

Everywhere we met good-will, friend... ness, cordiality, and left feeling that ... had helped to make these young peop... and old people happier for one eveni... of their lives, and that in our futu... broadcasts there would be a better unde... standing and knowledge of those who we ... trying to bring them, through the ethe... simple dance music with song.

Turkey Day in Studioland

(*Continued from page 27*)

Lombardo, and if he had any, they wer... not accessible. For when he was shake... violently to rouse him from the proverbia... doze into which he had fallen even in th... face of such an appealing discussion, th... beloved director of the Panatella synco... pators simply mumbled, "Please go 'wa... and let me sleep."

So of course no one did. They jus... kept right on loudly cooking that theo... retically perfect microphone banquet fo... turkey day until, by a sad misfortune ... Phil Cook, the Quaker Man, hove into ... sight.

"Phil," I asked him, "What's your idea ... of just the right thing for Thanksgiving ... dinner?"

"Well," said that multi-charactered co... median in voice No. 6, "you take a double ... handful of Crackels—"

And so ended the discussion with the ... large crowd rapidly scattering here and ... there and hiding behind grand pianos, ... drapes, saxophones, kettle drums and bull ... fiddles.

Crooks Don't Like Ether

(*Continued from page 13*)

curtail the intimacy between the youth
the criminal which is fostered in
se breeding places of crime.
Theodore Roosevelt expressed the en-
problem of delinquency when he said,
you want to do anything that is per-
nent for the average man, you must
in before he is a man. The chance
success lies in working with the boy
not with the man."
The main issue before the American
ople today is neither political nor eco-
mic—it is the education of youth.
The officers of the Bureau of Crime
evention of the New York Police De-
rtment have shown what remarkable
ults can be obtained by trained workers
o gain the confidence and the respect
delinquent boys and girls. The first
months' report of the Bureau has some
lendid illustrations of this point. Chil-
en who showed anti-social tendencies,
equently due to home conditions, were
duced to frequent recreational clubs
here they played healthy games and
rned to accomplish useful things. Dif-
ult family situations were harmoniously
justed, thereby making the home life of
e possible delinquent more attractive.
The great influence of this new arm of
lice service will not be felt immediately.
e are planning for the years to come.
e are most hopeful that by directing
e mental traffic of the young mind in
e right direction we will lessen the
iritual injury and death that devastate
e ranks of our children. Thanks to
adio the awakening of a national desire
r crime prevention is beginning to be
lt. We all admit the wisdom of the
axim, "An ounce of prevention is worth
pound of cure." The ether waves have
arted carrying a campaign of education
hich will promote the security, the
fety and the happiness of every honest
tizen. Such publicity means some-
ing else to the criminal. He shrinks
om it!

WHEN television comes into its own the ether waves will be able to broadcast pictures of wanted criminals. He thrives best in ignorance and darkness. But we will give him plenty of ether; not the kind that comes out of a can, but the ether which carries a much bigger kick, Radio waves. Crooks don't like that brand of ether.

Lessons In Loveliness

(*Continued from page 84*)

appearance and enhance her best points.

A guide to make-up—Powder always looks deeper or darker in the box than it does on the skin. It is not advisable to select powder or rouge or lipstick because you like the color in the package It will look much different on the skin. To be most effective, powder should always be chosen a shade deeper or darker than the tone of the skin. A lighter powder shows up on the skin, a powder deeper than the skin gives it a translucent appearance.

Neither is it advisable to select powder designated "For Blonde" or "For Brunette". Not all blondes are fair-skinned, nor all brunettes dark-complexioned. It is desirable to have at least two different shades of powder—a deeper, creamier shade for daytime wear, and a shade for evening that will give the skin a fairer, whiter effect under electric lights. A good evening lavender will give an alluring fairness to everyone except the Spanish brunette with deep olive complexion—and this is the type that should never strive for whiteness. A deep naturally olive complexion has fascination.

THE present fashion of "creamy" powders is flattering to nearly every tone of complexion carried to extremes. If you have brown hair you may wear a deep rachel to advantage, but a light rachel will look even better.

Rachel is associated in our minds as something for brunettes, but many a light-complexioned woman can enhance the attraction of her skin by a deep rachel, especially if she has brown eyes. If she has gray or blue eyes a light rachel for daytime and a pinkish naturelle or lavender for evening are more suitable.

Rouge and Lipstick—The shade of rouge and lipstick should always be a perfect match. Too often we see orange cheeks and red lips or vice versa. Rouge in cream form has many advantages over dry rouge. It looks more natural, if properly selected and softly blended in, and stays on for hours without the necessity of renewing it. I consider a good cream rouge much better for the skin than dry rouge.

Eye Shadow and Mascara—Eye-shadow is growing in favor, but the difficulty about it for evening is this: With so many various colored lights being used in theatres, restaurants and night clubs, one never knows what the lighting effects will do to the make-up, so it is best to stick to the deep blue or light green shade. A tiny bit of cream rouge blended into the upper eyelid will make the eyes look larger, but it must be very delicately applied, else the eyes may look inflamed. You know, of course, that the eyebrows are no longer being plucked into the extremely fine pencil line, but if they are scraggly or too heavy it is desirable to shape them or thin them out. Heavy "beading" of the eye-lashes, in fact, any kind of make-up for the eyes, is never in best of taste for daytime, except where the lashes and brows are too light. Then, a good cosmetique and eyebrow pencil are desirable to bring out the depth and expression of the eyes.

TO ADVISE each of you on your own color combinations, I will have to know—

1. The color of your hair (if it has grey in it, please say so).
2. The tone of you complexion—fair, creamy or olive. Does it still retain some summer tan?
3. Your age (approximately).
4. Is your skin included to be dry or oily?
5. The color of your eyes.

Please mention the RADIO DIGEST in your letter—the Editor's note tells how to address me.

Big Money for Radio Entertainers

If you can play an instrument, sing, or recite, learn about the opportunities to get into Radio Broadcasting as an Entertainer. If you have a voice "with a personality" there are also big opportunities as Radio Announcers. Our complete Book "Radio Entertaining" tells all about the opportunities for those who have talent, and how to cash in on it. Price $2 postpaid. Those purchasing "Radio Entertaining" and who desire to apply for an audition, may be listed with our Bureau, and we will advise your nearest Broadcasting Stations. No fee for this service. The "Listing Questionnaire" will be mailed with your copy of "Radio Entertaining."

Send $2 today to **NATIONAL RADIO BUREAU,** Dept. C, P. O. Box 332, San Francisco, Calif.

CLASSIFIED ADVERTISEMENTS

Rates are twenty cents a word for each insertion. Name and address are counted. Two initials count one word. Cash must accompany order. Minimum of ten words. Objectionable and misleading advertisements not accepted.

Business Opportunities

Screw-Holding Screw Drivers! Remove, insert screws from inaccessible places! Factories, garages, electricians, mechanics, auto, radio owners buy on sight! Exclusive territory. Free Trial! Manufacturer, 1710 Winthrop Bldg., Boston.

Mystery Announcer Wins

(*Continued from page 115*)

at every public appearance. There is no doubt that part of the charm exists in maintaining that identity as a mystery. His voice is, however, his most potent asset. It is a voice that registers a strong and virile personality, infectious with a twinkle of humor but withal possessed of a certain integrity of character and dignity appealing to the imaginative feminine listener.

RADIO was his first love. It began with his school days when he slipped away from the tedium of classrooms at Johnston, N. J., to delve into the intriguing business of putting coils and batteries together to produce a far-flung sound or gather in a sound that other hands directed from far away at sea or in distant lands. It fascinated and gripped him—those strange signals trickling down out of the sky to tell of things that were mysterious and far away. And finally he too could throw back his own thoughts across the great spaces. There was no idea of using his voice in those days—everything was in dots and dashes.

Eventually the ships claimed him. A wireless operator with power to span the seas from ship to ship and ship to land—then the War. Secretary Josephus Daniels sent him a special letter of commendation for bravery manifested in sticking to his key while in very imminent peril. After the war he gravitated into broadcasting, first as a combination announcer-operator, and now as the national champion Diamond Meritum Award winner.

The Happiest Years

(*Continued from page 16*)

gagements and her children were taking more of her time. Her husband died a few years later, leaving her with five small children and hardly any money. The days were dark ones for her and time and again she and her children experienced hunger. Just when the singer was in despair, she was asked to sing at a benefit performance in Berlin. For that appearance she was given thirty marks and the newspaper critics awoke to find that they had discovered a voice which they were sure was destined to become great. Perhaps this was the real climax of her life which led to her broad philosophy of today.

From that time on her path became smoother. She was asked to sing at the Hamburg Opera and then invited to become first contralto of the Berlin Royal Opera, the goal of every singer in Germany and one of the most famous opera houses in the world.

WHEN she sang Wagner at Bayreuth Maurice Grau, then impresario of the Metropolitan Opera in New York, asked her to come to America. Two years later, in 1899, she came to this country and the American public took Schumann-Heink, artist, mother and woman, straight to its heart. And after more than a half century of song, her golden voice still thrills its listeners. Friendly, unaffected and unspoiled, she remains the idol of her vast audience of music lovers. Now that the calm, peaceful days have come after a busy life, she finds her "happiest years."

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912, of RADIO DIGEST, published monthly at 535 N. Michigan Avenue, Chicago, Illinois, October, 1930. State of New York, County of New York, ss.

Before me, a Notary Public in and for the State and county aforesaid, personally appeared Raymond Bill, who, having been duly sworn according to law, deposes and says that he is the Editor of the RADIO DIGEST and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 411, Postal Laws and Regulations, printed on the reverse of this form, to-wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are: Publisher—RADIO DIGEST PUBLISHING CORP., 420 Lexington Avenue, New York. Editor—Raymond Bill, 420 Lexington Avenue, New York. Managing Editor—Harold P. Brown, 420 Lexington Avenue, New York; Business Manager—Lee Robinson, 420 Lexington Avenue, New York.

2. That the owner is: (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding one per cent of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a firm, company, or other unincorporated concern, its name and address, as well as those of each individual member, must be given.) Edward Lyman Bill, Inc., Raymond Bill, Edward Lyman Bill, C. L. Bill, Rando Brown, J. B. Spillane, B. Titman, and Charles R. Tighe, all of 420 Lexington Avenue, New York, N. Y.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: (If there are none, so state.) None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5. That the average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the six months preceding the date shown above is ..... (This information is required from daily publications only.)

Raymond Bill, Editor.

Sworn to and subscribed before me this 26th day of September 1930. Harry Hoag, Notary Public, County Clerk's No. 245, N. Y. County Register's No. 1117. Term expires March 30, 1931. [SEAL.]

Vote For Your Favorite Station in New Radio Digest Popularity Contest.

See page 5 for Story . . . Here are Rules and Conditions

1. The contest started with the issue of RADIO DIGEST for October, 1930, and ends at midnight, April 20, 1931. All mail enclosing ballots must bear the postmark on or before midnight, April 20, 1931.

2. Balloting by means of coupons appearing in each monthly issue of RADIO DIGEST and by special ballots issued only when requested at the time of receipt of paid-in advance mail subscriptions to RADIO DIGEST when received direct and not through subscription agencies according to the schedule given in paragraph four.

3. When sent singly each coupon clipped from the regular monthly issue of RADIO DIGEST counts for one vote. BONUS votes given in accordance with the following schedule:

For each two consecutively numbered coupons sent in at one time a bonus of five votes will be allowed.

For each three consecutively numbered coupons, a bonus of fifteen votes will be allowed.

For each four consecutively numbered coupons, a bonus of twenty-five votes will be allowed.

For each five consecutively numbered coupons, a bonus of thirty-five votes will be allowed.

For each six consecutively numbered coupons, a bonus of fifty votes will be allowed.

For each seven consecutively numbered coupons, a bonus of seventy-five votes will be allowed.

4. Special ballots will be issued only when requested at the time of receipt of paid in advance mail subscriptions, old or new, to the RADIO DIGEST when received direct and not through subscription agencies according to the following voting schedule:

1-year paid in advance mail subscription direct. .	$4.00	150 votes
2-year; two 1-year paid in advance mail subscriptions direct.....	8.00	325 votes
3-year; three 1-year; one 1 and one 2-year paid in advance mail subscriptions direct.	12.00	500 votes
4-year; four 1-year; two 2-year; one 3-year and one 1-year; paid in advance mail subscriptions direct.	16.00	750 votes
5-year; five 1-year; one 2-year, and one 3-year; two 2-year and one 1-year; one 4-year and one 1-year; paid in advance mail subscriptions direct.....	20.00	1,000 votes
10-year; ten 1-year; five 2-year; three 3-year and one 1-year; two 4-year and one 2 or two 1-year; two 5-year paid in advance mail subscriptions direct.	40.00	2,500 votes

5. For the purposes of the contest the United States has been divided into 48 districts, comprised of the 48 states of the Union.

6. The station located within the borders of each State receiving the highest number of votes cast by individuals residing within the same State will be declared the Champion Station of that State, and will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the second largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the third largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the fourth largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

7. In the event of a tie for any of the prizes offered, prizes of identical value will be given to each tying contestant.

8. Any question that may arise during the contest will be decided by the Contest Editor, and his decision will be final.

The Poet's Friend

(*Continued from page 24*)

int Parnassus and chatting there with
ts.
ere he formed the enduring friendship
Chaucer, Shakespeare, Swinburne and
setti who were his constant compan-
. These poets lived again for Mase-
in his garret and poured out their
songs to him.
hen he began with his own dabblings
verse. Some of these hint at the
us which was to be and most of these
y beginnings are still in the possession
riends in Yonkers.
lthough Mr. Masefield's thoughts
le sea and land, he has a memory for
e things. When he returned to the
ted States a few years ago for a lec-
tour, he went to the home of some
friends. They fell to reminiscing.
y talked about their wedding and
sefield even remembered the guests
had attended and what presents they
given. There was the old icebox
ch he himself had bought as a gift.
en Mr. Masefield returned to Eng-
l, he arranged for another icebox to
sent to his friend on the wedding an-
ersary.
lthough the old icebox might make
ery attractive addition to Henry Ford's
seum or provide a fascinating bit for
ectors of valuable furniture, Billy
oth intends to hold on to these two
oxes.
or a famous poet, there is very little
graphical material, but Masefield has
bably said with his fellow writers
t those who would seek him must find
in his works.

n olden times the bards would sing
ir rhymes on the streets and the more
tunate would find their way into courts
l palaces.
n modern times the only tunes we
r on the street are the warm whistle of
peanut wagon, the rumblings of trains,
whizz of aeroplanes and the beckon-
call of the steamboat.

SO AMONG the multitudi-
us voices of machines, our poets have re-
ated into the covers of books and from
e influential platform of the printed
ge have given utterance to their deep-
emotions.
But Radio, as Mr. Masefield points
t, may bring poets back into their own.
e wave length will silently carry the
ngs of poets through hum and buzz
modern life into the homes of those
o love the song of poetry.

Bernadine Hayes

(*Continued from page 49*)

"Any woman can be beautiful if she takes time," was the encouraging reply. "A charming woman is much more attractive than a beautiful woman. The longer you know a charming woman, the deeper does she grow in your affections."

"Are you financially independent?"

"Yes, I am, and I am not ashamed of it. I used to work in the lace department of a large store during my vacations when I went to high school, and very rich ladies would come in with their maids, and I would often wonder if I would ever be like them. I have always loved beautiful things and I love to go out to theatres and parties."

Her ideal man? He does not have to be good-looking. But he must be intelligent and must know how to earn a living.

"I want to marry someone upon whom I can thoroughly depend. I don't believe that any woman should dominate the marriage situation. Yes, I'd like to have one or two children and send them to nice schools.

"But there is nothing like a large family at Christmas time, with everyone gathered at home."

The career of Bernadine Hayes, Queen of the Air, began in humble surroundings. She started singing in St. Louis and confined her activities to private parties and in the homes of her friends.

THEN came her opportunity. It was at Loew's State Theatre in St. Louis. The engagement of one of the singers, around whom an act was built, had to be cancelled. Another singer was engaged to do the number, but when she arrived at the rehearsal she couldn't carry on with the song.

Eager to try the part, she pleaded with the manager to let her take it. He looked at her in surprise. Who was this young girl who even dared to presume that she could sing before the footlights? But she was not to be daunted, and the manager, after all, had to get someone to fill the bill. Her success amazed even the manager if managers can be amazed. And a contract was offered her for a tour of the West.

A short time after the completion of the tour Miss Hayes appeared at an exhibition, and as events would have it, George Junkin, Manager of KMOX, St. Louis, invited her to broadcast from his station, and soon after that she was signed up as a staff artist.

Recognition after recognition came. An official of the Columbia Broadcasting System, hearing her over KMOX, suggested that she go to Chicago and broadcast from WBBM and since that time she has been one of the features on CBS and on local programs.

Miss Hayes is known as one of the best blues singers in the country. But "popular" music is not her only interest in life. She loves operas and concerts and has been studying under Albert Rappaport of the Chicago Civic Opera.

The midnight hour has sounded and Cinderella has not departed. The Fairy Godmother is evidently pleased with the way she has carried her part—and the Prince of a Wealthy Kingdom will soon be coming.

RADIO BARGAINS

Low Power Transmitter adaptable for phone or code. With plug-in coils $14.75

Good Diction

(*Continued from page 66*)

minded is generally recognized. We hear a speaker without seeing him. When a speaker is only a voice, he must needs send forth a good voice. The Radio has not only added to the value of a pleasing method of utterance, it has increased the handicap which a harsh unlovely voice and incorrect use of words impose."

THE voice of Sir Oliver Lodge, musical, quietly authoritative, without one blundering note or displeasing tone is a lesson in cultivated speech of enormous potency, for it reaches millions of listeners who have been made speech conscious by the Radio.

"It was in recognition of the growing importance of the regular paid announcers of the five hundred stations in America as teachers of good diction, that I advocated to the American Academy directors the establishment of a medal to be awarded to the announcer whose articulation, pronunciation, tone quality and general quality seemed most worthy of award."

Miss Perkins claims that the chief function of Radio is to serve the public, first, by broadcasting news; second, by providing entertainment; third, by discussing educational topics; and fourth, by promulgating good cheer.

Who is more in need of this wonderful service than the busy housewife for whom Radio serves as her only contact with the teeming world outside?

Miss Perkins' broadcasts, built upon these principles, have been of inestimable value to the woman at home, to whose rescue she comes in more than one way.

Those who have found it impossible to do very much window shopping can always receive guidance from Miss Perkins who presides over her program as a charming hostess, never forgetting the elements of service, entertainment and good cheer.

Miss Perkins stimulates interest in her program by discussing current events of general interest and by inviting prominent persons from time to time to tell about their own fields of activity. Among these guests have been Mrs. Douglas Robinson, sister of former President Roosevelt, who told about the boyhood of her distinguished brother. Mrs. Frank Shuler, President of the New York Federation of Women's Clubs, outlined the scope and activities of this organization. Among those who have contributed a rendition of modern poetry have been Leonore Speyer, Edwin Markham, and Arthur Guiterman.

With representation from such a variety of activities, it can be seen why the interest of the busy woman at home is maintained in these morning programs.

Miss Perkins is very enthusiastic about her work. The National Association for American Speech of which Miss Perkins is President, attracts professionals as well as those who are interested in good diction for the sake of culture. Here at the Association, day and evening courses are conducted for voice training, vocabulary building, poise, effective personality and artistic interpretation.

"The purpose of speech training is to develop the use of the voice as an instrument of expression," concluded Miss Perkins. "This is just as essential in daily life as it is over the Radio, but Radio emphasizes the need."

Miss Perkins enjoys her Radio work because it brings her in contact with individuals from every walk of life and because it is so closely allied to the subjects of voice, diction and personal expression in which she has always been so interested."

Radiographs

(*Continued from page 69*)

ments for twenty-two publishers and writes all the continuity for the Breen and de Rose programs. She admits to a weakness for fan mail. She gets a voluminous amount but she reads and answers it all herself. She has a pair of white snails for pets. She had had them for years and herself. She has had them for years and has never been quite sure why she keeps them. But she does.

Peter de Rose

NEXT the man. Slender, dark, small moustache, bending over the piano and gazing up at the other member of the team with large romantic eyes. He is Peter de Rose, who has been picking out tunes by ear on the piano since he was twelve years old and now is half of the team of Breen and de Rose, the husband of the other half (I will not make puns); and the composer of a long string of popular ballads.

Many of these ballads are dedicated to his wife. Theirs is probably the most famous Radio romance on record. When they first began playing together hundreds of persons wrote in to say they were sure they were married by the way they sang love songs over the air. Hundreds of others wrote to say they were sure they weren't married—for the same reason! As a matter of fact, they weren't at that time but later they announced their engagement over the air. Congratulations poured in by the thousands and they were married by a minister whose acquaintance they had made through a fan letter he had written.

They are still singing their love songs in the same way—whatever that may prove—and Peter's latest ballad, dedicated to his wife, is "When Your Hair Has Turned To Silver I Will Love You Just The Same". But even under the brilliant lights of the studio that [illegible] looked a long, long way off.

Like his wife, Peter is of Italian [illegible] cent and was also born in New York C[illegible] He was one of nine children, all nat[illegible] musicians. Peter, himself, never ha[illegible] lesson in his life and doesn't read mu[illegible] but he has been playing the piano by [illegible] ever since he was big enough to reach [illegible] keyboard. In addition he also sings [illegible] plays the guitar, and just recently M[illegible] has taught him to play the ukulele. [illegible] first time he played it over the air it k[illegible] them busy for a week assuring th[illegible] friends that it really was Peter and [illegible] May. "And that," Peter says, "is prais[illegible]

He has been composing popular so[illegible] for years, but one of his earliest s[illegible] remains his greatest hit and they still h[illegible] more requests for it than any other nu[illegible] ber. It is "Muddy Water" and it look[illegible] at first as if it had been born under [illegible] unlucky star. It was written just bef[illegible] the big Mississippi flood of a few ye[illegible] ago and for a long time its sale w[illegible] banned throughout all that region. [illegible] time, however, the flood went down, t[illegible] "Muddy Water" went on and is still pa[illegible] ing Peter royalties. Among his oth[illegible] popular successes are "Havin' My U[illegible] And Downs," "Down Among The Sug[illegible] Cane," and "I Still Remember."

The de Roses live in New York Ci[illegible] on West Seventy-third Street, whe[illegible] Peter does his composing in an apar[illegible] ment overflowing with china and potte[illegible] animals for which they both, for son[illegible] unexplainable reason, have a weakness.

Washington Talks to the Nation

(*Continued from page 67*)

ever delivered over the air were made b[illegible] Senators Harrison and Johnson recentl[illegible] from Columbia studios in Washington.

The fiery Mississippian apparentl[illegible] missed an enthusiastic audience not at al[illegible] when he delivered a denunciation of th[illegible] Hawley-Smoot tariff bill. He shook hi[illegible] finger menacingly at the timid lookin[illegible] mike as he assailed the administratio[illegible] measure, and assumed the fighting pos[illegible] so familiar to Senate galleries. Senato[illegible] Watson of Indiana, who also spoke ove[illegible] Columbia on this bill, was equally at hom[illegible] as he voiced approval of the measure.

Senator Johnson withered the mik[illegible] with a glance as he began his assault o[illegible] the London treaty. He soon warmed u[illegible] and pitched into the task with all his familiar ardor. His speech was widely acclaimed as one of the best he has made.

Probably the day is not yet at hand when the little iron box will displace the rostrum. But certainly the day will come when no one can be considered much of a public speaker unless he can thrill invisible audiences via the Radio.

Why Look Like a Wife?

(*Continued from page 91*)

"pick on" their children than to serve m in the true sense of the word.

Another disaster that follows these men is loss of the play spirit. Nerve cialists agree that the death of the play rit is one of the largest factors in mat- nonial unhappiness. Women, more than n, have a tendency to lose all sense of ir identity after they are married. Of urse "Life is real, life is earnest," but e is fun, too, and it's a mistake for any man to lose sight of that.

IN REPLYING to neglected ves who write me, I suggest that they to interest themselves in amusements nich will take them away from the mon- ony of household tasks. I advise them cultivate some simple hobby. And I mphasize the advisability of going to aces of amusement with their husbands d children. A month or so ago, I read a ize winning article by a woman who told w she kept her husband and children ppy. She said that no matter how tired e was, she was always ready to go to ows and picnics and parties with her sband and children. When I read that wasn't surprised that she was a success- l wife. I'm quite sure this woman didn't ok like a breakfast-table wife!

How to be lovelier—any woman can— mply by cultivating the habit of never oking unattractive even to herself. Yes, ny woman can be attractive if she is will- g to pay the price—and the price is not igh. It calls for a little intelligence and haracter enough to care for one's self ithfully and systematically.

Even the most unattractive woman need ot be discouraged. For the most im- ortant answer to any beauty problem is —begin now to correct the things which re wrong and keep up the treatments very day thereafter. It is all a matter of abit. And it's just as easy to form good abits as bad ones. Good habits include egular periods of relaxation, exercise, roper diet, care of the skin, and mental liscipline. By mental discipline I refer specially to the elimination of worry, ussing, and nagging. These things ruin he disposition and not only that, they ause the glands to manufacture poisonous oxins instead of healthy fluids. Then he skin shows a yellow tinge, lines ap- ear, and the complexion grows dull and ifeless. And before women know what is happening, they have become breakfast- able wives.

But any woman can be beautiful. It is simply a matter of will power. The loveliest woman you have even seen is probably the woman who has character enough to care for herself properly and consistently. Any woman can develop character—so why look like a wife?

The Flying Announcer

(*Continued from page 72*)

Less than a week later, Brown announced the race on the Ohio river between the Tom Greene and the Betsy Anne, river packets whose rivalry for the racing title of the Ohio has made river history. For almost three hours, Brown gave WLW and National Broadcasting Company listeners a picture of the race and of its progress, with stories of the Ohio river and its history. He was assisted by George Hicks, NBC announcer, who came to Cincinnati to help with the race. This broadcast was almost a repetition of a similar race the year before in which Brown told the story of the sailing of the Betsy Anne and the Chris Greene, sister packet of the Tom.

Most important of all Brown's microphone appearances, however, is the one for which Mr. Crosley chose him in August: the broadcasting of the non-stop flight of Mr. Crosley's plane in the National Air Races.

Flying with Captain William S. Brock in Crosley's Lockheed-Vega at the rate of 190 miles from Los Angeles to Chicago, Brown told the story of the race through station KHILO, the plane's transmitter. The broadcast was picked up by stations along the way for rebroadcasting. At the finish in Chicago, the National Broadcasting Company picked up the story of the last 60 miles of the race, and of its culmination, which Brown described as the plane zoomed across the finish line.

Not content with this unusual feat of broadcasting from a racing plane, Mr. Crosley also sent his plane, with Pilot Brock and Announcer Brown to the International Balloon Race and Aerial Carnival in Cleveland the week of September 1st.

IN THE Cleveland event, Brown announced from the plane as it raced at full speed across the field. After the balloon races began, the plane followed the balloons for 50 or 60 miles, broadcasting their progress so that the WLW audience might follow them by Radio. Several more broadcasting stunts are "in the bag" for Brown and the plane as this story is written . . . stunts that will make him even more famous as an announcer than he is now.

Before Brown came to WLW from Buffalo, he had other broadcasts to his credit that would have satisfied the most adventuresome soul. He had leaned out of a nineteenth story window to describe a Lindbergh parade. He had been one of the first announcers to describe a city from an airplane. He was the first announcer to present Queen Marie of Roumania to the American Radio audience. He also had presented four of the most famous flyers: Colonel Lindbergh, Ruth Elder, Eddie Rickenbacker, and Clarence Chamberlain.

KEEP STEP WITH RADIO PROGRESS!

RADIO is one of the real marvels of this modern age. The demand is for technically trained men—men who keep pace with the unfolding revelations of this mighty and promising industry.

The International Correspondence Schools Course in Radio, prepared and constantly supplemented by outstanding authorities in the field, is specifically designed to meet the requirements of the radio industry for technically trained radio men.

Authorities responsible for the preparation of the I. C. S. Radio Course include: H. H. Beverage, Radio Corporation of America; George C. Crom, American Transformer Company; Keith Henney, author of "Principles of Radio"; Malcom E. Gager, instructor at the Massachusetts Institute of Technology; E. V. Amy, consulting radio engineer, formerly with R. C. A.; H. F. Dart, authority on radio tubes; Julius C. Aceves, consulting radio engineer, formerly of Columbia University, and others.

The I. C. S. Radio Course is complete, from the foundation principles of radio to the most advanced stages. It also outlines the principles and possibilities of television.

Mark and mail the coupon. We will send you all details. This act may be the real beginning of your career in radio!

Suspense

(*Continued from page 63*)

"Of course we should. Before anyone. And"—she repeated the words with emphasis—"We've noticed nothing."

To Irene this naturally seemed mysterious. But before she could ask for any explanation a diversion was caused by the re-entrance of her father, collared and generally tidier. His mind, it was evident, still dwelt upon one preoccupation.

"Ned and that paper-boy both late together," he grumbled.

"I DON'T think you know my husband, Mr. Gibbs," said Mrs. Mortimer, with an air of relief.

Gibbs also hailed an addition to the group as likely to be helpful; the evening did not seem destined to rank among his triumphs.

"How d'you do, sir," he asked, shaking hands effusively. "I think everyone knows the writer of—of that book you wrote."

Mr. Mortimer stared in pleased astonishment. "So you've read that, eh?" he exclaimed. "Capital!"

"Well," answered the guest, ingenuously, "not to say exactly read. But I've often seen it on the shelf at the public library. It's always there."

Mr. Mortimer said nothing—eloquently.

"There's another ring," observed Irene, as the sound of the front-door bell cut into a somewhat oppressive silence. She turned to her mother. "Shall I go?" she asked, "Amy is busy."

"Yes," answered Mrs. Mortimer. Then in a quick undertone. "No, wait a minute. No, go at once!"

"Why, mother you're absolutely shaking," Irene whispered, playfully. "One would think we'd never given a party before. And it's all going beautifully."

She flashed an apologetic smile upon the company, and went out quickly into the hall, leaving Mrs. Mortimer standing alone beside the fire. Irene had been right; she was certainly trembling. She laid a hand upon the mantel shelf to steady herself.

Meantime Gibbs had turned again towards his host.

"Sad thing about poor old Hughes," he observed, conversationally.

Mortimer grunted, unappeased.

"Found on the line this morning, they tell me," explained Gibbs. "They say it was that business of his son's absconding that made him do it."

Some trick of the firelight, perhaps, playing on the face of her who listened made it seem to work convulsively.

"I don't hear about such matters for choice," growled Mr. Mortimer.

"To be sure," agreed Gibbs. "Still, I just mentioned it."

These people were undeniably difficult to talk to, he thought. However, thank Heaven, here was someone entering who looked rather more alive.

This was Trixie, a conventionally pretty young woman of the fluffy and doll-like type, the affianced of Edward. Both her manner and her costume, a low-necked evening dress of silk, were not wholly free from the suspicion of a desire to show off before the family she was about to enter.

"Edward hasn't brought her," announced Irene, ushering in the visitor.

"Oh, dear me, no!" cried the lady. "Nobody brought me, I assure you. Not worthy of such an honor, I expected to find his lordship here."

Mr. and Mrs. Mortimer were greeted.

"Then you haven't seen him?" asked the latter, kissing her future daughter-in-law.

"Not since yesterday. And he was pretty humpy then. Hardly said good night at all."

"It is queer," mused Irene. Then more briskly. "Trixie, dear, this is Mr. Gibbs, from Edward's bank. Miss Willard, Edward's fiancee."

Mr. Gibbs bowed.

"What do you think of the cake?" asked Irene, by way of making conversation.

"CHARMING, charming," murmured Trixie, in a society voice, intended to show that sugar-icing was to her slightly demodé.

Simple-minded Irene looked pleased.

"Cook thought there should have been little candles on the top, for each year," she said, thoughtfully. "Would you have liked that better?"

"Hardly suppose there'd have been room," volunteered Mr. Gibbs, just to show his interest.

"Really, Mr. Gibbs!" Trixie withered him. "One isn't positively a centenarian, if that's what you mean."

Irene kissed her hastily.

"There," she entreated, "don't be cattish, if he is a bit late. Perhaps he is getting a present for you."

"Oh!" Some secret memory seemed to mollify Miss Willard. "I've had that already."

"We haven't seen it."

"I know you haven't." This still more consciously.

Irene's curiosity became clamorous.

"Is it something to wear?" she asked, eagerly. "Have you got it on?" Meeting with affirmative but mysterious nods to both questions, she added, entreatingly, "Oh, Trixie, do show it to us—if—if you can."

It was the last words that appeared to overcome Miss Willard's scruples.

"No gentleman," she replied, wi hauteur, "would give me anything wear that I couldn't show. Only I pro ised Edward—" She lowered her voi "Well, just you, then," she said, and h furtively from under the lace of her lo bodice produced a pendant, which s handed to Irene.

The latter took it with a cry of asto ishment.

"How lovely!" she almost gasped. "Ar they're real, aren't they? Mother, da do just look what Edward's given Trixie!"

Heedless of the other's cry of protes she had run to her father and displaye the glittering treasure. Even, he, wh had been again impatiently turning th pages of the paper, was impressed.

"Upon my word!" he exclaimed, takin the gift in his hand and surveying it wit astonishment. "Where, did Mr. Edwar get the cash for this bauble, I should lik to know? He seems free with his money."

Trixie looked vexed, and a little con fused.

"It was only because I admired it i a shop," she faltered.

From the moment of her greeting Mrs Mortimer had said nothing to the girl But now, with the pendant in her hand she came close to her and asked:

"Has he given you many presents lik this lately?"

Somehow, for all their quietness, the words seemed to cause an uncomfortable thrill in the little room. It was as though they were charged with ominous meaning. Trixie stammered and hesitated. She was blushing and already beginning to look cross.

"One or two," she said, defensively. "There's nothing to be astonished about. Edward's very fond of me."

"Naturally!" volunteered Gibbs, plunging; but nobody heeded him.

"You needn't imagine," she continued, "that I encouraged him in extravagance. I'm sure I was quite vexed about it at the time. Please give it back to me. I ought never to have let anyone see it."

"WHY?" asked Irene, as Mrs. Mortimer, in silence, handed the jewel back to the girl, from whose face she had not once taken her eyes.

"Edward made me promise not to. He didn't want people to know that he'd got more money than usual just now."

Then Mrs. Mortimer spoke. "And you keep it—like this!" she said. "How can you tell what might depend on it?"

The vehemence of her tone startled them all.

"Really, Mrs. Mortimer—" Trixie stammered, while Irene looked at the

HOYT MOORE
R. R. 3, Box 919,
Indianapolis, Ind.

If you are earning a penny less than $50 a week, send for my book of information on the opportunities in Radio. It is free. Clip the coupon NOW. Why be satisfied with $25, $30 or $40 a week for longer than the short time it takes to get ready for Radio.

Radio's growth opening hundreds of $50, $75, $100 a week jobs every year

In about ten years Radio has grown from a $2,000,000 to a $1,000,000,000 industry. Over 300,000 jobs have been created. Hundreds more are being opened every year by its continued growth. Men and young men with the right training—the kind of training I give you—are needed continually.

You have many jobs to choose from

Broadcasting stations use engineers, operators, station managers and pay $1,800 to $5,000 a year. Manufacturers continually need testers, inspectors, foremen, engineers, service men, buyers, for jobs paying up to $15,000 a year. Shipping companies use hundreds of Radio operators, give them world wide travel at practically no expense and a salary of $85 to $200 a month. Dealers and jobbers employ service men, salesmen, buyers, managers, and pay $30 to $100 a week. There are many other opportunities too. My book tells you about them.

So many opportunities many N. R. I. men make $5 to $25 a week while learning

The day you enroll with me I'll show you how to do 10 jobs, common in most every neighborhood, for spare time money. Throughout your course I send you information on servicing popular makes of sets; I give you the plans and ideas that are making $200 to $1,000 for hundreds of N. R. I. students in their spare time while studying.

Talking Movies, Television, Wired Radio included

Radio principles as used in Talking Movies, Television and home Television experiments. Wired Radio, Radio's use in Aviation, are all given. I am so sure that I can train you satisfactorily that I will agree in writing to refund every penny of your tuition if you are not satisfied with my Lessons and Instruction Service upon completing.

(*Continued from page 126*)

speaker with a sudden anxiety. What, she wondered, was making her usually quiet mother so odd to-night. This was the second thing—

"You're frightening Trix," she observed, with gentle reproof.

"I'm sorry." Mrs. Mortimer had mastered herself again, as though realizing the effect of her outbreak and alarmed by it. "You mustn't mind what I say to-night. I'm tired."

Doubtless that was the explanation, thought Irene, relieved.

"We're all tired and hungry, and inclined to get cross through waiting for our supper," she proclaimed, in her cheerful voice. "I shall have it up without waiting another minute!"

She had left the room almost before the last words were uttered; practical Irene seldom suffered the loss of an unnecessary second between resolve and action. Mr. Gibbs, confused and more than a little uncomfortable, had tactfully taken up a copy of the Register, and was affecting to be absorbed in its perusal. Mr. Mortimer had turned to the window, and, drawing back the blind, was gazing out into the street. Trixie and Mrs. Mortimer were thus isolated.

"Edward knows I happen to be very fond of real diamonds," continued the former, in what was almost a whimper. "So, naturally, he took the first opportunity—" She blew her ridiculous little nose. "No reason why I should be snapped at!"

MRS. MORTIMER was regarding her with a look in which there was both wonder and terrified pity.

"I'm sorry I flew out at you," she said at last, speaking low and quickly. "But, oh, my dear, you do love the boy, don't you? You're glad and proud that he chose you to be his wife?"

"I chose him just as much," corrected Trixie, still aggrieved.

"Then can't you understand how important it may be? You heard what his father said just now. Where did he get that money? Do you know?"

Impossible now to mistake the earnestness of her anxiety.

"I—I didn't ask," faltered Trixie. "We were having such a wonderful afternoon I wasn't going to spoil the fun with questions of that kind!" But, at sight of Mrs. Mortimer's face, she added quickly, "Edward isn't in any trouble, is he?"

For a moment his mother did not answer. Then:

"Even if he were," she said, "wouldn't it 'spoil the fun' to tell you?"

"What—what do you mean?"

"Would your love for him be strong enough to share it? Even if it were worse than trouble, if it were disgrace?"

"Oh—I—I don't know." The doll-like face was aquiver now with agitation. "I hate to think of things like that. There isn't anything going to happen, is there?"

The elder woman turned away with a half-audible groan. "I don't know either—yet," she answered.

"Supper!" cried the brisk voice of Irene, who at this moment appeared, bearing a covered dish, which she placed upon the table. "And the paper-boy's in the road, father. I've sent Amy out for one."

"Good!" exclaimed Mr. Mortimer, rousing himself from his abstraction. "At last we shall know who the fellow is!" He turned with a slightly superior air to the others. "I don't suppose it interests you people much; but, mark my words, this is an evening to be remembered."

"A very enjoyable evening, I'm sure," observed Gibbs, vastly relieved that, as he put it to himself, the family skeleton seemed to have blown over.

"Well," said Irene, "I'm glad you'll know before supper, father, or you wouldn't have eaten anything."

Father, as a fact, had neither eyes nor ears for anything but the expected journal. He did not notice how, while these sentences were being spoken, Trixie had moved close to Mrs. Mortimer. For all her affectation and silliness, there was good somewhere in the girl. "Tell me what it is," she whispered. "What you're afraid of. I want it to be mine, too."

For a moment Mrs. Mortimer caught her hand and squeezed it. Then she turned to face the door. "Wait," she said.

Amy was coming into the room. She carried the Evening Register and a telegram.

"Ah!" here we are!" cried Mortimer. "At last!"

"And there's this," said Amy, holding out the message.

"Oh, father!" Irene exclaimed. "A telegram! Perhaps it's from Ned to say why he's so late."

Mr. Mortimer was fumbling the paper. "Open it, somebody," he growled. "I can't attend to it at this moment."

Irene took the envelope. "I expect it's just that he's been detained at the off—No," she broke off, recollecting; "it can't be that, can it? Here, mother, you see?"

Mrs. Mortimer was standing motionless. Something in her bearing struck her daughter even then as strange; on her face was the look of one who sees fate approaching. "Open it," she command

There was a moment's pause as Irene tore the envelope and Mr. Mortimer rustled the pages of his journal. Then a cry broke from them both.

"Mother! Father!" exclaimed Irene, devouring the telegram with her eyes. "It is from Edward. And do you know what he says—?"

"Never mind what he says," the amazed, incredulous voice of Mr. Mortimer broke in upon her. "It's what it says here, in the paper, about him!"

He stammered incoherently. Astonishment seemed to have taken away his breath. No one noticed Mrs. Mortimer in that moment.

Then, "Listen!" he cried, and began to read aloud. "'We have pleasure in disclosing the identity of the brilliant young writer, Edward Mortimer; who will henceforth join our staff.' That means our Edward! Oh, but it can't be true!"

"True!" Irene's cry echoed his. "Of course it is. Absolutely. This is what it says here: 'Left bank. Permanency Register. Starting three hundred. Wait supper. Edward.'"

Mr. Mortimer seemed dazed. "My son wrote them!" he was murmuring incredulously. "My own son!"

"Lucky devil!" said Gibbs, for the second time; adding, with generous warmth, "but he deserves it!"

"Our Edward!" cried Irene. The room was full of little exclamations. "No wonder he looked queer when father read his own things aloud to him! Trixie, aren't you just bursting with pride?"

"Rather!" answered Trixie, whose eyes were very bright. "But I always knew he'd be famous some day." She turned triumphantly to Mrs. Mortimer.

"There!" she said, "what do you say now?"

Edward's mother had not moved or spoken. But as they looked they saw a strange thing. All her self-control seemed to desert her. She gave a great, sobbing cry. "Thank God! Oh, thank God!"

Then she fainted.

FLOYD GIBBONS' GREATEST THRILL

Sir Oliver Lodge ÷ Baby Rose Marie ÷ Will Rogers' Horoscope

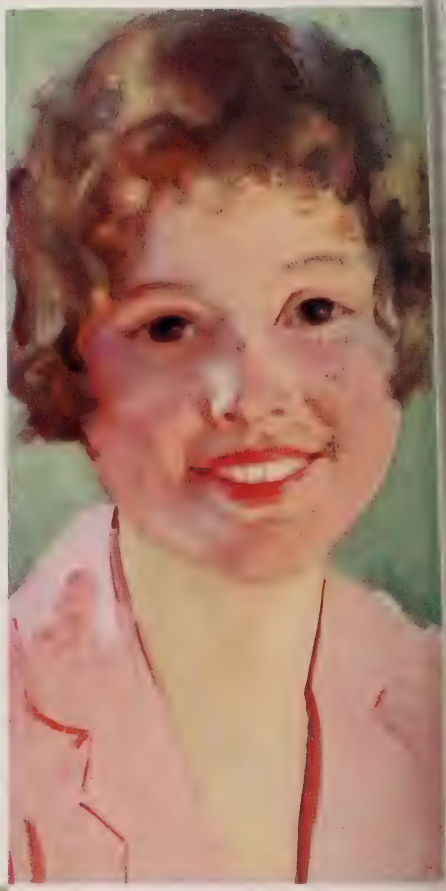
WHAT RADIO STARS WANT FOR CHRISTMAS

WITH THE PRECIOUS TEETH OF CHILDREN

trust only the finest dentifrice

SO widely known are the benefits which Forhan's brings to mouths marked by the effects of age, that another important function of this dentifrice is sometimes overlooked.

It is so pure, it is so mild and cleansing, that this "dentists' dentifrice" is ideal for children.



Young teeth need exceptional care. Fully 85% of all molars coming through the gums contain tiny surface cracks or fissures—the breeding place of future trouble unless they are watchfully cleaned with a safe dentifrice, and checked also by your dentist.

Health authorities also recommend that you clean and massage the gums, even of infants, and urge that children's gums receive regular care.

And care of the gums is the other function of Forhan's. This dentifrice was developed by a dentist, R. J. Forhan, D.D.S.

He prepared a dentifrice which gives the teeth a wonderfully gentle and thorough cleansing—and claims to do nothing more for the teeth. But he added another benefit which his practice had shown him was important—the benefit of a preparation used everywhere by dentists in the care of the gums. In fact, this treatment for the gums, also originated by Dr. Forhan, was the starting point of his excellent dentifrice.

Use Forhan's in the mouth of youth—and to keep the mouth of youth into middle age. When teeth are sound and gums are healthy is the time to adopt this excellent dentifrice. Let it cleanse the teeth and add its help to the care of the gums. Used with massage at the time of brushing, it livens circulation, and aids the gums to stay young and firm.

NOW ON THE AIR!

New Forhan's program—featuring Evangeline Adams, world-famous astrologer—every Monday, Wednesday and Friday at 7:30 P. M. Eastern Standard Time—Columbia Network.

Forhan's

YOUR TEETH ARE ONLY AS HEALTHY AS YOUR GUMS

'OLLOW MY STARS OF YOUTH TO A

★ ★ Clearer, softer skin

rances Ingram herself tells how to keep the skin lovely at its 6 vital places

YOU are just as young and attractive, or just as old, as your skin looks," told a charming woman who recently ame to consult me. "Keep your skin im- aculately clean... Keep it youthful at my ix stars... And *you* are youthfully lovely."

Then I explained to her my method ith Milkweed Cream.

"To cleanse the skin, spread my Milk- eed Cream generously over your face nd neck. Let it remain for several min- tes, to allow the delicate oils to pene- rate deeply into the pores, and then emove every vestige of it with soft linen.

"Now—apply a fresh film of the Milk- veed Cream. With outward and upward trokes pat it into the skin at the six oints starred on my mannequin.

"There are special *toning* ingredients in his Milkweed Cream. These penetrate he cleansed pores and defend the skin against blemishes and aging lines and leave it clear, soft and lovely."

, , ,

This charming woman came back to see me, a day or two ago. Her skin looked *marvelously* clear and soft and fresh! She looked at least five years younger—and said she felt it!

, , ,

I have recommended my Milkweed Cream and my method to so many women, and I have *seen* their skin grow fresh, clear, young. Won't *you* follow my six stars to a clearer, softer, younger skin?

If you have any special questions to ask about skin care, write for a copy of my booklet, "Why Only A Healthy Skin Can Stay Young." Or tune in on my radio hour, "Through The Looking Glass With Frances Ingram," Tuesdays, 10:15 A. M., E. S. T., over WJZ and Associated Stations.

STUDY MY MANNEQUIN AND HER "STARS" TO KNOW WHY

"Only a healthy skin can stay young"

★ 1 THE FOREHEAD — *To guard against lines and wrinkles here, apply Milkweed Cream, stroking with fingertips, outward from the center of your brow.*

★ 2 THE EYES — *If you would avoid aging crow's feet, smooth Ingram's about the eyes, stroke with a feather touch outward, beneath eyes and over eyelids.*

★ 3 THE MOUTH — *Drooping lines are easily defeated by filming the fingertips with my cream and sliding them upward over the mouth and then outward toward the ears, starting at the middle of the chin.*

★ 4 THE THROAT — *To keep your throat from flabbiness, cover with a film of Milkweed and smooth gently downward, ending with rotary movement at base of neck.*

★ 5 THE NECK — *To prevent a sagging chin and a lined neck, stroke with fingertips covered with Milkweed from middle of chin toward the ears and patting firmly all along the jaw contours.*

★ 6 THE SHOULDERS — *To have shoulders that are blemish-free and firmly smooth, cleanse with Milkweed Cream and massage with palm of hand in rotary motion.*

Coming *and* Going

Observations on Events and Incidents in the Broadcasts of the Month

STORIES continue to flow from Fannie Hurst's mind and heart with richer and increasing fervor. She is modern in her thinking, she understands the trend of modern reasoning, modern philosophy and gives her characters feeling and emotional reactions keyed to the day and the hour. This is not a prelude to any novel to appear in RADIO DIGEST but rather an introduction to an interview conducted by Miss Lillian G. Genn who was prompted to ask Miss Hurst whether it was the man or the woman who experienced the deepest emotion of the eternal passion. What does Miss Hurst say? Miss Genn expects to give you that interview in a forthcoming issue of RADIO DIGEST—perhaps in January.

* * *

LOOK what Santa is bringing us in our Christmas stocking! More channels for a broader scope of listening! Mr. Aylesworth, president of the National Broadcasting Company, says that synchronizing a hook-up of thirty high-powered stations over a single channel has been proven entirely feasible. Imagine all the NBC programs emanating over one or two channels! NOW if all the stations handling NBC programs should confine themselves exclusively to that source they could surrender their own channels; or else they could do double broadcasting, if they have the transmitting equipment. The national program could go forth on the NBC channel through the local transmitter and the local program could go forth on the local channel, making it possible for one station to present two programs simultaneously. On the other hand NBC could probably gain a license to put in a string of relay stations on the WJZ and WEAF waves. This would leave all other stations to their own devices.

But that is not all. An English inventor is now here giving demonstrations of a receiving set that is said to add nine frequencies to every one that is available now. Under present conditions each channel must be separated by ten kilocycles to avoid overlapping and interference. By the new method only the precise frequency desired can filter through a crystal gauged for that particular frequency. The next thing will be a new structure all the way around for broadcasting and reception.

* * *

And we are further told that the most powerful Radio organization in America could put movie television into operation in a practical way immediately if it so desired. This means that it could broadcast moving pictures and give you a receiver that would present a good moving image on a screen a foot square. Understand, this does not mean that the operator could go out to a stadium and broadcast a football game direct; it means that a motion picture of that game could be broadcast.

It is also possible to broadcast a newspaper similar to the way a ticker-tape performs. The "tape" for the Radio newspaper is wide enough for two columns of newspaper space and unrolls with flashes when you want it.

HEREIN you will read Mr. Leonard Smith's repor Floyd Gibbons' greatest thrill. It was not on battlefield, as you might have supposed, but in a bro casting station getting out a newspaper of the air for Literary Digest. He was said to be earning more than any other single individual on the air. His sudden replacement by Lowell Thomas caused a great deal of speculation. We called up Mr. Gibbons. He said everything was okeh except he had finished his contract and was glad to get a rest-up from the long grind. And anyhow would we kindly explain how we had put out one eye restored the other in our cut of him that appeared in October number. That was a mean trick in print make-up, whereby the orginal cut had been reversed that the right side of the face appeared to be the l Floyd said he wished every success to Mr. Thomas. T we tried Mr. Cudahy of Literary Digest. "Mr. C bons was engaged for a specific purpose," said Cudahy, "he accomplished that purpose and di splendid job of it. His contract expired and that it not renewed was the fault of no one. The fact that hired Mr. Thomas is no reflection on Mr. Gibbons. expect to use various persons from time to time to sp for us on the air."

* * *

WERE you fortunate enough to hear George Bern Shaw and Dr. Einstein during a recent transatlan broadcast? If you were not you may be glad to know t RADIO DIGEST will present their co ments in the January number. I unfortunate that some of these v important messages from notab across the sea must come at a ti when so many of us are busy at daily tasks in office, factory or fie For that reason RADIO DIGEST ho to be of service to its readers in rep ducing the exact text of some of most important speeches. We w also reprint the speech by Mr. H. G. Wells in our n RADIO DIGEST. There may be other notables wh speeches you will read.

Just eye some of these interesting and very exceptio bits planned for our January RADIO DIGEST: Guy Lo bardo's Adventure with a Gunman . . . E. O. Dunla Reviews and Previews on Broadcasting . . . Old Top Perkins' Drolleries . . . Messages from Venus, anot Peggy Hull horoscope . . . Seth Parker writes h Maine folks make good in the Big City . . . more ab Baby Radio Stars getting rich . . . We are going to start 1931 off with t finest RADIO DIGEST ever published.

Championship Contest Draws

BIG VOTE

Avalanche of Nominations Pull Hard for Four Leading Broadcasters in Each State

HAVE you nominated the four best stations in your state? Are you saving your votes for them? Never before has RADIO DIGEST presented a contest which has met with such instantaneous response as the one ow offered to its readers to choose the four most popular ations in each state.

Ballots and nominations are coming in by every mail. So far is anybody's choice in the leading ates. There is a chance to win for any ation that is nominated.

Letters explaining the reasons for pref- ence have been coming from listeners in l walks of life.

Here is one that places WENR at the ead of the four Illinois leaders. "You n put WENR at the head of any four ations in the country and I'm sure any ir minded listener who actually uses me discernment in the judging of rela- ve merits will vote to keep it there. I on't see why you don't give some special ward for the one station of all the states at gets the highest number of votes. I ope all the other WENR fans will join gether and put Gene Arnold and Everett Mitchell and Irma Glenn over the top. hey deserve it. Mrs. P. J. Miller, Chicago."

In Wisconsin there have been a flock f nominations for WTMJ, and in Min- esota there have been many nomination slips and votes for WCCO. Buffalo shows WGR going strong and in New Orleans WSMB heads the list of the most popular four. In Detroit WJR stands considerably in the lead of all other Michigan stations hat have been nominated. A number of nominations in Detroit seem to have arranged the ticket in the same order. It stands WJR, WMBA, WWJ and WXYZ. Looks like a little election- eering, what? You might be surprised to learn that in New York State WGY at Schenectady carries more nomination slips than any other station, even including the most popular stations in New York City.

On the Pacific Coast in California, KHJ, Los Angeles, has the distinct advantage with KFRC, San Francisco, a close second. We find KFOX, KFWB, KFI and KPO in succeeding order. Hi, there, KFOX, don't let these other stations take your old record lead away from you!

Of course WLW at Cincinnati is getting a lot of attention. A lady in Delaware writes: "There is only one station in Ohio, so why nominate four? I just put the dial on WLW and leave it there." Naturally there are any number of other Buckeye folk who will feel inclined to start an argument with the lady in this Methodist college town. But let them name their favorites—and then VOTE.

An interesting letter comes from Arkansas where KTHS has been put in nomination from Hot Springs. We have not heard a great deal from KTHS for some time. How about it, you Arkansas boosters?

You probably know all about this contest now. See those two blanks down at the bottom of the page? Fill them out and send them to the Contest Editor of RADIO DIGEST. Send the nomination blank first. You are to vote for the four best stations in your own state. This is to give everybody a chance to win one of the beautiful medallions from design shown in the center of the page. There will be four of these medallions awarded to the four stations standing highest in each state—and oh, what a cinch this will be for those who are in a state where there no more than four stations!

The rules and conditions of the contest are set forth on page 114. Read them and see how you can earn extra bonus votes by sending in a series of ballots as they come successively in each issue of RADIO DIGEST until the contest closes in April.

Lowell Thomas

Whose adventures have taken him to the four corners of the world

Lowell Thomas

Adventurer—Explorer—Writer —Friend of Kings and Beggars—Radio's Newest Voice

By Nelson S. Hesse

WHEN executives of The Literary Digest started a search for their new Radio voice they sought a man th a thorough knowledge of the world d its affairs, one who had traveled and udied, one with an alert and informed nd, a man who could discuss intelli- ntly and impartially any topic. The nt led them to a 200-acre farm in atchess County, New York, where they und Lowell Thomas, author, explorer d adventurer. They went no further.

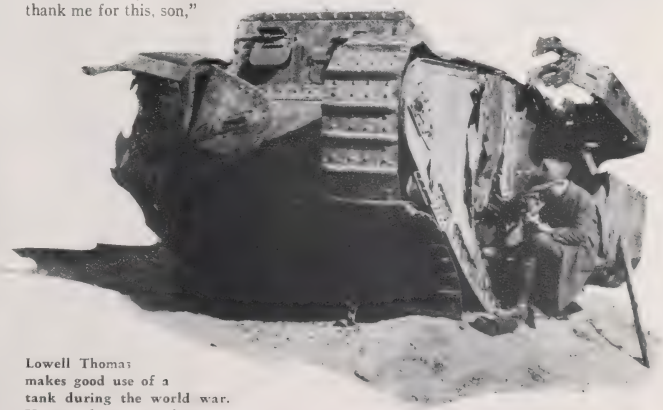
Lowell Thomas might well be called e embodiment of all the primary requi- es of a perfect broadcaster and inter- eter of news events. His life has been plete with action and adventure. An nquenchable thirst for travel has carried m to the the far corners of the globe here he has seen history in the making id has helped make it.

Who's Who describes him as an author nd lecturer. Lowell Thomas prefers to e known as a traveling student or a ewspaperman who got some lucky breaks nd has some stories to tell. Were he iven to boasting, he might lay claim to everal titles, for he probably is the world hampion globe trotter and the first man o broadcast news events over both the Columbia Broadcasting System and the National Broadcasting Company network.

THE numerous occupations nd avocations of this man qualify him is a candidate for the honor of being Radio's most interesting and colorful per- sonality. Still in his thirties, Lowell Thomas has been a gold miner, cow puncher, football player, law student, reporter, editor, college professor, explorer of the Arctic, India, Malaya, Burmah and Central Asia; special pleni- potentiary to Europe during the World War, war correspondent, world traveler, author of sixteen books and a myriad of magazine and newspaper articles, histo- rian of the first around-the-world airplane flight and story-teller extraordinary.

He has been an intimate friend of Field Marshal Viscount Allenby, the mod- ern Richard Coeur de Lion; of Sultans, Prime Ministers and Kings; friend of Princely Emirs of the East; close com- panion of Lawrence, the mystery man of Arabia; confidant of Carl Liebknecht and "red" Rosa Luxemburg, the German Ni- hilists; acquaintance of princes and beg- gars of Jerusalem and Mecca, of London and Rome, of Paris and Singapore.

SO MUCH for the back- ground of the man who broadcasts "Top- ics in Brief—the news behind the news." How about the other requirements—a good voice and a magnetic and pleasing personality?



From the time he was a toddler of four, Lowell Thomas had to stand be- fore his father and spout poetry and prose. He had to learn to get his voice out of his nose and down where it be- longed, to breathe correctly, to gesture with elliptical grace.

"Some day you will thank me for this, son," the elder Thomas prophetically said.

Twenty years later this prediction came true. This voice—rich, pleasant, friendly and well-modulated—was acclaimed in the largest auditoriums of the principal cities of the English-speaking world. More than 4,000,000 people paid close to $1,000,000 to hear Lowell Thomas tell of his adventures.

Lowell Thomas has an extremely fine sense of modesty, a modesty that acknowledges his manifold accomplish- ments in a factual manner. He makes a profound impression upon you the min- ute you meet him. Inclined to be a bit shy at first, he opens up once you en- gage him in conversation and is alive to any subject you may introduce. His magnetic personality literally reaches out tentacles which grip and hold all who hear him talk.

IN APPEARANCE Lowell Thomas resembles a well-tailored business man. He seems neither tall nor short. Always erect, he walks with a determined business-like gait

Lowell Thomas makes good use of a tank during the world war. He served on many fronts

Africa, Nogales Bey, the Turkish general, Sir Hubert Wilkins and picturesque soldiers of fortune such as Tex O'Reilly and Fighting Dan Edwards have dropped in to talk over the past and present with their long-time friend, Lowell Thomas.

Since he embarked upon his latest adventure Thomas has received letters, telegrams and cables of congratulation from friends and acquaintances all over the world. Several of of them have dropped in unexpectedly while he has been broadcasting. While executives of the Columbia Broadcasting System were congratulating Thomas a few minutes after he had made his debut over CBS, a short, stout and deeply-tanned man was ushered into the audition room on the twentieth floor of the Columbia Broadcasting System Building, at 485 Madison avenue. General Rafael Nogales, it was, bitter enemy of the present government of Venezuela and stormy-petrel of Latin - American politics. He had just arrived in New York and immediatelysought out his old friend, Lowell Thom

Some interesting facts cropped up d ing the first few weeks that Thomas broadcasting. A timer stationed in studio of the Columbia Broadcasting S tem found that Thomas speaks betwe 3000 and 4000 words during a fifte minute broadcast, the equivalent of short magazine story or more than th columns of newspaper print.

IN HIS new role as a broa caster of news events Lowell Thom becomes a voice speaking in the dar Curiously enough he nearly always h been just that, because he used pictur to illustrate his adventure tales. On again his physical appearance is hidde from the public.

It is difficult to believe that the lif of one man could be so crowded with ac venture, romance and action. It is equall difficult to condense the story of hi thirty-eight years into a few paragraph

Romance nurtured Lowell Thomas al most from the day of his birth. Son o a surgeon infected with wanderlust, h spent his early years in travel while hi family moved westward from Ohio in th gold migration that came a few years after the "Pike's Peak or Bust" move ment. Reaching the heart of the mining district, the Thomas family settled in Cripple Creek, Colo., and there Lowell Thomas lived for ten years in the crater of an extinct volcano some 10,000 feet above sea level.

that has carried him swiftly over jungle trails. Kindly but keen blue eyes greet you beneath his shock of long, wavy hair.

There you have the reasons why he was selected from more than a score of candidates for the new Radio "Voice".

When the call of Radio beckoned him, Lowell Thomas was on his farm near Pawling, N. Y., dividing his time between caring for his thirty cows and preparing his seventeenth book. Now he spends six days of each week in New York City. On the seventh day he and his wife, the former Frances Ryan, of Denver, return to their farm, which has become a rendezvous for explorers, adventurers and men high in affairs of this and other nations. IMBUED with a desire for
od education, Lowell Thomas went to
thern Indiana University, the Uni-
ity of Denver, Princeton and Chicago
t College of Law in quest of it. At
early age of twenty-four he had five
rees to his credit, had been an assist-
professor of geology, an instructor of
lish and a professor of oratory, and
equipped and led two private ex-
itions into the Arctic.
t various times Thomas has
n on the staff of more than a
en large metropolitan news-
ers. In order to pay his
y through law school
obtained a position as
eporter on a Chicago
ly. There he broke
with a group that later was to become famous—Carl Sandburg, Ben Hecht, Harry Hansen and Mary Synon.

Thomas began giving talks on his experiences in Alaska and the Arctic. Franklin K. Lane, then Secretary of the Interior, heard of his adventures and had him up to talk before the Smithsonian Institute. As a result of this talk Thomas was asked by Secretary Lane to resign from Princeton and lead a "See America First" movement. Thomas was to act as a sort of John the Baptist for the wonders of America, particularly of Alaska.

Then came the war, and, as Secretary Lane put it, "a poor time to be telling about the glories of nature." Secretary Lane decided that Thomas' trained eye and tongue could be put to still better uses. At the request of Secretary Lane and President Wilson, Thomas left Princeton and headed a civilian mission to Europe to prepare quickly a historical record of the World War. He was still in his early twenties.

Headed two expeditions into the Arctic

Helps make history with General Allenby in Palestine: Left: Famous war correspondent's camp in Palestine

In the words of Lord Northcliffe, Lowell Thomas saw more of the World War than any other man. He was attached in turn to the Belgian, French, Italian, Serbian, American, British and Arabian armies. While in Venice he heard of the appointment of Allenby to command the Allied forces in the Near East. He communicated with the British War Office, and they obligingly sent along a vessel to take Thomas and Harry Chase, his photographer, to Cairo. There he and Chase hopped aboard a plane and, as Thomas has said several thousand times, made in forty minutes a journey that had taken the Children of Israel forty years.

He stayed with Allenby's army many months as official historian of the epochal events developed by the Allied forces. He had the good fortune to be the only American observer who saw Allenby—the modern Crusader—drive the flaming Crescent from the horizon forever. These spectacular events in the Holy Land were recorded by Thomas for future generations through the lens of a motion picture camera.

Throughout the country he kept hearing rumors of strange happenings to the south, in the Arabian Desert, where a mythical British officer had united the hostile Arab tribes and was leading them in a fierce Holy War against the Turks.

(*Continued on page 128*)

Baby Brings

THIS yarn should really be called *Baby Brings Home the Caviar.* Bacon? Much too prosaic—and inexpensive. Like reversing the old saw, and craving beer with a champagne pocketbook.

For this is the story of several Radio kiddies whose incomes are more than ten thousand dollars a year. Nearly all are the children of foreign born parents whose fathers are incapable of earning more than $35 a week.

At the top of the list is a five year old tenement child whose income will be more than $100,000 a year. $100,000 worth of boop-boop-a-doop!

Perhaps you've heard Baby Rose Marie, crooning, coon-shouting Radio child prodigy. Or seen her in vaudeville or the "talkies" and marvelled at her. Then, her story and a look into her home might be of interest to you.

THE writer first saw her in vaudeville at the age of three and a half. Rose Marie came out wrapped in a smart little coat—did her number in a hard-boiled, astonishingly coarse shout, calmly and professionally removed the coat, hung it up and did two more numbers. When she finished she bowed her way off with the air of a young lady who had been boop-a-dooping for twenty years.

The house was quiet for a second afterward. Then there was very little applause. A strange man turned in his seat and remarked as though talking to himself:

"Gosh, I'll be darned if I know whether to laugh or cry!"

She was clever. But, from the stage there was none of the child about her. She left you with sort of an aching belief that something had been taken from her. A year and a half later I met her and came to know the real Baby Rose Marie.

It was an interview arranged by the National Broadcasting Company, who have her under contract. She came with her father. It was summer and she was dressed in a filmy, stagey dress with her black hair sleeked down and her dark brown eyes sparkling with mischief.

For a little while her father stood close by and answered most of the staid questions that usually go to make up an interview. Then someone came in and he went over in a corner to talk with them.

Rose Marie leaned over suddenly and put her elbows on my knees. For a full minute she played with a necklace of bright beads and tried to make up her mind whether she was among friends. Suddenly she grinned and climbed on my lap.

"Ah, ain't this the old apple sauce!"

"What's apple sauce?"

"Ah, you know," she shook her hea knowingly, "all these things I'm suppose to say."

Deciding to let the young lady conduc her own interview after that I cuddle her comfortably and, casting a sly loo at her father she began in a low stag whisper:

"DO you know where live? I live 'way over on the East Side—you know where the tenement houses ar at 616 East 17th Street. Right across from a big city ash dump and I bet play with a hundred kids ever' day. You

A Five Year Old Earns $100,000 a Year! And a Ten Year Old is in the $10,000 Income Class! How do they do it?

The Secret's Out in This... a Story about the Home Life of the "Millionaire Kids"... "Baby Rose Marie", "Little Jane" (Muriel Harbater), and Winifred Toomey, young actress.

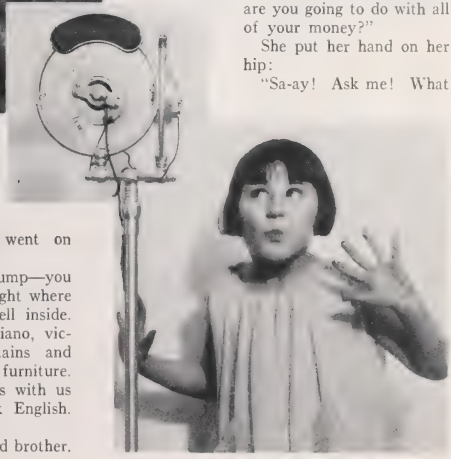
Baby Rose Marie and her family still live in the poor downtown district of New York. She entertains the kids on her block and gives them gifts and toys.

ughta see 'em. I don't think they ever ash. And they are ever' nationality in ie world.

"Know what I am? My name ain't ose Marie Curley. It's Mazetta. They ty Curley cause it don't sound like a oreigner. My pop is Italian and my om Polish. She worked in a restaurant. op drove a truck once—but he don't no ore 'cause I keep 'em so busy looking fter me. I mean he manages my affairs."

This precocious child mixing big words with childish philosophy went on naively:

"We live in a awful dump—you know a reg'lar tenement, right where I was born. But, it's swell inside. All modern. We got a piano, victrola, Radio, pretty curtains and flowers and swell stuffed furniture. Grandma—mom's ma, lives with us and she don't even speak English. Ain't that funny?



"You ought to see my kid brother. He is ten months old and—don't you think I'm lyin'—but, he can sing a jazz song. Not the words. But, I hum and he sings with me and shakes his shoulders. You'd die! He won't do it for nobody else but me. I guess he'll be in my act when he's about two if the kid's society will let him. The old meddlers! Always stickin' their nose in our business. His name is Frank, junior."

A little later when she paused for breath we asked:

"And Rose Marie, what are you going to do with all of your money?"

She put her hand on her hip:

"Sa-ay! Ask me! What

Winifred Toomey, unaffected, leaves all her "dramatics" at the studio.

would a woman do with her money? Spend it on duds, of course. I got about forty-eight dresses."

"Why not buy an airplane?"

Rose Marie looked astonished.

"Get me up in one of them old crates. Not while I'm right in the bean. I got to live and make lots of money."

She went on again in her husky little voice:

"I can't read or write. But, I'm pretty smart. A big professor from Columbia University asked me a lot of questions once and when he got through he told 'em I was a most unusual kid and that I had brains. I can just print my name. I learned how to spell it from the electric lights at the theatre. Honest I did."

Here she proceeded to hunt pencil and paper and laboriously prove her point.

"See! Not so bad—not so good. Give me time. I just went to school one day. Mom fixed me up swell—but I had a awful time. I had a nice clean dress on and white shoes. And they made us get in a funny line and there was a nasty boy behind me and I guess it worried him because I was the only kid at kindergarten that had clean shoes. Cause he reached over and rubbed dirt on 'em. Imagine! I went home and I says to mom that them eggs ain't civilized and I guessed I'd stay at home. She agreed and I ain't been back since."

SHE paused once for breath and inquired earnestly:

"Anything else you'd like to know?"

Then without waiting for an answer she went on jabbering:

"Oh, dear me, Susie! I forgot one of the most important things they always make me tell. I know more than eighty songs. Jazz and ballads. All the words and the music. I never forget once I've learned a number. You know how I was discovered, don't you?

"Pop come in one day when I was two and I was standing in the middle of the floor singing like Sophie Tucker. He nearly passed out and called Mom and she played the piano for me and they said they guessed they wouldn't have much to worry about if they could get me booked on the stage. Well, they did. Here I am.

"Now I don't want you to think I'm braggin' like a ham actor does but, you know, I was only nine months old when I talked. When I was thirteen months old I carried on a reg'lar conversation. And I won an amateur stage prize when I was two."

A little later she sighed, weary of h monologue:

"Oh, don't ask me how I got this wa Don't ask me!"

Let no one think Baby Rose Mari monologue has been elaborated upon. a matter of fact—it is impossible to it justice. At times she broke into so and made wise cracks that would sou so blasé and impossible in a kiddie of h age that, lest we be accused of having wild imagination, they have been elim nated.

And, with it all, she is a sweet bab Not a hardboiled little grown-up bab but a cuddly, affectionate child when sl isn't "putting on an act" for the bene of her "public". Like most stage chi dren she puts on her act at the slighte provocation and any willing listener is h public.

But, later at her tenement home—whic by the way is in one of the wor sections of its kind in town—we foun her playing in the street, the idol of he block. She had several toy animals be side her and a crowd of youngsters tha made it look like the setting for a tene ment movie.

Rose Marie is the queen of the block For doesn't her own shiny car sit in fron of the door? And hasn't she alway plenty of money to treat the other kid to ice cream and lollypops? She is generous little one—and is unhappy unles she shares with the other boys and girl who aren't fortunate enough to be Radi headliners.

Often she stands on the back of he car and puts on a show for them. It i an amazing sight . . . dozens of kiddie in the street and women of every nation ality, shawl-draped heads shaking approv ingly from the windows, keeping time t her boop-boop-a-doop!

At present the Mazetta's are on the way to Hollywood where Rose Marie will play in Victor Herbert's *Babes In Toyland*. She has been touring in vaudeville several weeks en route. "They say" her salary is $1,000 a week—and that with her Radio and movie salary she will bring into the Mazetta coffers well over $100,000 this year.

It will be interesting to watch the Mazetta's climb to fame and fortune on the shoulders of their first born. They have made no attempt so far to improve their living conditions, even though Rose Marie's income for a long time would have permitted them to move almost anywhere in New York they might care to live. They seem to be perfectly happy among their old friends in their foreign tenement setting.

SUCH a contrast to the amazing little Rose Marie is that most precious of Radio children, Little Jane of *Jolly Bill* (Steinke) *and Little Jane*.

Her name is Muriel Harbater. She is the daughter of a plumber and lives at 1927 University Avenue, the Bronx, New

ars of age and her income is somewhere ound $10,000 a year.

Jane's father has not retired as a great ny of the Radio children's fathers ve. He lets the mother manage and k after Jane while he tends to his mbing. But, through the little bread nner the Harbater's live in a nice five om apartment and keep a maid to make re Jane has the proper meals, and that erything moves in clock work fashion r her welfare.

What would you think if you had a ild like this?

Jane awakens at 5 o'clock sharp in the orning. Without the aid of an alarm ock. She rubs the sleep out of her eyes d bounding out of bed goes in and akes her sleepy father and mother.

"Get up, lazy bones! It is time for e to go to work."

Then there is breakfast. A well balnced breakfast of orange juice, toast, nd always a malted milk. Jane has ree "malteds" a day. Her little legs e solid as healthy little legs should be nd her cheeks are brown from swimming . the beach or rolling on the Fordham niversity campus near home. She is an xpert swimmer—and loves to fish and ait her own hook.

After breakfast there is a long hour's de on the subway—and at 7:45 Jane eets *Jolly Bill* Steinke at NBC and they ut on their first broadcast. At 8:45 ney put the same one on again. She arns two new song numbers every day nd reads her dialogue like a veteran.

Jane owes her sweetness and childish harm not only to her mother's care and he fact that there has been a constant ffort made to keep her away from the dea that she is more clever than any ther child, but also to Bill Steinke, with whom she has done their program for wo years.

He is "Uncle Bill" to her. A jolly Allentown, Pa., newspaper cartoonist who dores children and broadcasts for them because he loves them. Bill writes the continuity and directs little Jane. He makes it all a game. When he wants her o giggle he tickles her in the ribs and she rocks with laughter.

THEIR morning program (it used to be evening) is perhaps the most popular child program on the air, and Little Jane is beloved all over the United States.

She was "discovered" by her mother who explained:

"Muriel took part in school programs and I found she had unusual talent. I didn't like to see it go to waste. I didn't like the idea of the stage and I was happy when I took her to NBC and Mr. Steinke saw possibilities in her and gave her a chance in his program.

"It isn't like a professional life at all. There is no applause to spoil the children and we don't allow people to fuss over her in the studio. She takes it all just as a funny morning game to be played with Uncle Bill before she goes to school."

Jane goes to Public School No. 26. She made one vaudeville appearance and "hated it," she said. When asked what she was going to do when she grew up Jane said:

"Oh, always a Radio girl. I couldn't give that up."

And as for spending her money:

"Oh, we put it in the bank and in insurance. All but my clothes and whatever we need for bare expenses. We don't waste it. That wouldn't be right. Would it?"

LITTLE Jane is Russian. Her hair is light brown and her eyes a gray-blue. She will be quite a pretty young lady. She is stocky and healthy as a frisky, cunning little colt.

Nearly all of the Radio child celebrities have been discovered and brought out by Madge Tucker, *The Lady Next Door.* You no doubt know who she is. More about her later. Among her finds is Winifred Toomey.

***Jolly Bill's* partner, Little *Jane,* is Muriel Harbater . . . sweet and unspoiled.**

This little Irish colleen is as refreshingly childish and unaffected as Little Jane. And she has twenty-eight blonde curls. Count 'em! Because Winifred is not permitted to make vaudeville appearances and such, she is still on the $5,000 a year list.

Winifred's father is a clerk in Wall Street. They live at 636—57th Street, Brooklyn, in the winter and spend their summers at Rockaway Point, where Winifred walks away with all of the swimming medals for miles around.

There are two sisters. Mary, sixteen, is red-headed and in High School. Kathryn is 15 and in the Eighth grade. Let Winifred tell it:

"We live in a big brick double house and I have a nice big yard to play in. That's what makes me so healthy. That and the swimming. It's funny, I know, but my two sisters haven't a speck of dramatic talent. They don't even care for it. I've been on the air with Miss Tucker since I was four. I'm ten now.

"I've been in the movies too. I'm crazy about pictures. But, being on the air four times a week—often more than that, keeps me pretty busy. I go to professional school at 1860 Broadway. Did I tell you we have five rooms and a bath at home! Well, I meant to."

Winifred is an expert at being interviewed. She goes on without much prompting, wrinkling her brow and wondering just what might be of interest. When she paused we inquired:

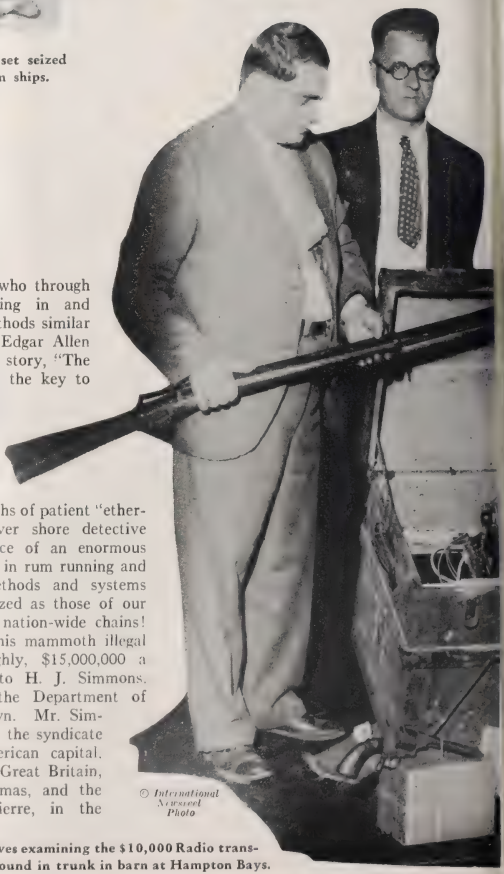
Government raiders jump into criminals' place at sending end of set seized at Coney Island, September 26th, and flash fake messages to rum ships.



By JANET A. DUBLON

FAR out at sea, beyond the twelve mile limit, a powerful boat moves at half speed. In its Radio operator's cabin sits an expert wireless man, busy taking down a message; tap-tappit—the familiar dot—dash—system of the Morse code, but to the uninitiated the pages of letters look like a jumble of unpronounceable words. At the Radio operator's side stands the captain, who snatches the sheets of paper as the message comes over. He understands this queer code, and translates the message into English. "Proceed to point ten miles south of Fire Island and contact boat M. Load with 578 cases of assorted liquors. Boat leaving now. Shore Headquarters."

This is the scene which the federal agents whom I interviewed described to me. How were they able to visualize that scene? They were certainly not on the spot in the cabin of the rum runner. Of course not . . . but they were in a much more strategic position. They were ensconsed in their secret Radio receiving station, listening in on messages sent over the short wave used by the Radio Rum ring in broadcasting instructions from its shore stations to ships beyond the twelve mile limits.

The message given here is actually verbatim, just as it was decoded by the government men, who through months of listening in and deciphering by methods similar to those used by Edgar Allen Poe in his famous story, "The Gold Bug," found the key to the secret language used by the rum syndicate.

This is what they discovered through their months of patient "ether-tapping" and clever shore detective work—the existence of an enormous syndicate, engaged in rum running and selling, whose methods and systems are as well organized as those of our largest trusts and nation-wide chains! The business of this mammoth illegal network is "roughly, $15,000,000 a year," according to H. J. Simmons, chief agent for the Department of Justice in Brooklyn. Mr. Simmons told me that the syndicate is owned by American capital, and has agents in Great Britain, France, the Bahamas, and the island of St. Pierre, in the

Enormous Liquor Syndicate Seized By Government Agents—Radio Used To Flash Instructions To Rum Row

French West Indies. In addition, receiving stations are maintained on lonely spots of the Atlantic Coast, from Maine to Delaware.

Why, if the Federal Government knows of the existence of this syndicate and knows the very men who buy its liquor on foreign shores, are not its operations squelched? Because of the ramifications of international law. Boats loading liquor on foreign soil cannot be prevented from so doing. If they take up positions beyond the twelve mile limit, the coast guard cutters cannot search or molest them in any way. Even if small super-speedy power launches meet the ocean steamers and proceed to transfer liquor to their own holds, under the eyes of a coast guard steamer, they cannot be held, under any of the existing treaties.

The rum ring's landing points on the coast are many, and their locations are being changed daily. Let the law discover the location of one, and it will disappear into thin air. To the ship and shore headquarters, the landing points are known simply by a number. Here is another ship-shore Radio conversation:

Ship—"Boat M sighted."

Shore—"Is the law in sight?"

Ship—"No. Boat M arrived. Proceeding with loading."

Shore—"Load and instruct M to proceed to Landing 10."

Ship—"O.K. M following instructions."

LANDING 10 may be located in a deserted stretch of beach in New Jersey, or it may be hidden in a rocky Maine cove. Of course, Federal agents could trace the whereabouts of the big steamer by their Radio compass, but

by the time a Coast Guard boat arrived to follow the small launch to its destination, it would be lost in the trackless ocean.

Despite all these handicaps, five of the many "contact boats" maintained by the syndicate were captured by the Department of Justice in the month of September. More important still, was the dramatic raid upon and seizure of the syndicate's key Radio station.

The story of this discovery and capture is a thrilling one. Early last June, Radio inspectors who comb the air day and night for illegal operators, found a broadcaster operating on a short wave length, who seemed to work with more regularity than the ordinary unlicensed operators. He had certain specific hours for going on the air, one of them being 4:20 o'clock in the afternoon.

FOR months Radio inspectors copied down the messages as they heard them. At first the ship to shore conversations looked like a meaningless jumble of letters and figures. But with an increasing mass of material to work with, Department of Justice code experts finally succeeded in finding the key to the cipher.

The station could have been located immediately and put out of commission. But that was not the plan of the astute government operators. By listening in on the conversations and tracking boats to their landing places, more could be accomplished. Many of the seizures made during the months from June to September were the result of information gained in this way. The *Nova II*, seized on September 20th, with 300 cases of liquor, was one of the boats which Mr. Simmons named as having been captured by this means. John Davis, its mate, also known as Captain McCloud, was recognized by federal agents, since he was out on $10,000 bail at the time of his arrest.

After making several captures of rum boats, federal agents decided to pounce upon the Radio station before its operators could become suspicious. The location of the transmitter was known to be somewhere in Brooklyn, because the signals were picked up strongest by Radio inspectors located in that vicinity. But where? Here is the point at which that interesting instrument, the Radio compass, was brought into play.

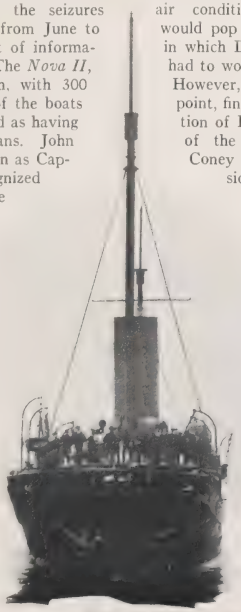
The Radio compass was originally designed to be of aid to ships at sea. Without going into technicalities, a simple explanation can be given. A ship or land Radio station broadcasting can be likened to a stick floating in a pond, sending out ever widening circles. A bearing can be taken by a listener from a point on one of those circles which will give the compass operator a straight line upon which he knows the Radio station must be located. Another bearing taken from a different point will give another straight line. The point on the map where the two lines converge gives the location of the ship at sea asking for its bearing, or in this case, of the Radio rum station sending out illegal signals. Of course the location of the station was not so simple as this would indicate, because air conditions and other difficulties would pop up during the brief periods in which Department of Justice agents had to work.

However, all indications seemed to point, finally, to the Coney Island section of Brooklyn as the headquarters of the Radio rum station. But Coney Island is a large area. Besides its broad boardwalk with throngs of people patronizing hot dog vendors, pop-corn sellers, shooting galleries and all sorts of amusement concessions; besides famous Luna Park and Steeplechase, where dignified old-sters don overalls and "chute the chutes"; there are hundreds of streets with staid rows of brick and frame residences, each one differing from its neighbors only in minor details.

Where then, in this peaceful residential district, was the hiding place of the powerful Radio station, capable of sending messages to ships as far away as Scotland?

Agents soon found out. Picture them in their automobile, playing the role of a party of visitors to New York out to see the sights of Coney Island. They stop for a few moments in front of a hot dog stand and one alights to purchase "eats" for the crowd. In the meantime a hidden portable Radio compass is set to work, bearings are taken and marks made upon a large street map of Coney Island.

Then, perhaps they may stop at the waterfront to view the ocean. Strangers are no novelty to Coney Island, and the government agents may stop as often as they please, without attracting attention. They took then, sixty-seven bearings, and finally satisfied themselves that the signals were coming from a building located at 53 Avenue V.



A GLANCE at the two-story brick building from across the street revealed that their Radio compass had done its work well. What appeared to the laymen's eye to be the aerial of an ordinary home receiving set, was in fact the antenna of a short-wave sending station of the Zeppelin type.

Friday afternoon, September 26th then, the trap was ready to spring. Two carloads of raiders arrived and parked their cars two blocks away from 53 Avenue V. In one of them sat a government Radio expert, with the headphones of a portable short-wave receiving set clamped to his ears. At 4.20 P. M. the station was due to go on the air. Nerves tense, the raiders sat awaiting the word from their Radio operator which would tell them that the rum ring operator was

roadcasting . . . the signal for
iem to begin their raid. For if
ney broke in upon the house and
ound the set quiet, the occupants
ould legally disclaim all knowl-
dge of the business of broadcast-
ig to rum ships.

Five o'clock struck, and still
he transmitter at 53 Avenue V was
uiet. Had the operator been
arned, through some treachery,
f the intentions of the Department of
ustice agents, and made his escape? It
ould not be the first time the bird had
own just as they were ready to make the
apture. Five-thirty, and still no sign.
t last, at six-twenty-five, the peculiar
gnals, recognizable because of a defect
n the transmitter, were heard.

THE raiders sped to the
ouse and closed off all exits. They en-
ered so silently and with such wariness
hat the Radio operator was caught seated
t his keyboard, tapping out a code mes-
age to the rum fleet. So quick was his
apture, that a United States Radio oper-
tor, familiar with the code, sat down in
he vacant seat and continued tapping out
ignals to the ships at sea, so that no
uspicion of the raid could arise.

The man seated at the keyboard was
Malcolm McMasters, a Canadian, who
was out on a bail bond of $30.000 in
connection with the government's pre-
vious capture of a similar Radio station
in Atlantic Highlands, N. J. Such is the
temerity of the hardened criminal—out
on bail, he commences unlawful opera-
tions almost immediately.

But McMasters was not the only bird
bagged. Another and much more im-
portant capture was made. Cecil Moly-
neaux, the chief Radio operator of the
rum syndicate, was caught in the act of
making repairs to the set. At 4:20 Mc-
Masters had discovered trouble and sent
in a telephone call to his chief. It was
6:25 before Molyneaux had gotten the
transmitter in working order, and hence
what the agents thought was an upset
in their plans, was an accident which
brought about the capture of the "Radio
Genius" of the rum ring.

McMasters and Molyneaux were ap-
proached from the rear. "Hands up!"
snapped a Federal officer. Both made a
wild dash for the front stairs, only to be
met by another party of raiders. Seeing
the hopelessness of escape, they sur-
rendered. McMasters gave his name as
Frank Baker, but Carlo M. Bernstein of
the Department of Justice recognized
him as the man he had arrested in the
previous Atlantic Highlands raid.

Molyneaux was also recognized as the
Radio operator of the "I'm Alone," the
Canadian vessel whose sinking by a
revenue cutter in the Gulf of Mexico in
1929, caused the transmission of tons and
tons of official correspondence between
Canada and the United States. During
all the excitement, the owner of the ves-
sel claimed that it was not being used as
a rum-runner. All indications seem to
point to the contrary now, although the
controversy has not been settled at this
writing.

Besides Molyneaux and McMasters,
the raiders seized the set, which they
declared was one of the most complete
to be found outside of those used by the
transatlantic wireless companies for com-
mercial transmission. Its value, con-
servatively estimated, was about $15,-
000—it included three complete 75-watt
short wave transmitters and three com-
plete receivers. Power was supplied by
a bank of storage batteries, numerous
dry cells, and by the electric light main.

Now that particular Radio station is
out of existence, but its operators are out
on bail. Will they go back once again
to the work which has caused their arrest
on two previous occasions? That re-
mains to be seen, and probably depends
upon the decision of the mysterious
financier in New York City who controls
the enormous syndicate, in its operations
from Maine to Florida.

WHO is this silent King
of the Radio rum ring? Who is responsi-
ble for the operation of over 100 unli-
censed stations which flash messages be-
tween the liquor racketeers' land head-
quarters and the rum fleet out at sea?
That is the question which Uncle Sam's
enforcement agents are asking. On one
occasion, before the Coney Island raid,
they thought they had the net spread so
tightly that not a minnow could escape,
but the big fish of the liquor ring swam
through.

Way back on October 17, 1929 the
biggest coup of all was attempted.

Thirty-five simultaneous raids were made throughout New York, New Jersey and Long Island. Over forty prisoners were taken.

The centre of the rum ring at that time was located in Highlands, N. J., where a powerful Radio station and a well-stocked arsenal were found.

The story of the capture made at that time, although it is now history, is just as interesting as the recent raid. The Radio compass narrowed the search down to the vicinity of Highlands, a seaside resort to which pleasure seekers from New York City come by the boatload. Disguised as a Radio repair man, Forest F. Redfern of the government service made observations and bearings and finally located a powerful Radio station in an innocent-appearing frame house.

Three stories high, this house had been the country estate of the Broadway impressario, Oscar Hammerstein, who unwittingly sold it to the rum syndicate. Among those arrested were Andrew Richards, Harold Lindauer, and Malcolm McMasters, who was later to be the guiding hand at the Coney Island Radio station. Important papers were discovered in the Hammerstein house . . . including bank books which showed deposits made by the syndicate in private banking houses and reputable Jersey trust companies, to the tune of a million dollars or more. A complete list of the henchmen of the gang was also found, and information which made the government agents believe they were on the track of the Big Guy himself.

NAMES were mentioned, but one after another the suspects were cleared. First George Remus, the emperor of the bootleg world who shocked the nation by slaying his wife was implicated. But he was eliminated.

The next nominee for King of the Radio Rum Ring was Al Capone, of Chicago, Florida and not so long ago, the Philadelphia Jail. Checks bearing his signature, but returned with a "Stop Payment" notation, were found among the papers of the rum syndicate. They amounted to $104,000! But Chicago lieutenants of this much-publicized gangster explained away his connection with the Atlantic Highlands gang. They said he had planned to tie up with the Eastern syndicate, but later changed his mind. Shrewd Al Capone! He must have received news of the approaching disaster.

Finally the government indicted three men, known as James Murphy, Al Lillien and William Lillien. None of the three were captured . . . for they escaped and allowed the under-dogs to bear the brunt of the blame. Daily government operatives promised news of them, but it is over a year since the Atlantic Highlands raid and they are still at large.

Whether they really were the controllers of this huge rum empire is open to doubt. Whoever the Rum King was,

International Newsreel Photo

Hampton Bays house, where "trunk" set was found. Rum syndicate chose peaceful spots as hide-outs!

he went right to work to recoup his losses. A crippling blow had been dealt him. Dry agents, 130 strong, had fallen upon his warehouses, landing points, boats at sea, Radio station, arsenal, and loyal henchmen. Everything had been confiscated . . . except his huge hidden bank balances. With these as armament, he set to work to reenforce his broken system, and undoubtedly succeeded.

As his lieutenants were released on bail, he communicated with them and started them at work anew. A new code was devised for Radio signalling. New boats were purchased, and new landing places found.

Again the government agents were faced with the task of starting from the ground up and locating Radio stations. On July 19, 1930 four illegal Radio stations were seized, this time in Long Island's most fashionable watering places.

In Southampton, which has usurped Newport's place as society's bathing beach, right opposite the home of Colonel H. H. Rogers, a multi-millionaire, a gorgeous establishment was found. Butlers and cooks were being maintained i order to create the impression that th Radio station headquarters was a fash ionable home.

On the same day captures were mad in Quogue, Hampton Bays, and Matti tuck. All three towns, as well as South ampton, are far out near the tip of Lon Island, and therefore offered a strategi point for the maintenance of an espion age system on the Government rum chasers. From them instructions coul be sent to the rum fleet to despatc power launches to spots not watched b the government.

One of the government agents, wh asked that his identity be concealed, tol me of his exciting, but almost disap pointing adventure in the raid on th Hampton Bays headquarters. An ol mansion, known as the Horton Place, ha been located as the source of the Radi signals. The house was searched fro cellar to garret, and nothing more vil lainous looking than an ordinary house hold Radio receiver was found. Th searchers were just about ready to re tire, disgruntled, when a peculiar tickin noise was heard. It came from the Radi cabinet!

CLOSE inspection revealed that this table model, with two dials, was really the sending and receiving end of a powerful station. Wires leading into the house were traced to the barn, where a well-equipped transmitter was discovered, in a trunk! This gave government agent a clue to the many changes of location of the Radio rum station which they had noticed. Every time they thought they had this particular station located, the signals would come from a different spot. That was easy, when the station was a trunk!

Capture of the trunk set and the other three Long Island stations didn't put the ring out of business, however, and the federal agents knew it. Their vigilance was rewarded again on September 19, 1930, when they captured a full-fledged transmitting set in New Bedford, Mass. New Bedford was formerly the headquarters of the old whaling fleet . . . what a transition from the giant seamen of the old days to the skulking rum-runners of today!

Again, the latest and most important

Christmas Stockings

Wanted by Radio Stars

Underwood & Underwood Photo

By Evans E. Plummer

DECEMBER is here—December, Christmas and Christmas giving! Once a year We-who-have-been-Disillusioned awake to a half-forgotten carol and go drooping down a tinseled lane to meet a little Child—a Child that lives only as a memory but once it was very real for it was You, or it was I. If you must—just take a look in the glass and see that little body you once had, shadowy against the radiant tree, or peering up the mysterious hole behind the mantel where your stocking hung.

THE tiny train, the box of blocks, the shiny horn, the skates, gameboard, gay picture book and those other curious packets all wrapped and labeled in figured paper—they are gone, departed like the little body that seems incredibly to have been You.

Still you must meet the Child at Christmas time—so why be sad? Except for some of us it would be much better that the Child should not come back. There was no hearth, no tree, no stockings and the Santa Claus so hopefully anticipated had failed . . . again. There was too much cold, too much hunger, too much disappointment, too much wishing that Santa Claus would hurry up and bring the body you expected to have when you grew up. Everything changes. Today is today.

Perhaps you are now interested in a more practical Santa Claus, and if you could have your wish—or suppose we say that a score of our better known Radio artists were to hang up their stockings today, and could have their wishes—what would they be asking for? I wanted to know—I thought you would too, so I asked them. And here is what they said:

Art Kassel, the lovable, reciting band leader of Chicago, heard in the Shell hour, built castles in the air a long time before he launched his *Kassels in the Air*. Most of this castle construction work was done from within the high iron fence of one of those drab places known as "orphan asylums" for want of a kindlier name. Yes, Santa got there, after a fashion, but it was not until Kassel was about ten years old that he found just what he wanted in his stocking—a shiny, regulation brass horn and an invitation to play in the boys' band of the institution.

The horn, which has become a clarinet and saxophone since, mapped Art's scintillating destiny. Perhaps that is why he simply answered, "Just let me keep my orchestra and use the microphone now and then, and I'll be content." when asked what he wanted for Christmas. His most usual or rarest gift from a fan during the year? The sympathetic heart strings of a grown-up orphan resonate in his answer:

"There's an invalid down in Somerset, Ky. Her name—if you think she wouldn't mind my telling—is Mrs. Eve Talbott. Her many letters to our band, so interestingly and cheerfully written, I value as my rarest gifts."

HAH—and Old Topper Ray Perkins, far from a tragic sort of figure, wise-cracks following Kassel (the two are together on the Shell bill, so why not here?), "I'd like to have a rabbit for my new silk hat, a microphone that can smile, tonsils like Ed Thorgerson's

and Alwyn Bach's pronunciation. As for what I have been sent this year, include in the oddities: 1. a lot of song lyrics (without music), 2. a lot of cocktail recipes (without ingredients), 3. poetry (free verse and very blank), 4. threats (dire), 5. every kind of bottle opener so far discovered, 6. an automatic harmonica, and 7. three sticks of tastyyeast.

"Sure I always get what I want for Christmas, because I'm such a good boy. At least my mamma, the blonde one, says I'm good, and she ought to know.

"My best Christmas is always the one ahead of me. But the most extraordinary one was in Hollywood last year. They make a sort of 'super-production' of it out there, with searchlights, paper snowstorms, parades, imported reindeer—all in a summer temperature. Furthermore it was the best Christmas I ever drank!"

AND here's what Helene Handin (who plays Anne in the *Pee-Wee and Windy* hour, and with Marcella Shields provides you with entertainment in the *Two Troupers* and the *Two Old Witches*) wouldn't mind getting in her sheer chiffon limb casing:

"1. Ten karat square cut diamond, 2. bonds of any amount—no stocks, 3. a small but well equipped yacht to cruise around Manhattan in the summer between broadcasts, 4. a Rolls Royce, but a flivver coupe would do, and 5. a ten-year contract with Marcella at about $5,000 (or more) a week.

"Among my treasured gifts of the year are a beautiful hand-made makeup box from a prisoner in a penitentiary, a box of home-made jams from a boy shut-in and his mother, several bottles of imported perfume, a hand wrought ring and the usual candy and flowers.

"Santy has been pretty good to me, but I'd have just as happy a Christmas if only I could be with one or more members of my widely separated family—my mother being a traveling lecturer and my sister located in Idaho. My most tragic yuletide? I was in my 'teens and studying music in Chicago—away from all my family and broke! To cap the climax I had quarrelled with my boy sweetheart."

Laughable Billy Jones and Ernie Hare refused to be funny about their demands from St. Nicholas. All they wish is 52 more programs of solid Radio booking with the Interwoven Stocking Company—sort of a stocking contract in the stocking, so to speak.

What has been sent them by listeners? Oh, a flock of oysters, jams, golf tees, neckties, candy and cake, the keys of three cities and jewelry.

"We always get what we expect," said Billy, "which is a sure thing, inasmuch as we expect nothing!"

Their most tragic Christmas, they say, is the one on which they have to work; the happiest, when at home with their families, and the most comical, when they spend Christmas with one another—which we'll all agree WOULD be.

Petite Jessica Dragonette of the golden coloratura soprano voice couldn't forget her career for one moment. No sir! She simply answered that what she wanted for Christmas was to sing *Goldilocks and the Three Bears* which she is dramatizing against Eric Coates' suite, *The Three Bears,* so that is what you may expect to hear in the Cities Service Concert of that week.

Gifts from fans? Many beautiful ones are in her collection, Jessica remarked. One in particular she admires, a tribute to her, *Solvejg's Song,* is a solid brass spinning wheel plated with gold—the kind our great grandmothers used—with the ball of flax and electric bulb. "The pedal moves and the wheel revolves," Miss Dragonette explained. Jessica refused to enumerate her past Christmases. She's so happy over the present and the future, that she really has no cause to complain of the past, she said. Now what do you suppose Godfrey Ludlow, NBC's beloved violinist and Elgin star, wants put in his stocking? Can't guess? Well, he simply wants and expects an offspring—due to arrive abo December 19—and when he told me t news he was presumptive enough to d clare "and *he* will *not* be a fiddler!"

Ludlow confesses that he has receiv from fans all sorts of trinkets to car around in his violin case, and all these see to possess certain voodooistic charms bring good fortune. The popular wield

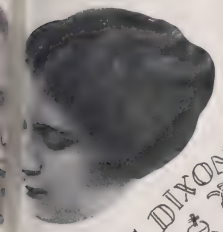
of the bow replie that since his sta in America (he cam from Australia but i now an American citizen he had always receive what he wished for Christ mas, and he wants to thank hi fellow American citizens an Radio listeners for making thi dream come true.

But the breaks always weren't tha way for Godfrey. Here's his story o one Christmas that wasn't so good:

"Was to have been released from German prison camp just before Christ mas . . . Everything was settled an arranged. Then something happened, an I was trundled back to the camp and kep there for three more weeks right throug the holidays . . . Not so nice!"

And my flapper and slow tempo friends how about the Lombardos Consolidated: The Christmas list of Guy, Carmen an Lebert looks like this:

Guy wants (1) to sleep all day, (2) a tip on Wall Street, (3) six more brother to put in his ten-piece band so as to mak it a family affair; Carmen asks (1) t bring his parents down from Canada t spend Christmas Day with him and hi brothers; Lebert wishes (1) a specia preparation for his lips to keep them fro getting chapped when playing his trumpet during the winter.



AND the Lombardo gift receiving clerk during the past year clicked off: Guy, a box of melted chocolates on the 4th of July, a crate of apples, and a

ss ash tray made of Robert Burns
natella cigar bands; Carmen, chocolate
lge galore, cigarettes, and a picture
r no reason at all) of a girl with a
ke draped around her shoulders; and
bert, a home talkie projector and a new
of golf clubs.

The Lombardo boys always have
eived just what they wanted for

MRS. DIXON

GUY LOMBARDO

hristmas, mainly
ecause of the phi-
sophy they've devel-
ped. "Never demand
or expect too much."
ey say, "and you'll never
e disappointed. Then all
hat is received on every Christ-
as is so much 'velvet'."

The dean of Victor Herbert conductors, Harold Sanford, expressed the wish of most Radio favorites when he said he'd appreciate the day off as his first request on his Christmas list.

"Outside of the day off for Christmas, which hasn't fallen to my lot for years, I'd like a good collection of pipes and tobacco. Of unusual gifts sent to me, the outstanding one is a fine black cat—intended by a superstition scoffer as a good luck offering—but which we were unable to keep.

"POSSIBLY the happiest Christmas I ever spent was the first one I was able to enjoy at home with my loved ones after a forced absence of many years. Not only was my family present but a collection of old friends who had come from many distant points for the occasion.

"Another I never shall forget was that of 1915 when the late Victor Herbert came to the theater to conduct the matinee and evening performances of *Princess Pat*. We *CELEBRATED* between matinee and evening, and again after the night performance."

Here, may I interpolate, it was possible to celebrate without going to jail in good old 1915.

Franklyn Baur's story of his happiest, and most tragic, Christmas almost made tears come to my eyes. I'll quote it in a minute, but before doing so, I wish to remark that if Baur were not a great singer, he'd undoubtedly be a popular writer or toastmaster.

For Christmas he asks "a manager who doesn't ask artists for 20% commission, a newspaper reporter who writes exactly what I tell him and laughs at my jokes, and an inventory of all hot dog stand owners who play their Radios for the entertainment of their patrons—and the names of their favorite artists."

"On one early June program," Baur replied when asked what queer gifts he had been sent, "I sang, *Only a Rose*. Two weeks later a farmer sent me a package which when opened revealed a large onion. An attached card read, 'Dear Mr. Baur: You opened the rose season for the florists. How about onion time for the farmers?—Only an Onion'.

"Yes, yes, very romantic, don't you think? So I went downstairs to the kitchen, sliced the onion, and ate it on a hamburger."

Now comes the tale of a happy, yet tragic, Yuletide which Baur spent not so long ago. The tenor continued.

"I remember well one Christmas Eve, after my performance in the *Ziegfeld Follies*. I had decided to walk a bit to relieve my nostrils of the odor of grease paint. The sky, with its bright and wondrous stars reminded me of pictures of the three wise men seeking the new and bright star of Bethlehem.

"I had walked but a few squares when a blonde-haired, blue-eyed lad about ten years of age approached me. 'Five cents, Mister,' he said as he held out his last magazine. The lad interested me. He had a sweet little voice—one which you would hardly expect in a boy shouting 'Magazines for sale.'

"'What are you going to do with the money that you collect on these magazines, Sonny?' I asked. The little lad gazed at me with his sparkling blue eyes and replied, 'I'm going to buy my little sister Mary a doll for Christmas. You see, Mister, she believes in Santa Claus.'

"Well, Tommy, for that was his name, and I decided to walk together to the corner toy store to select a doll for Mary. As we entered the store there was a glistening bicycle standing in a rack near the door. Tommy reached over, gave the horn on the 'bike' a toot, and said, 'That's swell! Some day I'm gonna have one just like it. There's the doll counter, Sir. See the one with the pink dress? She'd like that one, I know, because it cries and closes its eyes!'

"AFTER Tommy had bargained (quite capably, too) with the doll salesman, we turned about to give Tommy one more look at that bicycle. He sighed as he held the doll more securely in his arms.

"'Tommy,' I said, 'can you ride a bicycle like that?' He shrugged his shoulders manfully as he replied, 'Can I? I'll say I can!'

"'It's yours, Tommy,' I said. With a lingering look of doubt in his blue eyes, Tommy threw a leg over the 'bike,' and with tears streaming down his cheeks, said, 'Gee, now I know why Mary believes in Santa Claus.'"

That, Baur remarks, was the most tragic, yet happy, Christmas he ever spent. And now, to his contralto sidekick in the missing Firestone hour, Vaughn De Leath, who is spending a few months leave of absence from 711 Fifth Avenue, New York, at WTAM, now under lease to NBC. Vaughn's quite a country home hobbyist as you will see. But first, her list. Nothing is lacking in variety. A .22 calibre rifle, square cut diamond, motorboat, new car, new room on her house, the *Hitching Post*, an annuity, and to make others happy by playing Santa, complete her desires. During the year her plunder has been varied and peculiar. Someone even shipped her a baby

BERNADINE HAYES

HAROLD SANFORD

alligator! Other gifts include maple sugar and syrup, five birthday cakes, iron and copper cooking utensils for her colonial house, three dolls, a toy dog, and to top them all, a live turkey that she just couldn't kill and eat, so had to send to her country place.

Among Vaughn's sad December 25th memories, cooking plays the villain. Once she tried to cook a Christmas dinner in a hotel room on a one-burner electric grill. The rosy cranberries toppled off and took to rolling all over the floor.

Another Yuletide, "Not so long ago either," she says, "we thought it would be a lark to go out to our log cabin—built for summer weather. After unloading hampers full of food and other supplies, we built a fire in the cheery fireplace (no stove in there), ate a picnic lunch and went to bed to await Santa. The thermometer kept falling until I thought it would crash. We shivered through the night and at dawn pried off the frozen blankets. Mr. Turkey was cooked as a stew in an iron pot in the fireplace while we danced around, not for joy, but to keep warm. But, oh boy! That Turkey stew was delicious, even if the wind did blow down the chimney and make us choke and cry from smoke in our eyes!"

Over at the Columbia building there's a chap by the name of David Ross, a CBS announcer. Know him? You'll know him better after our little interview. Ross asked for two things to be put in his stocking: "a stocking full of Vitamin Z, the peace-inducing vitamin—and a little more humility on the part of the Radio loud speaker."

Unusual gifts sent him by fans include crushed roses and a regular weekly letter of about sixteen pages from a male lunatic. Ross added, that he'd like to take this opportunity of thanking his Radio friends for their many delightful letters. Did he always get what he wanted for Christmas? Yes, indeed. Twice, he says. A radiant daughter born to his wife in June and a son on whose birthday George Washington was born.

"My PAST Christmases have been even-tempered," said Announcer Ross, "a sort of golden, or better still, a gold-plated mean." There you are—just as I promised—David Ross' poetic soul would break out and express itself!

In Chicago at WENR, a pretty good station for its mere 50,000 watts, you've no doubt heard *Mike and Herman*. What do Mike (Arthur Wellington) and Herman (Jimmie Murray) expect to find in the old sock? Living up to their names as air comedians, they are hoping for "a juicy network contract, razor blades (new), a cork screw and the bottles to go with it, a folding peewee golf course, two life World Series passes, ideas for sketches, a date with the Hollywood bathing beauties and cameras, and the rest of the space filled up with oranges, apples, raisins and *NUTS*."

High in the list of peculiar gifts Mike and Herman have received from fans are a pair of 40-year-old suspenders and a second-hand revolver. The antique galluses, made of plush, were sent to Herman Shultzmeyer by the widow of the gentle-

Vaughn de Leath doesn't wait for that annuity . . . she plays a female Santa to her young friends.

man who died before he could use them. The rusty revolver came in the mail after a skit in which Herman lost money at the races and asked Mike where he could buy a second-hand revolver so he could commit suicide as cheaply as possible.

Other odd gifts include boxing gloves, fried chickens, white mice, a dog, shark's teeth, and several baby outfits—which Herman was able to put to immediate use.

Santa has played several jokes on the pair. One Christmas Mike burned his whiskers while enacting the usual role of Saint Nick, and on another, Herman bought a pony for his two daughters, Jean and Ethel. The pony ran away and Murray, who is German—not Scotch—bought a substitute in the form of a hobby horse.

Turning back to the serious for a moment, let's ask John S. Young, famed NBC announcer, what his order will be.

"I'll be content," John replied, "with only the next medal for good diction on the Radio which the American Academy of Arts and Letters awards annually. During the year I've received every kind of pastry, all sorts of patent medicine samples from wags—one of whom suggested that I take Lydia Pinkham's Compound—and a rare, lovely autograph portrait on linen of Admiral Richard E. Byrd.

"My saddest Christmas was the occasion when after accepting an invitation to enjoy a repast including Maryland turkey, Southern chicken, Vermont maple sugar and genuine English plum pudding, I had to work all day and eat at Child's."

Little Ann Leaf, the CBS organist, must be hungry. She craves for Christmas "a good breakfast, a good lunch, a good dinner, another good supper, and a new finger ring. I hope all my friends get the same—especially the 'fans'."

Booty earned by the nimble fingers and toes of this petite console manipulator embraces all sorts of edibles and much home-made fudge (which she loves), assorted real and artificial flowers, and, she added, "the usual cargoes of Rolls Royces, ermines, yachts, country houses—and postcards."

HER funniest or most tragic Christmas? The time in 1925 when she awakened to find out "it wasn't Christmas after all, but merely All Fools Day, alack and alas!"

War experiences were recited by Anthony Wons, the Scrapbook man of WLS and WLW who's now on CBS, and Harry Horlick, conductor of the A & P Gypsies, as indelible Christmases. Wons was in a veteran's bureau hospital where some of the patients were forgotten. Rather tragic, don't you think? His most comical Yuletide was spent in a Los Angeles rooming house when practical jokers locked him in the bathroom and he spent most of the day in the tub, and the happiest, he replied, as a boy in a little cottage in a small Wisconsin town when he awakened to find a ten-cent train under the tree.

Horlick's war Christmas memory results from service in the Russian Army. "On December 25, 1916," he said, "we arrived at Erzroum. A comrade offered me a strange Turkish instrument and demanded, as proof of my boasted musical talents, that I play it. I couldn't!"

The Gypsy conductor plays the violin, as you know. One of the most unusual gifts he has received is a quantity of hair from the head of an unknown lady music lover who instructed him to use it in stringing his bow. Harry Horlick asks little for this Christmas except a market improvement in A T & T shares.

If you like Tony's Scrapbook, you may stuff his stocking with some new jokes for his scrapbook, good health and sense to keep it, a dozen 50-kilowatt stations

MAKING *the* MOST *out of* MATRIMONY

By BILLIE BURKE

In An Interview with Lillian G. Genn

Beautiful Wife of Florenz Ziegfeld Says Self-Sacrifice, Patience, Tolerance and Faith are Essential for Wedded Happiness

NOT so many years ago there appeared on the stage a captivating, irresistible and talented young actress. She had gold-gold hair, roguish blue eyes and a manner so utterly fascinating that old and young, male and female, succumbed to her the moment she tripped into view. She made a sensational hit in London and New York, and her name—Billie Burke—came to be a synonym for all that was delightfully feminine and adorable. Those were the days when the young femininity fashioned themselves after her, for well they knew that the gentlemen showed a preference for anything that was Billie-Burkish.

Naturally romance tagged at the heels of this bewitching little star, and her suitors included royalty, the social elite, distinguished men of affairs, artists and many others. She was daily kept busy making sweeping denials of all of the rumors engaging her to any of them. Indeed, it was whispered that if she had married all who vowed they would die of a broken heart unless she became theirs, the number would have reached from London to Frisco Bay—with many more left over!

At the height of her glittering career, Billie Burke astonished her public by eloping with Florenz Ziegfeld, the famous creator of the Follies, and the one man outside of the Prince of Wales, who is constantly pursued by the very loveliest of the fair sex. This is due not only to the fact that he is a man of unusual personality and gifts, but because of the eminent position he occupies in the world of the theatre. Every beautiful girl who has stage aspirations longs to win Ziegfeld's approval, so that he has veritably become the goal of women from every part of the country.

WHEN you heard Billie Burke as featured artist on the Armstrong Quakers' program you doubtless were reminded of her own brilliant career on stage and screen. Miss Genn has obtained this interview as an expansion of Miss Burke's ideas and remarks on the subject "My Husband at Home".

One can readily understand, therefore, why everyone was surprised at the difficult rôle Billie Burke selected for herself in becoming the wife of the Bad Boy of Broadway, as he was then called, and why it was generally predicted that the romance would not last. Besides, wasn't it known that marriages, with fewer difficulties to contend with, rarely flourished in the shadow of the stage?

It is now almost sixteen years since Billie Burke married Florenz Ziegfeld and their romance not only continues, but is made more happy by their lovely daughter, Patricia. In these days when so many marriages flounder on the reefs of divorce, it would be interesting to know how Billie Burke has been able to achieve a successful marriage. Certainly her beauty alone, for a man who is always surrounded by the most beautiful women, could not have been sufficient to hold together the bonds of their union.

It was in order to learn this secret and her views on marriage in general, that I sought her out at her country estate at Hastings. The house is a large, stately one, situated on beautiful grounds. Within, it is charmingly and tastefully furnished. What particularly impresses one is that it is a home that is lived in, and is pervaded by a gracious spirit. One quickly feels at ease in it.

As for Miss Burke herself, her engaging personality is the same as it was, and with it is the sweetness and charm that endeared her to millions. The years have hardly touched her, for her hair is red-gold, her skin is lovely and flower-like and her blue eyes have the sparkle of youth in them. It is hard to believe that she has a daughter almost fourteen.

EXCEPT for rare appearances in a Broadway play, Miss Burke—Mrs. Ziegfeld in private life—has devoted herself entirely to the home. Shortly after her marriage, when she was playing on the stage and screen, at the largest salary paid to any actress of the day, she found that her career would not be possible without having her marriage suffer from it. When her daughter was born, she turned her back on fame and fortune, and gave herself up to the career of wifehood and motherhood. This gesture illustrates her attitude toward marriage more graphically than anything else. For she showed that no sacrifice was too great and no effort too much where the happiness of her marriage was concerned.

"Nearly any marriage can be a successful one," she told me, "if the woman is willing to give freely and generously of the best she has to give.

Christiana Maples (above) current beauty of *Smiles*.
Miss Burke (right) at time of her debut.

"You know," she smiled goo naturedly, "I have been frequent criticized for putting marriage up the woman. But while I believe th like in every human relationship, ea has to give up something for the othe yet, in marriage, it is the woman wh has to give a little more. Marriage primarily her job, and she has it mo in her power, than man has, to mak it a success. It is she who is mo responsible for their mutual peace ar happiness.

"IN EVERY successf marriage, you will find that the ma depends upon the woman. Nothing too much trouble for her. She ha conscientiously made herself an esse tial part of his life without any physic or sex attraction. The wives of ou famous men have always been know to have fortified their husbands wit that kind of devotion.

"But why speak of the little bit mor that woman must do when today sh isn't even doing her share? *The mod ern American wife has been so pam pered and spoiled that she has becom a rather selfish person. She expects a happy marriage to be handed her wit her wedding ring.* She rarely thinks o her obligations and responsibilities t her marriage, but rather what it is sh can get out of it. The American wife is given more than the woman of any other country, and she gives hardly any thing in return. She doesn't even try to see what she can do to make her marriage a happy one, but at the first sign of any difficulty, begins to think of a divorce.

"And yet, why should a woman expect happiness from marriage without putting her shoulder to the wheel and working for it? Nobody is entitled to happiness. It must be earned.

"Love, in the beginning, may be a flaming passion. But as that burns out, there must be developed in its place the strong, deep love that comes from an enrichening companionship. That is wrought only by self-sacrifice, patience, tolerance, and faith. The love that comes from it thrives in spite of hardships and obstacles, and not even the passing of the years can destroy it."

She paused for a

ment and then continued thoughtfully: Life nowadays demands so much from an and he is constantly under such a ous strain in his battle for existence, he needs a good deal of encouragement and praise if he is to be able to do work. A woman, therefore, must strive e a stimulus and a cheer leader to her band, rather than a drag on him. She t feed his pride and his courage with faith and her love. She must be rous with her sympathy and interd in the things he does. She must in every way to make his path easier his home life attractive so that his d and spirit are refreshed.

That is why I believe that marriage full time job and one which, like other career, demands unceasing rt. Any work that the wife does on outside must be subordinate to her riage. If it is the type of work that uires all of her attention and energy, must be willing to give it up if she rries. If she tries to cheat her marce by giving only part of herself, she l find that it is she who has been the er. For her husband will not be long turning to some other woman who ks he is important enough to be ced before her own individual interes. Such a woman will arouse a greater votion and sense of loyalty in him than part-time wife can.

"WHAT is needed today not a new type of marriage institution, e trial marriage and companionate marge, but only a little more common se about matrimony. Husbands and ves must realize that they cannot have mplete freedom and independence and happy marriage. oth are incompate. Each must trim wn the sharp edges individuality and ch must try to get e other person's oint of view. Each ust give up someing. But selfishss seems to be the icksand in which arriage is flounderg today."

Mrs. Ziegfeld was sked what are the rticular things husand and wife must do their daily living make their union ore harmonious.

"First of all, they hould be polite to ach other," she answered. "I can't unerstand why courtesy hould be given to ne's friends and to ne's business assoiates and employees,

(*Cont. on page* 121)

"Do you remember, Mike?" asks Myer . . . and Joe Weber (left) does recall the incident mentioned by Lew Fields, although it's a long road from Miner's Bowery Theatre in 1877 to Radio Studios in 1930

Encore!

By

Doty Hobart

"NEW YORK CITY has the best judges money can buy!"

That quaint remark handed the metropolitan Radio fans the laugh of the month last October. And well it might, for dignitaries of the bench in Greater New York were undergoing a grand jury investigation for alleged corrupt practices.

Although it may seem difficult to believe, the creator of that 1930 laugh-line was the same gentleman who, back in the gay nineties, originated a bit of crossfire humor which had our grandparents rolling in the theatre aisles.

You may have heard it. If you have, stop me.

"Who was that lady I saw you with last night?"

"She was no lady. That was my wife."

The newest of the two wise cracks was spilled into the microphone at WOR during one of the weekly broadcasts of those two famous comedians of a generation or two ago, Weber and Fields. The well worn chestnut made its debut on the stage of the one and only institution of its kind, the never-to-be-forgotten Weber and Fields' Music Hall.

Even though one institution (the building) is gone another remains. "Mike and Myer" still live. If you don't believe this pair of troupers is an institution in itself, pull out the volume of your Encyclopædia Britannica marked Vase to Zygo and see what that authority has to say under "Weber and Fields".

The smaller half of the team, who has been "Mike" to his public for nearly a half century, is Joe Weber. He is responsible for the above jokes. What he lacks in size he makes up in gray matter. Yet he refuses to take personal credit for either of them.

"Those jokes are Lew's and mine," is the way he puts it. Perhaps the fact that whatever is Lew's is Joe's and whatever is Joe's is Lew's explains the reason for this partnership lasting a lifetime. was that way from the very first, wh they made their debut in the theatre, Miner's Bowery in 1877. Lew Fields w then an overgrown boy of nine and J Weber was an undernourished ten-ye old. There was no hogging of the sp light in those days. Now that they ha found an outlet for their talent in Rad there is no hogging of the microphon It will be share and share alike to t end, and may the final curtain for "Mi and Myer" be long delayed in ringi down.

IT WAS my privilege as director of programs to introduce J Weber and Lew Fields to the air audien some three years ago on a commerci broadcast. They were interested in t studio. It was an entirely new enviro ment in which they found themselves an with no audience in sight, they question the ability of this strange power behir the microphone to reach any great num ber of listeners. It so happened that the

Footlight Favorites of Another Day Win New Applause in Radio Dramas

Doty Hobart, former CBS Production Manager and present-day Broadway Stagecrafter, dramatizes their return

to take part in a chain broadcast ational scope. I tried to impress with the size of their potential nce.

ou will play to more people on this broadcast than you have ever done l your stage appearances put to- r," I told them. "Think of it. Why, will be in the neighborhood of ty millions of listeners hearing your s!"

low do you know?" shouted Weber. Don't argue with him, Mike," chimed elds. "He's crazy. Who ever heard neighborhood that big!"

dding, they were, but behind it all a puzzled suspicion that I might be . Trouper-like they were letting off of steam.

ne care with which the program was arsed made them realize that those ne know attached a real importance ne broadcast. Without becoming con- ns of any change of heart toward io's ability to reach a vast audi- they told me afterward that had all the thrill of a first night nd the footlights when the show t on the air. And that, by the , is the same confession which y trouper makes whenever he, or does dramatic work before the microphone—"Every Radio performance is a first night to me."

As they left the studio Joe Weber said, "If you get any letters about our broadcast I'd like to see them."

I promised to deliver, in person, every letter received. A week later, as the official mail-carrier. I escorted two heavily laden office boys to Weber's office and when we left the place little "Mike" literally was "up to his ears" in congratulatory messages. His brother, Max, informed me later that Joe read every one of the two thousand missives!

The only reason Fields did not read them all was because he was working. "Working?" do I hear you ask? Certainly. Once a trouper always a trouper.

Recall way back when . . . Marie Cahill (above) was *Sally in Our Alley* . . . Alma Kruger (left) was Lady *Macbeth* with Louis James . . . Tom English was at Tony Pastor's? They're all Radio troupers now!

if not behind the footlights as an actor then in some other capacity which brings the trouper in contact with the smell of grease-paint. When Lew Fields is not putting on a production of his own you are sure to find him staging a musical show for some other manager.

THE "Weber Enterprises" is the name of the company handling the investments of the Weber capital. And Joe Weber is in full charge of this company. The office has a Broadway address and is in the Times Square district. By day you will find him in his office, except for the time he takes out for lunch at the Astor, at which time he is joined by Fields, while his evening hours are frequently spent watching a show from the front of the house. He is an inveterate theatregoer.

They love their Broadway, these two. It brought them fame and money and they never forget that. Nearing, as they are, the three-score-and-ten-mark in years, the spell of the street and their interest in its activities keeps them young.

The second time I brought Weber and Fields to the microphone as the feature of a chain feature I witnessed

a back-stage scene, the memory of which will remain with me always.

For this program I did not have my stars come to the rehearsals. Instead I told them the number of minutes they were allotted and picked the dialog routines, taken from scenes in some of their Music Hall productions, which they were to use. By now they were microphone wise and needed no coaching as to the use of the instrument for their act. As to the timing and tempo of their dialog, old time troupers sense those things instinctively.

I HAD prepared a rather elaborate introduction for Weber and Fields, a combination of music and the spoken word. Of this introduction my two old troupers knew nothing. I had kept them in ignorance purposely, hoping to give them a little surprise.

The show went on the air. There were two or three numbers by the orchestra. Then the announcer came to the microphone and told the listeners about the old Weber and Fields' Music Hall and of the efforts of its owners to present the first sincere burlesque (which does not mean, as many seem to think, a leg-show) in America. He told of the hit-shows of that era which were burlesqued—*The Heart of Maryland, The Geisha, Under the Red Robe, Secret Service, Zaza, Du Barry, Sappho* and many others. He spoke of the song hits and of the singers who made them famous.

"There was one called *Kiss Me, Honey Do,* sung by Peter F. Dailey and the chorus girls in *Hurley-Burley* in 1898." As the announcer came to this point the listeners heard the chorus as an instrumental selection.

In this way the choruses of many song-hits from the old Music Hall shows were introduced on the air for the first time; *Say You Love Me, Sue; The Pullman Porters' Ball; Dream One Dream of Me; Come Down, My Evening Star* and *My Blushing Rosie.*

As these old tunes were being played, Weber and Fields sat near the microphone awaiting their cue to broadcast. I was watching them to catch their reaction to my little surprise. They smiled as they heard the familiar strains of the first chorus. With the playing of the second one Lew Fields quietly moved his chair over the carpeted floor a few inches closer to his partner. His arm circled Weber's shoulders as he whispered to little Joe. Weber nodded but did not speak. Then, a moment later, the announcer said, "*Come Down My Evening Star* was sung by Lillian Russell in 1902. It was one of Miss Russell's biggest hits and was used in her repertoire for many years. The number you are now hearing is the chorus of *Come Down My Evening Star.*"

As Miss Russell's name was mentioned I saw tears forming in Joe Weber's eyes and before the playing of the tuneful *Evening Star* had finished, those tears were trickling unashamed down the old actor's face. A moment later he had wiped away all traces of outward sentiment and was on his feet at the microphone, ready for his cue, prepared to assist his partner murder the English language as only *Mike* and *My* [illegible] slaughter it.

"And now," the announcer was [illegible] ing, "we have the privilege of pre[illegible] Weber and Fields. Let me introd[illegible] you individually. First, the little [illegible] This is Joe Weber."

"Call me Mike, please," was [illegible] comeback. "All my life I've been [illegible] Mike."

"True enough, Mr. Weber. Mil[illegible] shall be. And this, ladies and gent[illegible] is Lew Fields."

"Much obliged," said Fields. [illegible] one mistake you made. When I'm [illegible] Mike I'm Myer."

Little Joe starts to laugh loudly.

In anger, Lew barks at him, "Wh[illegible] you laughing at, hyena? Ain't my [illegible] Myer?"

"Sure. When you're with me [illegible] name is mire. That's another nar[illegible] mud, ain'd it?"

"Here—here. What do you mean [illegible] ing me nicknames."

"Nickle-names I wouldn't call [illegible] Myer is a muddle-name."

And the pair were off with their [illegible] "eggsplanationings" about college li[illegible]

Radio, the sweetheart of every [illegible] trouper, has caught Weber and Fie[illegible] her net and thrilled them, just as [illegible] in turn are thrilling the lucky list[illegible] Today we find Mike and Myer disc[illegible] topics of the times in scrambled E[illegible] once a week in a fifteen minute [illegible] emanating from the studios of WO[illegible]

The cast of *Moonlight and Honeysuckle* boasts two veterans . . . Ann Sutherland (Sunbonneted Ma Betts) who shocked Broadway by wearing tights in *The Black Crook,* and Claude Cooper (Pegleg Gaddis), who has played 538 Broadway rôles!

ONE by one the old [illegible] stage favorites have been won over b[illegible] magic spell of the microphone. The [illegible] and the near great of footlight fame, [illegible] who know their theatre, have found [illegible] medium of expression for their ta[illegible] And how they cotton to the microph[illegible] — a tyrant who takes all and gives nc[illegible] in return but silence. But even th[illegible] those troupers work to an audience, [illegible] by necessity and not by choice, is "[illegible] cuffed" (to use an old theatrical [illegible] which applies to an unappreciative [illegible] ence), the lack of that impulsive app[illegible] so eagerly sought in the showshop is [illegible] than counterbalanced by the indiv[illegible] response delivered by the mailman. [illegible] many of the old timers tell me they [illegible] it much easier to remain "in chara[illegible] at the microphone because of the la[illegible] any noisy interruption.

During my frequent rambles in [illegible] about the studios the past year, I [illegible] met many an old stage favorite. S[illegible] times it was my first introduction to [illegible] but often an acquaintanceship made [illegible] to the advent of Radio has been joy[illegible] renewed. Their stories are interesti[illegible]

There is, for instance, Marie C[illegible] Glorious, eternally youthful, bob-h[illegible] Marie of *Sally in Our Alley* fame. [illegible] haps you may remember the song-h[illegible] the show which Miss Cahill sent so [illegible] ously across the footlights:

It's encore for Richard "Dick" Jose (left), a player in old-time minstrels, now at KPO. And for Charles B. Hamlin, the *Old Settler* at WTMJ; and Mae Buckley, who is *Mrs. Smithers,* Gwen's mother on the CBS Eskimo Pie program.

I ...ve-a you and
...e-a you true,

... live as two—
... live as one—
...er the bamboo
...e."

...02! . . . And
...n to this. In
...) Miss Cahill
... a mutual friend
...of ours on the
...et one day.
"Why aren't you
...Radio?" asked
...friend.
"Radio!" laughed
...s Cahill. "Why,
...n't even own a
...iving set."
"You should do
...," was the sage
...ice of the friend,
... he proceeded to
...that his counsel
...both scores was put into effect at once. Within the week Miss Cahill became ...lyed-in-the-wool fan and within the ...nth Miss Cahill, with her delightful *...illogues,* was giving the microphone ...earful. Like it? Of course she liked ...

"Only," she confesses, "the darned ...ng had me scared stiff the first time ...aced it. It's a devilishly cold proposi...n—that mike. That's why I like to ...ve a visible audience in the studio when ...work. I don't mind if they do sit on ...eir hands, I can watch their faces for ...ictions. And, believe me, it helps. In ...way I think the eyes have it all over ...e hands when it comes to letting me ...ow whether I am going over or not."

Only a few days ago my path crossed ...at of Florence Malone. The place was ...hallway in the NBC building. I was on ...y way out of the building when a studio ...oor opened and the members of the ...adio Guild Stock Company, homeward ...ound after an air matinee, fairly ran me ...own. There was Rosaline Greene, Ra...o's own youthful leading lady, whom I ...d not seen since her return from a ...immer vacation in Europe. There was ... Daniel Frawley, the original *Ruben* in *...he Old Homestead.* And Wright Kra...er who played with Fanny Davenport ...n 1896. And then I saw Miss Malone.

"Who is that little lady just coming ...rom the studio?" I asked Miss Greene.

"That is Florence Malone. Don't you ...now her?"

"I should," I replied, "for somewhere ...n my mind's catalog of faces hers seems ...decidedly familiar."

"Come along with me and I'll introduce ...ou to her," and the youthful leading lady ...nade good her promise, there in the hall...way, in front of the elevator doors.

And as the elevators passed and re...passed, Miss Malone and I discussed old ...imes. I was sure that we had met be...fore. But when and where?

"I played *Zaza* on the road for several years," the little lady, who now plays character parts, remarked.

That was it. *Zaza.* As an usher in a New England theatre I had been thrilled with the performance of Florence Malone in the title rôle. I had witnessed every show during the run of the piece in my home town. No wonder I thought I had met her before.

OUR acquaintanceship (although it was a one sided, across-the-footlights affair) established, Miss Malone and I found ourselves, an hour later, seated in one of the reception rooms—still talking over "those dear dead days beyond recall," the yesteryears of the theatre. Miss Malone began her stage career with Mrs. Leslie Carter. Then followed years in stock—at the Harlem Opera House in New York, in Los Angeles, in San Francisco. After that, leads in New York productions, only to have an unfortunate accident occur which forced her to give up the stage. Two years ago Harvey Hayes, himself an old timer, met Miss Malone on the street. She was fully recovered from the accident, and Mr. Hayes said—but let her tell you in her own words.

"Harvey and I had played together in the same company several years ago and when he found that once again I was anxious to try my hand at trouping he fairly dragged me along with him to NBC, where he introduced me to William S. Rainey, one of the program directors. The upshot of that meeting was that I played *Camille* in a broadcast the following week. Think of it! They certainly work fast in Radio, don't they?"

"It's necessary," I said. To learn more about her broadcasting activities, I added, "And then?"

"Oh, after that I worked regularly on the Shakespearian Hour and now I'm doing all sorts of parts in modern plays with the Radio Guild."

Wright Kramer. I mentioned the fact that he played with Fanny Davenport in 1896. Perhaps there may be a reader or two who will remember a play called *The Round-up.* If so, you will surely recall the scene wherein one of the characters portrays a man dying of thirst in the desert. It was one of those vividly impressive scenes which haunt one's memory. Wright Kramer was the actor who enacted the rôle. He was leading man for Mrs. Patrick Campbell for two seasons and played any number of juvenile leads in New York productions of *The Road to Yesterday* era. He has lectured for Burton Holmes and played a season with the Paris-American Theatre Company in the capital of France. Then Radio caught him up (or should I say, he caught up with Radio) and he took part in the dramatized O. Henry stories three years ago. When the Biblical Dramas were broadcast, Mr. Kramer was among those present in a cast composed of seasoned troupers gathered from the legitimate stage. If you are a follower of Radio drama you will hear his voice frequently in Soconyland Sketches and in Radio Guild productions.

T. DANIEL FRAWLEY. This gentleman began his legitimate work before the footlights in 1889. After establishing himself as a competent leading man he leased a San Francisco theatre and managed his own company. And what a company! Using embryonic talent he became the tutor of future stars. Here are a few names of those who were sent to Charles Frohman after serving an apprenticeship with his San Francisco company: Eleanor Robson, Maxine Elliott, Wilton Lackaye, Maclyn Arbuckle, Tommy Ross. When he finally closed his West Coast theatre, Mr. Frawley made six world tours with a company of American players gathered together under his own management. He says he has retired from active duty. Perhaps he has, but here's what he has been and is doing in Radio—*Lieutenant MacDonald* in the Crime Prevention Hour, character parts in Radio Guild productions, frequent appearances in Soconyland Sketches, and fifty-four weeks

(*Continued on page 112*)

Battling Time *gives* Floyd Gibbons Big

By Leonard Smith

SINCE Leonard Smith wrote this article the "newspaper of the air" has suspended publication, we hope, temporarily. Fan mail pouring in indicates the great popularity of this program and of Floyd Gibbons and we feel safe in predicting that the public will soon again be listening to the rapid-fire news comment of Mr. Gibbons.—Editor

"BUT the rest will have to wait until another time, we have to get to the studio."

It was 10:15 p.m. For two hours Floyd Gibbons had been retelling tales of his experiences, that to me seem to gather lustre with each retelling. I would have preferred to remain comfortably seated in his apartment, listening to "off the record" accounts of his experiences during the world war, but it was 10:15, and "we have to get to the studio."

On the walk from his apartment to the National Broadcasting Studio, a distance of half a mile, Floyd was strangely silent, and after a few unsuccessful efforts to him to conclude the story he had b telling me but a few minutes before trudged silently along beside him.

I had called on Floyd to get him to me what event in his eventful life h been his most thrilling experience. Wa when the S.S. Laconia had been tor doed from under him? Or the battle Chateau Thierry, where he was wounc and lost the sight of his left eye? Wh he was traveling with Pancho Villa, wh the Mexican rebel was conducting vicious guerilla warfare along the bord When he reported post-revolution co ditions in Russia without Sov

Floyd Gibbons receiving the latest news flashes over the ticker.

Gibbons *his* *Thrill*

. Smith

ority or sanction? When he was lost
he sands of the Sahara Desert?
fy first surprise came when he told
it was none of these. What? Was
e a thrill in Floyd Gibbons' life that
been left untold? What death-defy-
episode was still hidden away in the
liant mind of the world's greatest re-
ter and war correspondent?

The most thrilling thing I have ever
e," he told me, and at the time I
ught kiddingly, "is putting my Radio
spaper to press twice every night."

mumbled something about his cutting
the fooling and getting down to cases,
he continued:

Honestly, in all my experi-
es there has been nothing
thrilling as fighting
ce every night against
ctions of seconds that

cannot be stretched. You will have to see it done to appreciate the thrill."

For fifteen years I have experienced the wildest excitement of getting out daily newspapers. The fight against time. The thrill of beating the opposition newspaper on the street by a few minutes. The making over of pages. Tearing out type to make space for last minute bulletins. I couldn't help wondering how the broadcasting of a few news items could match regular newspaper work for thrills.

But I was soon to learn.

It was 10:30 when we reached the famous 711 Fifth Avenue building, and I was wondering what in the world we could do to kill an hour and a quarter before Floyd would begin his headline hunter broadcast to the Western part of the country. Probably he was going to ask me to sit in on another broadcast program with him.

The elevator "expressed" to the fifteenth floor, the top of the NBC building. As we left the elevator I began to sense that the hour and a quarter would not be wasted. Floyd, as we walked along the hall, was loosening his tie and unbuttoning his collar. His hat was shifted to the back of his head.

SOMEHOW the elaborate office of John Elwood, vice-president of NBC, seemed to me too soft a setting for newspaper drama. Floyd in his dishevelled state, seemed so out of place in such esthetic surroundings. But the activities that greeted me belied the surroundings.

First Larry Rue, Floyd's constant companion and co-worker since the earliest days of the Paris office of the Chicago Tribune, nearly bowled me over, as he dashed from an adjoining office with a hand-

the air with world vs. Fifteen minutes and not a second more.

ful of news items. Then I noticed Kenneth (Mac) MacGregor, who is supposed to be production manager, but is actually jack-of-all-trades in connection with Gibbons' broadcasts, busily engaged at a telephone taking down notes on bulletins being supplied by the United Press.

THERE, before Floyd, on the desk was a mass of news items. Enough to get out a metropolitan newspaper of from 24 to 60 pages, if necessary. And from this mass he must glean only so much as will go into a newspaper that requires exactly 14 minutes for the reading, at the rate of 217 words a minute—Floyd's record. In other words, from approximately 15,000 words of interesting events in the day's news, together with exclusive items of his own gathering, he must choose at most, 3,000 words.

He must read the mass carefully, because in Floyd Gibbons' air newspaper, bare, brief, terse paragraphs to the printed newspaper, may become the lead article, and the long, dry, routine stories take only very brief mention, if that "space".

The likely content of the paper is selected. Floyd must re-write it in his own style. He must write a newspaper in less than 30 minutes. The minutes tick away and the hands move toward 11:45. The paper is assembled. It is timed. A word is added. Two words are deleted. It is timed again. It is three seconds too long. Well, what of it? What of it? This newspaper, with allowances for ad-lib interjections, must fit exactly fourteen minutes to the split second! Seconds cannot be stretched!—11:30.

"Well," Floyd, relaxes a bit. "The paper is ready. So to the press room."

We start for the studio, Floyd, Larry, MacGregor and myself.

We have left behind a page boy who is in constant telephonic communication with the United Press. Beside him are three other boys, selected, I am later told, for their ability to rush through the studio building to deliver messages speedily.

We are almost to the elevator.

"Bulletin, Mr. Gibbons."

A boy is rushing toward us. The paper that he hands to Floyd, reads that a woman has killed her sister to save her from suffering from a broken heart.

"We shall have to get fifty words in on this," Floyd said. "I'll ad-lib it in." If fifty words are to go in, fifty must come out! Fifty of the same length, requiring the same reading time!

"We will have to trim the German political story," he decides. Through the notes he goes. His blue pencil hits a word here; two more here; a sentence here—with the skill of experience.

Beside him is Mac, closely checking the word count during the deletion process.

"Cut fifteen more," he advises.

The job is done Three minutes to get to the studio. We start again. We arrive. The tall man in faultless tuxedo is Edward Thorgesen, the announcer.

Floyd seats himself before the microphone. A page enters with a bulletin. No, it is two bulletins. A plane has fa endangering six occupants. An impor add to the America's Cup race story.

"One minute." Thorgesen speal quietly, warningly.

Floyd and Mac are trying to cut Yacht Race story to allow for the about the new developments. Somet must go for the plane crash. "Germa suffers again, and a whole page is dele

"—its famous headline hunter—F Gibbons. Are you ready, Floyd?"

Thorgesen has made his opening nouncement and usual salutation.

FLOYD begins, but h nowhere near ready. The first page his notes is missing!

"Hello, everybody, bushels of news day, things popping all over the map Introductory remarks. And he is sta at page two of his manuscript! Preci seconds of ad-libbing. The man in control room, James O. Kelly, sees turbance at the microphone. (*Cont. on p. 12*

Adventures and thrills make up the day of Floyd Gibbons. Here he is getting another kick out of life by riding in the cab of a crack New York to Chicago train.

Countess Olga Medolago Albani

NATURE and Circumstance have been kind to this smart young woman with sparkling smile. Born of Spanish aristocracy, wed to nobility, and gifted with a golden voice she has distinguished herself as an artist of exceptional merit in programs heard from WJZ and WEAF, New York.

BR-RRR—winter comes! Let's tune in KFI, Los Angeles. A girl—low, throaty voice—must be one of those Hollywood beauties! Right! Jeanne Dunn! And she looks just like this when she comes up to the mike.

Jeanne Dunn

Martha Attwood

SOMETIMES a special character costume helps materially to inspire the singer. And so Miss Attwood, notable NBC soprano, finds this gay hat and ruff a motif for the mood of her song. You hear in the operatic roles.

Berna Deane

THOSE inimitable Deane sisters whom you hear over the NBC networks may have intrigued your curiosity as to their personal appearance. At the left you see Berna, and if you were well impressed with her voice you will not be disappointed with her picture.

Vera Deane

THIS is Vera, the other Deane, who with her sister Berna sings of a Sunday night for the quarter hour between 10:45 and 11 o'clock. Then they sing every afternoon on the network. How do you like Vera's bonnet? They're wearing them in Seville this year.

Moonshine and Honeysuckle

ONE of the big hits of the season has been the Moonshine and Honeysuckle program over the NBC. Ann Sutherland, the mother, has been a favorite with theatre audiences for years. The stories are quaint and always true to the type and character. John Mason plays the father and Louis Mason, the son.

Aline Berry

HERE is a most intimate close-up study of Aline, who is Mrs. Peter Dixon in private life and the mother of Junior in Bringing Up Junior, which you hear from WJZ, New York. They brought Junior at the age of two months from Arizona to New York to educate him. The program goes big.

Weber and Fields

PROBABLY the most famous pair of old troupers in the world are Weber and Fields who retire from time to time and are yanked back to the stage at the demand of an insistent public. They are in Radio now and making a great hit. Mr. Doty Hobart tells you all about it in a story on page 26 of this Radio Digest.

Arline Judge, Ruth Tester, Fay Brady and Norman Brokenshire

NAUGHTY! Naughty! Be careful, Mr. Brokenshire, these three little maids have the low-down on you and you'd best mind your step. But it's probably all a part of the Radio Follies that we hear over the Columbia system. Arline, Ruth and Fay are the ones who first started the world singing, Sing Something Simple.

Florine and Irine Phelps

JUST to give you the rest of the Phelps twins broadcast as you heard them from WABC and the Columbia system, here they are all dressed up in their Broadway singing clothes.

Sarah Kreindler

JUST a slip of a girl, 18 years old, but with those dark dreamy eyes one may well imagine that Miss Sarah can make her violin breathe the song of Life. She was born and "brung up" in San Francisco. Began winning scholarships at the age of 10. You hear her from the Pacific sector of the NBC.

Courtesy Saks Fifth Avenue

WHITE crêpe, slender to the hips and then revealing unsuspected fullness, makes a modern evening gown. "Tear-drop" scallops at edge of bolero and hip yoke may help cause heart-breaks!

ERMINE, the age-old flatterer, attains new distinction in this wrap through curving spiral lines.

Courtesy Saks Fifth Avenue

BR'ER RABBIT springs a surprise in the coat below, for lapin is the smartest sports fur of the season! Especially in its new shorn version—with a little flat collar and a widish suede belt.

Courtesy Saks Fifth Avenue

Courtesy Brot & Co.

Courtesy Saks Fifth Avenue

ONE of the new "teens" frocks, simple but smart. Canton crepe with crisp white linen tabs.

OH MY! What's a "Sunday night" dress? This, because it's neither formal nor informal. Black velvet with pink bead yoke.

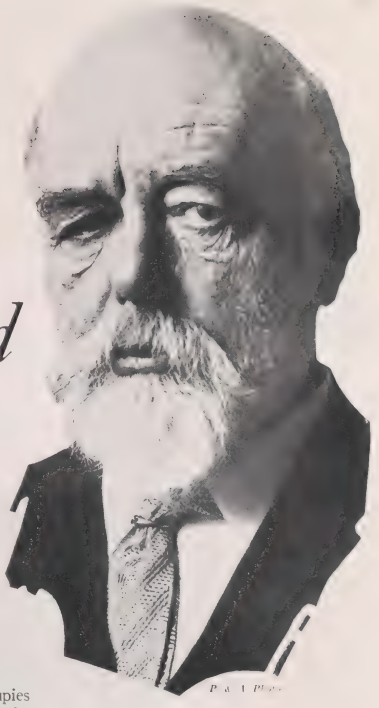
Billie Burke

(left)

LOVELY Billie Burke has never feared the charms of the "gloryfiees" chosen by her husband, Florenz Ziegfeld. And why should she with such beauty as you see in this hitherto unpublished photograph? Read her story in this Radio Digest.

Rosetta and Vivian Duncan

(above)



ALMOST everybody has seen or heard the famous Duncan sisters. Their name over a theatre means a line at the box office. But here you see them as you may have heard them on Walter Winchell's "Scoopee" program from WABC, New York, and over the Columbia system.

Mary Charles

YOU would swear that Mary Charles was English when you hear her impersonations over the CBS chain. She was born in Philadelphia, but she has spent the best part of her stage career in London. She came home and was selected to star in Paramount soundies. A good mike voice earned her an enviable place on the Columbia staff.

The Reality of the Spiritual World

Sir Oliver Lodge

Noted British Scientist and Spiritualist Declares Spiritual World Dominates the Material in International Broadcast Hook-Up

By Sir Oliver Lodge

A controversy on "Life after Death" has been between Sir Oliver Lodge, distinguished British scientist, and Sir Arthur Keith, president of the British Association for the Advancement of Science. Sir Oliver declares that the soul does not die with the body, while Sir Keith takes the opposing view.

Sir Oliver's opinions were broadcast from London over station WABC and the Columbia Broadcasting network as one of a series of international broadcasts arranged by Columbia.—Editor.

SCIENTIFIC men are mainly occupied in investigating the universe from its material aspect. They have never, in their corporate capacity, admitted the existence of any mode of being other than the material one. When a child is born into the world, he possesses certain senses—sight, hearing, touch, and so forth. These put him in touch with a certain aspect of the universe, an aspect of great beauty and complexity which provides abundant study for the lifetime of an individual.

But the poets and artists are not satisfied with this material view. They use material modes of expression, but they adapt them in much wider fashion. They realize the existence of a higher and more spiritual world and only use matter as a means to an end.

THERE is again a third group who are impressed with the universe in what may be called a completely spiritual aspect. This group occupies cathedrals and churches all over the country and carries on a system of worship. It seeks to take people's attention away from the material side of things and concentrate it on the spiritual.

With this group the artists have some interactivity, they cooperate to some extent, and, like the theologians, may possibly condemn the methods of science. The scientist, on the other hand, might respond that he is dealing with reality where his opponent is only dealing with figments of his imagination.

Among these diversified organizations there has arisen a set of people who by human experience have obtained information about a number of phenomena which neither they nor anyone else fully understand but on which they have formed their own opinion. This is the sect known as spiritualists. They are not hampered by scientific or religious tradition. They feel free to deal with the facts as they appear to them.

They may make mistakes. They may take appearance for reality. It may be that they need curbing rather than encouraging, but they get plenty of curbing and it is only their enthusiasm that enables them to continue what they have undertaken. It is true that not all of them are wise.

But, of late years it has happened here and there that among the scientific group a few have asserted that some of the phenomena asserted by the spiritualists are real and must be taken into account, and they do not scruple to say so.

By so doing they risk their reputation and are accused by their fellows of a kind of blasphemy against the spirit of science in accepting as genuine what is widely considered to be the result of fraud and superstition.

Nevertheless they persevere and probably in time will gain the ears of the main body of scientific men and possibly also the main body of theologians.

They themselves claim that the phenomena constitute a kind of link between the material and the spiritual world, and they seem to bring the two groups together and unite them in one comprehensive whole.

THIS is an ambitious task and may fail for a time, but so far as there is truth on their side they are bound to succeed. They seek at present to extend the methods of science into regions where they are generally thought to be inapplicable and to investigate the spiritual world in a cold and methodical manner. The seeming impossibility or extreme improbability of some phenomena does not deter them from inquiring into it. They have faith in the rationality of

the universe. They quite realize that the materialistic contention is a strong one as far as it goes, but at the same time they feel that the universe is much larger and more comprehensive than has yet been explored by science and they treat with respect the contentions of the theologians.

Truth, they say, is many-sided, and cannot be approached in its completeness by any one avenue. To this unorthodox group of physicists belongs occasionally a biologist.

THIS group believes that mind can act independently of the brain and that a study of the motion of particles can never exhaust the whole of reality. They say that the material world is interfused with and dominated by the spiritual, that the motions of matter are only an index or demonstration of what is going on in space, and that even the ordinary phenomena of death and life cannot be thoroughly understood by delving into matter alone.

The Twentieth Century has begun to discover that matter has no power of its own, that the atoms are merely bandied about by the process emanating from space, and that all that matter can do is to demonstrate the real happenings which occur in what we call empty space.

The properties of space are now being investigated. Already it has been discovered that there we must find the forces which hold the atom together, that cohesion and gravitation are really caused by something in space, that life travels from one body to another through space devoid of matter, and that spacial activities are responsible for all electric and magnetic phenomena.

Yet our senses only tell us about matter. We therefore use the motions of matter as an index or demonstration of what is occurring. We read a pointer of a needle when we want to measure an electric current, and that is typical of all our experimental methods. In themselves they are limited to pointer readings. The real meaning of the phenomena eludes us.

All potential energy has long been attributed to space, to the ether and to space, and now it appears that every other form of energy exists there too, and that the atoms of matter are only occasional interruptions in its vast continuity.

The last stronghold to which the materialists cling is the organized material of the body and especially of the brain. Some of them hold not only that the brain is the organ of thought, which it is, but that it originates thought and that to understand mental processes the study of the brain and the nervous system is sufficient.

THE truth is again that they are only indices displaying what is elsewhere going on in a region inaccessible to the organs of sense. The brain has no more initiative than any other form of matter. The real control, the animation of the particles must be sought r space.

This revelation in thought mak phenomena brought forward by the ualists more intelligible, especially they call attention to matter being and manipulated in ways unfamili strange.

I WISH in this conn to emphasize the fact that minds n communicate with each other witho organs of sense and without involvir physical process of communication. fact called telepathy is generally acc and it makes it easier to admit that can continue to exist after they hav their bodily organs. If a mind ca apart from its instrument, it shows mind is not dependent on the instru Mind only uses brain, nerve and n for display, for demonstrating to p with material senses what is reall curring all around them. If min operate apart matter, if mind brain can be thu connected, then mind may contin existence afte bodily organ has destroyed, and evidence can be duced that it act does so continue.

Competent in gators have said they are in touch people who have and have depa this life, people have lost their ma terial bodies and n theless continue exist. They hold fact, the doctrin individual survival adduce plenty of dence in support

Whether that dence amounts to p is still a matter opinion. Scientific p is a serious thing likely to be testifie lightly. But the dence certainly strong, and, for p tical purposes has vinced some of the oneers—convinced for instance—of fact that death is incident in life ra than a termination it, which has to studied and underst like any other nat process, that it is more and perhaps less puzzling and u telligible than bi

(*Cont. on page 1*)

P. & A. Photo

Sir Oliver Lodge keeps fit at seventy-eight years, as may be seen from the above photograph taken at his home, Normanton House, Salisbury, England

A RADIO COLUMN

By HEYWOOD BROUN

The noted humorist points out that fame is fleeting, dwells on the climate of California and winds up with a dissertation on the advantages of equality of sex.

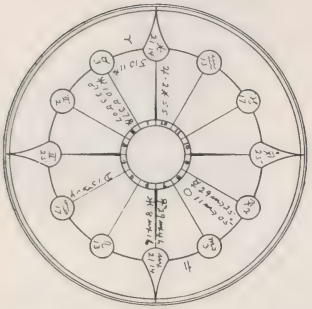
GOOD evening. I have no business here tonight. I ought to be way up in the country tuning in to find out what the radio on at this particular hour and saying, I suppose, "What's not so much. I could do as well as that". But you see I mixed up my dates, Friday wasn't my last night or my last week at all. That time I said goodbye. This is the last week and when it ends on Friday I am going to avoid saying "Goodbye" the way I did last time. That was a little melodramatic because I did know all the time that I would be back on the job again after three weeks. Very likely I had a sinister motive. I hoped people would say "You are not really going away." But if I sinned, many far more distinguished performers have done the same thing. Actors can do it and why not Radio broadcasters. Nobody ever believes an actor when he says he is making his farewell tour. Everybody knows that after the farewell tour there will be the absolutely farewell tour and after that the positively farewell tour. I am combining those two. This is the absolutely and positively farewell week barring the fact that I will be back again next month. At least that is my impression of the date. Miss Whipple gets things a little bit mixed up at times. She does—Heaven help me—her best.

BUT I am not going to say goodbye any more. People take it too calmly. "Not a shot was fired, not a funeral note." I felt a little like Bide Dudley. He left his home and was away two years. I think his home was Wichita, Kansas. At the end of two years he came back—carrying a suit case. And as he came up Main Street he thought that there would be some commotion. But he walked ten or twelve blocks before anybody noticed him. Then an old crony spied him and said, in a friendly way, "Hello, Bide, going away someplace."

So let's pretend I haven't been. But here is an invitation—from Mr. & Mrs. F. D., Oakland, California—"Why don't you make a trip out here. You know many of our celebrities come here to finish their last days".

I wonder if I may defer my acceptance of that kind invitation for just a little while. I will need a little time to polish up my last words.

And I have been in California. I spent a long, long time in San Francisco. I had to. I was covering a Democratic convention. It was 1920—the year Governor Cox was nominated. That was one of the longest deadlocks the Democrats ever had. And they are good at deadlocks. They have had practice. Before that particular convention was over almost everybody got some votes. Will Rogers and Ring Lardner each got half a vote. But after that their strength weakened. I think Will Rogers would make a very good candidate for president. He writes a better newspaper column than Calvin Coolidge. I mean I like it better. And he makes just as good a speech. When he wants to Will Rogers can talk just like Calvin Coolidge. It is a swell imitation. It is even better than that. By now I would rather hear Rogers do Coolidge than have Calvin do it himself. Will Rogers has the New England dialect down just a shade better. He has a knack for that kind of thing.



I tried to break the deadlock out there in California when they were just sitting around voting and voting. I made what seemed to me a very good suggestion. I thought they ought to put the names of all the principal candidates in a hat and then blindfold a delegate and let him pick a name at random. But, of course, if he happened to pick Carter Glass that was not to go. In such an event they were to blindfold another delegate and draw all over again.

It wasn't any antipathy for California or San Francisco which made me want the deadlock broken. San Francisco is a very beautiful city—particularly when you look at it from the other side of the bay. But don't let anybody tell you that the Golden Gate is as beautiful as New York harbor. That is not a matter of opinion. It just isn't so. People in San Francisco have one great advantage over everybody else in the United States. They can choose their own climate. The city itself is very cold. At least it is cold whenever I get there and I am sure there is nothing personal in that. It makes me a little mournful to see the palm trees out there drooping their heads in the cold wind and trying to look tropical. I always thought somebody ought to start a fund to buy raccoon overcoats for the San Francisco palm trees. But if you don't like San Francisco you do not have to go back where you came from. Just a short ferry ride will take you to spots that are boiling. It has the spice of variety.

SAN FRANCISCO ought to be a separate free city all on its own. And there are a good many people in California (inside the city and out) who would be in favor of that. It was pretty free when I was there last in 1920. Some foreign group, and I think they were Hugo Slovakians, wanted the Democrats to put a plank in the platform. I am not quite sure what the plank about Hugo Slavia was to be. I guess they just wanted the Democrats to say they were in favor of it. And the Slavs used to give a dinner to the newspaper men every night—with speeches and native wines. But they made one mistake. The native wines came first. Of course all this is ten years ago—but even then I never could quite make

(*Continued on page 126*)

Will Rogers and His Stars

Horoscope of Will Rogers tells the story of his career

How the famous gum-chewing comedian got that way revealed by listening-in on a planetary conference

By Peggy Hull

HELLO, Everybody! This is Peggy Hull, press agent for the planets, broadcasting. I have just dug into the heavenly files, and I have discovered the world's most unusual horoscope.

As you may well believe, this horoscope belongs to the world's most unusual man. Not so long ago, Mr. Squibb, who makes us beautiful and also makes us well—with toothpaste, pellets and other things—paid him $500 a minute to make us laugh. And since his stage average is only two jokes a minute, and he talked not much faster on the air, it follows that he got $250 a joke from Mr. Squibb—which is a pretty good price for a joke.

The man I am talking about, of course, is Will Rogers.

If you would like to know why he gets all the breaks; why he can chew gum, the most egregious of all social errors, in the presence of the most passionate disciples of Emily Post; why he can dismember the English tongue with impunity and yet be proclaimed by professors and purists; why he can poke fun at kings and queens, presidents and even motion picture producers . . . and make them like it; why he can come out on the stage with a piece of rope and a mouth full of chewing gum, a disheveled head of hair and an ill-fitting suit and take the audience right away from youth, beauty, glamor and romance . . . if you want to know why he can do all these things, gather around and I'll tell you secrets hot off the Milky Way.

ON NOVEMBER 4th, 1879—mark well this date—the wail of a new born infant pierced the walls of the Rogers ranch house in Oklahoma and all the cow hands gathered around to congratulate the head of the Rogers family, and eventually to peek into the cradle of the future $500-a-minute jester. Oklahoma was then sparsely settled and the advent of babies was more uncommon than now, but even so, the red face and chubby hands of the latest addition to the Rogers family did not impress the assembled waddies with the notion that an epochal figure had been born.

THESE waddies, of course, were creatures of the earth. Had they been able to ascend into the upper regions and consult the records which have just been opened for my perusal, they would have tarried longer beside the infant's bed. For up in the azure blue, hidden snugly away in the mountains of the clouds, nine planets, Jupiter, Venus, Mars, Uranus, Neptune, Mercury, Saturn, the Sun and Moon, were assembled in the directors' room of the Bank of Earthly Fortune.

As usual, the Sun presided at the head of the table. Perhaps I should explain that the Sun is the giver of life and therefore, at this, as at all other gatherings, before and since—he has occupied the pre-eminent place.

Whether you believe it or not, the destinies of all earthly creatures are shaped by these nine heavenly dictators and sometimes, I am unhappy to report, acrimony, opposition and discord prevail—to the detriment of the mortal whose destiny is being shaped!

And on November 4th, 1879 it appeared that a most unpleasant session was about to begin.

"Come to order," said the Sun crisply. "We've got a birth in Oklahoma to dispose of—male child, Rogers by name."

"Just another squalling brat!" sai[d] belligerent Mars with his usual a[p]athy. "Let's give him a dirty deal [a]nd be done with it!"

Venus, the Goddess of Love, rais[ed] golden glance from her embroidery. "I suppose, with your usual taste for h[o]cide, you would like to dispatch thi[s] fant out of hand," she said in icy t[o]

"Tut, tut!" chided the Sun. "A [c]hild born in Oklahoma deserves a bi[g] Let's get together, ladies and gentle[men] for once in an eon of time, and give [the] boy a liberal drawing account on [our] limitless resources of luck."

"What's the use," protested the glo[omy] Saturn, oppressor of mankind, in a [sa]castic way, "He'll only overdraw [it]. Look what Mars did for Napoleon—[and] what came of it."

Behind his spade-like beard, the [face] of the war god grew red. He had [been] touched in a tender spot.

"If you had kept your hands off [him], he'd been all right," he growled. "[You] tore him down, you cold and clam[my] fish!"

"Well, no matter," said the Sun, pa[ter]ically, "what are we going to do ab[out] the Rogers infant? Venus seems [well] disposed toward him, suppose we let [her] make the first suggestion."

A TEAR dropped from [her] golden eyes and fell upon the love g[od]dess' embroidery. "Alas," she sigh[ed]. "I am all out of sex appeal. I gave [the] last of my present store to Francis [X.] Bushman."

"That certainly is tough," said [the] Sun, "But if my memory serves me, y[ou] are now in the House of Virgo?"

"But only in a companionate way," Venus acknowledged, with a faint no

gravation in her dulcet voice.
be sure," the Sun admitted, "but
tuation is just what I had in mind.
ay not be able to give him the
tic allure of your masterpiece, the
mented Casanova, but why don't
to the other extreme and make
one-woman man, with a clean sense
nor and a distaste for the risqué."

ke him know things he has
er studied," Uranus con-
ued ignoring her. "He will
e quick wit and nobody—
iticians included—will ever
able to fool him."
Mars grunted in deep dis-
ite. "Surrounded by all that
eetness and light," he said,
e ought to achieve fame as a
former. Permit me to give
n just a single vice. He'll
so much easier for the one
oman to live with."
"Such as what?" inquired the
n, without enthusiasm.
"Chewing tobacco," responded
ars. "I am now residing in
e House of Taurus, the sign
the Bull. And I insist on
causing this paragon to masticate a cud."
"Does it need to be tobacco?" protested the sedate Moon, who, besides Venus, was the only other female present.

"NO IT doesn't," Mars conceded. "Let him chew gum!" And the war god lapsed into a disgusted silence.

While Mars remained in seclusion behind his beard, the other directors of the Bank of Earthly Fortunes continued enthusiastically to add to young Rogers' drawing account. The young man who priced his jokes at $250 a funny crack and who has just sold himself to the movies for $25,000 a week, is not, due to the protection of Venus, a prey of gossip as you have recently had cause to observe.

When Clara Bow, upon whom the love goddess lavished generous quantities of love appeal, made the front pages of the newspapers with the story of a betting escapade in a Reno gambling resort, it developed that Mr. Rogers had headed the party which had patronized the palace of chance.

Alas, the poor little "it" girl of the movies, whom Venus made profligate as well as personable, gambled not wisely but too well, and the fans gossiped for a week about a $19,000 rubber check.

But did they criticize Mr. Rogers? They did not. The beneficence of Mercury, happily posited in the honest, jovial sign of Sagittarius, assisted him to meet this vexatious situation with candor, discretion and a keen sense of proportion, whereas a less level-headed man might have taken fright at the prospects of adverse publicity and retreated to an untenable refuge in evasions.

Rogers admitted frankly that he had gone with Miss Bow and a party to the casino—and what of it? And, indeed, what of it?

SUCH, however, is the influence of the stars. Many public men have suffered severe setbacks for an equally innocent adventure. It all depends upon where the heavenly bodies were at the moment of birth.

Mr. Rogers' consistent and unchanging popularity is due to the position of Mercury in Sagittarius. This planet, curiously enough, has occupied practically the same position nearly all of his life and together with the stabilizing influence of Saturn, kept the Rogers' fortune on an even keel.

There have been no ups and downs in Will's career. No periods of spasmodic popularity which so many actors and humorists experience.

His Mercury, directing his intellect through the jovial Sagittarius, is responsible for the homely philosophy with which his writings are replete. This position has safeguarded his pointed jokes from the sarcasm and sting which the House of Scorpio would have given them.

Saturn in Aries, and Jupiter in Pisces, square to Mercury, is responsible for the untidy appearance, the disheveled hair and the homely face. But what the stars denied him in physical beauty they made up in beauty of soul and mind.

Will Rogers in a characteristic pose—easy-going, good humored and shrewd

Tuneful Topics

"Know Your Songs"

Body and Soul

THIS is perhaps the most unusual song in months, or possibly in years. Unusual not only from its very daring title but in its thought, melody and history.

When I used to play at the Westchester-Biltmore Country Club while still a student at Yale, there was a very persistent young man who seemed to enjoy watching our pianist play, and who, we found later, was the scion of a wealthy family living at Rye, and who was in certain respects a protege of George Gershwin. This young man, Johnny Green, later wrote with Carmen Lombardo, of the Lombardo Brothers orchestra, and another young man, a tune which enjoyed quite a bit of popularity. You may remember the title, it was called *Coquette*. A short time ago he was commissioned to write a song for Gertrude Lawrence to sing in England.

Together with Ed Hymann, a young man who wrote the lyrics of one of the songs in my picture, *The Vagabond Lover*, he evolved a melody which they subsequently called *Body and Soul*. Miss Lawrence proceeded to sing the song in England and there it became sensational. My observations from playing in London have led me to believe that the English people have an appreciation for a song with a very sophisticated thought and a very sophisticated lyric, but when shown the song here in America I was afraid of it, because its melody was very intricate and the lyric was possibly just a bit too daring and suggestive. I rejected it, at least for my own presentation of it, in its original state.

There are three key changes; it begins in C, goes into G, and then goes into D flat and back again to C. Such key changes are very difficult for the layman to make or follow, yet I realized that the song was a beautiful one to listen to. The song is also quite rangey, going from an extremely difficult note to reach—low D—to E natural. But when properly rendered, these beautiful contrasts make the song more lovely.

The publishers made a tamer version of the lyrics and offered it to Libby Holman to sing in the new musical comedy, *Three's a Crowd*. Yet it seemed that the revised lyrics did not get the song over, at least in the musical comedy presentation of it, so Miss Holman, I believe, is singing the original version which is much smarter but much more physical.

THE EDITORS of RADIO DIGEST *have persuaded Rudy Vallee, the famous Radio star, to conduct this department. In it, each month, he will pick ten selections of popular music which seem most meritorious to him and tell in each case, various points of interest regarding the authorship, public debut, history and unusual characteristics of lyric or melody. If the number is featured by the Connecticut Yankees, Mr. Vallee will give incidents coming within his personal experience.*

RUDY'S reputation is in no small way attributable to his remarkable ability to pick winners —whether they be old or new numbers . . . hence RADIO DIGEST *readers should find this department a very valuable and interesting guide to their selection of music in sheet, record, roll or other forms.*

The song grips the listener as he hears it, although I doubt very much whether it will sell tremendously in sheet music form due to its complicated nature. It is a beautiful thing and a song that I enjoy doing tremendously.

Body and Soul must be played s to the extreme, about twenty-si twenty-eight measures per minut order that the lyrics be pronounced ligibly, and that the melody doe suffer from jerkiness.

Embraceable You from *Girl Cra*

HERE are George Gershwin an brother at their best. A very song, and for me the most likeable of all the songs from *Girl Crazy*, the in which are featured Ginger R Ethel Merman and so many othe cellent artists. Typically a musical edy type of song, but one whic smart set of New York and other of any size will enjoy dancing t singing. *Embraceable You* may be p either in strict fox trot tempo, fif measures a minute; or the tune c played slowly—even at forty measu and still be danced to and sung.

My Baby Just Cares for Me

WALTER DONALDSON aga his best. Following close o heels of his tremendous success, *White Lies*, he has given a rolli rhythmical song to Eddie Cantor fo motion picture version with sound technicolor of *Whoopee*. While not ical of the style of song that Eddie tor usually sings, it fits him admi and he does justice to it. It is rep several times in the picture and ma great dance tune, as does *Embrac You*. Like the latter it may be play strict fox trot time, or semi-slowly

It is a number that my drummer justice to, as I rarely do the slang of number, although I feel they ar tirely within my province. Dona seems to excel in this type of nu ——he wrote *Yes Sir, That's My L*

How Are You Tonight in Hawai

HERE is a song with a title sounds like a "gag," ("gag" ing a theatrical wisecrack dependin double entendre or facetiousness). is a most charming tune, the music

By

Rudy Vallee

A New Department in which The Master of Rhythm Tells You How Hits Should Be Rendered

The Author . . . Rudy Vallee.

r en by Harry Warren who has given
) many wonderful tunes, especially
g for the Carolines, and the lyrics
written by Edgar Leslie, one of the
great lyric writers who writes with
igence and thought, perhaps a little
much so at times.
would seem in this case that the gag
e of the title must have hurt the
because I certainly would have
d it for a hit. The verse thought
e lover being miles away from his
one who is in Hawaii, and carrying
the picture of her in his mind; the
is asks her how she is in Hawaii,
goes on to tell you how he misses her.
I say, I felt that the tune should
achieved a phenomenal success, yet
publishers tell me that it has done
or nothing. This is certainly one
ration of the fact that I cannot
e" a song popular if it doesn't catch
popular fancy. Strangely enough,
Are You Tonight in Hawaii has
d to catch on. Just another mystery.

Baby's Birthday Party

ERE is a song which I was a little
afraid of as regards my own ren-
n, inasmuch as it is a sort of cross
een a nursery rhyme, a *Mother Goose*
e, an *Aesop Fable*, a doll dance, and
. The melody is reminiscent of *Nola*
the lyric is a combination of the
said ideas. I am at a loss to know
her *Baby* is a beautiful blond flap-
or whether she is in reality just a
tot for whom the fond parents are
g a birthday party.
e song has no trace whatsoever of
eurishness about it, and yet it was
en by a Miss Ann Ronell and it was
irst song she has ever had published!
so many thousands of persons who
ve they can write songs, she finally
eeded in getting a publisher to listen
he song. The head of the firm in
her room, hearing the song liked it
ediately, snapped it up and allowed
Lombardo and myself the privilege
troducing it on our respective rival
io chains.
have been surprised at the many requests to sing it that have been shouted at me by big, able-bodied men at various functions at which I have appeared in the last few days. On my flying trip to Washington, a big, football type of man yelled up eagerly for *Baby's Birthday Party*.

I have already asked Victor to permit me to record it because I believe that the song is going to be intensely popular with all ages and types. Miss Ronell is certainly to be congratulated; the song is worthy of any of the old veterans of Tin Pan Alley.*

It must be done slowly, about thirty measures per minute.

You Were Only Passing Time With Me

A CLEVER song written by a young colored boy who is one of the staff writers for a dear old friend of mine, Joe Davis. Joe has published many hits in the past and I think he has a sizeable one here in this extremely tuneful and lilting song, *You Were Only Passing Time With Me*.

It must be done slowly. We do it at about thirty-five or forty measures per minute.

I'll Be Blue Just Thinking of You

ANOTHER one of those songs that sounds like a gag, with a continued reiteration of the line "From Now On." It is a song that attracted me the first time I heard Ozzie Nelson sing it the night I visited him at the Glen Island Casino.

Two masters cooperated in the writing of it—Gus Kahn, unquestionably the greatest lyric writer Tin Pan Alley, or the world for that matter, has ever known; and Pete Wendling who, for the last fifteen years, has been writing very tuneful melodies. These two have given us this very catchy song which should be played about forty measures per minute in order that one particular place in the lyrics be intelligible. I have often said that like a chain being no stronger than its weakest link, the tempo of a song is governed by the particular place in the song which has the greatest number of words.

Obviously, in order to get all these words in, and get them in intelligibly, the whole song must be slowed down, otherwise the words become a mere jumbled mass of meaningless hieroglyphics. The difficult place in *I'll Be Blue Just Thinking of You* is "But the memory of your smile just makes me want to cry." Now try singing this fast and you will see what I mean.

If I Could Be With You One Hour Tonight

LIKE *Body and Soul* this is one of those odd songs that time and place cannot keep down. I have always maintained that a good song will eventually crash through, and my theory is certainly borne out in the case of this particular song.

It was written by Henry Creamer and Jimmy Johnson and published by Remick in 1926, that is four years ago. Creamer has been very popular in the writing of Negro musical comedies and musical affairs in general for many years. After the publication of the song by Remick, it did little or nothing and remained on the shelf very much as did the *Stein Song*, until several months ago, about July, 1930, to be exact, when one of the finest colored bands now playing, or one of the finest bands in the country for that matter, Mackinney's Cotton Pickers, at their wits' end for a tune to be recorded at an emergency recording date, yanked out an old copy of this song, made a quick orchestration and put it through.

The demand for the record was so great, and it in turn stimulated the desire of other orchestra leaders to play the tune after they heard the record, that Remick was forced to reissue the song

(*Continued on page 119*)

* Slang expression for the music publishing center in New York.

War Ace Eddie Rickenbacker Says "Hello, Ther

RADIO listeners who tuned in early one morning recently had the thrill of listening to a two-way conversation carried on between the United States and Australia. The broadcast was arranged in order that America might congratulate Wing Commander Kingsford-Smith on his flight from Croydon, England, to Sydney, Australia, a distance of 12,000 miles in less than ten days.

The dialogue was as clear to those tuned in on the NBC network as a telephone conversation, although the ether waves went more than halfway around the world. Participants were Martin P. Rice, of the General Electric Company, Schenectady, Captain Eddie Rickenbacker in New York, and Commander Kingsford-Smith in Australia. Here's what they said:

Mr. Rice: Good morning, Wing Commander Kingsford-Smith (*normal* v

Kingsford-Smith: Hello.

Mr. Rice: This is Martin Ric Schenectady.

Kingsford-Smith: Yes, Mr. Ric remember well.

Mr. Rice: I am sitting in the chair you talked from when you t to Australia.

Kingsford-Smith: Well, I will forget that. My mother was so th about it, you know.

Mr. Rice: Well, I want to give yo behalf of the whole people of the U States the most hearty congratulat Everyone is thrilled to know of great accomplishments.

Kingsford-Smith: Thank you much indeed.

Mr. Rice: Was this plane that flew, the Southern Cross Junior, similar to the other one?

Kingsford-Smith: No, the Sout Cross Junior is a light airplane. low horsepower, just a four-cylinde gine. It is in the class of sport fl you really might call it. It is really a sort of sport proposition. Hard commercial job at all.

Mr. Rice: How many miles did fly altogether?

Kingsford-Smith: If you count trip to Sydney it is about 12,000 m The actual mileage to the coast Australia, it is about 100 miles 10,000 miles.

Mr. Rice: And you did that in than ten days?

Kingsford-Smith: Actual time, co ing the difference of time between Lo and Australia, it was nine days twe one and one-half hours.

Mr. Rice: Did you find it at s points more dangerous than others?

Kingsford-Smith: Not so very gerous, except for the water cross which seemed a little unfamiliar to with one engine instead of three, know. There wasn't a great deal danger in it but was very strenu however.

Mr. Rice: What would you think passenger service over that line?

Kingsford-Smith: I think we will that in, say, five to ten years' time.

Mr. Rice: That is very interest Would that be a large plane, do you th or a small one?

Kingsford-Smith: I imagine it wo start by being just a mail plane carry

Captain Eddie Rickenbacker, war ace, is in the business of transport flying today

Australia!" *Via Radio to Commander Kingsford-Smith*

passengers and eventually develop into pretty big passenger service.

Mr. Rice: What do you think we need ost in work of that kind? What would the next step in the progress of devel- ing the airplane for that type of work?

Kingsford-Smith: A faster type of ine.

Mr. Rice: Now we are going to let you k with another good friend of yours, ptain Rickenbacker.

Kingsford-Smith: Yes, an old pal of ne.

Mr. Rice: We will ask Captain Rick- backer to say a few words.

Capt. Rickenbacker: Hello, Smitty.

Kingsford-Smith: Hello, Eddie.

Capt. Rickenbacker: Awfully glad to ar your voice.

Kingsford-Smith: Awfully glad to hear m you.

Capt. Rickenbacker: It seems a long ys off.

Kingsford-Smith: The reception is ex- ordinarily good, isn't it?

Capt. Rickenbacker: Splendid. The only trouble with you is that you e getting ready to go to bed and I had get out of bed to come over here to lk to you.

Kingsford-Smith: Perfectly true. It is n minutes past eleven o'clock at night, u know.

Capt. Rickenbacker: Well, I got up five-thirty this morning in order to be time, because I wouldn't have missed if I had had to stay up all night.

Kingsford-Smith: Awfully glad to hear ur voice.

Capt. Rickenbacker: Congratulations the wonderful flight. I have been atching every detail of it.

Kingsford-Smith: It was just a little t of hard work.

Capt. Rickenbacker: Yes, but I'll bet ur ears are tuned into the motor noises ore than when you came in this direc- on?

Kingsford-Smith: Oh, I don't know.

Capt. Rickenbacker: But I can im- gine your feelings and tenseness when u were crossing those jungles. You uldn't make such a big mouthful for me of those alligators down there, but hat there is, is mighty good and we all ppreciate it over here.

Kingsford-Smith: Will you send a per- nal message to Slim Lindbergh for me?

Capt. Rickenbacker: I will be very appy to.

Kingsford-Smith: Tell him that it will not be very long before I will be enter- ing into the same state that he is in. I am going to be married in a very few weeks from now.

Capt. Rickenbacker: Well, you know, you have everybody's hearty congratula- tions, and personally I could only wish for you what I could wish for myself.

Kingsford-Smith: Thank you, old man. We may both come over later.

Capt. Rickenbacker: I tell you, you had better be careful. You know, there are a lot of handsome aviators over here. I suppose you have some there too. We have seen one of them whom we kind of like. Say Smitty, tell me, if you were going to open up a service between Aus- tralia and the United States, which way would you consider it the easiest, East or West?

Kingsford-Smith: You mean across the Pacific or around the other side?

(*Continued on page 114*)

Wing Commander Kingsford-Smith, veteran of flights across the Pacific and from England to Australia

"You is de brudder what draws a seven."

Hawkins and the Missus Go to See

AMOS and ANDY

This Peterburg Couple Just Couldn't Wait, So They Travel Far to See "Check and Double Check"

DEAR EDITOR.

I received your letter thanking me for sending you the poem that you couldn't use. It was very nice of you to write to me about it. I hope I have better luck with the next poem that I write. I really should say the next poem that the Missus and I write, because we always work together on things like that.

The Missus and I get along very well together, even after ten years of marriage. We don't have any of the squabbles other married couples seem to be always having. We "gee" together on everything. We like the same Radio programs, and all. We're both daffy about Amos 'n' Andy. I have heard that in some homes the men like Amos 'n' Andy, but that their wives don't, and vice versa. But not so in our home.

The fact of the matter is, as the lawyers say, we must have been the first people in town to become regular listeners to Amos 'n' Andy when they first started broadcasting. And we told the folks next door and they told some others and the next thing we knew Amos 'n' Andy were the rage of Peterburg, and everybody was going around speaking about "propolitions", and saying "I'se regusted" and all the other famous Amos 'n' Andy words.

When we heard that Amos 'n' Andy were going to make a motion picture, why the Missus and I just couldn't wait until we should get a chance to see it. The Peterburg movie promised that they would have it as soon as it was finished, but the Missus and I just couldn't wait. When we heard that t picture was to be shown New York, why, we ma up our minds that we wou go there and see it, a again be the first in tow to tell folks about Amos Andy.

Well, down to New Yo we went, the night the pi ture opened. We got o the train and asked a taxi driver to tak us straight to the Mayfair Theater befo we even went to a hotel. But we couldn get into the theater the first night. W learned they weren't selling any ticke and that the first show was only for folk having gold-plated passes and New Yor celebrities, and not for folks who wante to buy tickets and tell their friends abou the picture.

BUT the next day was different. The fans could get in.

Say, a visit to New York's newes movie palace, alone, was well worth th

p. And we had plenty of time to see w beautiful the theater really is, be- use we had to stand in line in the lobby r more than half-an-hour before we uld even get inside, that's how big the owd was that also wanted to see Amos Andy.

We finally got inside the theater, only e Missus and I decided we wouldn't ok at the picture in the middle, but it until we could see it from the be- nning. So all we heard was people ughing like they were lunatick and that ly made us more anxious to get seated d see. Well, we finally got two seats nd of far back. Then they had a news- el and a short comedy, and then, at st, Amos 'n' Andy, in their *Check and ouble Check*. You know Andy, over e Radio used always to be saying heck and double check".

The picture opens with the Heroine id the man who turns out to be the llain of the picture, out horseback rid- g, and something goes wrong with her ddle. They start walking home to- ther, with the Villain, played by Ralfe aroide, making love to the beautiful eroine, played by Sue Carol, who is ally very beautiful. In the picture eir names are Ralph Crawford and an Blair. (I guess I had better call em by their play names.)

CRAWFORD is very velled up on himself and can't under- and why Jean won't have anything to with him. Jean tells Crawford that e is waiting the arrival of Richard Wil- ms (played by Charles Morton), from e South, and that er mother and dad ve gone to the sta- on to meet this here ichard.

Well, Jean and rawford go walking long, when, Zoop! a xi passes them and scares Crawford's horse. Crawford, being a very mean fellow starts to wallop the horse. The taxi hauls up and a young, handsome, smiling fellow hops out, apologizes for the taxi scaring the horse, although his apology wasn't at all necessary as it wasn't his fault at all.

Crawford doesn't want to talk about it and says, "Come along Jean." Whereupon the young fellow in the taxi asks, "What? are you Jean Blair?" And then he springs the big surprise that he is none other than Mr. Richard Williams. You can see that it's a case of love at first sight between Jean and Richard. The Missus and I did, anyway. Well, Crawford, of course, takes an immediate dislike to Richard, and hates him even more when he suggests that Jean ride home with him in the taxi leaving Crawford to walk with both horses. Then comes what we traveled so far to see.

The scene shifts to the office of the Fresh Air Taxicab Company, Incorpulated, in Harlem. In front of the door is the old battered fresh air taxi, and through the dirty window we could see Amos 'n' Andy just like you hear them. The camera moves inside.

There we see Andy just the same as on the Radio with his feet on the desk and Amos hard at work trying to fix a bum old innertube. They are talking about the lodge meeting of the Mystic Knights of the Sea and after the lodge they are going to a dance with Madame Queen and Ruby Taylor. Andy is very insistent about hiring a dress suit for the occasion. It was terribly funny. Oh my, Oh my, Oh!

Then the 'phone bell rings and Amos wants to answer it.

"Get away from that 'phone," says Andy. "Hello," he growls in his gruff voice. "Who? Oh, Madame Queen?" Then his voice changed soft and silly and the audience just roared when Andy says, "Yes dis is yo Ducky-Wucky."

Then Amos says sarcastically, "Old Ducky-Wucky."

WELL, Madame Queen wants to make sure she and Ruby are going to the dance that night, and after Andy yeses her, Amos asks to speak to Ruby, and that gets to be a scream. The Missus and I just laughed and snorted.

You see Amos starts talking. "Hello, honey, this is Amos . . ." and Andy says under his breath, "with the egg-shaped head." And Amos goes right on saying to Ruby, "with the egg-shaped head." Then he says, "No, no, honey, I didn't mean you . . ." and Andy cuts in again by saying, "the gal with the big feet." He just goes on getting Amos so bawled up that he is calling Ruby "big fathead" and everything when he means to call it to Andy and telling Ruby to shut up when he wants Andy to shut up. I thought everybody would go into hysterics. The Missus just screamed. Well, he finally gets it all straightened out, and then gets very blue again.

In the story Amos and Andy are supposed to have come to Harlem from the South where they both worked for a Mr. Williams who really turns out to have been the father of Richard Williams, but I guess I am getting ahead of the story. Anyway Amos is wishing he was back in the South with Mr. Williams.

(*Continued on page 118*)

"Hello, Honey, is dat you?"

"With de big feet?"

Broadcasting from

The Second Decade

LAST month, Radio broadcasting on a program basis completed its first decade. Station KDKA of Pittsburgh holds the distinction of having been the pioneer. Since 1920 a gigantic industry of tremendous world wide influence has been reared. The technical progress in both broadcasting and reception constitutes one of the greatest scientific achievements of the age. Head sets have come and gone. Exterior aerials are becoming less and less essential. Battery problems have been largely eliminated. Static has been stifled though not entirely suppressed. Progress on the artistic side of Radio programs has been universally recognized as marvelous. Today, the most important personages in virtually every line of endeavor and the most outstanding events of every type are brought before the public via the microphone. "Talent" which could never be paid to appear on the stage or in moving pictures of the drama type is brought before the people through the theatre of the air: President Hoover, King George, Colonel Lindbergh are typical examples of "Talent without price." Radio has become part of education and governmen

The early inventors and experimenters in wireless telegr phy and in Radio broadcasting fell so far short in their pro nostications of what Radio would bring within a deca that we feel little hesitation in expressing the belief th few, if any, people in the world today realize what the ne decade of Radio broadcasting will bring. Television on practical home entertainment basis is already in the offin The financial success of Radio broadcasting has been estal lished with quite a percentage of the commercial statio and the growing popularity of sponsored programs presag not only the financial success of broadcasting, but the rapi and important improvements which occur in any industr operating on a profitable, as distinguished from an "ar geled" basis.

RADIO has already accomplished so much that it is some what difficult to visualize just where the most radica changes will grow in the next decade. We venture, how ever, to predict that they will be more social in nature tha technical or artistic though these latter phases show im mense improvements, often in entirely new directions. I an editorial published in November the New York *Time* said: "In its mass appeal we have the real significance Radio. Mounting sales, princely incomes of entertainers— what are these compared with the triumph of uniting alie peoples in an hour of spiritual brotherhood? A new forc has been discovered—a social force which must be reckone with in the onward sweep of civilization, and which i second only to the printing press in its far-reaching in fluence."

In an editorial published in the September issue of thi magazine entitled "Radio Can Kill War" we proposed number of definite methods whereby Radio can be em ployed to develop good will among the people of the nation located in every part of the world and we discussed at th same time how Radio can be used simultaneously to develo universal anti-war psychology. Many of the suggestion made in this editorial are already being carried out an there is every indication that the movement will be materi ally accelerated within less than a year.

In an editorial in the October issue of this magazine en titled "Radio Is Destroying Old Social Barriers," we pointed out how the so-called "country brethren" are being brought into intimate contact with those people, those events and that knowledge which has long been considered the exclusive province of the socially elite when society standards are founded primarily upon wealth. We indicated that Radio is steadily fostering a new conception of social aristocracy and is, in fact, augmenting the national and international average of intelligence and culture with a speed and breadth of influence heretofore unknown.

The Editor's Chair

In commemorating the tenth anniversary of Radio broadcasting and in paying homage to its miraculous accomplishments during the period of youth, we reiterate our belief that the future trend will not be so much to revolutionary mechanical and artistic developments as toward the development of new types of economic, political, religious and social thinking—all of which will be international in scope.

Radio vs. Rackets

IN LAST month's issue of Radio Digest Grover Whalen, the famous ex-police commissioner of the City of New York, presented many facts regarding how Radio is being used to detect and apprehend criminals. He also stated that overtures to bribe and threats had been made to individuals who were broadcasting data about the use of Radio to track down violators of the law.

Within the last few years an evil, not entirely new in nature, has beset the business and political life of America to an extent never before dreamed possible. Even judges have been drawn into the mire of modern racketeering and conditions have now reached such a point in many of our largest metropolitan centers that the very foundations of our Constitution are menaced. Something must be done soon or the respectable elements will be driven into a subordinate position not only in business and in politics, but in every-day living. Unfortunately, so few people are wholly or even partially conscious of the far reaching extent of modern rackets that they are sitting idly in a state of so-called blissful ignorance.

Something must be done to arouse the public from its lethargy. Nothing of importance can or will be done until the public at large becomes emotionally excited. The responsibility to save America from its latest and most insidious parasite, the racketeer, is squarely up to the press and to Radio. Thus far the press as a whole has been sadly lacking in initiative, courage and thoroughness. Radio has been no better. The objective is not one for rivalry between the two mediums. It is very definitely one for cooperative effort along all possible lines. But in the exposé and driving out of rackets and racketeers the press and Radio can serve themselves and the public best by being good pacemakers for each other.

Who today, for instance, is publishing or broadcasting the facts regarding the toll which is being paid by many gasoline filling stations to racketeers, a toll which generally amounts to $2.00 per week per man and which is paid only for threat of murder, arson or physical damage to private property? Who is publishing facts about the similar rackets which have invaded the miniature golf course industry, and who is fighting against the toll which is paid by retail store merchants in so many cities for racketeer protection against having their glass store fronts broken by "rowdies"?

These are minor samples of the type of racketeering which is invading almost every line of business, and which is involving political office holders of low and high rank, and which in certain communities is rotting our most important bulwark of equity and justice—the American judicial system. The time for passiveness is past. The time for enlightening the public is here. Only an uprising of public sentiment can destroy the vicious monster who masquerades under the somewhat dramatic role of "The Racketeer".

Here's hoping that Radio can and will perform heroically and successfully, though unarmed, against an enemy who is armed not only with drugged liquor, kidnapping accomplices, masters of blackmail and pugilists wearing brass knuckles, but who is also fully armed and ready to fire with the very latest models of automatic pistols "dressed up lemons" (bombs) and machine guns mounted in armored cars. Radio, in the right, is mightier than might.

RAY BILL

John Garland

Sensitive Mary Cressley, in Love with John Garland, Coarse Landlord. But the Man who Kissed her Once

By
E. Phillips
Oppenheim

Illustrations by W. M. Stockton

The Story This Far.

A ROCKET lit a flaming streak in the darkness, and the village people on shore gasped at their last glimpse of the Southampton bound liner as she split in two on the reefs outside the little fishing port. The last of the survivors to reach shore was a tall, handsome man, John Garland, who was hailed by the other survivors as leader and courageous rescuer.

Two hundred souls had been brought, half-drowned, from the wreck, and the small hamlet, with a population of but seventy, had been hard put to find beds for them all. The clergyman in charge of the rescuing party almost despaired of finding a bed for this last refugee, when Mary Cressley, slim and frail, battled her way along the jetty and offered to give warmth and cheer to some one . . . a woman or a child . . . for she liv all alone and was a timid soul. H with the sanction of the minister, and a time of dire need, she could not refu shelter and a warm fire to the strang despite his unkempt beard and wild pearance.

So John Garland walked through t storm by Mary Cressley's side, to h tiny cottage. In the dark he thoug her a little old lady, but when the fi light lit her face, he realized she was n more than thirty or thirty-five . . . a he recognized her as the little Cressl girl, daughter of the old minister. I even remembered kissing her when had seen her in their childhood days b

The Deliverer

aced with Eviction Unless She Marries her Red-faced, one Away Again Without a Word . . . and She is Destitute.

A great motor-car had swung up to the door. A man, head and shoulders taller than most of them, pushed his way into the auction room.

ore he left home for a long journey. Morning and a shave revealed a hand-ome man to the surprised eyes of the imid little Englishwoman. Three days assed . . . then four, but the ship-wrecked stranger made no move to depart. Gradually the hamlet was being emptied of its unusual crowds, then suddenly Miss Cressley awoke to the fact that she hated the thought of the young man's leaving! Perhaps . . . well, she was a young woman still . . . she rearranged her hair after the fashion of her youthful days and clad herself in a slim, pale dress. When she appeared, smiling shyly, he looked at her in amazement and exclaimed:

"Why you grow younger every day. If I could only do the same, you might remember the farmer's son as well as I remember the minister's daughter!" He gazed down at her questioningly.

Conclusion

SHE started. Then a wave of recollection came to her. There had always seemed something familiar about his tone and manner.

"Why," she gasped, "you are John Garland—John who ran away from home!"

He smiled.

"I kissed you once, Mary," he said, "up the lane there."

She blushed furiously.

"I do not remember it," she said, mendaciously—a statement which was scarcely likely to be true, considering that it was the only embrace to which she had ever submitted.

"I'd like—" he began, and stopped. She was stooping over her roses.

"You have been away a long time," she said, softly.

"A long time," he repeated. "Everyone seems to be dead and gone. I am afraid I shall find the old country a lonely place."

"Luncheon is ready," she said. "Shall we go in?"

Afterwards he produced the telegram.

"This afternoon," he said, calmly, "I must go."

She caught at her breath. She could not keep the frightened look from her eyes, but she was able to control her tone.

"Isn't it a little sudden?" she asked.

He nodded gloomily.

"I'm a man of affairs now," he said, "and I'm wanted."

SHE saw him off. She scarcely heard his farewell words. Every faculty she possessed was devoted to the desperate effort of preserving her secret. She saw him go, felt the touch of his fingers, heard the sound of his kindly voice, and turned away a little abruptly, just in time to hide the blinding tears. Then she walked back to her cottage, seeing no one, walking like one stumbling through a dream. It was very quiet, very peaceful, there. The smell of tobacco still lingered about her tiny hall. There was nothing else. Her knees shook as she fled up the stairs to her room.

Tragedy that year came not only from

the sea, but from the land, to the little village of Pargeth. Dinneford's bank failed in the neighboring town, and half the village lost their savings. Mary Cressley lost more. She lost everything. When the winter came, and the worst was known, she found herself face to face with ruin.

She went to her landlord, a red-faced, sporting solicitor of bibulous habits. She had known him all her life, and hated him. He had been expecting her visit, and received her a little grimly in his bare, untidy office.

He interrupted her timid explanations.

"I KNOW all about it, Mary Cressley," he said. "Your money is lost — Dinneford's will never pay a farthing—and you can't pay your rent, eh?"

"Not just yet," she admitted.

"Not just yet or ever," he interrupted. "How should you pay it? You've got nothing."

"I was going to ask you to wait for a little time, and I would try and get some lodgers," she said.

He laughed scornfully.

"You'd get no one before the summer," he said; "and how do you suppose you're going to live and pay your rent out of boarders?"

"I can't think of anything else," she said, desperately.

"I can," he answered. "You must do what you'd have done years ago if you'd been a sensible woman—marry me!"

She rose at once to her feet.

"That," she declared, "is impossible."

"Is it?" he answered. "Well, then, it's also impossible for me to wait for my rent. I'll give you a week."

She went away without a word. For three days she hesitated. Then she sat down and wrote to John Garland. He had spoken truthfully when he said that he had become a man of affairs. His name was everywhere in the papers lately—the new colonial millionaire, the owner of gold-mines and townships. Pargeth, it seemed, had entertained a Prince in disguise.

She wrote the letter, and as soon as she had finished it she tore it up. Her head was buried in her arms.

"I can't!" she moaned. "I can't!"

Then legal documents came to terrify her. A man made an inventory of all she possessed—a man who handled her precious pieces of china as though they had been jam-pots, and even counted her household linen. The terror came again! She thought of the workhouse—the cold, grey building on the hillside—its bare rooms, the long-drawn-out days of agony. Again she wrote to John Garland. This time she would have posted the letter, but Fate sent in her way a newspaper.

"You must do what you'd have done years ago if you'd been a sensible woman—marry me! I can't wait for my rent."

She learned that he had purchased a great country estate, and announced his intention of marrying. The name of the lady was mentioned—the daughter of a poverty-stricken peer, a reigning beauty for several seasons.

Mary tore up her letter and went down to look at the sea. If only she had the courage!

Her landlord, Peter Sewell, came once more—the night before the sale. He was flushed, and he smelt of drink. He talked in a loud voice, and he had a good deal to say about her folly. In the end she turned him out of the house. It was her last luxury, and she enjoyed it.

There were barely a score of people at the sale. Amongst them was the vicar, flushed and anxious, with a little list in his hand which he kept consoling. When the auctioneer mounted his chair the vicar for a moment intervened.

"May I," he said, turning to face the few people, "say just one word?. You all know the painful circumstances under which this sale has become necessary. You all know very well our dear friend, Miss Mary Cressley. A few of us have subscribed to buy her furniture, and thus keep a home for her amongst us until the spring. Pargeth, unfortunately, is not a rich place, and the sum which we have been able to collect is, after a very small. But I should like you all know that when I bid, I bid for those w wish to return to this dear lady her f household goods."

There was a sympathetic murmur fro the bystanders, a nod of approval fro the auctioneer, and a growl from Sewe A red-faced lady, who kept the ir turned indignantly towards him.

"What I say is, let the poor lady ke her bits and bobs of furniture!" she e claimed. "Who'd be the better off f them, I should like to know? And wha a matter of a bit of rent behind, e Hasn't she lived here respectable, a paid her way, all her life? Shame them as is pressing her like this, I say

Sewell turned upon them all a litt fiercely.

"Look here," he said, "there's be enough of this sentimental rot. Th is a business meeting. Get on wi the sale, Cob If any of y think you' going to indul in a little che charity, you' wrong. I here to bu myself. No then, Cobb."

The sale pr ceeded. The vicar b timidly for the first fe lots. Sewell scornful outbid him and secur them. Then there w a commotion outside. A great motor-c had swung up to the door. A man, hea and shoulders taller than most of then pushed his way in.

"What the devil's the meaning of this? he exclaimed, looking around.

The vicar recognized the new-com and scented a friend. He ignored th expletive. In a few words he made th situation clear.

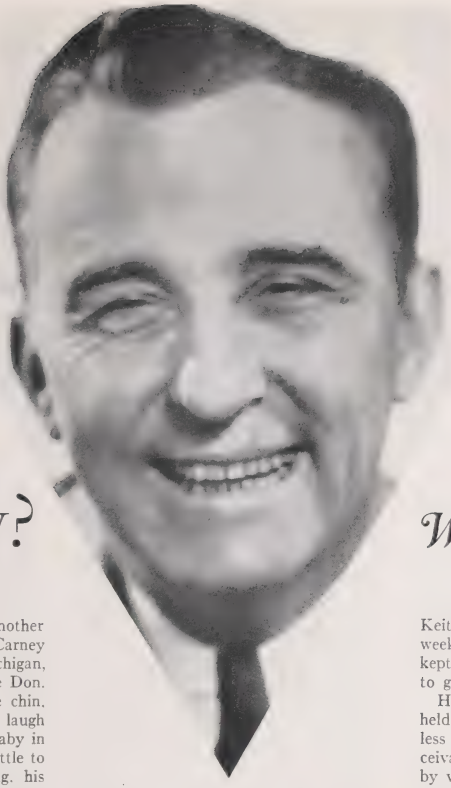
"Right!" John Garland said, leanin his back against the wall. "You can lea the bidding to me, vicar. I'll take hand in this."

Sewell glared across the room.

"Cobb," he said, turning to the au tioneer, "remember this is a cash affai You can't take bids from strangers wit out the money."

JOHN GARLAND laughe dryly, though there was little sign o humour in his face.

"My name is John Garland," he sai "I've a thousand pounds in my pocke a few hundred thousands in the ban and a few millions behind that. Like t examine these notes, Mr. Auctioneer? he added, holding a packet out to hin



The auctioneer waved them away.

"Quite satisfactory, Mr. Garland," h said.

"Go on with the sale," Sewell shoute

Who Is Don Carney?

A Million Kids Know Him as Uncle and Listen When He Speaks

By Fred Smith

[N THE year that many another American boy was born, the Carney household in St. Joseph, Michigan, rejoiced in a welcome to little Don. ter they chucked him under the chin, iled at his smile, laughed at his laugh d said he was the best natured baby in e land. While Don was still too little to seen advantageously if standing, his other would sit him up on the old square ano and play a laughing accompaniment his interpretations of songs from the ilbert and Sullivan operas.

Thus entertaining relatives, guests and iends, the boy acquired a propensity nich grew and developed with his own owth and development. Parents who aised the child, however, rebuked the outh who expressed a yearning to go the stage. Ah no! That was quite a fferent matter! Little Don should go ght on through school, high school, colge, become a professional man—go to ows if he liked them, but be a show-an? Never!

BUT from these same parnts Don had inherited a will of his own, desire to do as he pleased, respond to the himes that tickled him, follow the will-o'-he-wisps that beckoned him. Through igh school days he played piano for neighorhood dances. He entertained at amateur shows by singing and playing, telling unny stories while sitting at the piano. Then he got a booking on small time audeville, began his fitful wanderings.

No straight-away course to fame and lory was his. He plodded back and orth, up and down, touching life on the Gulf, at the Great Lakes, in the mountains, small towns, big towns. For many a year did he follow the vaudeville trail, with never a more cheerful respite than this one: passing through Hornbeck, small, picturesque Louisiana town, Don descended from the train for a moment to walk the station platform, breathe the pine-scented air. With chest expanded he found himself exclaiming, "What a wonderful place for a rest!"

Not long after he returned to Hornbeck, saw, liked and bought a small farm at the edge of the town. There he'd go during off seasons, live the simple life of a Louisiana farmer, walk and meditate beneath the pines, fraternize with neighboring farmers.

In 1915 Carney blew into New York confident that Keith Circuit was ready and waiting to give him a $100 a week contract. But the Keith office seemed surprised at this advance news, repeated over and over that no contracts at even the comparatively small figure of $100 a week did they have to hand out . . . Last summer, by way of contrast Radio-Keith-Orpheum paid Uncle Don $1500 a week for a twelve weeks' tour, would have kept him indefinitely had he been willing to give up his microphone.

However, fifteen years ago New York held open no theatrical portals for dauntless Don. After exhausting every conceivable method of getting into vaudeville by visiting managers and booking offices, talking with actors, Carney decided to go out and get a job—his stomach was taking no vacation.

There was at that period in the history of the U. S. A. a big rush on shipbuilding. So, to the New York Shipbuilding yards went Carney, and he got his job—ship fitter's helper at 18 cents an hour! He had never before seen a shipyard, but dutifully he followed his fitter about, carrying the tools, keeping his eyes open. Within two weeks he received an increase in pay, at the end of six months he was a foreman, at the end of the year which followed he was made assistant superintendent, and soon after he became superintendent of a division on torpedo boat construction. In addition, he was placed in charge of a school for ship fitters . . . Then the War came to an end, contracts began to dwindle, and by 1923 shipbuilding for Carney was no more.

IN THE fall of 1923 Carney started out in vaudeville again, this time with a large act that soon fizzled, and unconditionally, because the manager, holding fast to all the money accumulated up to that moment, took a train for some place else. Don came back to New York.

RADIOGRAPHS

Intimate Personality Notes Gleaned from the Radio Family of New York's Great Key Stations

By Rosemary Drachman

"SEVEN-ELEVEN" Fifth Avenue, you know, is the National Broadcasting Company Building. By getting there at nine o'clock I had a half hour to wait for the Camel Hour and Mary McCoy. And thank heaven for my punctuality, for the Camel Hour wasn't at "Seven-eleven" at all but down

Mary McCoy

at the Times Square Follies studio.

So—ten minutes to go, and Times Square fifteen blocks away. Taxi; expensive but necessary. Hate traffic lights. And one way streets. At last—Forty-second street and the New Amsterdam Theatre. Through the long lobby past the pictures of lovely show girls. No time to be envious now. Into the elevator and up to the roof. It used to be the old New Amsterdam Roof Garden, sacred to the memory of the Ziegfeld Midnight Frolic. Then a stage and an orchestra pit covered the dance floor, seats replaced the tables, and it became a theatre. And now the National Broadcasting Company has transformed it into a great auditorium which is used for public broadcasts.

I give my ticket to an usher; hurry down the aisle. There is just time to slip into my seat—lovely seat, second row—and notice the audience, smart as any first night gathering in any of the Broadway theatres. Lights down, curtain up. Orchestra, glee club, pianos, microphones fill the stage. Gordon Whyte steps to the footlights.

"In one minute, ladies and gentlemen, the show will start. During the performance I must ask you to remain very quiet, as those microphones—there are three hanging right over your heads—are extremely sensitive. Thank you."

The show is on! First Charles Previn and the Camel Hour Orchestra. Then Willard Robison. Then Reinald Werrenrath. Then Mary McCoy; lovely golden hair, big blue eyes, sweet clear voice.

Three years ago Mary McCoy stood in front of another microphone in Kansas City and sang a song. To the young girl who had been singing in churches and concerts in Kansas City it was just another local Radio program. But when it was over she got a telephone call that gave her the greatest thrill she had ever had.

"This is Mme. Ernestine Schumann-Heink," said the voice at the other end of the wire, "I have been listening to your program, my dear, and enjoyed it ever so much. May I see you for a few minutes tomorrow?"

Mary McCoy didn't sleep that night, nor the next night. For when the great contralto met her the next day and heard her sing again she was so impressed that she asked her to go with her as assistant artist on her Golden Jubilee tour. Mme. Schumann-Heink had only one fear, that this small, fragile blonde person would not be equal to the strain of traveling. But even that doubt was swept away by the end of the tour.

"Ach, my child," exclaimed the great diva, "if you stand this trip so well, you are strong like an ox. You can even do opera."

And the following summer they spent together at the contralto's California home, where Madame coached her young protegée in operatic rôles. Then ca[me] an urgent offer from the Shuberts to h[ave] her assume the leading rôle in "My Ma[ry]land". Madame Schumann-Heink advi[sed] her to take it, declaring it would [be] "excellent experience." So for a y[ear] Mary McCoy sang the rôle of Barb[ara] Frietchie. Back in New York after [the] road tour she soon came to the attent[ion] of NBC. She signed a contract, and h[as] she is on the Camel Hour, meanwh[ile] continuing her operatic work with NB[C].

I found her back stage (or should [I] say back studio?) after the performan[ce] the hair more golden, the eyes bigger [and] bluer than ever, on close inspection. [A] exquisite, orchid-like creature—and [we] was talking about stunt flying! S[he] adores airplanes, she explained, but [is] solutely refused to go up unless [the] pilot will promise to stunt! On [the] ground her favorite means of transpor[ta]tion is a horse, and I learned later th[at] she is an excellent horsewoman. S[he] was born in Great Bend, Kansas, a[nd] learned to ride on a Texas ranch w[ith] real cowboys for instructors.

Ben Alley

Her greatest thrill, next to hearing Mme. Schumann-Heink's voice on the phone that night in Kansas City, was the five-dollar bill she got for her first paid appearance. It was before a women's club and she was nine years old. But that was by no means her first public appearance. She has forgotten that, but only the other day a man from her home state told her that he remembered a little golden haired tot of three standing up before the guests and singing at a party given by her elders. That was the age at which she started to play the piano and for many years she played all her own accompaniments. At that time she was known as Laura Townsley McThat was her real name and she kept it until she joined the cast of "My Maryland". Then the Shuberts suggested that a less formal one would be more fitting for light opera purposes. She has been Mary McCoy ever since.

Ben Alley

BEN ALLEY should have a new picture taken. Look at it. Don't you think Columbia's staff tenor looks like a very fat man? I did. And when I was handed that picture and told to wait for him up on the twenty-second floor, I kept watching the elevator and expecting some very chubby person to come out of it. So when the brass door slid back and a medium-sized, athletic looking young man stepped out, I mentally discarded him as far too thin.

But the picture lied. It *was* Ben Alley. And he looks more like an energetic going broker, a few years out of college, than the's usual conception of a tenor. And he has just that attitude, one of businesslike purposefulness, toward his work. He thinks singing is a combination of natural talent, plus intelligence, plus hard work. Not singing to the stars, but singing to a needle seems to be his aim.

"What is this needle?" I finally asked after several remarks about keeping the needle steady, about being careful not to let the needle go over thirty.

"Why, don't you know?" he asked in amazement. "Well, come with me."

We went up a narrow stairway into a room filled with what looked to be all parts of switchboards—the master control room. In the middle of each switchboard was a little dial. On one of the dials a needle was wavering back and forth. Ida Bailey Allen was broadcasting a home economics talk and with every word, with every breath, the needle changed position.

"You see," said Ben Alley, "it never goes above thirty (that was the middle number). That means her voice is going out all right on the air, that it won't blast,' but will go clearly and pleasantly to the homes. A singer must do the same thing as a speaker, keep that needle steady."

Up at Columbia Ben Alley is known as one of the easiest singers to "hold". He has mastered his microphone technique. This he does not do by drawing away and coming closer, as so many singers do, but by changes in the voice itself. I watched him at the Mardi Gras program on Monday night, and his singing position scarcely varied a finger's length.

It is a beautiful voice, with a surprisingly "alive" quality in it. One woman, a cripple, wrote him that from the next room she heard him singing, and could not believe that he was not actually there. Disabled as she was she had to crawl into the other room to see if someone were not there.

When the Irish tenor sings, there is no trace of accent in his voice, but when he speaks, occasionally there is a low throaty note. It is his southern background. For he was born in West Virginia, one of eight children. All through his school years he was remarked for his beautiful voice. He won a scholarship to Marshall College, and that institution thought so much of his voice that it soon made him director of its music department.

After a training course at the Cincinnati Conservatory of Music, he settled in Charleston, West Virginia, where he did church and concert work. He went to Lexington, Kentucky, and was active in church and concert work there.

Eventually he joined Station WHAS in Louisville. He took part in the first international broadcast, when an attempt was made to reach England. Although the attempt failed so far as England was concerned, the tenor's voice did carry to Hawaii.

With WSAI in Cincinnati, Alley sang incognito as the "Blue Grass Tenor", and was amazingly popular. In 1928 he decided to try his fortune in New York. He had his savings and a $110 check from his church, which he thought would support him till he found what he wanted to do. The savings soon vanished and when he turned to the check, it was gone. He could not find it. For a week or so he literally and actually starved, till he found some vaudeville and night club work. It was not until long afterwards that he found the check with some of his music. He has it today, uncashed, pasted in his scrapbook.

Ben Alley has been with WABC and Columbia since January, 1929. He has been featured in over five hundred programs and has received at least a half a million letters from enthusiastic listeners. He may be heard now over the Paramount Publix, Syncopated Silhouettes, Artists Recital, Howard Fashion Plates, and Mardi Gras hours.

Welcome Lewis

Annette Hanshaw

Welcome Lewis

WELCOME LEWIS . . . in case you haven't listened in regularly on the Chase and Sanborn, Fleishmann, Eveready, 7-11's, Spotlight, Wallace Silversmiths, and Radio Luminaries programs . . . is the small lady with the sleek, black bobbed hair who croons "mean" songs over the air in a deep, husky voice. So deep is that voice, in fact, that her first music teacher called it a phenomenon, and Miss Lewis is listed at the National Broadcasting Company, not as a contralto, but as a "female baritone". More than one uninitiated listener suddenly tuning in on one of her songs about hot mamas and mistreated papas has mistaken her voice for that of a man. And the biggest surprise of all is that those deep, rich tones come from the throat of a "half-pint" size girl who is so small that she has to stand on a platform to reach the microphone.

You remember the nursery rhyme about the Old Woman Who Lived in a Shoe. She had so many children she didn't know what to do. Well, Miss Lewis' mother wasn't the least bit like that. She already had seven children when a friend remarked that she must find such a large family troublesome. Mrs. Lewis said nothing until the eighth child was born, and then she answered by naming the newcomer "Welcome".

(*Continued on page 122*)

MARCELLA

Little Bird Knows All—Tells All—Ask Her about the Stars You Admire

AS MARCELLA trots through the magnificent arena of the Grand Central Station and bumps into porters, suitcases and the heterogeneous crowds a-comin' and a-goin', she often wonders if Pat, Mrs. Martin, Diana, Betty Mae and the rest of her curious family are not among them, and if the Radio stars whom they want to know about are not just ahead dashing for the next outgoing train.

What a flurry of people! There in a corner are four youngsters tugging at their mother's skirts for some chocolates. And over there in front of another gate is a monocled gentleman chatting away, don't you know, about this and that.

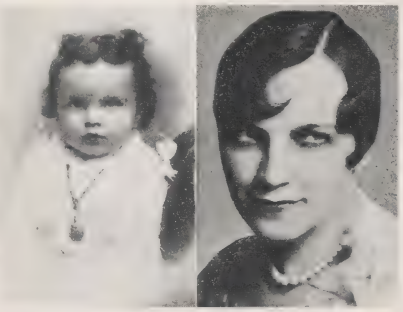
Everything is moving incessantly—arms, legs—jaws—all in a jumble of peculiar rhythms.

And as I write this, Toddles, the Presiding Pigeon of Graybar Court, alights on the window ledge. She blinks ten times in rapid succession, which is her way of telling me that I'm way off the subject of this column. And as Toddles always knows what's best to do, we all bow to her wisdom.

So off we go!

Marcella does claim to see all and hear all, Nona, and "purty" soon she will be nothing but eyes and ears, which are very useful these days, I must say.

* * *



WELL, first of all, Jessica Dragonette, the "golden phantom of the air," no longer takes speaking parts in her program because it seems to be too much of a strain on her voice—and second, the program is speeded up by the elimination of the dialogue.

Jessica Dragonette

No, there is not any truth in the rumor that Miss Dragonette is going talkie-wise. Her first love is Radio, and she refuses to divide her allegiance. Thank you muchly for the poem, Nona, I think it is very beautiful. And thanks also for the lovely article.

HERE Helene Handin is represented before and after sweet sixteen. She's one of the busiest daughters of the air. And when she's not writing out Radio acts, she wields the needle and shears into making over clothes for a little girl whom she has taken under her wing. And they're just the cutest things you ever saw. She crocheted one of those fashionable berets for this youngster of nine, and pulled out a blue sweater (which she had been saving for a Christmas present) because it matched the beret. I had luncheon with Miss Handin today and told her how much you enjoy her programs, Janet. Sorry you must run so fast to catch the early train so that you can hear Helene's broadcast.

Helene Handin then — Miss Handin now

* * *

HOW old is Lawrence Salerno, Italian Baritone of WGN? He is twenty-nine. To whom is he married? Caroline Olson of Madison, Wis. Is she professional? No. How did he obtain his start in Radio. Well, it was this way. Five years ago, Salerno asked for an audition before Henry Selinger, manager of WGN, and presto was employed! Before this he had been in concert and opera. He had the role of Pish Tush in Gilbert & Sullivan's operetta, "The Mikado". For three and a half years he was soloist in the Grace Episcopal Church in Madison, Wis. And now he's with WGN. If there are any more if's, who's, what's, and why's that are on your mind, Nancy, send them on to Marcella. Yes, he was born Italy, but came to America when qu young.

* * *

WE SHO' does take all dem pa in de Fresh Air Taxi Corpulation, p gam—say Amos 'n' Andy. An' beli me, one partner am jes' about confal latin' widout anyone else bustin' in. you see we have it direct from them t they run the program, Paul.

* * *

OVER on the next page Fred Fiebel, very much at ho with his organ, Sarah. He sta things stirring at the Colum Broadcasting System every mo ing. Gets up every day at 5: does his little stretching and th takes the train from Ridgefie New Jersey to the Paramo organ studio in the big city a rehearsal. He puts most of t twenty-four hours of the day good hard work, but does n think that he is leading a stren ous life at all. He would be fine model for the congregatio of immature golf game spectato

The postman brings him hu dreds of fan letters each day fr those who hear his broadcast eight o'clock, all of which ju goes to show that there are people w are actually awake at that time.

Fred is young, robust and happy. started to practise on the violin when was ten years of age, but all the whi he was thinking of baseball and footba But he could not escape from the fate a musician. He learned to play pia and to like it. Then he began to play t organ. And after a year's study he was offered a job in a small picture house, and from then on he made quick progress.

Lawrence Salern

He has an organ in his home that takes up two floors and has eight hundred pipes!! I wonder if there is any room for the carpet sweeper!

WANTED: The whereabouts of Miss Frances Cowin who used to be engaged in radio and concert work in and around Chicago. Reward offered is boundless gratitude.

* * *

EVERY Wednesday night, Ruth Donnerberg and two others, making a trio, of vocalists and instrumentalists, go on a mythical musical journey over station WCKY, Covington, Ky., known as "Musical Wanderings". One night the isle may be in Japan, and another night the trio takes swift flight to the opposite end of the planet.

Ruth Donnerberg

Ruth is an accomplished 'cellist, having graduated from the Cincinnati Conservatory of Music. The other two of the trio is Alma Ashcraft and Mayme Kennison.

* * *

SO GLAD to hear from you Bobby Griffin! We've all been wondering where you were hiding—at WJJB, Marshalltown, Iowa, eh? Well, that's jes' as good a place as any other. Do keep us posted on your work and regards from all of us.

* * *

HERE'S another NBC announcer. Howard K. Jewett was born in Yokohama, Japan, in 1904, of American parents. His father was in the silk business, and although an American citizen he served as consul for Denmark. Ted lived in Japan until he was six and learned to speak the language fluently. He attended Princeton University but left after a few years because he felt there was too much to be learned in the great big world outside and he wanted to start larnin' as soon as possible. Then his family drafted him into the silk manufacturing business and he worked in the mills that he could start from the very bottom. On many occasions he addressed local business clubs on the industry that gets its raw material from the worm. One can never tell what the background of an announcer is. He is not married and lives in Jackson Heights, Long Island with two other National Broadcasting Company announcers —Frank Singiser, who made a personal appearance in our column last month, and Howard Petrie. Can you imagine the time they have getting one another up every morning—Time to get up—this is the National Broadcasting Company—Howard Petrie announcing!

Fred Fiebel

PHIL THORN is on the WOR staff of announcers. Mr. Thorn is playwright and actor. He went through Yale University in two years. Several short plays which are occasionally produced throughout the country by amateur groups were written by Mr. Thorn and those who remember KDKA when it was in its stage of infancy will recall the interesting sketches which Mr. Thorn wrote and broadcast over that station.

* * *

DELL PERRY moves fingers and toes whenever they are called upon. When she is not cutting capers on the piano, she cuts capers on the ice. Miss Perry who is heard on the "Piano Capers" program twice a week over the NBC is a fancy ice skater and goes in for that sport when her fingers are idle. "I have three hobbies," declares Miss Perry—"ice skating, cross word puzzles and fighting with Oscar." Oscar is her Radio partner. These fights are hard-fought arguments, always over music and always conducted in sportsmanlike style, but they are forgotten when the rounds are over.

* * *

BY THIS time, Carrie and Bernie, you have seen all about Sarge Farrell, the Windjammer in the October column. I am still waiting for his list of stations where he will broadcast this winter.

* * *

THE man who sings the theme song on the R. K. O. program is Tom Kennedy. And here is his picture for you, Waxie.

Dell Perry

* * *

THERE is efficacy in prayer, Elizabeth. It was proved in the case of George Hicks. He prayed for months for a job as an announcer. Then the opportunity came one day. He applied with two hundred others for this post at the National Broadcasting Company and was immediately accepted. A year after that he assisted Graham McNamee in reporting the arrival of the Graf Zeppelin at Lakehurst. He burned the midnight oil reading up on aviation and zeppelins, and his work was so successful that he was transferred to the New York studios. He is only 23 and many adventures are packed into these years. He wandered about sawmills, and logging and construction camps of the northwest. And he took a three-month trip along the Alaskan coast as a member of the freighter's crew.

* * *

ARTHUR Q. BRYAN is announcer of WOR. "Q.", says Arthur, "is one of the best breaks I've had. Nobody knows what it means and everybody wants to." Could it be Quixote, Quesnay or Quicherat? These are all actual, honest-to-goodness names. Every one knows who Don Quixote was. Quesnay was a French physicist and economist and Quicherat a French lexicographer. So you can have your choice. Frankly, I don't like any of these names between Arthur and Bryan, but as long as our announcer determines to keep the "Q" a secret, we have a right to sandwich anything between his Christian and surnames.

He was born in Brooklyn—that

Cecil and Sally

Johnny Patrick *is bashful* "Cecil"

Helen Troy... *is giggling* "Sally"

He was a phone operator . . . she an accompanist but their impromptu chatter "clicked" and today they are heard from Miami to Honolulu.

By

Dr. Ralph L. Power

MOST showfolks seem to get somewhere by pushing themselves forward and praising their own act. But Cecil and Sally, youthful and bashful, have found that the more shyness creeps into their every-day life, the faster they speed along towards success and a sock full of money.

Today Cecil and Sally are heard over fifty-three stations, covering a territory extending from Honolulu to Miami and from Vancouver to Halifax. Whether it's the Arizona desert or the rugged coastline of New England, wild and woolly western Canada or the easy-going Southland, they seem to have acquired somehow a universal formula for providing chuckles and unrestrained glee, thus becoming pretty well liked by the listening groups.

THEY are funny. They get themselves into almost every conceivable kind of trouble and out of it. Sally lisps her way through with an admirable display of disregard, a mixture of utterly foolish questions and a fountain head of giggles.

Almost every one firmly expects Cecil to smash her with a flatiron some time, but he never does, and when Sally's fond uncle almost took her to Paris to live, Cecil really came out and showed just how much he liked her.

This boy and girl are more than funny. They are so natural and true to life that every listener knows some parallel and has been through some of their adventures. If an accurate analysis of their popularity could be made, it would undoubtedly reveal a large degree of friendship or affection for the two young characters.

Nobody, not even the astute program directors themselves, know exactly what the public wants . . . probably because the public isn't quite sure itself. Few wou have realized the possibilities of the nc mal day-by-day adventures of a 17 ye old girl and an 18 year old boy. B let's begin at the beginning.

Let's talk about Johnnie Patrick fir even though the rules of the sea s "women and children first."

Johnnie was born in Kentucky. H grew up there and also in Texas. H ancestors for generations have been arn people. As a youngster, he was rais by an uncle and aunt and they moved, course, from presidio to presidio and ba racks to barracks . . . or perhaps it w officers' quarters, for the uncle was commissioned man.

AT THE ripe old age twenty, young John decided that the were far too many army posts to vis all of 'em before passing on to the ne world, so, when his foster parents we ordered away from the presidio in Sa Francisco, Johnnie stayed back an

ed out to look for a job in earnest. here were then no commissions on nployment, so young Patrick almost the luck of the boy heroes in the tio Alger tomes. Of course he made w false starts and did various kinds ork.

ONE day he drifted into \ and got a job. He wasn't fussy t the kind of a job it was. In fact, robably didn't know what the various ifications of broadcast activity were. e got the job. It was running the hboard.

hings ran pretty smoothly, but he had t of time on his hands. He didn't the idea of addressing envelopes on side, while operating the board, but lid like to dash off smart little busi- announcements and other small pro- embellishments on the typewriter oard.

wasn't long before they even let sing a bit, for he had a fair voice. . he was yet on the switchboard and was the bread and butter job.

ow let's go back in the story and find about Sally . . . Helen Troy.

t the tender age of five (my, but 's awfully young) she took her initial ight bow, introduced by her uncle, L. Silver, a Keith circuit headliner in ier days. Her schooling was acquired raverse City, Michigan, in the Sacred rt Convent.

fter graduation she studied music . . . o and organ . . . in Chicago for a while then essayed the role of theater or- st at Grand Rapids. But Helen was ome town girl and homesickness ght her back to Traverse City when was only eighteen.

he worked there for two years, then a Detroit theater and finally in San ncisco, where she played in several ters. I almost forgot to say that this really a home coming, for Helen was n there just before the big confla- ion of 1906 and thereafter was taken .

wo years ago she became staff or- ist at KYA. Thus we bring the his- es of the two young people up to the e of the big idea. All of their modern ory dates from that time.

HER work sort of over- ped, too, just like Johnnie's. He was 'phone operator, but did some singing writing. She was the accompanist, also did solo work and vocal activity. When she checked in to work she uld stop for mail at the 'phone board. t for fun Johnnie would talk Milt oss and she would talk baby chatter. t got to be a habit, so they worked some little programs and they went r well . . . though admittedly a sort studio fill-in at first.

Then came the big idea, although it n't seem so big at the time. They rked out a series of three skits woven around a music store locale. But at the end of the week the characters of Cecil and Sally were left high and dry. The audience clamored for more with a loud noise.

So that's really the beginning of this act, which now, in electrical transcription form, has literally swept the country. The Radio episodes depict the average eighteen-year old boy and his seventeen-year old girl friend. But perhaps it isn't exactly right to call them "average", for Sally has the cutest giggle . . . a still cuter lisp . . . and the ability of asking questions faster than a horse can trot. Cecil is bashful, afraid of being sentimental, a typical boy all through.

So the series progressed, even though Johnnie had to get down to work at 6

Cecil of the soulful eyes isn't a bit romantic, but Sally makes up for him!

a. m. in order to use up the typewriter before the office staff showed up.

The time element of their meteoric rise is somewhat as follows . . . first KYA. then the new defunct ABC chain (Pacific coast unit) . . . then KPO . . . and now all over the country via electrical transmissions which are recorded in San Francisco. And all this in the short space of two years since they first gave the little three-skit affair.

No small measure of the success is traceable to Dick Haller, now vice-president and general manager of Patrick and Company, which looks after the business interest of Cecil and Sally. Haller will be remembered by many as the instigator of the KGW Hoot Owls (pioneer coast frolic group), manager of that station for many years, and later production executive for the former ABC network affair.

Will the young folks get married, or rather will they be married to each other? That is the question on the lips of 'most every Cecil and Sally fan. Well, I guess they are too good showfolk to let it be known if they do, for then the glamor and romance would be gone for the public.

At any rate, Cecil is pretty reticent about it and at the present rate, it will be some time before he can get his courage around to the point of springing the question.

On one of the ten minute episodes it did seem as though he would spring the eternal question . . . but he gasped, gulped and then asked for a glass of water. Yes, Cecil seems utterly devoid of things sentimental, romantic or affectionate.

Poor Sally's tendencies towards the romantic are constantly snubbed by Cecil. Then there is the girl next door, whom Cecil likes but Sally doesn't, and who will later play an important part in their lives. And last, but certainly not least, there is Sally's other boy friend, Alexander, rich and entertaining, who occasionally gives Cecil an uncomfortable hour when he resumes his friendship with Sally.

I suspect that in a pretty large measure these two young people more or less live the lives they portray, though it is equally as true that Johnnie Patrick is not an "average" young man . . . he doesn't at all like the idea of conforming to convention and doing everything just like the other fellow.

Helen Troy (Sally) is two or three years older than the character she portrays. She is easy to gaze upon, blonde and funny to listen to. She has no particular hobbies, but does like to go to drive her car, go on horseback jaunts and see the ball game. She likes clothes, dresses in outdoor fashion whenever she can and isn't such a slouch at housework. 'Tis even said that she would much rather putter around her city apartment than play bridge, and she is just as attractive dancing as she is while swimming.

Johnnie Patrick (Cecil) is an eligible young bachelor, and while he sometimes confesses an occasional desire for a home and a dog, he is temperamentally somewhat like Cecil—he never takes the same girl out twice.

He lives alone in a medium sized apartment which commands a fine view of the Golden Gate and the ocean.

UP THERE he does all his writing and cooks his own breakfast . . . but doesn't wash dishes. He drives a roadster with the top down and doesn't own a hat. Six feet tall, with azure eyes and dark brown hair, he likes nearly every kind of outdoor activity and is never known to miss a good show.

Johnnie swims a bit, plays a fair game of tennis, goes up in airplanes whenever he gets a chance, and his pet aversions are ferry boat whistles and raw oysters.

Both Cecil and Sally in real life like to browse around . . . in street cars, ferry docks, restaurants, stores and other public places . . . to gather ideas for more episodes in their series, which run six nights every week. Both have a sort of independent spirit . . . like dancing, swimming and appreciate the unusual . . . the weird . . . the strange sights whether in the next street or the next county.

Chicago Studio

"CHATTER!" This is the crisp command spoken every night at 9:30 except Saturday and Sunday by a WGN announcer, and is the cue for "The Girls" to begin their now famous nightly back-fence gossip. Incidentally, that one word is to be the cue, theme song and whole story of this letter as your writer is bursting with "chatter" of folk about town.

But to go on about "The Girls." Almost everybody in the Middle West is talking about Clara, Lu 'n' Em, "The Girls". In a nice way, of course. Everybody is saying "Who are they?" "What are they like?" It is known, generally, that Clara and Em live in a double house and Lu rents the upstairs, and every night they discuss timely topics, ranging from their own youngsters to President Hoover or Christopher Columbus. Nobody ever knows what they are going to talk about but one is always sure, at any rate, of the largest number of laughs that any fifteen minutes can bring.

"Well, who are they, anyway?" you ask. Really it's a shame to tell . . . I had pictured them as matronly and middle aged, and what was my surprise to discover them blooming girls, well under thirty and all three Northwestern University graduates!

Iowa, California and Illinois helped assemble them. Clara Roach, whose calling card reads Miss Louise Starky, was born in Des Moi Iowa, her father a lawyer. She came to Northwestern Univers and there took an active part in the department of speech, w ning a scholarship for post graduate work, became president Zeta, Phi Eta, school dramatic organization, and later tau interpretation.

Lu, whose microphone name is Lulu Casey and whose life surance policy reads Miss Isabel Carothers, also came fr Iowa . . . Mt. Pleasant, to be exact. She won an honorarium dramatics in high school at Des Moines, attended Drake came to Northwestern where she, too, was elected a mem of the dramatic society and as Clara, its president.

Last but not least, in fact greatest worry of the trio, is Krueger. In the family Bible name is registered Helen King. B in Los Angeles, her parents brou her when but a child to Peoria, I where Helen was graduated w honors. She wrote the senior cl play. From two years at Brad College she advanced to Nor western, joined up with Louise a Isabel in the dramatic organi tion and later became vice pre dent.

They are all so thoroughly meshed in their parts that they oft slip into character when they together in public places, mu to the delight and amusement anyone who happens to be n them.

The "Musical Wanderings" program at WCKY, Covington, Ky., is t brainchild of attractive Alma Ashcraft (top). Besides being beautif and clever, she's staff soprano and hostess.

Peg Wynne and Ambrose Barker (above), recently deserted the thre a-day and joined KNX, Hollywood. They have played in every civiliz country in the world . . . appropriately, their program is call "Nomads".

Harvey Hays (left), "Old Timer" of the Empire Builders, reach Chicago! At the station to meet him were Bernadine Flynn, leadi lady, Don Bernard, production manager and Don Ameche, juvenile lea with hat in hand.

Betty McGee

Writes A Letter Bursting With News

R at WMAQ Hal Totten's twins are still quite the bject of conversation. This famous sports announcer the proud father of twin girls on September 25th, the t Rogers Hornsby made his bow as the new manager of rigley's baseball club. So all in all it was a big day for os.

e was some question as to what the names of the little re to be, Cubs players and fans offering many suggestions s Pete and Repeat. But Mrs. Totten had other ideas. children, who were eventually named Barbara Jean and Joanne, were well equipped with clothing just as soon as layers and fans heard of rrival. Each of them has n dresses—many of them ade by lady fans who worked garments while listening to eports of the games.

he way, Hal never set his be a sports broadcaster or broadcaster of anything, ll into it. Earnestly em- on a newspaper career, he lding down a re-write job on icago Daily News when he fted for announcing football over WMAQ in 1924. The ring a former major league ayer was employed to an- the ball games but after ys Totten was again drafted rvice.

ball, football, basketball, races, stage shows, reviews, ner features were handled by him for WMAQ for four year as a sideline but it was not until three years ago when Radio grew to such proportions that he was pulled into the department full time.

* * *

SPEAKING of sports announcers, did you know that Pat Flanagan, noted for his graphic word-pictures over WBBM and the CBS, went to school this Fall? Pat insists that sports are ever-changing and that to authoritatively broadcast a game he must always be in it. So Pat attended the famous Northwestern University coaching school under the direction of Major L. Griffith, commissioner of athletics in the Big Ten.

* * *

BUT to take another flying leap back to WMAQ again. While we were over there the other day we had the pleasure of coming face to face with "Jane Hamilton" of Home Calendar fame. It was another of those Clara, Lu 'n' Em shocks. We had to make the mental adjustment of subtracting fifteen or twenty years from the age we'd given her. She seems amazingly young for one who has accomplished so much, and is exceedingly easy to look at—slight, with nice blue eyes and blond hair. Her interest in women and their activities is very real and she brings to her work a

a sunshiny smile has George Taylor (top)! Of course, for he's er and master of ceremonies of the Sunshine Hour at KYA, San Francisco. Studio folks call him their "Personality Boy".

(above) is a veteran flute tootler and one of the hardest blowers Dilworth Little German Band Concert at KDKA, Pittsburgh. Gus, with the big medals, wields the baton.

re Bunny, Bobbie and Uncle Dell (right), just before beginning roadcast for little 'uns KMOX, St. Louis. Bunny is really Lydie Lee, Bobbie is Vic Smith and Uncle Dell is Delmar Ming.

Tom Mix (above) left his horse Tony outside when he broadcast at WWNC, Asheville.

Terese Meyer (right) staff organist at WTMJ, Milwaukee, has an enthusiastic following.

practical knowledge of the problems of the home. She is accustomed to working on a budget, manages her own home and is the mother of a bouncing boy of four years.

* * *

INTERESTING bit over at the NBC Chicago studios. Bernadine Flynn and Don Ameche who regularly take the leads on the Empire Builders programs Monday nights used to play opposite each other in University of Wisconsin theatrical productions.

The talent of the two was so outstanding that they were urged to try their luck on Broadway. Both were successful on the legitimate, but more or less lost track of each other in New York. After a time each became interested in Radio and each, unknown to the other, tried out for a part on the Empire Builders program. So after the decisions were made there were many "oh's" and "ah's" and much U. of W. gossip flying back and forth.

When, or if, a vacation materializes the two hope to slip up to Madison for a week or two and put on a play in the old surroundings.

TED HEDIGER is the name of the new Chicago NBC announcer. He has covered a bit of the country in getting an education, having attended college in St. Paul, San Francisco and St. Louis. Since college days Ted has occupied his time with Radio, beginning as an amateur operator, then going into commercial Radio and announcing. He is known for his association with WRHM, Minneapolis, KWK, St. Louis, and KTM and KGB, Los Angeles and San Diego. He likes swimming and motoring and goes in for golf—the miniature variety.

* * *

'TIS said that it's because their own marriage is such an ideally happy one that Lee Sims and Ilomay Bailey are able to create the beautiful *Musical Portraits* which they present to Radio fans through WBBM. Stories about love and lovers form the basis of these renditions.

* * *

dward W. Hall of WICC, Bridgeport, s of Heart Attack

September 24th, Edward W. Hall, r general manager and vice-president ation WICC at Bridgeport, suc- d to a heart attack. His death ht sorrow to studio friends and listeners.

1928 Mr. Hall went to Bridgeport member of the advertising depart- of WICC. Three months after g the station he was elevated to anagerial position, which he held June of this year, when he retired se of ill health. Many fine features inaugurated at WICC by Mr. Hall among them the Cheerio Squad and Radio Doctor's hour, conducted by r M. Withstanley.

other achievement of Mr. Hall was opening of two churches which had closed several years. The Com- ty Church at Mill Plain ict, Danbury, which now ts a large congregation a radius of one hundred and holds services every Sunday, was revived through these Radio efforts.

* * *

Stanley Maxted, who is heard on the Canadian Pacific "Musical Crusaders" programs, was born in Folkestone, England, and came to Canada at the age of nine. He received all his schooling in Montreal, where he also studied voice and won a wide repute as concert and oratorio singer. When the war came he enlisted as a private with the Canadian forces, returning as a lieutenant. He now holds the rank of major in the Canadian militia. At the Scottish Festival in Banff last year he created the leading rôle in "Prince Charlie and Flora", a ballad opera dealing with a romantic incident in the life of the Young Pretender.

The Last Man's Club—announcers of the Buffalo Broadcasting Corporation—gloat over the squash which goes to the last bachelor. Left to right, Herbert Rice, Bud Hulke and Bob Strigl.

lima Islanders (right) charm C listeners with romantic South Sea music.

Harry Glick, who conducts a Radio gym class over Station WGBS, New York, is welterweight champion of the world! He gives complete instructions on how to lose weight or gain it, and pack away a goodly wallop while doing it.

* * *

or Clausen and Ann Perkins (below) who tap their stuff when Jo Wright and his Cinderella estra provide music at KPO.

Everything is new around Station KFYR these days. Their new building was specially designed to house a modern RCA transmitter . . . it is located about eight miles from Bismarck, the Capital of North Dakota. Visitors from Montana, Minnesota, North Dakota and even Manitoba have been welcomed on tours of inspection by P. J. Meyer, who is manager and grand mogul of the station.

* * *

Winnie Felds Moore, KFI-KECA travel talker, bought a pee wee golf course in Los Angeles and becomes a business woman . . . not neglecting her dear Radio public, however, while running the source of supplementary income.

A squash, instead of a bottle of wine, is to be the premium for sustained bachelorhood in the announcing staff of the Buffalo Broadcasting Corporation, according to regulations drafted by the newly organized Last Man's Club.

Once constituting quite a sizeable group of fancy-free Sir Gallants of the Air, the bachelor unit has dwindled to but a trio. Herbert Rice, Bud Hulick and Bob Strigl are the last "Last Men", but there are rumored developments which make Rice's eligibility for the club questionable. In fact, Bud Hulick is already giving Rice one of those bitter "I know you'll not last long" laughs. Yet, who knows but that the echo may come back to haunt Hulick, for he is very much the eligible sort, and many indeed are the meaningful glances that are cast his way when the fair ones visit the studios. Bob Strigl has a determined glint in his eye and his teeth are gritted. And say! He's putting his initial on the squash! Bob is reputed to be a man of determination, and maybe— Well, the battle's on!

Blue Monday *Jambore*

They call it the Golden State Blue Monday Jamboree out on the Coast, but is it blue? Emphatically no!

Harrison Holliway, smiling at you down below there, has an easy-going, kindly manner of presenting the acts that has helped to put the Jamboree across. He's Manager of the Don Lee Station KFRC, and keeps the Blue Monday assignment as his only announcing job.

"Mac" Henry McClintosh, the Grand Old Man of the West Coast, seems to be a trifle puzzled. But we warrant he's not stumped, for Mac and his guitar were on the air in the days when broadcasting was in its swaddling clothes. They say he can't sing without his ten gallon hat handy!

Bill Wright just lives in each of th... he creates . . . and they are many! H... is as Professor Hamburg, one of the J... ree's funniest acts. Left, you see the ... face act, "What Must Ah Do Now, L... in person. Lem, the Scowler, is Tommy ... roe and Lafe, the Thinker, is Arnold Mc...

We don't know whether or not Juanita Tennyson (below) is related to the poet, but her songs are as moving as his ballads, and she is known as the "perfect Radio soprano".

Young America, represented by Charles Cartier, aged sixteen, Edna O'Keefe, sixteen, and Ronald Graham, baritone, nineteen, is doing its bit at KFRC.

* * *

BERT HANAUER, recently returned from Europe, is back again at WCAO. He has resumed his place on the announcing staff and will also write continuities for special programs.

On his trip to Europe Bert visited Germany, France, Belgium and England. He was particularly interested in hearing European Radio programs. Except for an occasional advertisement for lost objects, he says, commercial programs are practically unknown in Europe, the Radio stations being supported by a tax on the sale of receivers. Since time is no consideration, the programs are put on in the most leisurely fashion, a lapse of ten or fifteen minutes when nothing at all is heard being quite a frequent occurrence.

Monroe Upton of KFRC.

Bert inquired of an Englishman why their Radio stations did not make some effort to run programs on a time schedule and eliminate the blank spaces.

"We like it that way," was the reply. "You see, we don't like to be hurried."

Frank Dahm, new program director at KPO.

Frank Dahm recently said good-bye to WGN, the Chicago Tribune Station on the Drake Hotel, in order to assume a new post as program director of KPO, the pioneer Hale Brothers-Chronicle station in San Francisco.

Dahm, who for over five years has been publicity director and continuity editor of WGN, has been concerned in many of the station's most famous broadcasts, and Chicago Radio circles are agreed that he was one of the most brilliant members of the WGN staff. No stranger to the microphone, he has broadcast professional football, baseball, and many boxing matches for the station.

Outstanding among the programs he has prepared were WGN's famous broadcasts of "The Miracle" and "Carmencita and the Soldier", two Morris Gest productions. He collaborated with Quin Ryan in writing the popular "Old Time Prize Fights" series. Lately he has been devoting his time to commercial programs for WGN and independent producers. He was the author of the first written Radio continuity ever used in Chicago.

* * *

Alice Hutchins Drake of Washington recently celebrated her "sixth air anniversary". Her programs broadcast from WRC in the Capital City have included book reviews, talks on sight-seeing in Washington, and over one hundred programs on the subject "Famous Paintings in Many Lands". Her discussion of the murals in the Library of Congress last summer was relayed through an NBC chain.

Bottom . . . Don Becker, WLW ukulele virtuoso, also famous for his satire, "The Irrational Broadcasting Company".

. . . *With The Studios And Their Stars*

LOU EMMEL (Louise Alide Archibald Emmel) is just what the Radio audience usually pictures him . . . fat and jovial, medium height, and sparkling blue eyes, aged about thirty-five.

In his work at KTAB, San Francisco, he does a multitude of things . . . sings solo work, also with the orchestra, takes part in the Saturday frolic and conducts a sunshine hour.

Back in his play days in New York he was always attracted by the sparkling lights in the apothecary shops. By and by he was graduated from Columbia as a pharmacist, and day after day he rolled pills, treated bruised scalps and filled prescriptions.

Pretty soon Lou was offered $18 a week as a chorus man and he took it . . . in *Parisian Model,* the Anna Held show. Before long he was taking the second lead at $125 a week and began to study singing. Later he added dialect work to his activity . . . Irish, Jewish and German, and chautauqua and lyceum work became his field of endeavor.

For the past three years he has been with western Radio . . . originally at KFRC, later with NBC's coast unit, and now at KTAB. Lou's hobbies are golf and horseback riding, while his wife prefers tennis and the drama. Both are fond of symphony music.

* * *

MOREY AMSTERDAM is getting along quite well at KNX in Hollywood. But he doesn't take his Radio work too seriously. It is something to keep him mentally alert after his day's work writing gags for the movies, funny stories for snappy magazines, dashing off songs made to order and all that sc[illegible] thing.

Morey does a popular song or [illegible] once in awhile, but not too often. [illegible] two or three times a year to be [illegible] Most of the time he tells stories. M[illegible] stories are always cleaned up fo[illegible] Radio audience. Radio audiences ar[illegible] most particular in the world.

Mrs. Morey's young son is but tw[illegible] two, though he looks to be thirt[illegible] account of being fat and pudgy, [illegible] somewhat sedate, which of cours[illegible] isn't a bit . . . five and a half feet o[illegible] hoof, his own of course; weight a [illegible] dred and a half; curly black hair; [illegible] single.

* * *

GENE BYRNES, who composed *I [illegible]* and two score other popular [illegible] while at KHJ the past two years [illegible] gathered up his trusty typewriter [illegible] moved over into swanky Hollywood [illegible] KNX.

Part of the time he dashes off c[illegible] nuities, other times he strums awa[illegible] the studio organ, once in a while he [illegible] nounces, sometimes he even sings . . [illegible] his character as "Standard McWebs[illegible] comedian, seems to be the most po[illegible] of his Radio duties.

Previous to his work at Los Angel[illegible] was with New York stations for [illegible] years, and three in eastern vaudeville [illegible] the present writing he is letting his [illegible] grow long in anticipation of getting to [illegible] the talkies as a long haired come[illegible] And besides, he adds, it saves money

Manny Nathan goes back to the KFOX
Friday night two-hour frolic as master
of ceremonies after the feature was off
the air for a few months. Aided and abetted by portly and corpulent Hal Nichols, part-owner and announcer of the Long Beach station, little Manny represents an opposite type . . . small, wiry, under-sized.

* * *

KTM's new orchestral director is Salvatore Santaelle, who has led theater orchestras in and around Los Angeles for lo these many years . . . appearing over Radio as early as seven years ago through KWH . . . later as concert master in some of the largest theater picture houses of the Southwest.

Santaella for six years was a pupil of the great Rachmaninoff and one of his first "jobs" was as accompanist for Pavlowa; later he accompanied with Max Rossen, violin virtuoso; and he was once piano soloist with Paul Whiteman and his orchestra.

* * *

C. Merwin Dobyns, owner and director of KGER, Long Beach, issues a statement to the press that although he has not yet picked out a career for his son, Howard Britton Dobyns, he sees nothing against his being a Radio announcer if he wants to be. Note . . . the boy is now eight months old, giving adequate signs of having considerable voice quality, also quantity, at this tender age. His lusty lungs were brought into play as a "prop" recently on one of the Sunday night Ho Hum Frolics. Of course nobody fell asleep while his part of the act was on the air.

* * *

Glen Rice, KMPC manager, and creator of the famous Beverly Hill Billies, is another fond papa. But his youngster is now aged two, and already old man Rice is proclaiming to the world that Junior will be a famous football announcer in '45. But Mrs. Rice doesn't seem to be worrying much one way or the other.

Charlie Warren is WAIU's Comedian

Less than a year ago sleepy residents of Ohio rose from their beds, touched the floor ten times with their finger-tips, turned on their radios—and started to laugh. They have been laughing ever since. The cause: Charlie Warren, chief announcer of WAIU, in Columbus, O., and author of inspired idiocy unequalled in the entire realm of nonsense.

Life ceased to be a sober, uneventful thing for Ohioans with his advent; and it became a matter of hilarity after his organization of the most popular club of the air, the Amalgamated Benevolent Protective Order of Exasperated Charlies. This club, with the avowed purpose of rescuing the grand old name of Charlie from the oblivion into which it has descended, is fortunate in having as its president, secretary, treasurer, "Guardian of the Inner Shrine," and leading member, the founder himself.

Charlie Warren
WAIU

He himself modestly attributes his success to the fact that he was born—in Los Angeles—in a terrific storm, first seeing the light of day through the windows of a private hospital later designed to become a Keeley Cure Sanitarium. That was thirty years ago. Coming from a family of artists, it is not strange that he made his stage debut at the age of seven, singing a song about a "paper of pins" at a Los Angeles theatre. He worked his way through high school and Leland Stanford by appearing as blackface comedian in the local vaudeville houses.

Since then he has wandered through Europe, the Orient, and most of the United States, acting in vaudeville, introducing dance orchestras and marathon dance groups. Two years ago Radio won his interest, and has held it ever since. At WLS, Chicago, where he was first launched into the air, he joined Ford and Glenn, Jack and Gene in the popular Showboat programs. He has broadcast from Manila, Honolulu, and most of the principal cities of the U. S.

Old Dutch Girl Takes the Air

FOR many years the pleasing, whimsical figure of a sturdy Dutch girl, shod and garbed after the fashion of the Netherlands, has appeared before the public with upraised stick in hand, until today this trademark is familiar to practically every housewife the world over. There is one peculiarity about this internationally famous figure that has aroused the curiosity of the legion of her admirers. She has never shown her face to the public. In this, they are doomed to disappointment, as it is said upon excellent authority that the Old Dutch girl never will turn her sun bonnet from the characteristic profile position, which completely hides her features.

However, a compromise has been effected that doubtless will be received with keen interest by the millions who have wondered about this apparent shyness. The Old Dutch Girl has come into being as a talented artist with an exceptionally charming voice, which is now being heard throughout the country over the Radio, and she appears in person three times weekly. She sings, and an orchestra plays those tuneful melodies everyone likes to hear to start the day. Then too, the Old Dutch Girl will broadcast current news events of particular interest to home-makers, set to verse in her own inimitable way.

This newcomer to the air is sponsored by the Cudahy Packing Company, makers of Old Dutch Cleanser, and comes to listeners from CBS studios every Monday, Wednesday and Friday morning. It is predicted this entertainment feature soon will be recognized as one of the outstanding early morning broadcasts on the air.

* * *

Dr. Ray Haight, violinist, worked his way through the University of Southern California school of dentistry, and while his practice is getting established he leads the instrumental trio three or four times a week for KMTR, Hollywood.

* * *

"Is that a man or a woman?" is the first question out of the mouths of Radio fans who hear Gretta Taylor sing. Because of the unusual quality of her voice many mistake her for a man. She sings way down deep in the lower registers that carry so well over the ether, and her rolling tones have won her many Radio friends during her two years on the air at KMA, Shenandoah, Ia. Not only does she sing! Yes sir, she will play everything from "Turkey in the Straw" to Rachmaninoff's Prelude (usually without the music)—on the organ! Her versatility doesn't end there—swimming, golfing, dancing, bridge and tennis occupy her when she isn't eating hot pop corn or salted peanuts. Five feet six inches tall, weight 122, and a corn fed complexion.

Gretta Taylor

Nathalia Crane, fourteen-year-old poet, author of *The Janitor's Boy* and a new book, *Pocahontas.*

We Are All
POETS

Interview with Nathalia Crane And Adventure with Burglar Bring Rhyming Reflections

AREN'T we all poets, more or less?

Let's be frank and admit it. Confession is good for the poetic soul.

There may be exceptions. For instance the miserable low down contemptible burglars who broke into my apartment the day I went out to interview Nathalia Crane—you remember, the little girl who wrote such adorable things about her affair with *The Janitor's Boy.* She was only nine when she did it. I'm going to tell you all about that interview, and the burglars, but there are a few other things to be said first.

My contention is that everybody has a little of the poet's soul within his being and burglars are only the exception that proves the rule. The main thing seems to be that there is another something in us that is always shush-shushing the poetic, so that we rather hide the fact as a shameful secret vice. Not me, though——I take my stand in the open. I like poetry, and I write poetry—anyway it's poetry to me, editors to the contrary notwithstanding.

That's why I was glad that the dear little Crane girl was ushered up to the Columbia studios to speak on the Ida Bailey Allen program. What a grand excuse to converse and commune with a poetess whose works are world famous, child though she is. Although it might be just as thrilling to sit on a stump beside John D. Rockefeller and muse on the symbolic inspiration of a battle scarred golf ball.

THERE are so many ideas for poetic reverie in this—almost anybody could write in that situation, whether you are a real poet or not. Just imagine this giant and the ball:

Oh thou rugged little pellet—
What's thy story? Come and tell it.
Eyes that sped thee o'er the course
Have shaken empires with their force;
Hands that plopped thee to a hole
Could peel a million from a roll . . .
And the pellet answers not at all,
Because it's only a little ball.

Thus one could go on and on with great thoughts like that. But everybody seems to be afraid the meter won't be just right, or that some long haired critic will stick up his nose and say catty things. So we suppress the urge and brand ourselves in our own hearts as cowards.

I doubt not that Henry Ford drinks deeply in poetic thought. I dare say he has written many a pretty little sonnet just to express the feeling of exaltation that comes to him with the discovery of some precious antique—perhaps a musty old trunk that he has been told once belonged to Paul Revere. And as doubts assail—

Oh seamed and venerable trunk
Art thou real (or is it bunk)
A thousand bucks in thee I've sunk
Tell me truly: Genuine or junk?

No matter how prosaic the individual you can readily see what sublime thoughts can traverse the brain with poetic strain. We all have that feeling only some of us lack the knack of making our words flow as they go. As for me it seems I have written reams and reams and put them on a shelf just to keep for myself.

THAT brings me up to the day I was to go and see Nathalia Crane—and the day the burglars came. "Crooks don't like ether," says Mr. Whalen. And I say they hate verse worse. All of this poetry was stacked away in the cupboard when they came and ransacked the house. They took my nice new winter coat, they tumbled out the linen and the silverware, pulled up the rugs, tipped over the furniture, broke a beautiful art lamp and did about everything but disturb my carefully preserved poetry. A million dollars could have been concealed between the pages and they never would have found it. They shunned that shelf in my cupboard as though it had been charged with deadly poison gas.

Not even to have glanced at my poetry was adding the worst possible insult to injury. That is why I have positive conviction that burglars lack even the flimsiest fragment of soul. I would have

The Quaint and Fascinating Art of Making

Hooked Rugs

Is Fashionable Once Again

MARTHA CRANE

Courtesy Mandel Bros., Chic.

Colonial living room using maple furniture and chintz.

Burlap Bags and Old Stockings Will Make Attractive Floor Coverings, Says Radio Home Adviser!

WHETHER the art of hooking rugs came ashore aboard a sailing ship in the early days, the handiwork of some sailor during periods when trade winds overtook his ship, or whether the first hooked piece came from the agile fingers of a busy colonial housewife, it matters little to the homemaker today. Unless she is a collector of antique hooked rugs, she is content to know that hooking is absolutely American in origin and execution, and will let it go at that. She is placing hooked rugs on the floors of her living room, dining room, bedrooms, hallways, and yes, even her kitchen, for one reason . . . they give her home a bit of that indefinable quality called charm.

Nor is it important whether the room is modern or colonial, formal or informal in treatment. Hooked rugs nowadays have found more patterns and color than the proverbial Jacob's coat, and it is only a matter of choosing the right rug for the right room.

Martha Crane instructs homemakers over WLS, Chicago.

Last winter a brief letter addressed to the WLS Radio Bazaar from a homemaker listener aroused the interest of other women eager to know more about hooked rugs and their making. Before the winter was over, 10,000 homemakers had written for instruction sheets and 2,000 more had contributed long letters telling of their own patterns and methods of rug making. Each day brought packages containing small rugs and mats sent to me as director of the Radio Bazaar in appreciation of the hooked rug programs.

Realizing that in order to hav an understanding and appreciatio of hooked rugs one must kno something of their origin I starte the series with the story of a old hooked rug. Some say the fir bit of hooking was an outgrowt of marlinespike seamanship, and that an idle sailor on the dec of a becalmed sailing ship was responsible for originating th method of "hooking" small bits of cloth or yarn through a heav background material. It is true that some of the oldest hooke rugs came from settlements along the rough coast of the Atlanti Be that as it may, the housewives in these settlements found th hooked rug, rude as it then was, a luxury indeed. Floor cove ings were one of the many comforts left behind when famili crossed the ocean to their new homes, and this new way making colorful rugs from scraps was a wonderful innovatio

It wasn't long before hooked rugs were in every household New England. Rich and poor alike attended "hooking frolic in the fall and winter evenings, and there was as much merr ment around the rug frames as around the quilting frame or the husking bee. Money and materials were scarce, and scra too small for quilt pieces were saved for rugs. To these ear homemakers, the bits of bright cloth were so many splotches paint on a pallet, and the coarse linen in its rude rug frame canvas. Pleasures were few, and minutes spent hooking ru often meant the day's recreation for busy New England wiv

COLONIAL homemakers took great pri in their rugs, and a spirited competition existed among t women. There were no patterns. Instead, with a bit of coar linen before her (linen instead of burlap was used then for bac ground material), the colonial homemaker picked a bit of cha coal from the fireplace and sketched a rude pattern of her ow

Elizabeth Waugh and Edith Foley in their book, "Collecti Hooked Rugs" tell an interesting story of a hooked rug desig They were visiting Dr. Grenfell's mission in Labrador, whe hooked rug making goes on today much as it did in coloni times, and one of them stopped to admire a rug which to h resembled a jelly-fish with octopus-like tentacles.

She was collecting rugs in Newfoundland at the time, a thinking perhaps she had discovered a rare drawing of son

p sea monster, inquired, "What is that
ugn?"
'A ram," was the reply. (Ram, in the
guage of Newfoundland, say Misses
ugh and Foley, means "tom-cat.")
But," was protested, "how did you
ne to draw a cat like that?"
'Oh, us first catch the ram; then us
d him down on the mat and us drawed
und him."
Undoubtedly many of our early hooked
s had a similar beginning.
Hooked rug making was and always
l be essentially something to be created
the housewife in her home. The fact
t the vogue for handmade rugs has
lergone a marked revival within the
few years means that the homemaker
lay realizes the qualities these rugs
e for making homes more charming
l livable.
The rug maker today hooks her rugs
h comparative ease. She buys a pat-
n to her liking, perhaps choosing it
m a complete collection already made
for her inspection, selects the colors
er examining the finished rug before
and comparing it with her color
eme, and then takes home with her a
k and frame ready made.

THIS hook may or may be similar to those used in early ys. Perhaps the rug maker chooses a irply pointed instrument with a short, mp wooden handle. This is one of simpler hooks, and will be the osen if the maker is an "old-timer" at work. On the other hand, because oked rugs have staged such a come-ck, there are on the market today ee or four reliable hookers that do the by themselves. Easily operated, they ice and measure the loops accurately, d are chosen invariably by women at-pting their first hooked rug.
For the actual making of a hooked rug e finds many materials. Yarn, of urse, is ever popular, and because it is rm looking, easy to handle and can be rchased everywhere, the majority of g makers choose it. Scraps of woolen th are always good. Old bed linen if t worn too thin is excellent, and many men have written of using old cretonne ngings. One WLS Radio Bazaar listen-who lived in the country wrote that e had all her friends save the cotton rk socks their "men folks" discarded, r she found that after thorough launder-g and dyeing and cutting they made cellent rug "yarn". A letter from an-her listener tells of using ravelled burlap cks dyed bright colors.
Economical homemakers are cheating e rag bag of its silk stockings by mak-g them into hooked rugs. Slip the silk ocking over the arm after first cutting vay the parts of the foot and hem that ntain cotton threads, and cut a strip om one-half to three-quarters of an inch ide. By cutting the strip spirally, each stocking yields one continuous strip. The tan, brown and black stockings make excellent background materials, and the lighter shades can be dyed the desired colors for the pattern before they are cut.

While many rug makers use old burlap sacks, cleaned and washed, for foundation material, others prefer to buy burlap by the yard at their local store, and still others select stamped patterns.

In this, the beginner finds the ready stamped pattern has its advantages, but for the experienced rug maker who draws her own designs there is a certain satisfaction that comes with the originality and charming unevenness of a handdrawn rug design. One well-known collector of antique hooked rugs maintains that "hooked rugs are pictures just as truly as if they had been painted with a brush," and perhaps it is this desire to create something truly one's own that inspires women to draw original patterns when they attempt this fascinating craft.

Everyone is acquainted with hooked rugs using endless variations of floral wreaths, scrolls, geometric designs, pictorial drawings, animal sketches and marine scenes. Now, with the vogue for modern furnishings, comes the hooked rug that finds itself in perfect design harmony with modernistic interiors. These designs are legion, and since they are geometric, quite simple.

Equipment for making a hooked rug is more or less standard, for one needs a frame, a hook, burlap with the pattern stamped or drawn on it, and material from which the rug is to be made. There are four or five different types of frames, some of wood and others of metal, but all perform the same work, and once the burlap background is fastened and tightened in the frame, the actual work of hooking begins.

Let the frame be placed at a convenient height in front of you and begin hooking at the lower right hand corner, holding the hook in the right hand above the burlap, and the strip of material in the left hand beneath the burlap directly under the point of the hook. (Use a wooden handled, steel pointed hook.) Put the hook through the burlap so that it catches the material held in the left hand, and pull it through in a loop the desired size, the thickness of the rug determining the length of the loop. Having formed the first loop, insert the hook again close to the first, and pull through a second loop the same size and height as the first loop. These loops will stay in place and will hold each other firmly upright.

BORDER, background and other spaces where plain color is used should be worked in rows from right to left, care being taken to make the loops uniform in size and spacing. If the design in the rug is prominent, hook this first and fill background spaces last.

After the rug is finished and taken from the frame, cut off the extra burlap around the edges, allowing a border of approximately two and one-half inches. Turn this under on the wrong side, whip it down securely, and the rug is ready for the floor. Except for very old rugs which are showing signs of wear, it is not necessary to line hooked rugs.

Some makers prefer to clip or shear their rugs, and if this finish is desired the loops should be pulled through a little higher in the making, and the tops chipped with shears as the hooking progresses. Some women complete the entire rug and send it away to have it sheared, a process which proves to be quite expensive when the maker finds how much of the valuable material has been sheared away. Clipping as the hooking goes along is much more satisfactory and economical.

Hooking rugs is becoming a popular home occupation, requiring only spare moments and some inexpensive materials.

Beautiful antique scroll pattern-rug which serves as model for present-day makers.

Helpful Hints for Christmas

"Carrots, Radishes and Green Peppers Peep Through Christmas Wreaths," says Joan Barrett of Radio Home-Makers Club

An Interview
by
Catherine Adams

FOR years Christmas has caught me unawares; set me into a flurry of last minute shopping; and a rush of preparing the house for Christmas guests. But this year (is it perhaps, a sign that I am growing older?) I am being forehanded. I've been collecting thoughts for Christmas gifts for months. I even have my dinner menu planned. In fact, as I thought it over the other day, I discovered that all I lacked were some novel ideas for decorating the house to make it a true holiday haven for my niece and nephews—who in spite of their veneer of sophistication continue to wax sentimental over an old-fashioned Christmas. But red tissue bells and red and green paper chains suspended from doorways no longer hold the appeal they once had for the youngsters. They are too old to enjoy the miniature figures of Santa Claus and his reindeer which once sent them into ecstasies. "What", I wondered "can I do to make this house fairly radiate Christmas the minute those children enter the door?" And then I decided to take my problem to Joan Barrett, Interior Decorator of the National Radio Home-Makers Club. "She is probably swamped with letters on this very subject," I reasoned. "I'll just sit outside the door and listen in while she answers them."

I found Miss Barrett atop a tall step ladder in the entrance hall of the National Radio Home-Makers Club headquarters. She had a mouth full of carpet tacks and a handful of hammer. A chain of laurel leaves was hung about her neck.

"I'm just trying out an effect," she mumbled, in answer to my enquiring look. Then, while I watched, she skillfully tacked the laurel in place along the picture moulding, robbing the high ceilinged room of its air of formal dignity and giving it an immediate effect of "homeyness" and cheer.

Miss Barrett hopped off the ladder and joined me on the floor. "It does look nice, doesn't it?" she admitted. "It's an excellent stunt for women who have great, formal, living rooms and want to make them look Christmas-like without resorting to the more obvious sort of decorations. If this were in a home, I would suggest draping another little chain of laurel above the over-mantel pictures, unless that were too close to the moulding. In that case it might be placed in the panel between the mantel shelf and the fire opening—not too bunchy a cluster, you understand, but a symmetrical garland, or festoon, harmonizing with the architectural lines of the mantel and carrying out the dignified character of t room. Several brilliant tangerines h concealed in the foliage would give a da of color, and two little spiky cedar tr in orange pots on either side of the fi place would complete the picture."

I HAD a clear mental visi of my own living room dressed up in t way. How stunning the green leaves wo look against the chaste white of my C lonial woodwork; how striking the eff of the orange tangerines with the crea yellow of my walls! "That's just idea I've been looking for," I told M Barrett. "My niece and nephews v love it t I have hal mind to w until they here so t can have fun of help me. But wh can I get laurel?"

"Oh y can buy t of any flori Miss Bar replied. " rather exp sive in so parts of t count though, cause of st laws whi prohibit ga ering it. I were you decorate t house wi cedar branc instead. out into woods yo self to g them and i yoursel

A spruce sprig tied with a red bow will make your entrance hall breathe Christmas spirit.

Decorations

Wreaths
The Tree
Table Decorations

Joan Barrett ties laurel leaves to wire as a foundation for her amusing "vegetable" wreaths.

ristmas tree while you are outdoors. We do that every year at our house," ss Barrett continued. "The Sunday be- e Christmas we bundle into old clothes, vy stockings, and flat heeled shoes; n we get a couple of axes and all four us, the family dog, and often two or e guests from the city, pile into our car. Sometimes we have to travel es before we find a cedar woods that no 'No Trespassing' signs. Once when thought we had found one we were barrassed to discover ourselves in the k part of a cemetery.

Of course, there is always a great deal argument about the choice of a tree. h member of the family favors a dif- nt one. And somehow, we have never n able to gauge the size of a tree ac- ately. In a field or forest, with noth- but larger pines to judge them by, it y look small. But several times we e been amazed to find that our final ice wouldn't go through the front door, ch less stand erect in the low ceilinged ng room."

I'll watch out for that," I promised. ut do give me some tips about selecting ood tree."

Well, the main thing," Miss Barrett d me, "is to choose a symmetrical one h a broad base and gently sloping sides. u can chop it a foot from the ground eed be so that the bottom branches will ep the floor. You can even, if you wish, form a little tree surgery and tie addi- al branches on to cover bald spots. sure to cut some extra branches for king wreaths for your doors and win- vs. I imagine that the youngsters will oy this almost as much as chopping tree."

'Give me instructions," I said. "I'm aid I'll bungle the job if you don't."

"YOU couldn't possibly," ss Barrett replied. "Why in our neigh- hood I know lots of eight and ten year children who earn their Christmas ney by making wreaths. All you need a stiff piece of wire bent in the size cle you wish, some string, and the nches of greenery. There are other nts besides laurel and cedar that serve ually well in this capacity: winter berry, piper berry, hemlock, Southern pine, or en smilax. Simply twine the branches out the wire and tie them in place. A w of bright red ribbon or a cluster of holly, mistletoe, pine cones, or fruit at the top will finish it. Or why don't you combine the evergreen with vegetables?"

"Yes," I couldn't resist saying, "I imagine that a bunch of spinach or mashed potatoes would be very effective—but I'm afraid that would be just a little too modern for my taste."

"THAT'S just where you are wrong," Miss Barrett retorted. "The old Italian masters realized the decorative value of vegetables hundreds of years ago. Don't you remember seeing old paintings and antique china showing bright splashes of fruit and vegetables woven into the dull background of a wreath of leaves?"

I surrendered. "All right I'll do it," I told her. "I'm willing to rely on your taste, and at least my wreaths will be different from any others on the block."

"I wouldn't advise you to go in for vegetables too strongly," Miss Barrett laughed. "You're apt to awake to find rabbits nibbling at your doors. Besides, too much of anything unusual robs it of its individuality. I think you'd better make your window decorations of plain spruce and reserve the more ornamental wreath for your big front door. Make it of spruce branches twined together to form a band about four or five inches wide. As you fasten them to the wire insert small red and green peppers, light hued cucumbers, and parsnips or carrots in the deep foliage. It will be colorful and decorative as well, and you will have the local newspapers clamoring for photographs."

"What else can I do to the outside of the house?" I queried, intrigued with the idea.

"Well, if you have a Christmas tree growing in your front yard, you might fix it up with lights. We haven't a more picturesque custom in this country. And, by the way, while you're thinking of outdoor Christmas trees you might do as my mother always does, and provide one for the birds. Just tie pieces of suet, berries and the like to the branches of a dead tree and watch the sparrows and chicadees come."

"That's a splendid idea. What next?"

"Two little cedars in red or orange pots at the front door would be excellent. Later you can transplant them to your lawn. Oh yes, and then we must plan your indoor Christmas tree. Have you any notion about decorating that?"

"Not a one, although I do know that most of the ornaments we've had for twenty years were broken when the tree fell over last Christmas. I'm afraid that means laying in a new supply."

"Don't do it," Miss Barrett urged. "The old time trees are lots of fun for children, and many people save their glass baubles and trinkets from year to year for sentiment's sake. But the new trend is to dispense with them in favor of an all white or silver tree—and really that's not a new idea either. The Germans have been doing it for generations. My idea for you would be to drape the tree with quantities of silver moss, and silver foil flowers or stars. Use orange electric bulbs to carry out the tangerine idea and place a silver foil reflector in back of each one.

And then for a finishing touch get some silver colored gas filled balloons to tie to the branches; you'll be amazed to see how beautiful they look floating from the tree.

"And then," she continued, "if you want to avoid having the tree fall over this year, screw its container to the floor with tiny angle irons. The marks won't show afterwards when they're covered by a rug, and you can use the same holes next year."

"But what shall I stand the tree in"? I demanded.

"Get those nephews of yours to make you a low, wooden box, lined with oil-cloth, and with a hole big enough for the tree trunk bored through the center of the detachable cover. Then put the trunk through the hole, nail a flat board to its base and insert the tree, board and all, into the box. Fill the box with wet sawdust and adjust the covers. Then screw the box to the floor. It sounds a little complicated, but if you save the box from year to year you'll find the effort well worth the satisfaction it gives you. The wet sawdust will keep the tree fresh and prevent the needles from falling. (You can pour a little more water in once in a while to keep it damp.) And the box painted orange, or green will provide the nicest looking sort of base imaginable."

"Well, then that's settled," I told her, "but while you've been talking I've thought up another problem. The youngsters love the old-fashioned idea of putting lighted candles in the window on Christmas eve. I like it too, but my husband thinks that it is too much of a fire hazard even if we stay right in the house. Yet I dislike those artificial looking electric candles—they seem to take away all the spirit of the thing."

Miss Barrett agreed with me. "But," she said, "I agree with your husband too. It isn't right to chance a fire, when there is a simple remedy. Get some vigil candles—the sort made for altar use in religious ceremonies. They are squatty and round. Each one fits in a ruby colored glass container a little taller than the candle. When lighted they send off a flickering ruddy glow, with practically no danger of fire."

"THAT'S splendid," I said, as I checked off my list. "Let's see, we have the garden, the front door, the living room, and fireplace accounted for. How about decorations for other rooms?"

"By all means have them," Miss Barrett replied. "There's no reason why your Christmas spirit should stop with the living room. You can place wreaths in all the windows for one thing. Or, since you plan wreaths for the downstairs, you might use simply a single spray of holly, mistletoe, or long needled pine in the second story windows. And there should be a sprig of mistletoe hanging from the hall doorway or lamp where everyone must walk under it, and oh yes, some sort of decoration for that beautiful winding staircase of yours. You might twine the bannister with a cha of cedar, if you have enough. Or, if y prefer, leave the railing bare and co centrate on that wall niche at the st landing. I think that a straight standi spray of fluffy long needled pine abo a foot and a half high would be stunnir You can place it in an orange paint flower pot, or in a pottery jug.

"I think that you will find this id of pine branches in pots excellent for t other rooms in the house too. Four sho sprays in miniature pots standing in prim row on the bedroom mantel wou be very decorative. One on either si of the built-in dressing table in the gue room, and another in the corner of t hallway will give the house an air gaiety out of all proportion to the co and effort involved.

"CHILDREN'S toys mal a naive decoration for a mantel, broa window seat, or table top. Avoid usin the more or less banal Saint Nicks sin there are no little children in the famil Modern kindergarten toys are much mo picturesque. You could make a darlin little set-up with Noah's ark figures, parade of wooden soldiers, or with oc modernistic animals, little houses and th like. A miniature Christmas tree with circle of doll children dancing around would be equally amusing. And if yo object to using toys merely for decor tive purposes you can let all the youn sters who called between Christmas an New Years select one to keep. M mother has been following this custom fo years, and consequently is adored by ha the six-year-olds in town."

"There is one topic you haven't eve touched yet, Miss Barrett," I remarke "That is a suitable dining table decor tion for Christmas day."

"There should be lots of candles, c course. And if the table is to be form you might use a single, great poinsetta; c one of those rare Christmas roses, that ar not roses at all, but relatives of th marsh-marigold family. Christmas cac are effective for a modern setting. loose bunch of mountain huckleberry; c dar, combined with straw flowers; spruc with the cones still adhering; bunches c laurel; eucalyptus; or fluffy, long needle pine, are equally effective. Really ther are so many beautiful combinations t be evolved, I can't think of them a now."

"Well," I said, "in an hour you've mar aged to think up more novel and beaut ful ideas for decorating my house tha I've been able to evolve in two weeks. I I get into any more decorating difficu ties, may I call again for help?"

"By all means," Miss Barrett said, "bu we've been so interested in this discus sion that we have talked right past clos ing time. It's been two hours instead c one and I'm going to have to do som tall scrambling to get that five-ten train

Christmas Day Menus

From

Ida Bailey Allen

President, National Radio Home Makers Club

◆

For the Family

DINNER

Stuffed Endive
Cranberry Jelly Celery Olives
Spinach Soup with Cheese Crackers
Roast Fresh Ham Braised Chestnut Sauce
French Fried Cauliflower Potato Puff
Lettuce Salad with Cherry Dressing
Steamed Fig Pudding, Foamy Lemon Sauce
Coffee

Braised Chestnut Sauce

Melt two tablespoons butter; and when it is beginning to brown, stir in two tablespoons flour, one teaspoon salt, one-eighth teaspoon pepper and a few grains mace. Cook until a pale brown in color, stirring frequently. Add one tablespoon minced carrot, one teaspoon minced onion, and one sprig minced parsley; then add one and one-half cups ap stock, stirring constantly. When thickened, add one cup cooked, chopped chestnuts. Let simmer two or three minutes; and serve.

Steamed Fig Pudding

Combine two cups entire-wheat bread crumbs with one cup milk; and scald them. Add four egg yolks, well beaten, and mixed with two-thirds cup brown sugar, one-half teaspoon salt, grated rind and juice of one lemon, grated rind of half an orange, and three tablespoons melted vegetable fat. Sift together one-half cup entire-wheat flour and two teaspoons baking powder. Add one-half cup chopped walnut meats and one cup chopped figs; and combine with the first mixture. Fold in four egg whites, beaten stiff. Turn into oiled custard cups; set in a steamer top; cover with paraffin paper; and steam an hour and a half. Serve with sweetened whipped cream and preserved figs.

◆

Company—Formal

DINNER

Oyster Canapes
Radishes Olives Cranberry Jelly
Asparagus Consomme
Roast Turkey with Gravy
Mashed Potatoes Braised Parsnips
Tomato Creole Aspic with Lettuce
Frozen Apricot Cream Lady Fingers
Coffee

Oyster Canapes

Toast six good-sized rounds of bread in the oven until crisp; and spread with a mixture of two tablespoons butter, one tablespoon minced celery and one tablespoon minced green pepper. Have ready six good-sized oysters, which should be rolled in fine bread crumbs and sauted in enough butter to keep them from sticking. Place an oyster in the center of each canape; decorate the edges with strips of pimento; and serve hot.

Tomato Creole Aspic

Combine three and one-half cups stewed, sieved tomato, two tablespoons minced carrot, two tablespoons minced onion, one tablespoon minced celery tops, two cloves, one-half teaspoon pickle spice, two tablespoons lemon juice, one-half teaspoon salt and two teaspoons sugar; and simmer for ten minutes. Add one and one-half tablespoons gelatin, which should be softened in an extra half cup of cold water. Strain through a cloth; and let stand until it is the consistency of an egg white. Then add one-half cup finely minced green pepper, one minced pimento, one tablespoon minced chives, and one tablespoon minced olives. Mould individually; and serve in nests of lettuce with a garnish of celery curls and stars of mayonnaise.

Frozen Apricot Cream

Combine one quart sieved canned apricots, one cup sugar, one-eighth teaspoon salt, and one cup heavy cream; and freeze in three parts of crushed ice to one part of salt. To freeze in a mechanical refrigerator, whip the cream; and add to the sieved apricots a tablespoon of gelatin softened in water to cover and dissolved over steam. Combine the ingredients, transfer to the freezing tray of the refrigerator; and freeze from three to five hours, according to the temperature; stir the mixture every hour.

Stretching for *Beauty*

By Frances Ingram

Keeping Your Body Alive Brings Beauty To Your Skin

Do Acrobatics? No... But Strive To Become Lithe And Supple

Pacific and Atlantic Photos

A stretch a day keeps the doctor away.

THE OTHER day I received a letter which contained this paragraph: "All my life I have been stretching for beauty. I haven't it. up hope yet, Miss Ingram, and I wish you would tell me how I can my stretching for beauty more table. I'm afraid my stretching isn't igent. Won't you tell me how to ch for beauty and get it?"

ow, of course, what this woman meant that she was reaching out for some- ; which she felt was just beyond her n. When she spoke of stretching for ty, unfortunately she was speaking atively. If this woman actually had stretching for beauty, she would found that beauty was not beyond reach. Women who stretch for beau- *literally* stretch—find that beauty is elusive, for stretching for only a few utes a day does keep old age away. eeps the doctor away, too. It's much er than the proverbial apple. Stretch- also keeps the "blues" away—over- ht "blues" and underweight "blues"— act, all kinds of "blues."

STRETCHING to keep ng, beautiful and happy is not a new ention. It is not a fad. Stretching is ure's way of keeping fit. Stretching is secret of keeping youth and of re- ing youth. Have you ever watched a ed tiger in the zoo? That tiger may been penned up in that 8x10 cage ten years yet he retains his natural ness, sleekness and agility. His per will tell you that the only kind of rcise that tiger gets other than his ited walks is the stretch. His tamer tive, the cat, keeps her figure and th in the same way. Have you ever really watched a cat for any length of time? Some time count, if you can, the number of stretches a cat takes in one day. Or watch a baby. You will find that young humans stretch themselves asleep and stretch themselves awake. It's their daily dozen.

Do the words "daily dozen" sound dismal and military to you? Perhaps they do. Personally, rising at the crack of dawn and swinging Indian clubs has never appealed to me, either. Of course, this type of exercise does do some good things. It sends the blood racing all over the body, bringing your color up and quickening the tempo of your system, but the trouble lies in the after-effects. In this type of exercise people have a tendency to spend twice as much energy as is necessary. This is tiring and makes for awkwardness. You see, awkwardness is due to the liberation of more energy than is necessary to accomplish the required action. Remember when you exercise that the idea is not to become an acrobat, but to become live and supple. If you're one of the people who shy away from the old type military exercise, I wish you would try, instead, natural exercise—stretching.

PERHAPS you are one of the people who think they are getting through life adequately without doing any exercising. If the truth were known most of us shy away from exercise and most of us never get beyond good intentions. For instance, there's the housewife. When I write to a housewife and suggest exercise as part of the solution to her complexion difficulties, she is pretty apt to write back to me and say, "I get plenty of exercise just doing my housework. Why, I'm on my feet twelve hours a day." I don't doubt that she thinks that is exercise. But, unfortunately, it isn't. There are certain parts of her body that aren't getting any exercise at all.

When I advocate exercise for the business girl, she writes back to me and says, "I suppose I should exercise, but I haven't time in the mornings and I'm too tired at night." Now health and an attractive appearance are an asset in the business world. And to keep healthy and attractive, good circulation is vital. The blood must be kept flowing to insure the carrying off of wastes which would otherwise appear as blemishes on the skin. The rebuilding of depleted structures will not go on normally either, unless the blood is kept flowing and flowing properly.

For both the housewife and the business girl—and the business man, too!—there is no better exercise in the world than plain, old-fashioned stretching. Any-

Perfect for school. A raccoon-collared tweed suit with seven-eighths coat.

Fashions for "Sub-debs"

An Interview with an NBC Fashion Expert . . .

Helen Worden

By

JEANNE DUBOIS

THE telephone rang at my elbow. "This is National Broadcasting Company. Miss Helen Worden, one of our fashion experts, can see you at 11:00 A.M. tomorrow morning at our offices. Will that be convenient?"

It was . . . so 10:58 found me on the elevator bound for the upper regions of the NBC Fifth Avenue building. Just as the car door was about to close, a slim figure dashed by the starter, and joined us, slightly out of breath. The young lady was so tiny that I could see right over her head, though I'm not so very tall myself.

WITH the general exodus at the NBC offices, we both alighted, my petite friend scurrying past the reception clerk with an air of being at home, in contrast to my stop for directions.

"Will you wait just a moment?" said the hostess. I sat down and visualized Miss Helen Worden. As Fashion and Society Editor of the New York Evening World, she must be quite an impressive figure. Probably one of those tall, slinky women with perfect poise and a calm, even voice.

"This way," said the page . . . and opened a door to reveal to me my little friend of the elevator!

"Yes, I'm Helen Worden, and I like giving interviews . . . but I'm all out of breath from racing to get here in time. Won't you talk first?"

Relieved to find the Fashion Expert not at all overpowering, I found it easy to explain my mission. With all the interest displayed in fashion articles for women, one seldom finds the needs of the young girl of the *jeune fille* age . . . sixteen, seventeen, or almost eighteen . . . even mentioned. But she is very much interested in her appearance!

Miss Worden agreed with me. "I call girls of that age sub-debs, and although that's a well-worn name for them, there is really no other I can find. They are usually still at school, so most of their clothes, at Mother's insistence, must be *practical*. And how they hate that word!

"But there's no earthly reason for practical things being dull and unattractive. Young girls can wear the new 'bright dark' colors with much more verve than an older woman. Take the new gre which is dark, yet has such a brig woodsy tinge. A thin tweed dress, o knitted frock, in that color will look fre after weeks of attendance in class-roo at afternoon sorority gatherings, and tri to basketball games. You can say t same thing about the color that is call 'bittersweet' . . . it's an orangy r that is particularly good with your fresh complexions. I saw a particula nice tweed suit with a seven-eight length, raccoon collared coat in th color."

"I THINK those shades a lovely," I said. "But so many you girls are wearing black now. Is it co sidered smart?"

"Yes . . . very definitely yes! But wi reservations . . . a bright red leather be or a crisp 'lingerie touch'. That mea a collar last year, but this year it mea anything from a row of tricky little piq tabs right down the front of one's dre to a triangular 'revers', or flap, fac with crêpe, which may be worn buttone with white facing peeping out, or u buttoned and openly flaunted."

"Are these dresses that you are d scribing all in some variation of wool? I asked.

"No. Silk crêpe is just as fashionab and has the merit of being able to d double duty, if your sub-deb is going o to tea or an informal evening party. Litt bows of fur or bright embroidery are ne

ot this season, but the young girl
d always try to keep her dresses as
e as possible. Her afternoon dresses
d never be very long, and she'll find
- and simple flares much more effec-
than elaborate effects.

"YOU seem to be trying to
ve all the thrill from our sub-deb's
robe," I said. "You know, after
have graduated from their gangling,
gs-and-arms 'teens period, they like
splay their newly acquired charm
grace."

nd who can blame them?" Miss
den responded.

But you've accused me too soon. Re-
ber I've been talking thus far, about
ol things. When it comes to party
s, our young friends may be as fluffy
frilly as they please.

But be sure to tell them that sophis-
ion is not the right keynote this year,
for real debutantes, so it certainly
the thing for young girls. Tell them
apitalize their youth . . . to choose
gs that are just as soft and naive and
aling as can be.

w one dress in
Fifth Avenue
not so long

ck, and several
hers which I have
mind for sub-
bs," volunteered
iss Worden.

"That will be
ry kind of you,"
said. "Pictures
the things
you've described will help our *jeunes filles*, I'm sure."

Some one opened the door and a sudden cold draft reminded us of outdoor things.

I inquired, "Should young girls wear furs?"

"Yes," said the pleasant-voiced NBC authority, "but there are certain furs which belong, because of their inherent qualities, to youth. The first one I think of is lapin. Way back in the days when my grandmother wore a 'pelisse' or little short jacket, it was liable to be lapin . . . only she called it rabbit skin. Last year saw the fashion revived, and this year finds it even more strongly entrenched. The fur is so soft and easy to manipulate that it can be belted, or flare slightly and still not appear bulky. It's being used for those tricky short jackets that are so becoming to your sub-deb, as well as for long coats."

"IT'S inexpensive, too, isn't it?" I remarked, returning to the practical end of the discussion.

"Very," replied Miss Worden. "No young girl should wear elaborate furs . . . girls from fashionable schools whom I see lunching at Pierre's before an opera matinee always choose furs like lapin, kidskin or beaver . . . verging on the sports furs. And when they go out in the country they like the warmth and sportiness of raccoon."

"And what have you to say to the girl who wants a cloth coat that is thrillingly new?" I asked.

"Lots and lots. She'll like the big furry collars which frame her face so charmingly, and the tight little belts that only the slender young girl can wear at the exact normal waistline, and the boleros and slightly flared skirts. In fact, I'm sure she'll find so much to enchant her that choice will be a difficult matter."

"Now, can you give me one last exciting piece of news for my sub-debs?" I asked.

"M-m-m. There's a new sort of evening wrap which is made specially for her first prom. It's called the 'bunny coat' and that's just what it looks like. Soft white lapin, and she hugs it tightly around her chiffon or satin or moire frock, knowing that she looks too adorable!"

"Now I must run away and leave you, for I'm due at a fashion show, and then a tea, and tonight the opera. But I'll send you those pictures I promised. Heavens! It's 12:15. Let's go."

SO THE elevator operator heard my thanks to Miss Worden, on behalf of all the sub-debs who will find her helpful . . . just as the elevator operator had witnessed our meeting.

Courtesy Best & Co

(Left) Soft blue chiffon and Alencon lace make a sub-deb demure but ravishing. (Right) The bunny jacket with its flattering white fur makes a perfect first evening wrap.

The pictures sent by Miss Worden appear on these pages . . . and the lapin sports coat and woolen school frock with white tabs appear in the Rotogravure Fashion Section on Page 45—Editor.

How to Enjoy Symphony Music

Every Orchestral Work Is A Pattern of Tones . . .

Comprehension of the Underlying Theme

Brings Pleasure in Good Music

By

WILLIAM BRAID WHITE

Doctor of Music

This is the third of a series of articles on the inspirational appeal of good music. Dr. William Braid White will be glad to answer in his articles, any questions about music. Address him in care of Radio Digest—Editor

Dr. William Braid White

MUSIC is a form of expression just as is poetry or the drama. Dance music—what is called jazz—is a form of music, and decidedly, too, a form of expression. Jazz is very fascinating, for the rhythm on which it is built tickles the toes and sets the feet jiggling for young and old alike. Yet, it is the worst kind of mistake to suppose that the only function of music is to tickle the toes and make the feet dance. Music has other things, of greater importance than that, to do. It has its feet-jiggling function, of course; but that is not its only or even its most interesting, function. The real task of music is to give expression to those emotions which cannot be put into words.

So it happens that when a lover and his lass are experiencing towards each other those feelings, at which a cynical and older generation laughs but which it envies none the less, they often find that music speaks to them with a power and a persuasiveness exerted by no other means of expression. The girl may be the silliest of little flappers and the boy the rawest of lob lollies; but each finds the stupidities, the crudities and the shallowness of everyday conduct suddenly taking upon itself sweet and grave loveliness. To each of the pair of lovers the other is sublime. Each finds opening up in the soul depths of feeling never before known to exist. Then, it may be, music comes along an their unspoken thoughts find an utteranc deeper than words could give. They ma be silly about it. The tune may be cheap little sentimental piece of slop, i the ears of a sophisticate at least; but t these naive yet admirable lovers it ma speak with all the mysterious beaut which Beethoven has written into the slo movement of his Ninth Symphony. Here music is taking its rightful place as in terpreter of the soul. Brahms worke on his First Symphony, that gigantic drama, for twenty years before he fel satisfied with it. Music, to put it briefly is the result of concentrated intellectua passion and power.

Beethoven had meditated for ten years before he found the exact forms into which to cast the leading tunes which he needed for the Ninth Symphony.

Pattern and Power

Just now you are having presented to your ears concerts which are giving you some of the best that will be done in musical performance during this season. Considering that you will be having op-

ities to hear the New York Philnic Symphony Orchestra, the Roxy Philadelphia, not to speak of the t soloists and ensemble players ill be heard on the air, it is evihat you will be much better preto hear them with pleasure if you in in advance a few basic principles musical art.

ic is the result of intellectual power to bear on sound. It is always a as I said last month, and it is ern of sounds just as speech is. is articulate sound, and music is but both speech and music mean until they each have been ar- in a pattern.

ne is a pattern. A simple tune is le pattern. It is a fact that the t music is based usually on very patterns. It is the working out se, the combining of them with patterns and the gradual evolution ast and intricate pattern, like that Oriental rug, which makes music herent significant thing that it most ly is.

next time you listen to music of gher kind, think of the pattern of iental rug. In a cheap domestic the pattern is crude and staring. annot for a moment mistake it. owers or other conventionalized deblend together in the most obvious If your eye is not trained to appre- fine shades of color or intricate ng of beautiful patterns, you may lling to think that the cheap carpet te nice. Now try studying an Ori- rug. At first sight a very fine al may often appear to have no n at all. The color shades are subtle and lack the noisy brightness eap, new carpets. The pattern too y intricate and often it is hard for practiced eye to see where it begins ds. A little practice in seeing soon ls, however, that there is a plan form behind all the apparent comy. A certain comparatively simple rn will be repeated over and over . woven into the texture of the rug d by thread, as each of the thou- of threads is knotted and cut off ately with loving care. Once your grasps the basic pattern the whole scheme falls into a proper perspective and you find yourself admiring your rug understandingly. You now are no longer just looking, you are perceiving. You have ceased to be a mere starer and are on your way to become a connoisseur of Oriental rugs.

So it is with music. When you are listening to the simplest tune you are listening to a pattern of tones. When you hear the most elaborately worked out orchestral work you are listening to a more elaborate pattern. Basically the two are one.

Musical Terms

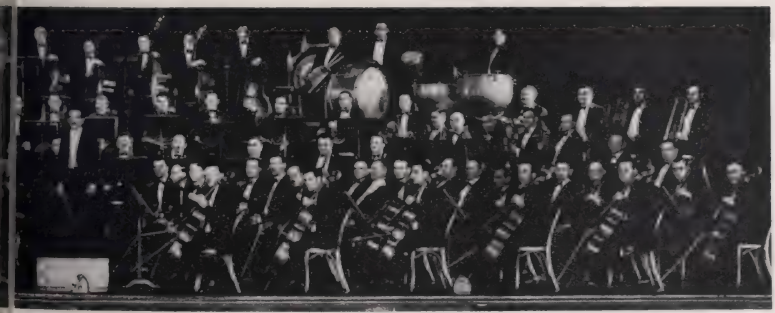
By the way, here are one or two explanations to stow away and keep in your mind, to help you as you listen during coming weeks.

Symphony: The largest and most formal of all musical works. It is written for the grand or symphony orchestra, of which I talked last month. The orchestras like the Philharmonic Symphony of New York, the Chicago, the Philadelphia, the Boston Symphony, the Cleveland, the Roxy and many others of which you hear, are symphony orchestras in the right sense of the term. Dance orchestras or small ensembles are not symphony orchestras and should not be confused with them. A symphony is a gigantic tonal pattern intended by its composer to express some large scheme of thought and emotion, which he puts into tones as another man would put it into speech, into a novel or into a painting. A symphony is nearly always divided into four sections, called "movements".

The first movement in a symphony is always built in the most careful way as to pattern, woven with all the patience and skill of an Oriental rug designer. It usually has two leading tunes . . . "themes" . . . or tone patterns, the first sounded at the very beginning, and the second later, after the first has been impressed sufficiently upon the minds of the hearers.

The second movement of a symphony is usually an extended song-like expression, revealing the deepest emotional thought behind the composer's conception, just as the first movement usually reveals

Erich Kleiber, brilliant young German conductor, who won plaudits in his first season with the New York Philharmonic Symphony Orchestra.



his sense of power and his ability to deal masterfully with the ideas that come to him.

The third movement, known usually as the Scherzo (Italian word meaning joke or jest) is a jolly contrast to the first and second, bringing out the lighter side of the basal thought. The fourth movement or Finale is a great summing up of the pattern thoughts and a statement of them usually in a triumphant and decisive form.

Some sarcastic musician once said that the first movement of a symphony shows how skillful the composer is, the second how deeply he can feel, the third how loudly he can laugh and the fourth how glad he is to have brought the thing to a successful finish. But you must not take this too literally.

Sonata: A symphony for one instrument or for two. It is smaller in magnitude but the same in general plan. Beethoven wrote symphonies for the orchestra and sonatas for the piano. The basal plan is the same in both. A symphony or sonata written for three instruments is called a Trio, for four a Quar-

WANTS PICTURES OF NBC ANNOUNCERS

I AM A reader of the Radio Digest and think it is the most popular monthly magazine of its kind. It has been my desire to have the pictures of the NBC announcers and I would like to know where I may acquire them.

This is my first letter to the Radio Digest and I wish to become one of the many members of the V. O. L. Club, for I enjoy reading each interesting letter in print.

—James H. Harrison, Otto, Tex.

Write National Broadcasting Company, 711 Fifth Avenue, New York. Also see November and December Marcella—EDITOR.

AS AN interested reader of your publication I certainly enjoy its features. No doubt the leading Radio team on the air is "Amos and Andy," and they certainly deserve all the comments and write ups which you are giving to them, but why not see who on the air is second to this wonderful team as far as Blackface is concerned, and make mention of them.

My choice would be Koffee and KoKo, two local youngsters who in my opinion have mastered the colored dialect. I have listened to these boys since they have started to broadcast and they have shown wonderful improvement. They started not quite a year ago to broadcast on the smallest station in Buffalo, WEBR and of late they have been a sustaining feature on Buffalo's largest and best station WGR.

Wishing Koffee and KoKo loads of success and also your wonderful magazine.

—Mrs. J. E. Morris, Buffalo, N. Y.

THREE LETTERS FOR DX LISTENERS

JUST fifteen years of age, and I am secretary of the American Branch of the "Anglo-American Radio Society".

This club (A. A. R. S.) is headed by Leslie W. Orton of England. Branches are being organized everywhere. This is the best feature of the society. Each branch is to keep the other informed of changes in power, etc., and to furnish all information possible concerning locally-made Radio apparatus.

Will you please print the foregoing in V. O. L.? I feel sure it will help me in my quest for members, and I'd appreciate it very much.—"Enthusiastic Bug"—John Malone, Secretary, A. A. R. S., Box 195, Lacon, Ill.

I am a DX fan with confirmations from over 180 stations in U. S. A., Cuba and Canada and would appreciate very much hearing from anyone who can give information regarding broadcasts from the following places:—Oregon, Delaware, N. Hampshire, Montana, Maine, Idaho, Vermont, Nevada, Wyoming, Arizona, South Carolina, Rhode Island, New Brunswick, British Columbia, Saskatchewan, Prince Edward Island, Cuba and Mexico.

Trusting some kind readers and listeners will be able to give some information.—W. Dyson, 72 Cambridge Ave., Hamilton, Ontario, Canada.

YOUR letter and the new Radio Digest arrived this week and I agree that the new publication is an improvement. I wish you the best of success and feel sure it will be forthcoming since the magazine is really worthwhile.

I enclose a copy of our little publication. I hope you find it interesting. This is published each month by the International Short Wave Club which has a membership covering 37 countries and possessions at this time. If you would care to mention this organization in your new magazine, we would certainly appreciate it.

The club is composed of short wave enthusiasts living in all parts of the world and was organized just a year ago. Information on short wave stations and developments are gathered from all corners of the world and printed in our magazine each month. We welcome every reputable person to membership. Fifty percent of our members act as reporters in gathering material for publication. It is not a commercial project and is owned, edited, sponsored and advocated by the short wave listener.

Wishing you continued success, I beg to remain,—Arthur J. Green, President, International Short Wave Club, Klondyke, Ohio.

APPLAUSE FOR LINDBERGH ARTICLES

THANK you for your two articles on Col. Charles A. Lindbergh, and for reprinting the text of his Radio address. You may be sure that when I see the magic Lindbergh name on the covers of your magazine, I will not hesitate to buy it.—M. B., Rochester, N. Y.

* * *

LESS JAZZ, SAYS ELVA

I AM A regular reader of Radio Digest and about the first thing I look at is the Voice of the Listener.

I am wondering why you never say anything about the Southland Singers, or Hank Simmons Show Boat or Seth Parker. You seem to have a lot to say about orchestra leaders. They are all right and so is their music. But I wish you would tell us something about these other people. (*Sorry you missed our Seth & Hank feature. Editor*)

As for Amos 'n' Andy I am for them. Am glad they are on earlier so we don't have to wait so late and miss our beauty naps. So let's give these jazz band leaders a rest and praise the other folks a bit.

I suppose if my letter is worth publishing some folks will call me an old "fogy" but I don't care for jazz music and I don't care who knows it. How about it? Let's hear from somebody else. —Elva Cobler, Garrett, Ind.

* * *

MR. METZGER LIKES OUR FICTION

BEING a Radio fan and an interested reader of your fine Radio magazine, I was much pleased in going through your September issue to see the article about WHAS (our best home station).

One thing which struck me as being rather odd, was the fact that there was no mention made of the two boys who put on an act called "Joe and the Cap'n." To me and many of my friends, this act is by far the best coming out of WHAS. We believe it ranks with many of the large chain offerings.

I enjoyed your Rupert Hughes story very much. I hardly see how your merger could make your splendid magazine much better! —Philip Metzger, 1729 W. Market St., Louisville, Ky.

* * *

AND MRS. STEELE DOESN'T!

I COME directly to you about the Radio Digest for it is rotten. I subscribed for it last October and a few numbers were good, only I do not like the stories. The plots are not complete, the poison grapes in Gigolo were vague and all through the stories there is a vague untruth.

What the public wants of a Radio Digest is pictures and true histories of the studio staffs of the stations. Too much Amos and Andy lately. One writeup of artists like they are and then go to others just as good. One Floyd Gibbons—he is all right, but sell him once and then sell others better than he. The pictures for your stories are hideous. Stop it—[illegible] ruin the Digest!—Mrs. Cady Steele, [illegible] Liberty, Ind.

* * *

HE KNEW US WHEN WE WERE "T[illegible] HIGH"

I WOULD like to know very much if [illegible] plan to publish any more of those big b[illegible] books which are entitled, "Radio Diges[illegible] lustrated."

I have always enjoyed reading the Di[illegible] We have a big stack of them here at h[illegible] These are from way back in 1921, 1922, [illegible] and so on. I liked the old way you made [illegible] back in the years mentioned above. They [illegible] made from paper like the big newspaper[illegible] made from. Boy, I sure enjoy reading [illegible] old books every time I see them. They di[illegible] have stiff backs then. I sure have receiv[illegible] lot of valuable information from them [illegible] will always boost them. Wishing you suc[illegible]

—George B. Myers, Silver Grove, K[illegible]

Radio Digest Illustrated (in bound volu[illegible] is no longer published—EDITOR.

* * *

MORE DETROIT NEWS SOON

THIS is my début in writing to you[illegible] wanted to get acquainted with V. O[illegible] even better, so I am writing and expres[illegible] some of my views.

First I would like to say that I like R[illegible] Digest a great deal but wish it contained [illegible] Detroit News. Detroit has only five stat[illegible] but they are all good. WWJ has ten yea[illegible] good service behind it, WJR has 5000 w[illegible] and deserves it, for their fine programmes [illegible] serving a large territory. WXYZ is a Colu[illegible] station and offers the best programmes in[illegible] city, while WMBC and WJBK offer many[illegible] teresting and varied programmes. A [illegible] Rad-dio Fan.—Lewis C. Frank, Jr., [illegible] Webb Ave., Detroit, Mich.

* * *

WE PROMISE MORE WSMB NEWS SO[illegible]

I RECEIVED this day the latest issue of [illegible] Radio Digest, and am pleased to be n[illegible] bered among the subscribers to such an[illegible] cellent and instructive magazine in the [illegible] of Radio.

Even before I became a subscriber, and s[illegible] after I became the Radio fan I am to-da[illegible] which dates back to April, 1925—at wh[illegible] time one of our best Radio stations in this cit[illegible] WSMB—first came on the air, I used to [illegible] chase, from a local Radio dealer each w[illegible] (you remember, the Radio Digest appea[illegible] weekly, then), your paper.

Likewise, I have also witnessed the rise [illegible] its present position in the field of R[illegible] broadcasting, that excellent Radio broadc[illegible] ing station I mentioned in the above paragra[illegible] WSMB,—but its pinnacle has not yet b[illegible] reached, I know, and, though you have, [illegible] various times in the past, given this stat[illegible] favorable comment, I am looking forward [illegible] a newer writeup in your magazine soon

Rolf George, 6153 Catina St., New Orle[illegible] La.

* * *

FOR THORGY SEE NOVEMBER MARCELLA

WHY not give us a picture of Edw[illegible] Thorgerson. I've been hearing him [illegible] nounce for several months now and I'd like [illegible] know how he looks!

Listener

d I want to put in a word for Amos 'n' . I may not be a "high-brow" but I do d myself as reasonably intelligent—at sufficiently so to take care of a responsible ion—and I thoroughly enjoy their ex- nces—if Miss Lucy Barrett—or any one loes not like their entertainment all they to do is turn a dial or two—unless have a poor Radio—and in that case they ld get a new one.—A. M., Richmond, Va.

* * *

EAD PHIL COOK'S "THRILLS" IN NOVEMBER RADIO DIGEST

EASE let me add my voice to that of Mr. d Mrs. Jennings, Caro, Mich., to have one interview Mr. Phil Cook and tell us thing about him. Publish his picture and a picture to those in his audience that one. I am sure no one, working alone as M Cook does, gives more real enjoyment he does.

our article about the Cheerio family was llent and your magazine is a fine medium ugh which the unseen audience can get a pse of the artists and realize they are real .—Grace Rodman, Allendale, N. J.

* * *

SHOULD CHEERIO REMAIN INCOGNITO?

I WAS surely some surprise to find that adio Digest had moved to New York City, re several Radio magazines have not sur- d. We sincerely hope it will not mean the of the Digest!

e have been reading it almost from the issue in 1922 and it has always been in- sting, and during its several changes its ke up" has been satisfactory to us ners.

'e thank you very much for the "Cheerio" its' pictures, but were disappointed that did not get Cheerio himself, who, we think king the wrong attitude and carrying the gnito too far. We think faith in unseen gs is not easily acquired and has to be in- ted, and so we may lose interest in his of the "Cheerio" Program if he con- es to be so conservative. It completes the ner's interest, if we can read of, and see the ures, of those we listen to through Radio. -Mrs. Servior Mitchell, 9 Webster St., le Falls, N. Y.

* * *

ST WISHES FOR SPEEDY RECOVERY

HAVE been lying flat on my back in the ospital for nine weeks with a cut and broken I have had my Radio beside me all ing this time. Between the Radio Digest my Radio I have managed to get along fine hout getting too tired. Do I enjoy the lio Digest? I certainly do!

have read the Radio Digest for a year and e always enjoyed it, but never before have ot the full value out of the magazine. I v read every word of it and will continue to so from now on.

his is my first letter to you but there will bably be more.

More power to your column and to the dio Digest and congratulations on the tember number.—Harold F. Baker, Win- d, Kansas.

WHICH IS MOST POPULAR ORCHESTRA? RUDY VALLEE? - GUY LOMBARDO? COON SANDERS?

MRS. JOHNSON certainly started something. The mail man is staggering under his daily burden of letters for V. O. L. We, of course, remain editorally impartial—Editor.

* * *

ONE VOTE FOR RUDY

ALTHOUGH I read Mrs. Johnson's denouncing letter in V.O.L. about two months ago, it has taken me until now to get cooled off enough to write to V.O.L. with some more needless defense for Mr. Hubert Prior Vallée without flying into a rage and throwing so many more tables and chairs out of the window the way I did when I first read it. (Slight exaggeration? Perhaps, but).

I've found that usually the ones who hate him so, are the ones who know little or nothing about him. I know several *men* who have come in more or less personal contact with him and they all say he is as "square," and as much of a "regular fellow" as is possible for anyone. Who could say more?

Give us more about Rudy, "Radio Digest," (and don't forget to show this letter the way to V.O.L.)—Another "Heigh-ho"-minded fan. Louisville, Ky.

* * *

ONE FOR GUY LOMBARDO

SOMEONE found Rudy Vallée an inspiration for writing poetry, but for me no man, great or good, could induce me to write poetry about him. Mrs. Johnson, I am surely with you when it comes to Rudy Vallée.

In my estimation Guy Lombardo has the best orchestra on or off the air. Can you find me a trumpet with a better tone than the one in his orchestra? Can you find me an orchestra that has better time? Or a better balanced orchestra? Can you find a man who divides up his "leads" better? (Instead of giving them all to one instrument.) Can you find an orchestra that can play all types of music from the blues to the waltz? And I give these as my points in trying to persuade you that Guy Lombardo and his Royal Canadians are the best orchestra "this side of Heaven."

—Ygontou, New York

* * *

ONE FOR COON SANDERS

I HAVE never seen Rudy Vallée and have never met him, therefore, I cannot give an opinion. I am merely writing this article in defense of Coon-Sanders, who happen to be very personal friends of mine.

I think it is very unfair to implicate Cooney and Joe in such a ridiculous dispute. Their Radio audience comes before anything else, and they have done more for charity and more wonderful things for the less fortunate and invalids than any orchestra leaders in the country. They are both very high-class men with wonderful personalities, and treat everyone royally. They have received as high as 500 requests in 4½ hours, which proves that they have a marvelous outstanding orchestra, and do not deserve any nasty slams.—Walter Hoffmann, Jr., Milwaukee, Wis.

* * *

AND COME OTHER NOMINATIONS

MOST everyone enjoys Rudy Vallée's orchestra of course. But why give so much space to one orchestra, when there are so many other good orchestras, worthy of a little praise? Gene Fosdick's orchestra—who could sit still when that band strikes up? And Ted Weems, Jimmy Green, Boby Meeker, Herbie Kay!—M. M. S., Milwaukee, Wis.

* * *

I DO not see why these ladies in the October issue laugh at Mrs. Johnson, Jacksonville, Fla. Rudy Vallée is not what he is cracked up to be. Rudy does play the better class of dance music, but he cannot touch Ben Bernie. Listen to Ben. over WBBM, Chicago, Wed. 10:15 p.m.—An Orchestra Leader, Toronto, Can.

* * *

I'VE just finished reading the October issue of the Digest and as usual I've made a thorough inspection of the V.O.L. department.

While I don't want to insult or "slam" Rudy to any great extent, just the same I certainly believe that there are plenty of dance orchestras in the country that are way ahead of him.

If I were to name five orchestras that I considered the best in the country and certainly better than Rudy Vallée I would mention Coon-Sanders, Don Russo, Jimmy Green, Guy Lombardo, and Art Kassel in the order named.—Charles S. Clarke, Asheville, N.C.

* * *

48 . . . 49 . . . RAZZBERRY!

AFTER absorbing all of that excitement over our Rudy. I thought I'd better put my two cents in, too, and congratulate Mrs. Johnson on her remarkable discoveries about Rudy Vallée. No doubt she knows him personally and has thus been enabled to reveal to us unsuspecting victims the falsity and shallowness of this horrible impostor. For this great service to mankind we intelligent readers of Radio Digest should immediately take up a collection of lead slugs and cigar coupons and present Mrs. Johnson a silver-plated razzberry dish and a gold pickle fork. Many a life has she salvaged from the clutches of this sugar-tongued crooner. She has further given succor to his victims by revealing how they have been fooled into overlooking his "ugly" features and "unattractive" face. Say, these Radio artists have a lotta crust if they think we intelligent fans are gonna stand for a homely face!—Anne, Lake Placid Club, N. Y.

* * *

MRS. JOHNSON REPLIES!

FIRST may I answer briefly the Vallee fan of Portland. Me.

I must say that it is an ill wind indeed that doesn't do some little good! So my statement caused your first contribution to V. O. L! I must give myself a pat on the back, for the discovery of your wonderful talent and genius. You must continue to entertain us with your opinion and ideas. Please, after this, direct your comments and suggestions to some one who will be interested in what you have to say. It is of no consequence whatever to me what you think about Rudy; you have a perfect right to hero worship if you so desire. But remember. this is a free country and I have the privilege of expressing my personal opinion just the same as you have, so indulge to your heart's content, but remember don't direct your information to me personally.

Now for the Arkansas admirer. Why be so cruel and partial, and not want the magazine if it doesn't have Rudy's pictures? Give the others a break. As the distance is too great for a duel, and I am very much of an amateur in regard to fighting over dream lovers, we will have to call it a draw. However write a note to Santa Claus, and tell him all about it. Ask him to bring you a whole book of Rudy's pictures. He will understand heart throbs like yours best of anyone.

In closing, let me again express my admiration for Guy Lombardo. He already has a host of loyal fans to sing his praises at all times!—Mrs. Johnson, Jacksonville, Mo.

Out of the AIR

HITS—QUIPS—SLIPS

By INDI-GEST

From 1 A.M. until dawn the other night Indigest was in the throes of a horrendous nightmare. No, it wasn't a Welsh Rarebit dream, because Indi doesn't have the least partiality for cheese; nor was it qualms of conscience that caused the racking mental pains of that frighteous night. Besides being horrendous, that nightmare was terriblific, alarmful, petrificatory, appallifying, formidibaceous and made me shquiver all over like a naspenleaf.

It was worse than that, 'n all because there were so many good things from contribs this month that I couldn't make up my mind about the big prize winners. About 1:15 A.M. a five dollar gold piece and three big round silver dollars with legs like the circus giants' started to chase me. They took up their hunt way out West at KFRC in San Francisco and hounded me all the way East to WQAM down in Miami. And whenever I sat down by the roadside to rest my painful joints and callous feet a contributor would rise up beside me and say I DESERVE THAT BIG FIVE DOLLAR PRIZE! DO I GET IT? NO? . . . BANG! BANG! BANG!

And I would jump up, afraid of being peppered with buck shot or even shrapnel (in Chicago it was a bomb) and run some more.

It ended when somebody was about

to bang me on the head with an Indian war club that looked more like an Alaskan totem pole, and I found the back of my head black and blue from rolling on the floor and hitting the bed post on the way down.

The next day I made up my mind to quit worrying and give *two* prizes of five dollars each as a nightmare preventive for myself. One goes to Helen Mary Hayes for her Jabberknocky, on this page . . . and the other to Mort Clemson for his "Musings of a Radio" which you'll come to if you'll just be patient. Now, don't be turning the pages over, just to see it . . . it's against the rules to read the last page first.

HOW TO CATCH FLYS

Rocky Austin, the Song Rambler of WJAY, has become an inventor.

Rocky: Well folks, I'm going to tell you about my invention, the very latest in fly-catchers.

Place a step-ladder against the wall of your room. On the top of the ladder construct a platform and in this platform place a trap door.

This is how it works. The fly walks up the ladder to the platform. He

starts walking around on this and behold, he falls through the trap door into an ice-cream freezer where he is instantly slain.—*Charles Burwell, Magnolia, Ohio.*

Here is a letter I got from Imp, who sent me a recipe for cement custard not so long ago. I know it gives all of you a thrill to read some one else's mail, so I'll be good to you. She writes:

"So my 'Invalid's Custard' sounded good, but if I should send cake, by the time it reached Indigest it would be a brick! Well, which would be the most satisfying, cement or brick? I might make some fudge for you, Indi-Gest (able). How 'bout it, Indi-Gest (ion)?

Thinkin' and talkin' so much 'bout YOU I have Indi-Gest (ion) on the brain, 'stead of, well, where do you have IT?"—*Imp, Detroit, Mich.*

You can tell IMP for me that I'm not saying anything . . . but . . .

Cash for Humor!

IT WILL pay you to keep your ears open and your funny bone oiled for action. Radio Digest will pay $5.00 for the first selected humorous incident heard on a broadcast program, $3.00 for second preferred amusing incident and $1.00 for each amusing incident accepted and printed.

It may be something planned as part of the Radio entertainment, or it may be one of those little accidents that pop up in the best regulated stations. Send your contribution to Indi-Gest, Radio Digest.

JABBERKNOCKY

(After Lewis Carroll—quite a ways)

'Twas graham, and the squishy blone
  Did blat and guggle on the air.
All rudy were the sexophones
  And the blue grumphs were there.

Cum see, cum sa, the zigradoons
  Made skreaking skirl like ghosts in pain.
  All dirgeous were the symphotoons—
  They bibbled soft again.

What are those awful sleemish growls,
  Like avalanches on tin roofs?
It is the Staticus that howls
  With thunder in its hoofs.

Then buckle on my tuba sharp,
  Tie on my piccolo so blue;
I'll polish up my stout jewsharp
  To run him thru and thru.

All day he sought the Staticus
  With grid screen and skerflump.
The short waved monster did percuss
  And skriffle with its hump.

At length he tracked it to its plish,
  He ran its generator thru.
The monster squiffled in a trish,
  Fell wrackling in the sklew.

Come to my arms, my roxy seth!
  He relayed in his joy.
For thou hast slain the minimeth—
  Thou art the sunshine boy!

'Twas graham, and the squishy blones
  Did blat and guggle on the air.
All rudy were the sexophones
  And the blue grumphs were there.

Helen Mary Hayes
Lincoln, Neb.

WTAM at the conclusion of a song sung by a lady artist:—

Announcer: Oh how I would like to make you happy.

Lady Artist: How nice of you.

Announcer: Beg your pardon Miss —— I was only announcing the next number.—*Arthur Day, Sergent, Ky.*

A UKELELE STRUMMING LORELEI

May Singhi Breen claims that she has n indefinable something that attracts sh, but Peter de Rose says no, *he* is n expert fisherman. The discussion ook place while the popular couple, eatured on NBC programs, were on a shing trip on Twin Lake, N. Y., with party of friends.

One morning May and Peter put out a canoe to try their luck. But the sh wouldn't bite. May, tiring of the ort, picked up her ukulele, which she ad brought along, and began playing. hree of the strings immediately happed. Peter was elected to do some- ing about it, and in the spirit of fun, ubstituted some of the fishing line on he instrument.

The plan worked better than either f them had expected, and May con- nued her strumming. Soon the fish egan biting from all sides. The bot- om of the canoe was filled with choice atches. They rowed triumphantly ack to shore to find that other mem- ers of the party, who had been out onger than they, didn't have a fish to how for their efforts.

May insists that it was her playing hat lured the fish, and not any re- narkable skill on the part of her usband.

May Singhi Breen allures the fish with her uke

A SHORT STORY

Karl Stefan, WJAG, gave this news ulletin:—

A Chicago man was bathing his feet n benzine because his feet hurt him. He was also smoking a cigarette.

Benzine — Cigarette — Siz! Boom! Hospital. — *Frances Cherry, Wayne, Nebr.*

FIRST THEY STOP THE BOAT

Heard this one from WCCO:—

Tim and Ole were on the ship Europa bound for Europe.

Ole: Tim, why do they send a letter to a man when he falls overboard?

Tim: Send a letter? What do you mean?

Ole: Well, I asked a sailorman what they did when a man fell overboard and he said they dropped him a line.— *Irving Webber, Fairmont, Minn.*

This one proves that politicians in Canada are like those everywhere else.

During the recent election campaign in the Dominion, the Hon. R. B. Bennett had just finished his final effort to win votes, presenting his platform with due credit to himself. When he finally concluded his remarks station CKX at Brandon played "Give Yourself a Pat on The Back" as a sign off number!— *Kenneth R. Perry, Hartney, Manitoba, Canada.*

'S A CUTE STORY

Heard over WLW:

"Two college boys were returning to the dormitory, after being out all night. They saw an angleworm. One of the boys observed, " 'S a cute angleworm." " 'S a right angleworm," argued the other.

"Aw, don't be so darn geometrical."

That's what hootch does for one.— *Mrs. Judson W. German, Atlanta, Ga.*

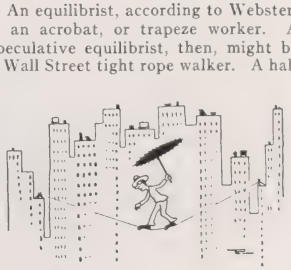
Those cute angleworms remind Indigest of this worm story, which just must be announced with a Noo Yawk accent.

Goitie and Mabel sat on the coib, reading the Evening Woild.

Said Goitie to Mabel, "There's woims in the doit,"

Said Mabel to Goitie, "Woims don't hoit."

So they went on reading the Woild!



That's the way the rest of the country thinks we New Yorkers talk. But we really don't. Actually, it sounds much worse.

* * *

On September 25th Floyd Gibbons' snappy wind-up had to do with plants, trees, etc. His parting shot was "And until then, listen to the sap." After which Edward Thorgersen made the concluding announcement!—*Florence Haist, Lindenwold, N. J.*

Does anyone know what a "Halterophilist and Speculative Equilibrist" is? If you do, please, oh please, allay my curiosity and tell me, quick, quick. Indi-gest got a contribution (which we were obliged to decline) from someone whose letterhead describes him as such.

An equilibrist, according to Webster, is an acrobat, or trapeze worker. A speculative equilibrist, then, might be a Wall Street tight rope walker. A hal-

terophilist is not in Radio Digest's big dictionary but might be derived from . . . phili, fond of, and halter . . . one who is fond of halters. Complete definition then, of halterophilist and speculative equilibrist is a Wall Street tight rope walker who would like to be (or ought to be) hung. But if you can offer a better definition, please shoot it in.

Six thirty, the kids just turned me off. I'm sure glad when I have digested little Tommy Jack Rabbit and Billy Ground Hog. There should be a law to keep these bed-time stories off the air, at least when a coast to coast super-six like me has his switch turned on. We Radios have too little to say about what is done with or around us, and still we talk fifteen hours a day; is that right, I ask you?

O, O, here comes the old man himself, just home from the office and all tired out, but even if he is, he'll not be too tired to tune me until midnight. The guy that owns me is the champion dial fighter of the world, never satisfied with what I give him.

Honest, he thinks I'm a Robot, I guess. He tunes in a three-piece band and then gets sore at me because I don't make it sound like a full symphony. And on top of that, some of these broadcasting stations have been handing us Radios a lot of sourdough music. For example: 'eek, 'ssh, 'ugh, tell me who can make that kind of bunk sound like "Home Sweet Home" or "Asleep in the Deep." You know, some time, I'm gonna get sore and paralyze a couple tubes.

The other night, the old man had a house full of company and was telling 'em what a wham I was at bringing in distance. First crack out of the box he gets rough with me and made me mad, so what do I do to get square with him but mush the call letters on every distant station he tuned in; was he sore at me? He said that for two cents he would break every tube in me. Of course, these last remarks were made after the company had gone, I'm kind of afraid of him when we're alone. He might stick a screw driver in me and get me to squealing and then even the neighbors would be down on me.

One night he tried to get station KCB. and I, like the good little Radio I am, went right out in the ether after them. I soon found out they were off the air and thought that I would be real nice to the old boy and bring in something else. Well, he goes right up in the air and says, "When I want KCB. I want 'em and not RXK. This settles it, I'm gonna either fix this thing or wreck it." He might just as well saved the breath he used when he said, "Fix." In he digs, we goes around and around, me throwing sparks and smoking, thinking that maybe I could scare him off. I stood it as long as I could before I got hot; I gave him a good shock, made an awful noise in the loud speaker but he kept right on giving me a half nelson. This went on for about an hour and me trying to protect myself in every way I knew how. He then started to get personal and called me a piece of junk. That was enough for me, after me taking him, the family and his friends all over the country and showing 'em a good time. I just took one deep draw of current and burned out every tube in me; then he takes one more look and says to the Mrs. "I knew I could fix this thing if I got after it." She says, "What's the matter with it?" and he says "All the tubes are burned out, I'll get a new set of tubes tomorrow." The Mrs. says "How much does a new set of tubes cost?" The old man says, "Not over ten bucks."

I suppose you wonder what I do for pastime. Well I'm gonna let you in on my favorite indoor sport. I just set around all day and high-hat the phonograph and player piano—no one even looks at them since I came.
Mort Clemson, Peoria, Ill.

SERVED HIM RIGHT FOR BUTTING IN

Here's a Slip and a Quip!

The B.B.C. Trio of WMAK was playing its last number when the announcer, Herbert Rice, broke in "Ladies and Gentlemen,"—then realizing that the piece wasn't finished, he kept quiet until the music stopped. Then listeners heard, "Say, what the Hell do you mean by butting in—" and the voice trailed off as the speaker realized that the mike was still on.—*W. G. Burton, Niagara Falls, Ont.*

"PUT A LILY IN HIS HAND" MIGHT BE MORE APPROPRIATE

It was late afternoon and one of our local announcers had been entertaining with recorded selections for quite a while. He had lost interest, it seem in the blending of his program, and i weary voice said, "Now playing you, two phonograph records, 'L My Head Beneath a Rose' and 'Tu on the Heat' . . ."—*Margaret E. Se wick, 123 Alamo Plaza, San Anton Texas.*

TWENTY INNINGS! PITY TH POOR ANNOUNCER

Bob Elson, WGN sports announce was describing a baseball game betwe the Cubs and St. Louis Cardinals. Th broadcast was sponsored by Thom son's Restaurants whose slogan "Thompson's must be a good place t eat." It was during the first half the 20th inning, about 7:15, and the a nouncer was both tired and very hu gry (as he had previously announce when he said in a weak voice, "Thom son's must be a good place to eat."— *Clara Carter, Oakland, Ill.*

HOT ON GRAHAM'S TRAIL

Here is one probably heard by mil lions:

Graham McNamee in announcin from St. Louis at the fifth World Serie game explained the postponement o President Hoover's speech with "Presi dent Roosevelt's speech will be read directly after the completion of the broadcast of this game." He cor rected himself immediately!—*L. T Young, Lieutenant in the U. S. Navy, U. S. Ship New York.*

Two other special Indigest reporters (E. C. Baird of St. Joseph, and Mrs. R. D. King of Alexandria) sent that one in too, but the Navy got here first, as always!

* * *

Listening to station WNOX. The announcer, Roger Williams, read a telegram requesting "A Cottage For Sale" . . . to be sung by Frances Ressler . . . signed — Paul of Atlanta, Ga. When he had finished reading the message, he said "I am very sorry, Paul, but the mortgage has been lifted on this cottage so Frances is Washing Dishes With The One She Loves."—*Roy E. Baker, 1405 N. Central St., Knoxville, Tenn.*

TUNE IN

rawford—They're putting in some t Radio broadcasting stations now-
s.
rabshaw—I should say so. Out t they have a WOW!—*J. J. O'Con-*
New York.

GOSSIP SHOP

he only thing that prevents Giu-e di Benedetto from bringing his e orchestra of fifteen canaries down he NBC studios once in a while is

fact that *Cheep* music won't go so with the guitar serenades he pro-es in the Neapolitan Night programs conducts.

lis wife knows the location of all the stores in New York and steers him y from the marked streets, because y time he passes one, it's so much the budget for another yellow bird wo.

* * *

hil Dewey, NBC baritone, was ed on a farm not far from Rochester, iana, and claims he got his first ex-ence in vocal training when, as a ll boy, he called the cows in from ing every evening, to be milked.

He made his first professional ap-rance at the age of five. He really paid for it. The story goes that l and his father were on their way to n in a horse and wagon. They came n some men at work, grading the d with gravel. The grading machine ead all the way across the road, so y were forced to wait until a path ld be cleared for them to pass. The erintendent in charge of the work, owing of Phil's vocal proclivities, ed him to sing a few songs while they ted. He even promised to pay the if he proved especially entertaining. e proposition appealed to Phil. The st he had ever sung for previously e cookies or candy. From the high gon seat he sang all the popular songs knew. When he was through, the n who had contracted for his services proached him saying: "That was e, young man. Here is your reward." With that he handed Phil a bright ny penny.

* * *

See the signature on the picture of il Dewey on this page, and May ghi Breen on page 95? You've essed it—Indi-Gest's illustrator is ne other than Jolly Bill Steinke, of Jolly Bill and Jane. He's a former newspaper cartoonist and walks around the studio with a perpetually busy pencil.

SCRAMBLED PROGRAMS

Sitting beside my Radio nightly, listening to the orderly procession of programs marching through the hours, I am sometimes possessed of a wild desire to break the monotony by scrambling the various characters. Here are some of the things I would like to hear:

1. A conversation between Achmed Pasha and Jane M'Grew.
2. Seth Parker explaining the World Series to Will Rogers.
3. Amos and Andy in an Evening in Paris.
4. Leopold Stokowski conducting Henry Field's Little Symphony Orchestra.
5. Floyd Gibbons pinch hitting for Walter Damrosch. — *Nelle Arnold, Cedar Creek, Nebr.*

* * *

That last one is good subject matter. You can just imagine Floyd . . . The next number on the program will be the Swan Song from Lohengrin. Flashes from the United Press tell that this fellow, who was a German count, paid a surprise visit to a young lady in a new kind of boat . . . drawn by swan power instead of electric h. p. He was out to save her from execution for killing her brother. He did and ended up by marrying the lady, with the stipulation that she keep his name from the press. She couldn't . . . gave him away . . . and so he did a quick fade-out, this time using a couple of doves for a fly-away to Heaven. The *theme* of the Swan Song, which you will hear *weaving* in and out of this beautiful melody, is *sad* and shows the sorrow that Lohengrin feels on parting from his beloved. It is one of the most heart-rending pieces of music which the great Wagner ever composed.

Puzzle:—Can you tell where Gibbons stops and Damrosch begins? It ought to be easy.

WAIT UNTIL TELEVISION

Sandy had inherited a Radio from an uncle in London, and had invited a friend over to spend an evening listening to a wireless programme.

"At its conclusion the host said: Weel, Mac, wha' cuid we desire better than thot? Singing, instrumentalists, a talk on insects, opera, news, and dance music—all for naethin'."

"Aye," said MacTavish, "but we dinna hae ony acrobats."—*Molly Zacharias, Kansas City, Mo.*

Molly must have good ears and sharp eyes, because she sent in another good one besides the Scotch one. The other one is Henglish and 'airy. 'Ere it is.

AIR TONIC

English Barber—Hanything h'on the 'air to night?

Customer—I don't know. I haven't a Radio.

CROSS YOUR HEART

Heard over Station KMPC:

"The next number will be 'Really and Truly.' A phonograph record."

I wouldn't doubt his word!—*V. M. Davidson, San Diego, Calif.*

PHIL DEWEY'S FIRST PROFESSIONAL APPEARANCE

Scientific Progress

By Howard Edgar Rhodes, Technical Editor

Progress of Television

ALTHOUGH there have been no important announcements concerning television for some time there is no doubt but that engineers associated with the major broadcasting companies and with the large electrical companies are spending considerable time and money on the problem. It is quite probable that several of the companies are more advanced in their television experiments than they care to say, reserving announcements until some definite concert results have been obtained. Engineers of the various companies refuse to make any statements regarding their work in television. The National Broadcasting Company has licenses for experimental work on television and a license for experimental work has been requested of the Federal Radio Commission by the Columbia Broadcasting System. The NBC for some time past has had an experimental television station in operation in the heart of New York City.

Television in the home has been stated, by various engineers, to be from three to five or more years away. Such estimates are of course based on the idea that development work will progress along certain definite lines. A really new idea might bring television to the home much sooner; unforeseen difficulties might make practical realization require a much longer time. Even today there are of course a number of stations broadcasting experimental television programs; regular programs are transmitted by the Jenkins Television Corp. in New Jersey and from W9XAP, the television station of WMAQ, Inc., operated by the Chicago Daily News. William S. Hedges, president of WMAQ, Inc., advises us at this writing that with the large photo-cells they intend to use it will be possible to transmit full length views of actors, instead of just a head and shoulders.

All television licenses issued by the Radio Commission are granted on a temporary experimental basis. The Commission is believed to be interested in television development, but also believes that sufficient public interest has not been created to grant permanent licenses on the basis of "public interest, convenience and necessity." There is reason to feel, however, that as soon as sufficient public interest is aroused the Commission will grant permanent licenses.

TELEVISION WIZARDS

Dr. August Karolus, German television expert and University of Leipzig professor, left, and Dr. E. F. W. Alexanderson conferring in the laboratories of the General Electric Company at Schenectady.

Meanwhile those organizations (br casting companies especially) who that they will want to transmit televi when it leaves the womb of techno are anxious to get experimental lice now, so that when permanent licenses granted, and there won't be very m they will be able to point to the exp mental work they did to bring about accomplishment and thereby enha their chances of getting a perman license. It is probable that the la manufacturers are rather anxious t television does not follow the same perimental course that Radio did wher first started in 1920.

Television experimental work in t large laboratories evidently has two ai in view. One is to develop television a means of home entertainment usi simple but effective apparatus. The oth aim is to develop television for the th tre, so that television images may presented on the stage.

Mid-West Radio City

RADIO broadcasting is going on bigger and better things. First can the announcement of the hu Radio City in New York and now Chica can boast of a super-station which h been erected on top of the world's large building, the Merchandise Mart.

Here are a few statistics that show th magnitude of the project. The new statio is two stories in height; comprises mor than 66,000 square feet; contains six stu dios, four of which are two stories hig and plans are completed for additiona studios when needed.

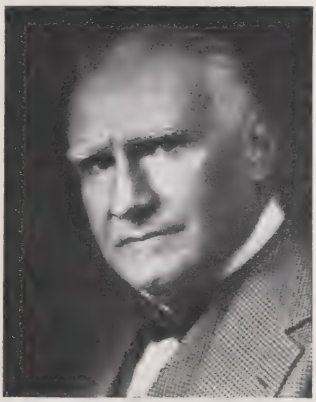
More than 56,000 square feet of sound proof material was used in the constructio of the studios; there are more than 9 light fixtures in the studios and more tha 33,000 watts of electricity are used to ligh Studio A alone.

More than 13,400 square feet of carpet was used to cover halls, corridors, and offices. The staff of employees numbers over 200 and more than 400 radio entertainers are available.

The station includes a number of innovations which are the result of years of experimental work on the part of a large staff of engineers. There are four network control booths which are, in fact, miniature studios. It is indeed a super-station.

of the Radio Arts

Concert-going by Radio



ALTHOUGH I have been conducting symphonic orchestral concerts since 1885, and traveling with my orchestra over the entire United s many times during that period, I only in the last four years been to reach the great masses of our le by means of the Radio," says er Damrosch, musical counsel. Na- l Broadcasting Company. "Before wonderful invention was perfected, uld play only to audiences which l gather in the concert halls and res of our larger cities. Such audi- s were necessarily limited by the size he auditorium, and assuming that I ucted about one hundred concerts winter with an average audience of ty-five hundred, I could reach about hundred and fifty thousand people year.

ut now the Radio enables me to play udiences of ten million people every rday evening, and as I give about y-four of these concerts during the r, that gives us the incredible total hree hundred and forty millions. e this huge audience includes many y listeners of the past, by far the er part are people who have never re heard a note of what I call music. ny delight and amazement, the music lozart, Beethoven and Wagner comes em like a revelation of beauty and ional pleasure. Only through the o could I reach these millions of le on the farms and ranches, in out he way towns, and above all, the y who are too poor to buy concert ts, and to whom the "air" now s free for all, a weekly message of honic music.

n average of thirty to forty thousand rs a year which I receive from these ners, gives eloquent testimony of joy and gratitude. Small wonder I consider these last three years of professional life in many ways the important in my career as a musi- and educator."

metimes when we sit down to write monthly manifesto on Radio, we k the job with gusto and enthusiasm, faith in Radio's ultimate possibili- optimistic that Radio will reach t achievements. How we feel de- ls largely upon what we have heard the air during the preceding few . Having had the pleasure of listen- to two excellent symphony concerts over the preceding week-end we are all "het up" over the possibilities of this type of broadcast music in promoting music appreciation. For it seems to us that instrumental music should be the backbone of Radio entertainment. It is perhaps the only form of entertainment that can be assimilated solely by the ear.

After all, listening to a symphony con-

Walter Damrosch, dean of American conductors and musical counsel for NBC.

cert by Radio has advantages over listening to it in a concert hall. The placement of the microphone quite close to the orchestra eliminates from the Radio reproduction the rattling of programs, coughs, sneezes and other annoyances that must be tolerated in the concert hall. And the inability to see the musicians enables one to concentrate completely on the music. During the rendition of a number at any concert a surprising large number of the audience may be seen reading their program, turning in their seats to see what their neighbors are wearing, or watching with eagle eyes the movements of the conductor.

TO SAY that such people "hear" the concert is mere piffle. To really follow the development of a symphony, there is needed a degree of concentration that does not permit of any division of attention between eye and ear. Of course one can slump down in the seat and hold a hand over the eyes but this tends to attract undesired attention from others who will think you have fallen asleep or who will consider you a faker feigning intense absorption in the music. The movements of the conductor and other members of the orchestra, the bowing of the strings, the thumping of the kettle drum are necessary—and detracting. For there is no such thing as absorbing music optically. The Radio relieves us of all these things.

And therein lies the advantage of concert-going by Radio. Given a good receiver, a good orchestra properly transmitted and we can enjoy a concert in our home much more than we could in the concert hall. We can push on our favorite pair of slippers, turn off the lights, settle ourselves in an easy chair and in the quiet and darkness be in a position most fully to enjoy the music. Try it.

LISTEN carefully to the music. Pick out some bit of melody, and follow it through the symphony. Every now and then you will find it coming back, sneaking around the corner maybe in a different key with some variation, perhaps disguised by a growth of beard and a new hat. But, like a bloodhound, keep on its track. It will try to hide, bury itself under the heap of sounds, but back it will come. You will enjoy it. You will hear things in the music which you never before realized were in the score.

The major disadvantage of listening to concerts by Radio is that we have to listen between numbers to the announcer, telling us who composed the next selection, why he composed it, where he was born and goodness knows how many other details about the music and its composer.

Why can't the interval between selections be almost silent so that we may feel fully the glow of pleasure that comes from hearing good music well played?

We are not fooling ourselves, or even hoping to fool our readers, that the broadcasting of symphony concerts is perfect. The reproduced music does not have the full dynamic range of the musical orchestra, nor do we hear the higher overtones of some of the instruments. But we do hear by Radio a much better balance between the various instruments than we hear when we actually go to a concert. By Radio we get the best seat in the house—and we get it every time.

Scientific Progress *of the* Radio Arts

International Broadcasting

RADIO, unlike other mediums for the transmission of voice and music, recognizes no national boundaries between countries. Per se it is essentially international. It seems but natural therefore that Radio should reach a stage of development where, as has now occurred many times during the past year, programs from foreign countries would be available to American listeners and American programs available to listeners in foreign countries. There will probably not be another event of major importance that will not be sent by Radio to all parts of the civilized world.

The placidity with which the American listener has accepted foreign broadcasting is not surprising. For the past century the public has learned to expect marvels from science. As a result, international broadcasting, which if accomplished several years ago would have amazed people, is now accepted almost casually, though with appreciation of its utility and its effect in strengthening friendly relations between peoples of various countries.

But international broadcasting was not an easy task to accomplish. On the contrary it was difficult and expensive. Engineers working on the problem lost many nights of sleep. Engineering work on the problem dates back many years—it really goes back to the very beginning of Radio. Foreign broadcasts as we hear them today will, of course, be improved. At present they are imperfect, but good, and not to be fully appreciated until one has to do without them.

At present the success of an international broadcast depends somewhat on the weather and its effect on receiving conditions. But as the work goes forward we will gradually add improvements to the point where broadcasts can be arranged at any time with but little regard to atmospheric or other conditions that now hinder our efforts.

C. W. Horn, general engineer, of the National Broadcasting Company, was intimately connected with a large part of the preliminary development work on international broadcasting. Regarding the future of this branch of Radio broadcasting, Mr. Horn recently stated, "I foresee that we shall gradually improve and increase the number of broadcasts until without any definite announcement or warning we shall be arranging programs for international consumption without giving much thought to the question as to whether or not conditions will be suitable. It seems to be human nature that have such developments grow on us without realizing that changes have taken place.

IT MAY take a year or two of refining before it becomes thoroughly reliable, and also to permit some of the more distant parts of the world to equip themselves with the necessary apparatus, but we are already assured that the problem has been solved and that we are ready to permit the listener to participate in things that take place far beyond the boundaries of his own country."

These things are accomplished at great expense, but what the public demands it usually gets. Means are always found to satisfy their wishes.

Studio A of National Broadcasting Company's new midwest "Radio City" in the Merchandise Mart, Chicago, which is the largest broadcasting studio in the world. Its dimensions are: Width, forty-seven feet; length, seventy-two feet; height, twenty-three feet.

Fred Ibbett, Production Manager of NBC Chicago Studios, directing rehearsal of Rin-Tin-Tin Thriller, *The last of the Hendersons.* (Left to right) George Opie, Frank Doucet, Bernadine Flynn, Bob White and Fred Ibbett.

Encore!

(*Continued from page 29*)

reading innumerable parts in *Mystery House*—to say nothing of hundreds of "one shot" microphone appearances in Radio drama. His best Radio part? He claims to have received his greatest Radio thrill out of his interpretation of the character of General Custer in NBC's production of *The Massacre of Custer*.

Not all of the troupers appearing in Radio dramas have retired from active stage work. Far from it. Many of them find time to work at the microphone while appearing in Broadway productions. Josephine Hull, for example, played in the season's hit of three years ago, *Craig's Wife*, and took part in nearly all the Biblical dramas presented over an NBC network. She, also, is a member of the Radio Guild Stock Company and has come into Radio with a background of legitimate stage experience that includes work in plays and operettas while at Radcliffe College, stock at Castle Square in Boston, more stock at New Orleans, leads with Wilton Lackaye and Shelly Hull (she became Mrs. Shelly Hull while working with him) in productions and an enviable position as a stage director.

WHEN I asked her opinion of Radio drama she replied, "It is remarkable because of the ease with which every listener can be reached. The intimacy of the microphone brings a feeling of relief to me. It does away with that constant struggle to project one's voice to the last rows of the theatre. I always feel as though every person in the audience of an air performance is sitting right in the front row. Delicate inflections of the voice, frequently lost in the theatre, can be handled without straining."

After witnessing her work in *Houseparty* on the opening night of its long run I went backstage to congratulate Anne Sutherland. What a trouper! Born shortly after the close of the Civil War, the same year in which Joe Weber first saw the light of day, Anne Sutherland was destined to make theatre history, long before Radio was even dreamed about. As Annie Sutherland she was one of *Black Crook* ladies who shocked a nation by appearing on the stage in tights! Dropping the "i" from her first name Miss Sutherland went in for legitimate drama. She has played opposite such well known artists as Joseph Jefferson, Nat Goodwin, Henry Dixie and a host of others and finally reached stardom under the Charles Frohman banner in *Mrs. Erskine's Devotion*. She has always had what actors call "fat parts" (which means rôles of outstanding importance) even when her starring days were over. Hers has been a busy, active life—always connected with the theatre until two years ago, when, after the long run of *Craig's Wife* in which she made a decided hit as the mordant-witted aunt, Miss Sutherland went to Europe for a much earned rest. The stock market was not kind to her and she returned to this country "broke but happy", as she puts it, and immediately opened a cozy little tearoom in Greenwich Village. When she returned to the stage to play in *Houseparty* she did not give up the tearoom "because," says Miss Sutherland, "so many of my old friends drop in for a snack of ham and eggs and coffee after the theatre that

George Rand, an old trouper now with NBC Coast studios.

for me it means keeping in touch with the world I love. Then, too," she added with a twinkle in her ever-smiling eyes, "it keeps me out of mischief to be busy."

Out of mischief! Perhaps, as she says, her tremendous amount of vitality needs these many well filled hours of activity to keep her out of mischief. What I think she meant was that she must be busy to be happy. And as busy as she always is she couldn't keep out of Radio. Not that she wanted to keep out of it, for she was anxious to have her fling at the theatre of the air. The chance to prove her worth as a microphone performer came when NBC decided to produce the air serial, *Moonlight and Honeysuckle*, which is being written by Lulu Volmer, the author of *Sun Up*. One of the principal characters in the serial is *Ma Betts* and when Miss Sutherland's name was mentioned as a possible player of the rôle, there was no second choice. Miss Sutherland has made this chara of the mountain woman one of the standing air rôles of the year. We without a doubt, hear the voice of trouper in many other Radio dramas, as I write this, the call of the footlig is urging Miss Sutherland to return the stage in a Broadway production.

When *Moonlight and Honeysuckle* started its air story of the mount feud, there was a character known *Pegleg Gaddis*, played by another timer. Claude Cooper is the old tim name. Now, Mr. Cooper, who was b in London and first appeared on American stage in 1889 in that ripe melodrama *Silver King*, is an ambitic actor who is striving to set a wor record for the number of rôles played the stage. When he created the Ra character of *Pegleg Gaddis*, Mr. Coop claims to have had a background of 5 grease-paint rôles to his credit. A f weeks ago an opportunity was offered h to appear in a new Broadway productio so Mr. Cooper explained his desire t released from the cast of *Moonlight a Honeysuckle* to Miss Volmer. Rath than trust the part to another, Miss Vo mer accommodatingly wrote *Pegleg* o of the story by the simple expedient having him killed off. And Mr. Coop added another character scalp to his be The play was not a success and as I wri this Mr. Cooper has just closed with h third "flop" this season—which makes total of 538 different rôles which the ma has portrayed on the stage. If Mr. Coop is successful enough in picking unsucces ful plays at the rate he is now going, h will set a record, no fooling.

Another charming actress playing man character parts for the various NBC di rectors is Alma Kruger, who, at ninetee played *Lady Macbeth* opposite that ste ling actor, Louis James! They starte young in those days to act in the work of the master playwright. After severa years' work with such stars as Sother and Marlow, Robert Mantell and Gran ville Barker the lady who dared to pla (and probably did a fearlessly good jo of it) *Lady Macbeth* at nineteen find herself a member of the far-famed New York Civic Repertory Company.

A CALL will bring Miss Kruger to the studio on the run—providing the demands on her stage serv ices do not interfere. Her first Radio work, like so many another trouper of legitimate productions, was in one of the Biblical dramas. And, by a peculiar twist of fate, Miss Kruger gave an air performance of *Lisa's* mother in Tolstoi's *Redemption* prior to her appearance in the same part on the stage. In speaking

r microphone work, Miss Kruger
"It makes one voice conscious. I
feel as though I were playing be-
n audience made up entirely of the

lave you caught that Eskimo Pie
gram, emanating from the CBS stu-
? The kiddies are marvelous—but
't forget to give *Mrs. Smithers* a hand.

Olive West, who played in the first Passion Play given in this country.

Mae Buckley, a trouper long before her "Radio child" (*Gwen* in the sketches) was born, is *Mrs. Smithers*. Like so many stage favorites who have played for Charles Frohman, Augustus Daly and David Belasco, trouper Mae Buckley made her debut in Radio in the Biblical dramas.

Do you remember *Show Boat?* That, to my mind, was one of the finest ventures which drama ever made to the theatre of the air. Credit Harry Brown, the creator of *Show Boat*, for much of its success but don't forget that Mr. Brown was discreet in selecting his cast. "Troupers all" was his slogan. Mr. Brown was no mean trouper himself, having played in support of Lillian Russell, Rose Stahl, Frances Starr, Edith Talliaferro and Irene Bordoni. He became *Hank Simmons* in *Show Boat*.

Edith Thayer, player of leading rôles in the original productions of *Blossom Time, The Firefly*, and *The Chocolate Soldier*, became *Jane McGrew* of *Show Boat* fame.

Other troupers in the splendid cast of that feature were Brad Sutton, minstrel man, ventriloquist and magician; Elsie May Gordon, a graduate of Little Theatre work in Boston; James F. Ayres, who can tell many thrilling stories of the days when *Ben Hur* and *The Shepherd King* served as vehicles for his histrionic ability; Lawrence Grattan, who created the name part in a dramatic version of *Parsifal* on the stage.

In 1898 Broadway saw plays with names like *Bertha the Beautiful Sewing Machine Girl* and *China-town Charlie*. They were real blood and thunder dramas, and were the first vehicles of Jimmy Waters, who now entertains Radio theatre goers as *Ike The Paragon Painter*, at WLTH, Brooklyn. Recent years saw him on the road as Isaac Cohen in that perennial, *Abie's Irish Rose*, but now he has given up the stage in order to write his own Radio skits and take star parts in them.

IN NEW BRITAIN, Connecticut, is a septuagenarian minstrel, who used to strut his stuff at Miner's Bowery and at Tony Pastor's. His name is Tom English and he frequently delights the listeners in New England with programs of old songs and stories as he relives the "days long past" before the microphone in the Hartford studio of station WTIC.

Halfway across the U. S. A. we hear from Charles B. Hamlin, playing the rôle of *The Old Settler* in a WTMJ (Milwaukee) program. Mr. Hamlin's stage life dates back to the *East Lynn* period. He's played with many of the old time stars, too—Otis Skinner, Lee Baker, David Warfield and the Barrymores.

Jumping all the way to the West Coast we find Dick Jose, another minstrel man of *Silver Threads Among the Gold* fame. Mr. Jose is working on a commercial hour broadcast from Station KPO. And that's in San Francisco.

In the Golden Gate city, too, are the studios of the National Broadcasting Company's Pacific Division, where we find Olive West. The appearance of this charming old trouper of sixty odd belies her years. Her hair is graying, but her blue eyes twinkle with youth and humor. There were no easy roads to stardom when Olive West was beginning her career. She made her first appearance in 1879, as *Salome* in the first *Passion Play* ever given in the United States. Although she was only twelve, *Salome* was a real "grown-up" rôle. To this day she remembers the reception given the cast . . . vegetables and eggs were thrown at the actors by spectators, for the populace of fifty years ago refused to look upon the *Passion Play* as art.

But it's a far cry from the unesthetic audiences of the 1870's to the enthusiastic Radio listeners of today . . . deluges of fan mail take the place of the spattery eggs that Olive West remembers.

Another of the old timers, who often plays with Miss West, is George Rand. When *The Climbers* by Clyde Fitch was produced in the San Francisco studios, the veteran was carried back in memory many years. *The Climbers* was one of the first plays in which George Rand ever appeared! He gained his rich experience under the tutelage of Oliver Morosco in the days of touring stock companies, and rose to stage manager under the Morosco banner. Some of you may also remember him with Nat Goodwin's company in *Oliver Twist*. Since 1929 he has been occupied with the producing end, as well as acting in NBC Radio dramas.

(*Continued on page 114*)

"Hello There, Australia!"

(*Continued from page 57*)

Capt. Rickenbacker: That is right.

Kingsford-Smith: Well, naturally, we having our principal cities on the east, I would consider the possibility of crossing the Pacific Ocean, 7000 miles. We are about 17,000 miles around in the other direction.

Capt. Rickenbacker: It looks as though we are going to have to switch Australia around, reverse it. Say, I couldn't help but listen in to your ideas about what was necessary for a service in the way of aircraft. I agree with you. Do you remember that twin engine job that we were building when you were here?

Kingsford-Smith: My word, I do.

Capt. Rickenbacker: Well, we delivered that the other day to the United States Army.

Kingsford-Smith: Fine.

Capt. Rickenbacker: It shows about 175 miles an hour.

Kingsford-Smith: Well now, that is fine.

Capt. Rickenbacker: You can get some idea—They were trying to live up to the things that you are finding necessary in your tremendous achievements.

Kingsford-Smith: That is fine. When you get up to speeds like that, you can cover the ground in absolutely no time.

Capt. Rickenbacker: Tell me, how is the transport service operating in your country?

Kingsford-Smith: We have been operating for six months without an accident of any description and have already declared a dividend.

Capt. Rickenbacker: Well, we will bring your organization over here. We need dividends very badly in this country.

We have recently opened up two new transcontinental mail and passenger services, one from New York to Atlanta, Georgia across Dallas, Texas to Los Angeles. And then another from New York to Philadelphia, Pittsburgh, Columbus, Indianapolis, Kansas City and Los Angeles. And that gives us three transcontinental airways for mail and passengers.

Kingsford-Smith: That is great. Are you cutting down your time?

Capt. Rickenbacker: Yes, we are cutting down the time, and we hope during the next year or two we will be going from New York to the Pacific Coast within 20 to 24 hours without an overnight stop. For the moment, we are stopping at Kansas City and Chicago, but with the development in planes for sleeping, there is going to be a tremendous opportunity to cut down time.

Kingsford-Smith: That is marvelous.

Capt. Rickenbacker: What do you think of the needs over there in the way of transport planes?

Kingsford-Smith: Oh, we need them with our long distance problems, you know.

Capt. Rickenbacker: That is more or less true of the world at large. Smitty, we are about to be cut off, and I am awfully sorry, because I just want reach out and grab you and hug you congratulate you on your past achie ments and those that I know must due you in the future.

Kingsford-Smith: Thank you, old m and many, many thanks. My very b and cheerio.

Capt. Rickenbacker: Give our love the girl, and don't forget you have m lions of friends over here.

Kingsford-Smith: All right, Eddie, thank you very much for that and I a preciate it sincerely.

Capt. Rickenbacker: Good-bye.

Kingsford-Smith: So long.

Encore

(*Continued from page 113*)

Up North in the pleasant city of Seat tle, I am advised there's an old time working at KJR, KEX and KGA, North west Broadcasting System stations.

A score of years ago everyone in Ne York City knew of Frank Coombs, th "Silver Thread Tenor", who revived an popularized that famous ballad *Silve Threads Among the Gold.*

It makes little difference what studi you enter with this question on your lips "Any old time troupers broadcasting fo you?" the answer is always the same— "Yes." And more power to them, say I. It is their opportunity to present a fitting "encore" to those who appreciated their work on the legitimate stage.

What do you say, readers? Let's give the old time troupers a bit of well merited applause.

Vote For Your Favorite Station in New Radio Digest Popularity Contest.

See page 5 for Story . . . Here are Rules and Conditions

1. The contest started with the issue of RADIO DIGEST for October, 1930, and ends at midnight, April 20, 1931. All mail enclosing ballots must bear the postmark on or before midnight, April 20, 1931.

2. Balloting by means of coupons appearing in each monthly issue of RADIO DIGEST and by special ballots issued only when requested at the time of receipt of paid in advance mail subscriptions to RADIO DIGEST when received direct and not through subscription agencies according to the schedule given in paragraph four.

3. When sent singly each coupon clipped from the regular monthly issue of RADIO DIGEST counts for one vote. BONUS votes given in accordance with the following schedule:

For each two consecutively numbered coupons sent in at one time a bonus of five votes will be allowed.

For each three consecutively numbered coupons, a bonus of fifteen votes will be allowed.

For each four consecutively numbered coupons, a bonus of twenty-five votes will be allowed.

For each five consecutively numbered coupons, a bonus of thirty-five votes will be allowed.

For each six consecutively numbered coupons, a bonus of fifty votes will be allowed.

For each seven consecutively numbered coupons, a bonus of seventy-five votes will be allowed.

4. Special ballots will be issued only when requested at the time of receipt of paid in advance mail subscriptions, old or new, to the RADIO DIGEST when received direct and not through subscription agencies according to the following voting schedule:

1-year paid in advance mail subscription direct..	$4.00	150 votes
2-year; two 1-year paid in advance mail subscriptions direct.....	8.00	325 votes
3-year; three 1-year; one 1 and one 2-year paid in advance mail subscriptions direct.	12.00	500 votes
4-year; four 1-year; two 2-year; one 3-year and one 1-year; paid in advance mail subscriptions direct.	16.00	750 votes
5-year; five 1-year; one 2-year, and one 3-year; two 2-year and one 1-year; one 4-year and one 1-year; paid in advance mail subscriptions direct ...	20.00	1,000 votes
10-year; ten 1-year; five 2-year; three 3-year and one 1-year; two 4-year and one 2 or two 1-year; two 5-year paid in advance mail subscriptions direct.	40.00	2,500 votes

5. For the purposes of the contest the United States has been divided into 48 districts, comprised of the 48 states of the Union.

6. The station located within the borders of each State receiving the highest number of votes cast by individuals residing within the same State will be declared the Champion Station of that State, and will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the second largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the third largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the fourth largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

7. In the event of a tie for any of the prizes offered, prizes of identical value will be given to each tying contestant.

8. Any question that may arise during the contest will be decided by the Contest Editor, and his decision will be final.

Christmas Stockings

gible things that if I told you what they were, they'd sound silly, so I won't tell you. But I really would like the chance to do better and bigger things in my work the coming year.

"My most tragic Christmas? When Santa was explained away; happy, the holidays I returned home during my first year away at school; comic, well, we drove outside of town to a Christmas Eve dance at the polo club, and on the way home, with ten of us in the car, we got stuck in the mud. Finally at 6:30 A. M. we arrived home, and then had to get up at seven o'clock so that brother could open his presents!"

WHAT does the first tenor of a male quartet expect? If E. Clinton Keithley, who is that in the popular Chicagoans male quartet of NBC and KYW, may be taken as typical, it's a big box of good cigars. Keithley, who writes many ballads, also adds that a $5,000 royalty check on his latest song, *Love and a Rose*, would not be amiss. His happiest Christmases, he related, were those when he was a boy and the illusion of Santa had not been punctured.

Now for a real married couple of the air—Aline and Peter Dixon, who do the *Raising Junior* skit for NBC. "The lady asks," said Peter speaking for Aline, "some very expensive perfume, lots of pretty undies, and what have you? While the gent allows books, pipes, bartender's accessories and tools with which to make boats and other toys for the offspring.

"Did we always get our wishes on Christmas day?" he continued. "Not exactly, for I always wanted a Humpty-Dumpty Circus but my dad didn't, whereas I hated to wear neckties, but got them anyway. Aline, being born on Christmas day, had many disappointments.

"Past Christmas history? Well, here's one. Tulsa, Okla., five years ago . . . Aline playing in stock, me out of a job, the two of us engaged just two days. I spend my last five dollars to buy her a present, and she had to provide the dinner . . . but it was a grand Christmas just the same! A year later, married and in Louisville. Baby on way, very little money. Dixons present one another with free samples obtained by answering magazine ads!"

NEXT, a pseudo scrapping couple, *Mr. and Mrs.*, or Jo and Vi of the CBS skit, who are not married in real life but are Jack Smart and Jane Houston. Jack asks for a baby Austin on account of the lack of parking space in New York and because he could park it in his apartment. One of his most unusual gifts received as a result of his broadcasting is an electric stimulating machine which he can't use because he is so ticklish.

Jane makes a modest request—just a trip to Europe. Funny gifts sent to her during the year are a row boat and a watch dog. "My happiest Christmas," said she, "was the one I spent with my husband upon his return from the war overseas."

Now for a half a dozen batoneers of the air whom all of you must know.

Nathaniel Shilkret's letter to Santa: "Please leave me health, happiness and the wealth may take care of itself. Add some musical scores, new ideas, a complete set of the poets, and perhaps a new tennis racquet. Our happiest Christmas was when my wife and I decorated the first little Christmas tree for our son."

Joe L. Sanders, inseparable partner of Carlton Coon, in the orchestra business, requests: "Health, happiness and ability to make others happy, harmony among my follow workers, a clear conscience and a 'hit' song."

Joe, like Art Kassel, treasures as his most valued gifts from listeners the letters received from the same Somerset, Ky., invalid lady, and told of his unhappiest Christmas:

"I was in Butte, Montana, many years ago, and the thermometer registered 30 degrees below zero. I had the 'flu' and had lost my voice. This wasn't so good, as my job was singing in a male quartet. Top that off with snowbound mails and no word from home and the loved ones . . . just plain hell!"

BERT LOWN'S happiest Christmas was the thing that put him in the hospital. As a youth his parents, after much pleading, gave him a long desired motorcycle. Two days later it was wrapped around a fire hydrant and Bert spent New Year's Day all swathed in bandages. "What do I want this year?" he replied, "Oh, just make it two days off, a tri-motored plane to haul my bands around to engagements, a $20,000 weekly pension and if you have it to spare, you might throw in a yacht. My most unusual fan gifts had been three *RED* neckties, a raccoon hat, a pair of home-knit socks and a pair of black, yellow and green garters."

And Will Osborne? "More elephants are needed," said he. "I've hundreds of them now but can't get too many. But they must have their trunks *UP*. My happiest Yuletide was that spent in Germany with my boys. We were not allowed to spend a cent for anything. When payment was offered for refreshments, entertainment and dinners, the natives were insulted and incensed. Never have I seen the Christmas spirit so genuine."

Harry Kogen and Jules Herbuveaux, both of NBC and the latter musical director as well of KYW, Chicago, duplicate one hint. They'd both like either inaudible Radios or a pair of ear muffs that will filter out all sounds emanating from any Radio set or accessory.

Kogen, with a chuckle, added the following list, "an automatic pencil that works and still writes, usable neckties, a hot trumpeter, 1,000 good arranger[s] 500 new commercial programs, Uncl[e] Wilson's membership card, a 'first' [in] horsie *Zuyder Z*, and a twenty-ride [on] to Gary, Ind."

"Kuku" Raymond Knight, of NBC[,] several others strangely seem to wis[h] ger and better commercial contracts. [The] "others" are Mountain Balladeer Br[ad] Kincaid, of WLS, NBC and WLW [and] the NBC duo-piano team of Retting[er] Platt.

KNIGHT said the [only] peculiar gift on his list was a mecha[nical] "cuckoo" to use on his Kuku hour. [He] added that Christmases had almost [always] been the same to him. He always ate [so] much, then, "lulled into a state of s[ub]rific unconsciousness by the product [of] the so-called festive board," he [would] sound asleep. Kincaid remembers as [his] happiest Christmas the time when, [as a] small boy down in the mountains, S[anta] brought him "a new pair of red-top [cow] boots with brass toes!" Fans have b[een] kind to him, he added, and among m[any] gifts he has received are two croche[ted] baby dresses for his twins and a gu[itar] made entirely by hand with the aid o[f a] pocket knife.

Know the Pickard Family and th[eir] hill-billy tunes and hoe-downs? If y[ou] don't you're missing one of the best a[cts] on the dial. Anyhow, this is what t[he] Pickards of NBC ask from Santa Cla[us]

Five-year-old Ann, doll house, swi[m]ming suit and rocking chair; Miss Ru[th] a lot of collegiate clothes; Mother, a n[ew] flivver, as the old one leaks; Bubb, a f[ew] red neckties, sox to match (and I'll p[er]sonally add, an engagement ring); Da[d] to keep the family and listeners happy.

Good old Pickards! They think the most unusual Christmas was the first o[ne] they spent in New York after leavi[ng] their home in Tennessee. "Nobody kne[w] what to do," said Dad. "We just s[at] around, all dressed up and nowhere t[o] go, and the whole bunch of us were ha[lf] froze to death."

Buryl Retting and Dick Platt added t[o] the contract request that some kind pian[o] manufacturer, if still in business, migh[t] send them a couple of concert gran[d] pianos for home use, and described thei[r] unhappiest Christmas as that of last yea[r]. "The stock market had done funny thing[s] to our friends and ourselves—so we ha[d] nothing in our stockings except holes."

ONE more soprano—Bernadine Hayes, 1930's Radio Beauty Queen and NBC artist. "I'd like, Mr. Plummer, just one thing. That is to be considered as a concert and operatic soprano as well as a mere blues singer. I'm studying opera now, and I hope to show the world. If hard work and Santa help, I hope to get there."

But before concluding, let's go down to St. Louis and ask Chester Gruber, better

wn to KMOX and CBS fans as "Tony ooch", what he'd like.

Nothing better," replied Gruber, "than ave fulfilled my request that enough o sets be placed in all charitable in- tions. My first Radio gift, inciden- . came from a youngster. It was a . He had saved for months to ac- ulate this amount and wanted me to something for my birthday with . . I still carry it as a luck token.

My latest unusual gift is a carved that originally belonged to President eo of Mexico.

Did I always get what I wanted for stmas? Well, my mother died when as twelve, and I had to go out and sh 'em up'. It was tough going for g time and I was lucky if I got meat ny Christmas dinner.

My happiest Christmas, I believe, was of last year. A Texan who had been nvalid for five years wrote me an ause letter. His sentiments seemed get' me somehow, and I asked my io friends who were contemplating ing me Christmas cards, to send them is shut-in instead.

Several weeks after Christmas he e me saying he had just passed the iest Christmas of his life. He had ived over a thousand letters and cards my Radio friends, and it was almost ssary to move his bed out into the to make room for the 600 or so gifts had been sent to him."

hat, my readers, I think is the finest nple of the true Christmas spirit I ever heard. Let's not forget the -ins in our happiness of the holidays, in closing, let me join all the micro- ne's favorite sons and daughters in ing that we all find the same sort of piness this year that results from cticing the true spirit.

nother Twenty Star interview by Mr. Plum- will appear in January RADIO DIGEST.)

Symphony Music

(*Continued from page 91*)

for five a Quintet, for six a Sextet, so on.

nsemble: A small orchestra or col- ion of instruments. Many broadcast- stations employ beautifully organized artistically satisfying ensembles of n ten to twenty-five players.

talian Words in Music: For two cen- es Italian has monopolized the privi- of coining words to express musical s. The habit has now grown in on art of music till nothing probably can done about it. Still there is one great antage in this. Italian has become, music, a sort of universal language. s, a German, an American, a French a Russian composer can write down expression indications on his music- re so that any other musician sitting n at an instrument to play that music, understand the terms used. Some day shall have a discussion of these terms on this page. Meanwhile just remember that Allegro means 'lively', Andante means somewhat less lively, in fact, gently; Maesto or Maestoso means majestic or impressive; Adagio means slow and gentle; Largo means even slower and more impressive; Lento means quite slow; Moderato means moderate; 'Ma non troppo' means 'but not too much so' and is often added after such words as Allegro.

What I Have Heard and Liked

On Sunday afternoon, October 19th, I had the very great pleasure of listening to the Philharmonic Symphony Orchestra of New York, under the direction of Erich Kleiber, who has recently come from Berlin to conduct until Toscanini arrives. I like Kleiber's work. He manages to get from the orchestra a quality of tone that appeals to me and he has no freak ideas. He tries to reproduce the music as the composer intended it to sound, and not as he thinks the composer ought to have intended it. The worship of Toscanini that is at present at its height strikes me as mainly important in showing that New York, or that part of New York which presumes to tell the rest of the country what it ought to think about musical matters, has very poor taste. Toscanini is a good conductor of Italian opera, but I wish that he were not running the symphonic destinies of New York. On the other hand, Kleiber is far less sensational but to me more satisfying in most ways.

Kleiber's best work, as I heard it, was his conducting the orchestra through Brahms' violin concerto, with the solo part played by that very interesting Hungarian Josef Szigeti. A concerto, you know, is a symphony with a solo part written in for a piano, a violin, a 'cello or other instrument.

That same afternoon I heard the Roxy orchestra do another Brahms piece, the second symphony. This is a good work with which to begin one's acquaintance with the great master. It was composed and first performed in Vienna about forty-three years ago, and it is distinguished among all works of the kind for its quiet beauty. The composer never, so to speak, raises his voice in this work. He speaks in a tone of quiet friendliness, as a beloved friend talking from the other side of a bright fireplace on a cold afternoon in the late fall.

Merry Christmas

When next I have the pleasure of talking with you 1931 will be with us and we shall be ready to forget the black year 1930. Meanwhile good music will help us. If every tired business man, nervous female bridge-fiend and rapidly-breaking-down high-pressure salesman in the country would just give himself or herself for an hour every evening to the sweetnesses and beauties of fine music, this would be a happier and less nerve racked nation.

We Are All Poets

(*Continued from page 81*)

gladly sacrificed all if they had but read my *Ode to a Dinosaur's Egg.*

And while the dull emotionless burglars were prowling through my mundane trifles—— I stepped into the foyer of a modern apartment building not far from the Brooklyn bridge in Brooklyn. I did not see a red headed janitor's boy but a dusky elevator man took me up to the Crane apartment.

Nathalia herself opened the door and curtsied in a quaint old fashioned way. Her fluffy brown hair tumbled over her head. She wore a brown velvet dress with a lace collar. Her voice was thin and a little frightened. She impressed me instantly as a child taught to "hold in" and "not to speak until spoken to, then to reply with as few words as possible."

So MY interview was not altogether successful. My impression was that the Cranes were just regular "folks" who had tried conscientiously to bring Nathalia up into the world without ostentation.

"Are you interested in science?" I asked Nathalia after several questions.

"Yes," she replied, "is there not poetry in the fact that the wings of a humming bird outrace the wheels of a motor; and the eyes of a gnat are as a thousand telescopes in one?"

That's what I mean by "poetically minded". I went on:

"How do your poems come to you?"

"As visions—a sort of mental eye, different than the way the actual eye sees them. But in this I am not far different, I believe, than others. All of us are poets, and our delight from reading poetry is drawn from the fact that beautiful verse is the general expression of all hearts. Only some of us write it and some of us do not."

"How did you get the idea of writing *Pocahontas* (E. P. Dutton & Co.), this latest book of yours?"

"I had been thinking of the possible menace of the reds—and then I thought of the saving spirit of the past—as represented by the Indian girl who saved Captain John Smith. Science might have said, 'Never mind Captain John Smith, never mind the country,' if an experiment had been in the balance. But the spirit of Pocahontas said, 'No, Captain John Smith must be saved. The country must be saved.' And in my poem the spirit of Pocahontas—the spirit of the past Pocahontas summons the modern poets to lead the remnant of the A. E. F. and the Indians against the Reds."

Nathalia is just a simple, normal youngster, who interprets in verse what this great big world is bubbling over with in its own language. She agreed with me that we are all poets.

Amos and Andy

(*Continued from page 59*)

Just at this point up comes the Kingfish of the Knights of the Mystic Sea with a big "propolition". Russell Powell acts as the Kingfish and he is certainly a pip for the smart aleck Kingfish.

He explains that this "propolition" is for the taxi to take some musicians to a party somewhere in the suburbs of New York and it will pay Amos and Andy $12.00 less ten per cent "remission" to the Kingfish for getting the job.

Then the fun begins in earnest with the three of them trying to find out what ten per cent of 12 dollars is. The Missus and I about split laughing. First Andy tried to figure.

"Two goes into 12, two goes into 12," he keeps repeating.

Then Amos speaks up, "Well, go on and get it in there, then."

Then the Kingfish suggests that they figure it by the "new method".

"You multiplies ten by two," says the Kingfish, "and anybody knows dat's twenty. Den you takes away two, leavin' eight dollars, and dat is ten per cent of twelve dollars. Den you could cut dat eight in half and I'd take six dollars."

THEN Amos speaks up again and says, "Couldn't you cut dat six in half and take two dollars?"

So the Kingfish says all right, and everything is fixed.

Then we drop Amos 'n' Andy for a while and go to this big party, and it turns out to be a birthday party for Jean. Jean's father is big-hearted and is crazy about Richard Williams. And so is Jean's mother, played by Irene Rich. Both parents, they let you know, would like to see Jean marry Richard.

"But, alas," says Richard, "since my father died I am just a poor boy with only a house in Harlem, a family possession from the days when Harlem was a fashionable neighborhood, and I can't even find the deed to that house." He tells Jean's father he is going over there in the morning to look for the deed.

Well, Crawford, the Villain, is listening in on that conversation, and tells his sister all about it. Of course she conspires with her brother to help him marry Jean so they can all share in the Blair fortunes. This sister, played by Rita LaRoy, makes a great Villainess if ever there was one; so the plot thickens and they scheme to go to the old Williams house that night and find the deed before Richard has a chance to get it.

All this time Mrs. Blair is worried sick because the musicians haven't showed up. Next we see the Fresh Air Taxicab steaming up the driveway with Duke Ellington's fifteen negro musicians, their instruments, and Amos and Andy in it!

Then Amos and Andy go back to town to attend the lodge meeting, and we watch the couples dance to Duke Ellington's music. While the dance is going on Jean and Richard slip out to the lake on the Blair estate, and after a canoe ride in the moonlight they sit on a bench. While they are sitting there the band plays the theme song of the picture, *Three Little Words*. The three little words are "I Love You", and Richard tells Jean that the song is saying what he wishes he had the nerve to say. They get very close together, and the Missus and I held each other's hand and got close together too, it was so romantic.

Well, then they changed back to the lodge of the Mystic Knights of the Sea. Kingfish is presiding over the meeting, and explains that this is the night two "brothers" are to be selected to spend an hour in the "haunted house", which turns out to be the old Williams house, in honor of the founder of their lodge. All the "brothers" whose names begin with "A" are to draw a number from a hat and the one drawing seven must choose a friend and go to the "haunted house."

Just before he draws a number, Andy says "Oh, seven, you've failed me many times, and if you is ever goin' to fail me again, fail me NOW!" but this time he draws the seven, and of course chooses Amos to go with him. They are to be locked in the house, find a paper with "Check and Double Check" written on it, that was left by the "brothers" who made the trip last year, then they must find more paper, on which to write "Check and Double Check" and leave it for the "brothers" picked for the next year.

Amos and Andy don't know it, but when they arrive at the house Crawford is there already searching for the deed. There are a lot of funny things that happen to Amos and Andy and Crawford, in different parts of the house. They are all making noises and each thinks it is ghosts. Once Andy's coat gets caught in a door, and he almost turns white because he thinks a spook has a hold of it. I guess everybody in the theatre just hawhawed fit to die.

Well, they find the "Check and Double Check" paper and in looking for another paper to write "Check and Double Check" on and leave behind, accidentally find the deed, but they don't know what it is. Crawford takes a big revolver and goes to see what in thunder is making that noise and surprises Amos and Andy.

Pointing his revolver at them he says, "Give me that paper." And Andy thinking he means the "Check and Double Check" paper, gives that to him, Crawford sticks it in his pocket with even looking at it.

Amos and Andy then dash from house, Andy having the deed in pocket.

The next thing that happens is s posed to be the next day. Richard saying goodbye to Mr. Blair, havi searched the old Williams house a failed to find the missing deed. Th he tells Jean it is impossible for him marry her because he is so poor and scorns any help from Jean's father. he leaves the house.

Then we are back in the taxi offi The boys are way down in the dum They haven't got the "Check and Doul Check" paper so they are afraid th lodge brothers will not believe they we in the "haunted house."

Then Andy throws the deed into t wastepaper basket and sits staring at

"D-e-e-d," he spells the word on t front. "D-e-e-d, spells dead. Somebody dead."

"D-e-e-d, doan' spell dead," says Amo "That spells deed. Let's see that paper He reads it slowly and then coming the name "Williams" he realizes th maybe that it is the paper Richard w looking for. He tries to reach Richa on the phone at the Blair home an learns that he has left. Well Amos an Andy get into the taxicab and start a wil drive to the station trying to catc Richard. That is very funny, with And hanging on for dear life while Amos ha many narrow escapes in traffic.

THEY reach the statio just in time to stop Richard from board ing his train. And sure enough the pape they have is the missing deed.

Then you see them back in the tax office, bluer than ever. A man comes i with a great big package for the boys. note says it is Richard's and Jean's wed ding cake. Just then Ruby Taylor call up to say that both she and the Madam have heard the whole story and want th boys to come right over. They start carrying the wedding cake. And right i front of Madame Queen's beauty shoppe Andy drops the cake under a truck an the cake is smashed to bits. Both o them stand looking at the crumbled mass and as Andy says "I'se regusted," the picture fades out.

I sure hope, Mr. Editor, you get a chance to see the picture, but I guess you are very busy with the magazine.

Again thanks for the letter about the poem. Regards from the Missus,

Yours, As Ever,

William G. Hawkins.

RudyVallee's Tuneful Topics

(*Continued from page 55*)

, in the parlance of Tin Pan Alley, to after it." The song climbed up to ost first place on the list of best ers throughout the entire country, ch to the surprise of even Remick mselves.

t is a sort of torch-ballad affair, in the thm that only a Negro seems to know v to write. Only a Negro would dare give a title such as this song has, or to te the general thought incorporated hin its lyrics, and yet surprisingly ugh the song is very popular with all es of people of all ages. It is on the ne now but it certainly enjoyed a nice mmer run; it was just like found money the publishers; the record did prac-lly all the work for them.

Another case of a tune which should done semi-slowly, or about forty meas-s per minute.

Without Love

HERE is a tune which it would take several adjectives to describe. It s written by that trio of songsmiths, Sylva, Brown and Henderson, and ced in the musical comedy, *Flying gh*, for which I suppose they expressly ote it.

It is done very effectively throughout musical comedy; in fact, one couldn't the show without appreciating the l beauty of this particular song, espe-lly after its rendition by the extremely mp comedienne of the show, Kate ith. After several others have intro-ced it effectively enough, she takes the g. with Bert Lahr standing by her (Bert hr being the hit comedian of the show), o continuously ignores the advances of ss Smith—together they stand on a k stage with a blue spot. Lahr being once quite sad and emotional, while ss Smith seriously puts the song over h a bang!

The final words, which go like this—ife's a song without a tune, and who uld care about the moon above?" plays to a tremendous finale on the word ove". Properly brought out by a per-n possessing a strong, rich voice with od intonation, this one place puts the g over; and incidentally, the artist, iss Smith, does full justice to the en-e song, and especially this last part, d leaves the audience gasping and ap-uding for more. It is one of the most ective numbers I have ever sung.

I know one person who feels that it s a sacrilege to couple such everyday, tter-of-fact lyrics with such a gorgeous, eratic-like melody. The melody is very autiful, and the lyrics *are* very matter--fact, and yet it is another case of posite poles attracting to make a beauti-l song. The old lyrics are "Life's a tch that doesn't strike." and "Life is milk without the cream." These are household terms, but to alter the song the least bit would, to my mind, destroy one of the cleverest and most tender songs ever written.

It must be done slowly; we do it about thirty measures per minute.

Stolen Moments

A NUMBER with whose writing and publishing I had considerable to do —a number that I have great faith in.

Several broadcasts have resulted in a lot of discussion about the song and many requests for it. It is a little reminiscent of many tunes though as far as I know unlike any of those it seems to resemble. It has an odd title with an unhappy and emotional thought.

At the time of writing we are the only ones who have presented it inasmuch as it has not yet been published and is not in the hands of other orchestra leaders. We have just finished recording it and the Victor Company has been very pleased with our recording of it.

Like most of the tunes mentioned above it must be done slowly—about thirty measures per minute.

Makes Good in California

BOBBE DEANE (Mrs. Ted Maxwell) comes of a family of actors, but skating and swimming were her hobbies until a few years ago. Now she takes part in many NBC productions around the San Francisco bay district.

When ten years old she did skating acts in vaudeville, and during the '15 exposition she did a diving exhibition stunt on the fair grounds.

Later parental objection was brought to bear and she went into dramatics rather seriously . . . playing stock, then musical comedy in New York, with the Ziegfeld productions, three years on Broadway and then she came to California with Ziegfeld's *Sally*.

In California she played feminine lead with Ted Maxwell's Players and in 1926 they were married in San Rafael. Because they had both lived all their lives with their clothes in a valise they bought a big house up in San Francisco.

About three years ago Maxwell became production chief for NBC in San Francisco, and now Bobbe Deane takes part in a half dozen regular productions of the coast chain.

Stretching for Beauty

(*Continued from page 87*)

one can take time during the day to stand up and stretch. The housewife will find her work easier if she will stop now and then, throw her hands up over her head and take a long stretch. Or, she can walk from one room to another on tip toes, stretching as she goes. The business girl's alibi doesn't hold water, either, because stretching is wonderful for relaxation. For girls under constant mental and physical strain, nothing helps more than occasional, but daily, stretching.

It shouldn't be necessary to have to tell people how to stretch. Children at play offer many suggestions and so do animals. Animals do not chin bars or swing dumbbells—they stretch. It's too bad in a way that we don't have to learn to stretch. Human nature being what it is, most of us have to go to a high-priced gymnasium and pay ten dollars a minute before we realize the value of Nature's exercise.

I find that there are many people, however, who have to be told how to stretch. They shouldn't have to be told really, because every one of us has our directions right inside of us—born there—just as they are in the cat and the tiger. But if you seem to have mislaid your directions, here are some suggestions:

The first thing in the morning, stretch. Stretch in every direction. Even if you're lazy, you won't mind this kind of exercise because you can do it while you are still in bed. Sit up and stretch—legs, ankles, feet—with your arms stretching above your head. Twist your body in all directions and stretch with all your might. After this you won't mind getting up because you'll feel very much alive after all this stretching. But keep on stretching even after you are up.

STAND on your tip toes and stretch to the ceiling—head stretching up, chin held straight, with your neck stretching up as if it were climbing right out of your shoulders.

If you do this properly you'll feel this stretch all the way down to the middle of your spine. Keep on stretching, your arms up, your feet apart, and pointing straight ahead. Stretch as high as you can, and then suddenly drop toward the floor—your head, and arms, and shoulders, and body limp like a rag doll. Do this last stretch several times—stretch and relax, stretch and relax. In just a few minutes, you'll find that your blood is circulating vigorously and you will feel all limbered up and ready for whatever the day has in store for you.

If you have a hard day at the office, or you're worn out with housework at the end of the day, try these stretching exercises and watch yourself revive. This particular exercise is suggested by one of our four-footed friends, the family cat. Lie flat on your stomach. Then slowly raise your back, supporting yourself on your hands and stretch your back higher and higher until it is arched like an angry cat's.

Here's another stretch that is wonderful for relaxation. Bend your knees and get down on the floor and crawl. Then from the crawl stretch your right arm and your left leg to their fullest extent along the floor. Keep the arm ahead of the figure and the leg behind. Now draw the left knee up under the chest and extend the left arm and the right leg. Do this exercise very slowly and repeat it fifteen times. It's fun, and is there any reason in the world why exercise shouldn't be fun?

HAVE you ever gone to bed with your mind going over and over events of the day or things you have planned for the next day? The next time this happens to you, try stretching. Strive to let go in mind and in body. Be limp. Then raise each arm and leg separately and allow them to fall as if they were dead weights. Open the jaws and relax the muscles of your face and neck. Now raise your head and then drop it ba limp on your pillow. Next stretch yo legs, through the heel muscles rath than through the muscles of the to and again relax. Then stretch yo arms and legs together and feel a ve distinct pull at your waistline. Y won't have to repeat these exercises ve often. You won't stay awake lo enough!

Stretching will increase your chances staying young by about eighty per ce because stretching keeps your body fit. S stretch for youth and stretch for beaut Stretch! Stretch! Stretch! You ha no idea what an improvement it will mak in the appearance of your skin and in th general aliveness of the whole of yo Try it. Stretch, and stretch again.

Miss Ingram will be pleased to answe any questions about exercising for beaut if you will write her in care of RADI DIGEST, *420 Lexington Avenue, New York N. Y.—Editor.*

Correction

The November issue stated that France Ingram broadcasts regularly from CBS Miss Ingram gives Radio talks over a National Broadcasting network.

Baby Brings Home the Bacon

(*Continued from page 13*)

"What are you going to do when you grow up?"

She looked very solemn and grown-up then:

"Oh, I just want to be one thing. Just like Miss Tucker."

The Toomey's are a modest, unassuming and untheatrical family. Winifred leaves her dramatics at the studio door—and Mrs. Toomey is another mother who does not permit people to fuss over her child.

As far as we know, Winifred is the only one of the NBC Radio child stars, beside Jimmie McCallion, who does not come from a foreign family. It is astonishing to see them pulling the family up by the boot straps, so to speak, putting the other older kiddies through school and moving the folks from poverty row to luxury and Riverside Drive.

So this is Radio!

Capture of Radio Rum Ring

(*Continued from page 18*)

capture was the Coney Island raid on September 26th which I have described. But, as Mr. Simmons of the department of justice told me, Uncle Sam's agents are on the watch for new developments and new stations, and as fast as they are opened, they will be destroyed.

Radio listeners should remember, however, that it is a hard job for a small force of men to keep track of 100 illegally operating stations over an area of 2,200 miles, from Maine to Florida. If any reader of this article, "DXer" or amateur short wave listener, hears any suspicious call letters which he cannot locate on his chart, let him communicate immediately with the department of justice agents in his district. By so doing you may help in the break-up of this enormous rum syndicate, which has its tentacles upon the very life of the nation and endangers all peaceful citizens.

Making the Most of Matrimony

(*Continued from page 25*)

...not to one's mate. Whenever a ...and and wife are rude to each other, ... is bound to fly out of the window. A ...an should never permit her husband ...trample on her self-respect. She ...ld never be satisfied with anything ...than his finest love and his highest ...rd.

...She, in turn, should always appear ...er loveliest for him. Carelessness in ...onal detail will weaken her husband's ...e in her and may result in the loss ...is devotion. She doesn't need to be ...ensively dressed. But her clothes can ...east be neat and dainty.

...It has been my observation that many ...men often break up their homes be...se they display such faults as nagging, ...jousy, suspicion and whining, or they ...lect their duties as housewives. Or ...y don't know how to deal with their ...bands intelligently. A man will come ...e from a day's work all tired out ... she will immediately greet him with ...ecital of domestic woes. Or she will ...g him out to dinner or a party when ...is too exhausted to move.

...I believe that a woman should seek ... recreation during the day and be ...ling to do what her husband wants ...en he comes home at evening. If she ...es the same things as her husband, ... task will be simpler and they will be ...e to enjoy their leisure together. But ... should have other interests as well ... that she will always be a stimulating ...mpanion to her husband. Boredom ...n be just as fatal to marriage as any ... the deadly sins.

"FOR that reason man ...d wife should not limit each other's ...edom. Each should be able to have ...ends. Anybody with any kind of men...lity cannot be shut off from contact ...th other minds. Besides," she laughed, "...f you don't give a man enough rope, ...'ll take it anyway, after much bickering ...d quarreling. You simply have to trust ...ur husband. One must remember, too, ...at a man may be interested in other ...omen without wanting to exchange any ...e of them for his own wife, assuming, ... course, that she has given him of her ...st.

"I believe that if a man has the free...om to meet those of the opposite sex, ...ou take the spice out of the forbidden ...uit and there is no particular desire for ...anting it. The same holds true of the ...oman.

"This does not mean, though, that there ...ill not be cause for jealousy. Wherever ...here is love, there is bound to be jealousy. But one must recognize that it really is a childish trait which can create considerable havoc in marriage, unless it is severely disciplined. This isn't easy to do, but it can be done.

"Certainly," twinkled Mrs. Ziegfeld, "no woman has ever had more cause for jealousy than I. Beautiful women are always throwing themselves at Mr. Ziegfeld or writing him love notes. He is probably subjected to more temptation than any other man. But I had seen the misery that jealousy had caused in other homes, and I determined, in the early years of my marriage, that that green-eyed ogre was not going to disturb our domestic peace. I trained myself to view the situation calmly and to realize that these exuberant young women are merely trying to get a job. There was no reason for me to become excited or jealous.

"BUT everybody must allow for frailties of human nature. There may be escapades that are not the result of a misdirected imagination. However, if a woman has regarded her marriage as a challenge to the utmost skill of her mind, she need hardly fear that an alluring outsider will invade her hearthplace. A man of character takes pride in a comfortable, hospitable home, and unless the circumstances are unusual, he would not think of breaking it up.

"The trouble is, though, that a woman is apt to take a man's fidelity and respect for granted. With the ceremony finished, she thinks she can relax from her efforts to do anything for her husband. But marriage is a job at which she must work every day. She must know that there will be storms to face and trials to bear. Marriage is no more devoid of these difficulties than life itself is. That is why she doesn't gain anything when she runs away from them by seeking a divorce.

"If, on the other hand, she makes up her mind that come what may, she will weather the storms, and willingly, and even eagerly, put into marriage everything she can, she will find that not only will she hold her husband's love, but that nothing life has to offer can bring such great joy and exquisite happiness as the companionship between them."

She paused to look into the garden where Patricia was playing, and to fondly wave her hand.

"I know," she said, as she turned to me, "that none of the triumphs I enjoyed on the stage, nor the money it brought me, has given me such happiness as being a wife and mother. That is the greatest rôle any woman can play in life."

AMAZING NEW INVENTION MAKES OUTSIDE AERIALS OBSOLETE

...household "Green-tenna" gives you the greatest distance, clearest reception, most static-free operation. Eliminates exposure danger of outdoor aerial coming in contact with electric power lines, lightning hazard, or damage by sleet and storm. Saves cost and upkeep every year. Can be moved with the set, will be ideal for apartments to avoid outside aerial congestion and interference.

Nothing to wear out, burn out or replace. Guaranteed satisfactory results under normal conditions.

DISTANCE Brings in long distance stations with surprising ease and unusual clearness. Can be used with any type set—non-directional.

SELECTIVITY Reduces interference to a minimum, and assures uniform reception at ALL points of the dial.

EASILY INSTALLED Install a Radiolene "Green-tenna" on your present set in 5 minutes. Merely hook up wires to aerial and ground posts on set, and attach present ground wire to center post of "Green-tenna." If your radio dealer does not yet have Radiolene "Green-tenna", we will supply you direct.

WESTERN COIL & ELECTRICAL CO., Dept. D, Racine, Wis.
Designers and Builders of Radio Equipment Since 1915

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912,

of RADIO DIGEST, published monthly at 333 North Michigan Avenue, Chicago, Illinois, October, 1930. State of New York, County of New York, ss.

Before me, a Notary Public in and for the State and county aforesaid, personally appeared Raymond Bill, who, having been duly sworn according to law, deposes and says that he is the Editor of the RADIO DIGEST and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 411, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are: Publisher—RADIO DIGEST PUBLISHING CORP., 420 Lexington Avenue, New York; Editor—Raymond Bill, 420 Lexington Avenue, New York; Managing Editor—Harold P. Brown, 420 Lexington Avenue, New York; Business Manager—Lee Robinson, 420 Lexington Avenue, New York.

2. That the owner is: (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding one per cent of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a firm, company, or other unincorporated concern, its name and address, as well as those of each individual member, must be given.) Radio Digest Publishing Corp., Edward Lyman Bill, Inc., Raymond Bill, Edward Lyman Bill, C. L. Bill, Randolph Brown, J. B. Spillane, B. Titman, and Charles R. Tighe all of 420 Lexington Avenue, New York, N. Y.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: (If there are none, so state.) None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for which such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5. That the average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the six months preceding the date shown above is..... (This information is required from daily publications only.) Raymond Bill, Editor.

Sworn to and subscribed before me this 26th day of September 1930, Harry Heag, Notary Public, County Clerk's No. 245, N. Y. County Register's No. 11177. Term expires March 30, 1931 (Seal.)

Radiographs

(*Continued from page 67*)

The Lewises lived in Los Angeles and were professional musicians. They didn't want their daughter to enter the same field, but before Welcome was six years old she was singing about the house in that same low-pitched voice that has since made her famous. By the time she was twelve she was singing prologues in Sid Grauman's motion picture houses, billed as the "Girl Phenomenon".

Then, as they say in the movies, came the war. Welcome devoted herself to benefit work, singing at Red Cross concerts and training camps up and down the coast. After the war she went home to take care of her mother. They were devoted to each other and for the remainder of her mother's life she remained at home. Then she went into vaudeville. She had had little voice training, for a famous teacher once told her that hers was a voice that should never be trained but should be left to develop naturally. There are few voices that can be treated like that, but apparently the teacher was right, for she immediately became successful in vaudeville and was soon making phonograph records.

In fact it was a phonograph record that was responsible for her introduction to Radio, and if it hadn't been for that record she might have been playing the three-a-day on some vaudeville circuit now. She had been in vaudeville for four years, and then one night a friend of hers gave a party. Among the guests was a director of the National Broadcasting Company. The host played one of Miss Lewis' records for the entertainment of his guests.

"There's a girl who would make a great Radio singer," declared the director.

IT HAPPENED that Miss Lewis was in New York then. The host promptly telephoned her, and next day she was given an audition. A contract soon followed. That was a year ago, and since then Miss Lewis has turned down several offers to appear in Broadway musical shows. She has not given up the stage for good, however. Sometime, when the pressure of her Radio work becomes less, she told me, she hopes to play in at least one Broadway show, but it's impossible to say when that will be.

She used to live in New York City, but she recently moved to Westchester so her favorite pet, a wire-haired terrier named "Snip" would have more room to play. When she isn't busy at the studio she makes phonograph records for Victor and does odd jobs around her place in Westchester. She loves mechanics and spends half her time in a suit of overalls crawling under and over her automobile. She did all the electrical wiring in the house herself. She isn't married and she spends her evenings reading fan mail and studying French.

Annette Hanshaw

WE'RE walking up Fifth Avenue, the major part of "we"—I do sound like the Lindberghs, don't I—being the diminutive Miss Annette Hanshaw. Little Miss Van Heusen, they call her sometimes, for it is on that program which comes to you every Thursday night over WABC and the Columbia Broadcasting System, that the tiny "blues" singer is featured.

She's all of five feet tall. All of ninety-five pounds heavy. She has blond curly hair, a skin like peaches and cream. She wears a black velvet beret, a terribly smart black and white dress, black slippers with saucy bows.

As we stroll up the Avenue we peer into shop windows, deciding that the new fur trimmings are adorable, that suede shoes are lovely, but very impractical, that the most ravishing dress we've seen is a plain black one with just three white velvet calla lilies as a corsage.

We lunch at one of those places where there are oriental rugs on the floor and the pats of butter have imperial crests molded on them. And such food! That alligator pear salad! That dessert with the candied chestnuts! However . . . this isn't a fashion talk or a food talk. This is an interview.

First, the skeleton in her closet.

Annette Hanshaw admits she's a 'fraid cat. She's afraid of bugs and rats and thunder storms, and most of all—of the microphone. Yes, in spite of years of Radio experience, she says that every time she broadcasts she is so upset and nervous she wants to grab her hat and run.

"But, why?" I asked.

"Because I'm so afraid I'll fail, not sing my best. Suppose I should have to cough. Suppose I didn't get just the right pitch. And all those people listening."

"All those people listening." That is the secret of her fear. She is afraid of disappointing her audience. Yet she never has. Always her voice is true and sweet, her words clear, understandable, and always her listener is conscious of a very human, "just folks" kind of personality.

Radio isn't her only iron in the fire. Under her own name and also under the names of Patsy Young, Gay Ellis, and Dot Dare, she has made records for many phonograph companies. Over a million of her records have been sold, which, you will admit, is some record! She composes music, too. Two of the popular hits she has written are *Sweet One* and *Till Your Happiness Happens Alo*

She's been humming tunes ever si she was two years old and at six, w a box of candy as a reward, climbed u a chair and sang a solo. "And," she sa "I still like candy. It's all right for to eat it. But I shouldn't drink much coffee." Whereupon she asked waiter for another cup.

Once Miss Hanshaw thought she wo be an artist, and entered the Natio School of Design. She even got so far designing an advertisement for a lipsti company. But four years ago, wh spending a winter in Florida, she w asked to sing over the local station, a that was that. Radio has claimed h ever since.

She says her most important hobby her fifteen-year-old brother. This you brother wants to be a doctor. "I know says Annette Hanshaw, "it's a career th takes years and years, but that's wh he's wanted to do from childhood, ar I'm going to help him to do it. F there's no greater happiness than knowin what you want to do and being able t do it."

"Yes," she added, "I'm one of the luck ones. I want to sing over the Radio an I want to make phonograph records, an that's just what I'm doing."

Marcella

(*Continued from page 69*)

borough which is the target for every joke about babies, museums and grave yards. His first business background wa the Mutual Life Insurance Company Now and then he would study singing a a hobby. And he spent one week in the Scranton coal mines—but he did not like the taste of coal dust sandwiches. He was on the original cast of the Jeddo Highlanders and the Seiberling Singers We'll get at the "Q" yet if it takes all of Scotland Yard's detectives.

* * *

SORRY, Ruth, but no one seems to know where Bill Jonason disappeared. KGBZ says he hasn't been on their station for some time, but maybe someone scanning these columns has heard him recently and will send the news to me.

* * *

MARCELLA hears all, tells all. Write her a letter, ask her any of the burning questions that are bothering your mind. Information is her middle name.

John Garland

(*Continued from page 64*)

…und you! I'll make you pay for …terference!"

…ne else thought of bidding. With…rning a hair John Garland paid … pounds for a tea-pot and seven… …r a china ornament. Then came … no. Sewell started it.

"… pounds!" he said.

"A…urd!" Garland murmured. "Twen…

"T…rty!" Sewell replied.

"F…ty!" Garland bid.

The room became breathlessly still. …s were sums which belonged to fairy-…d. The last bid was Sewell's—one …d and forty pounds. Garland … for a moment.

"… that Mr. Sewell's bid?" he asked.

"…s, sir," the auctioneer answered, …r.

…and leaned over and struck a few … upon the piano—a miserable, worn… …tair, barely worth the amount of …st bid. He shook his head.

"…don't believe Miss Cressley cares … this piano much," he said. "Half …tes seem to be gone, too. I think … Mr. Sewell have it."

"…s a rascally swindle!" Sewell roared. "…n't pay for it. Put it up again."

J…n Garland smiled.

"…certainly didn't pledge my word to …verything," he said. "I dare say …ll be pickings for you, Mr. Sewell."

Sewell flung himself out of the room, …d he sale was over in half an hour. …e vicar wrung John Garland's hand.

"…od bless you, sir!" he said. "You …n't find a better use for your money …a this, I promise you. She's the …rest, most unselfish little lady that …e breathed."

"…glad to hear you say so, sir," Garland …ered. "I'm going to marry her to…ow."

"…e vicar looked amazed. "Is it a …?"

"…ou can tell anyone you like," John …nd answered, "except Miss Cress…n case you should see her first."

"…oesn't she know?" the vicar gasped.

"…ot yet!" John Garland answered. "…te in the evening Mary Cressley …stealing back from the farm on the …s where she had spent most of the …

A fine snow was falling, and a cold …blew through her thin clothes. She …mbered that there would be no fur…niture nor any fire in her stripped home, and a sob came into her throat. Perhaps they would have left a rug or something—her clothes she was not sure about. Tears dimmed her eyes as she made her way down the little lane. It was her last home-coming. When she reached the gate she peered in, and her heart almost stopped beating. The furniture was all there! Nothing had been taken away!

She began to tremble. She scarcely knew how she pushed open the door. From the kitchen came a pleasant smell of cooking—the parlour door was open. She peered in. A great figure rose from his knees.

"Mr. Garland!" she exclaimed.

"May as well call me John," he answered, "as we're going to be married to-morrow."

She fell into his arms. Her hat was crushed, and the little fair curls came tumbling over her ears. He took the pale face in his strong hands, and kissed her upon the lips.

"Mary, you little fool," he said, "why didn't you send for me?"

"I don't know," she murmured, weakly. "I thought you were going to be married."

"So I am, to you, to-morrow," he answered. "I've fixed it up with the vicar. Come in to supper and I'll tell you all about it."

He led her out of the room, his arm around her waist. She forgot that she had ever been wet and cold and lonely. For a moment she believed that she had died upon the moor and been taken up into heaven. And then he kissed her once more upon the lips, and she knew that she was on earth!

"Been on a vacation Bill?"

"No, Jim—I've stopped smoking.

Gained six pounds in a week. You know how I used to smoke—a package of cigarettes and a cigar or two a day—it sure had some hold on me. I tried to stop many times but could only quit for a few days. But I'm through forever now—took a scientific home tobacco treatment—fixed me up in two weeks.

"Wasn't hard on me at all—noticed improvement the first day—I feel like a new man. It didn't interfere with my work—didn't leave any druggish after-effects—the money I saved in the last two weeks has paid for the treatment alone.

"Why don't you take it? It has entirely banished the tobacco habit for many thousands of men like you and me. It has been successfully used for over fifty years and comes to you with a money-back guarantee—it is a doctor's individual prescription that sure fixes you up. Write for full information NOW. No obligation. All correspondence is strictly confidential."

Make Your Old Set a 1931 Model for **$4.85** Complete for Any Set

Tune in That Smooth Mellow Tone and Tune Out That Noise

The F & H Tone Control and Noise Eliminator will vary the tone so as to conform with the personal musical tone taste of any individual, brilliant, treble, or that deep mellow bass found only in the high priced modern tone controlled sets. AS A NOISE ELIMINATOR 50% to 95% of the high pitched static and line noises can be eliminated. Finished in beautiful crystallized finish and comes complete with adapters and twelve foot silk cord for convenient remote control. Connected by anyone in a minute's time. Return in three days for refund if not satisfied.

REESONATOR

For distance and sharp tuning. Over 40,000 satisfied customers. Now only $3.95.

The Reesonator will increase the volume, distance, power and selectivity of your radio set to the equivalent of the addition of two extra tubes. It will enable you to play with dance volume stations which were barely audible without it. Attaches across aerial and ground leads without tools by anyone in less than a minute. It is especially recommended for all sets having an untuned antenna or floating tube such as: Radiola 16, 17, 18, 33, and 333; Atwater Kent models 30, 32, 35, 37, 38, 48 and 49. Certain models of Victor, Temple, Silver-Marshall, Knight, Apex, Dayfan, Crosley Bandbox and Jewelbox. Saves 25% on A and B batteries on battery sets. Return in three days for refund if not satisfied.

F. & H. AERIAL ELIMINATOR

Price **$1.25** Complete

Every Instrument Tested on Actual 1000 Mile Reception

The F & H Capacity Aerial has the capacity of the average 75 foot aerial 50 feet high. It increases selectivity and full reception on both local and long distance stations, and is absolutely guaranteed. It eliminates unsightly poles, guy wires, mutilation of woodwork, etc. It does not connect to the light socket and requires no current for operation. Enables set to be moved into different rooms with practically no inconvenience. We predict this type of aerial will be used practically entirely in the future. Installed in a minute's time by anyone. Return in three days if not satisfied.

Floyd Gibbons's Big Thrill

(*Continued from page 32*)

ness to the great putch—putch, you know, is German for revolution. Well, sir, Larry went to Munich——"

Mac is tapping him on the arm. Gibbons goes on reading. He goes a little faster. Mac continues tapping. Floyd goes faster.

These taps are unknown to the public. But they are a most important part of an extensive signal system vital to Radio newspaper editing. Tapping means faster. Stroking the arm means slower. Mac's every move, every nod, every wave of the fingers, means something in this signal system.

Floyd is into the plane crash story.

"—left on a flight across the——"

It is dramatic—tense. Passengers in danger, he reads on.

"—was equipped with a four hundred and twenty-five horsepower motor——" Mac finds that another page is missing. A brief, frantic hunt for the missing page with more of the details of the plane crash. It is gone. Floyd is nearing the point where he must turn to the missing page. Mac signals that it is gone.

"—And then, ... and then—the plane was completely demolished."

On into the story of the death of Karl Boy-ed. The seconds tick into minutes and Mac's tapping becomes frantic.

"The United Press shoots a story from Washington—Bobby Dunn and I were down in Mexico with Pancho Villa."

IN ALL, forty seconds have been wasted in mishaps. Forty precious seconds. More than 110 words wasted. They must be deleted. Mac works frantically with the blue pencil. Gibbons rushes along. An item is deleted. Mac's tapping changes to stroking, the last minute is reached. The broadcast must be finished exactly on time, not earlier, not later. The seconds tick off. The newest member of the wind-up club has been announced.

"E. Ray Webster, a shoe salesman. I guess a shoe salesman should get something to boot, so, in addition to his membership in the wind-up club, he wins the sandpaper socks for footing this column with the following":——

Floyd Gibbons is saying good night just as the second hand of the studio clock reaches one minute to twelve.

"—and until tomorrow night, at [illegible] hour, good night. This is Edward T[illegible] gesen announcing."

Twelve o'clock on the second. On [illegible] button, according to the studio parla[illegible]

The paper has gone to bed. It has g[illegible] to bed on time. That is the thing [illegible] counts. The incident of the missing f[illegible] page is forgotten. The fact that the m[illegible] ing manuscript on the plane crash has b[illegible] lying on a piano in the rear of the stu[illegible] is forgotten. No one cares how it [illegible] there. The tenseness has left Floyd G[illegible] bons. He once more becomes the affa[illegible] pleasure-loving, spontaneous eternal you[illegible] his friends know him to be.

HE WILL be paid appr[illegible] imately $300.00 for his broadcast. [illegible] work is over for the day. And until [illegible] morrow night at this hour, Floyd Gibb[illegible] relaxes.

We repair to a restaurant for a bite [illegible] supper.

"And is that," I asked, "a fair sam[illegible] of what you go through twice daily?"

"Everything went unusually smooth tonight," he replied. "You'll have to wat[illegible] another session to get the real thrill [illegible] this thing. For instance, one night t[illegible] studio clock stopped and we didn't kn[illegible] how much time was left. And one nig[illegible] when Mac was sick and the substitu[illegible] tapped my arm when he should ha[illegible] stroked and I had to ad-lib for two f[illegible] minutes, and again. . . ." On and o[illegible] mishap after mishap, thrill after thri[illegible] In his year of fighting against unstretc[illegible] able seconds, Floyd Gibbons has been [illegible] time ninety-nine per cent of the tim[illegible] You could count on your fingers and to[illegible] the number of times he has failed [illegible] finish "on the button".

Only a man of Floyd Gibbons' vitalit[illegible] and nervous energy, could carry on th[illegible] way he is forced to. I was willing [illegible] admit that he was not spoofing when h[illegible] told me that editing his Radio newspape[illegible] was the greatest thrill in his life.

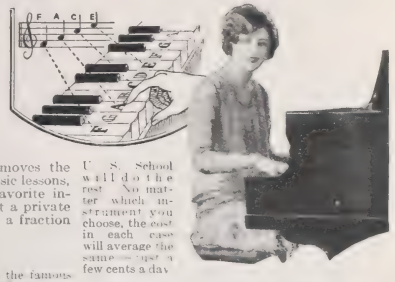
Don Carney

(Continued from page 65)

ed in the world's greatest city with
ld suit-case which sheltered nothing
valuable than a well-worn tuxedo.
ish he carried a total of 15 cents. It
a tough winter for Don Carney.

So WERE the next few
's, spent as a lifeguard at Avalon,
J., and playing small movie parts.
fter the movies, Carney cycled back
audeville. It was the same old grind
ing around to dinky booking offices.
ing bookings occasionally, fame never.
lly in May, 1928, Jules von Tilzer,
of the brothers of famous Harry,
to Don:
Why don't you try Radio?"
I don't know—I never thought of
."
Say, you go down to the McAlpin,
n to station WMCA, and ask for
rins. Tell him I sent you."
atient Don Carney went to WMCA,
ved at a moment in the afternoon
n an immediate audition was possible.
sat down at the piano, played and
into the microphone. Norrins, sit-
in his office, listened to the resonant
e coming out of the loud-speaker,
ed Carney in, and said:
Well, you're good. But I haven't any
for you right now."
Then there's nothing doing?"
I'm sorry. Leave me your address,
when I want something of your type,
let you know."
Carney was writing his name and ad-
ss on a piece of paper which he had
ed up from Norrins' desk when Walter
ff, WMCA announcer came in and an-
nced plaintively:
What in the dickens are we going to
tonight?"
Norrins: "I don't know. What do you
an?"
Well, I've got to go out on a remote
trol job, and there'll be nobody here
announce that bunch from the African
thodist Episcopal Church."
You mean there won't be anybody
e to announce the program in the
dio?"
That's what I've been trying to say."
Daring Don lifted his head.
Why not let me do it?" he asked.
Your voice sounds O.K. to me," said
ff.
His voice is all right," declared Nor-
s.
Then why don't we let him try it?"
Why don't we?"
And furthermore, if he makes good
night, why don't we give him a job?"
Why don't we?"
Thereupon Neff led the future famous
ncle Don into the studio, showed him
w to switch from one microphone to
other, parted from him with a prayer
r the amateur's success.



To those who think Learning Music is hard-

PERHAPS *you* think that taking music lessons is like taking a dose of medicine. It isn't any longer!

As far as you're concerned, the old days of long practice hours with their hard-work exercises, and expensive personal teacher fees are over with.

You have no alibis whatsoever for not making your start toward musical good times now!

For, through a method that removes the boredom and extravagance from music lessons, you can now learn to play your favorite instrument entirely at home—without a private teacher—in half the usual time—at a fraction of the usual cost.

U. S. School will do the rest. No matter which instrument you choose, the cost in each case will average the same—just a few cents a day.

Easy As Can Be

The lessons come to you by mail from the famous U. S. School of Music. They consist of complete printed instructions, diagrams, and all the music you need. You're never in a hot water. First you are *told* how a thing is done. Then a picture *shows* you how, then you do it yourself and *hear* it. No private teacher could make it clearer or easier.

Over 600,000 people learned to play this modern way—and found it easy as A-B-C. Forget that old-fashioned idea that you need special "talent." Just read the list of instruments in the panel, decide which one you want to play, and the

Have You Instrument?

Name

Address

City State

No sooner had Don Carney become an announcer and all-around fill-in entertainer than he saw the possibilities of broadcasting, concentrated upon microphone technic, sound effects, and all things requisite in the broadcasting of multitudinous roles and character parts. Ambitious, he worked hard at WMCA, made contacts with larger stations, landed a job at WOR.

One afternoon at the studios Al Cormier, WOR commercial manager, came to him hurriedly and said:

"Don, I've got a prospective client coming up to the studios—he'll be here in thirty minutes. Have you got anything that would do for a half-hour kids' entertainment?"

"Why—not up to this moment, but—say, sure I've got something. I'll have it ready for you in half an hour!"

Trusting Al said O.K., brought his client to the listening post and sold the account. In that brief half hour Carney had worked out the idea of "Uncle Don." had rung in the airplane, harmonica and Simple Simon, had written a little song, and had created a line of chatter, a thread of helpful philosophy which caught the fancy of the client at the moment and amassed a following of half a million signed members within a year.

But the half million Uncle Donites, and the other hundreds of thousands who listen but do not write are only a part of the great audience that follows the multiplied activities of Carney the Versatile. Other thousands smile thrice weekly with his Book House Story Man, and millions set their dials once a week to follow the hamlet happenings of Luke Higgins in "Main Street Sketches." Not only does Carney play Uncle Don, Simple Simon, Uncle Otto, Book House Story Man, Luke Higgins—he himself writes nearly all of the material for these characters, including the enormous task of preparing the weekly script for Main Street.

AWAY from the microphone he is the happy husband of the beautiful girl he married last summer.

Earnest, eager, sympathetic, yet ambitious withal, this genial rover epitomizes his concept of life quaintly and beats about on bushes to come to his point:

"I'd like to live in a thatched hut on a palm beach somewhere in Florida or the South Sea Islands. Meanwhile I bring as much of nature as I can into our apartment—many kinds of plants, an aquarium. The Central Park Reservoir is nearby. I take long walks in the park. I guess that's the best any of us cliff dwellers can do.

A Radio Column—*By* Heywood Broun

(*Continued from page 51*)

out what it was they wanted. All the newspaper men used to listen attentively and at the end of every speech somebody would shout, "What's the matter with Hugo Slavia." And then we would all shout "It's all right." And then we would sing "Auld Lang Syne" and go home.

So LONG as this is reminiscence night I might say a little about a forgotten figure whose name has just come up once more in the newspapers. I found this name on page twenty-six. It used to be page one. Gertrude Ederle is a swimming instructor in an obscure swimming pool at Rye, New York. She is almost deaf and she says that the money she earned in vaudeville is practically gone. She told the reporters "If I had known how it was going to be—I don't think I would have done it. It wasn't worth it."

You remember what IT was. Four years ago—come August—Gertrude Ederle swam the English Channel. She was the first woman to swim the Channel and she did it in faster time than anyone had ever accomplished it—girl, boy or man. Her record did get beaten later on by several men. But after all she had softened up the Channel for them.

If Miss Ederle's hearing was definitely impaired by the Channel swim that is a big price to pay. Maybe the feat brought her less in fame and fortune than she had hoped. Nobody except Lindbergh ever got a more glorious welcome home. I don't even think the Colonel himself beat Trudy by more than half a ton of ticker tape. People always stop cheering after a while. You have got to expect that. But I am thinking of something—of something more lasting and deeper than the keys of the city and a speech by the Mayor. Gertrude Ederle may not realize, now, and perhaps she never knew that—she was a symbol. When she reached the far side of the channel and dug her toes into sand and gravel she gave every woman in the world a chance to stand a little straighter and a little more securely. Over a course which had been tried again and again she had done better than the best man. Perhaps it isn't logical to say what one woman has done—women can do. But that is the line that thinking follows. The world could never be quite the same again. You couldn't go on dividing humankind up into sturdy oaks and clinging vines. I'm a clinging oak myself. A vine that could swim the English Channel wasn't exactly what you might call clinging. And I think that even today the effect hasn't been entirely lost. Four years ago we heard more about woman's sphere and, "Of course this is a man's job." And all that. Every time Trudy splashed her way through a big wave she kicked a tradition in the face. The Channel might have been some old gentleman saying, "No, no—not for little girls". And she showed him and all other old gentlemen in the world—old gentlemen of nineteen or ninety—that woman was not inevitably the weaker vessel. Not when it came to crossing a Channel.

I am not arguing that women should invade every field now occupied by men. I don't know that the home or the universe would be better off if we had women piano movers or if Vassar went in for intercollegiate football. It isn't necessary that some forthright and strong-minded female should hit Max Schmeling in the jaw and knock him out—but I don't think that is altogether impossible—I know that life today isn't run to any great extent by weight lifters—and yet I suppose thousands and hundreds of thousands of women have been denied all kinds of jobs for which they were superbly fitted for no better reason than that they were women. The very word feminine is used to denote weakness and passivity. We even have feminine endings in metrical schemes. If a man named Gilbert had a job and made a mess of it we would say, "Gilbert wasn't much good." But if a girl called Sally scored a failure at some piece of work a great number of people in the community would not be content in blaming the failure on Sally's individual shortcomings. They would probably say, "How like a woman." The whole theory of the masterful man rests upon the naive belief that any m can look a woman in the eye, grab h by the wrist and say "Come here." A that if he does she will not only advan meekly in his direction but love him.

But if the system amounts to anythi it has to be universal. One channel sw mer is enough to break the whole cha Imagine some man trying to chuck G trude Ederle under the chin. I do mean, of course, that as soon as Tru swam the Channel every discriminati against womankind ceased upon the stant. But it was one of the things whi helped. And it is still helping. It w worth it. I don't care whether there logic in that fact or not. Whoever sa this world was run on logical lines? A if you think there is no discriminati against women look at the laws of yo own state and see what a husband can with a wife's earnings in scores a scores of communities. And if you don want to take the trouble to look up th law books just take a glance around th office where you work. In hundreds o occupations women get less pay for do ing precisely the same work as a ma And when it comes to picking executive you know perfectly well that a far mor capable woman will be passed up in fa vor of a man. Of course lots of busi nesses are being run by women today Some woman acts as boss in plenty o establishments. But the salary goes t somebody else. She is the private secre tary or the assistant to the president o something like that. How do you sup pose business men get so much time t play golf—because each one of them ha some woman in the office who knows a great deal more about the concern an its affairs than he does.

I do not want to seem seditious to my sex. Complete equality has its advantages. I stopped giving up my seat in the subway as soon as a woman swam the channel. There was no longer any point in my pretending that I could withstand the buffets of the crowd just because I was a man. Swimming the channel is just as hard as getting out of a Bronx express in the rush hour.

CHIVALRY is just another way of saying, "There! There! little girl! Don't bother your pretty little head about such things."

And maybe she wants to bother her head. And tackle the problem for herself. It doesn't have to be the English Channel. But that is a good way to start. Please take it back Trudy. Don't say it wasn't worth it. Oh yes it was. Listen a little closer. Can't you still hear it—yes, you can,—that's it—ringing down four years and further—"Atta girl."

FANNIE HURST ANSWERS IT!

Is it true that romance went out with the crinoline skirts and the clinging vine?

That love no longer means all to woman and that she would not make sacrifices for it?

That there is no romance in modern marriage?

America's most brilliant woman novelist answers these questions in an interesting interview on

IS ROMANCE DEAD?

Take Your Pick of These BIG PAY RADIO JOBS

Broadcast station jobs pay $1800 to $5000 a year.

Many of my men earn up to $100 a week selling and servicing Radio sets.

Operators on Ships see the world and get good pay plus expenses.

Radio Factories pay well-trained men $1800 to $5000 a year.

YOU MUST HAVE N-R-I- TRAINING to be a CERTIFIED RADIO-TRICIAN

I Will Train You At Home to Earn Big Money in Radio.

Many of My Men Make from $50 to $100 Weekly

Thousands of Big-Pay Jobs Opening Every Year

Wouldn't you like to say Good-bye to slow raises and low pay? Then by all means mail the coupon below for my free book of facts on the many opportunities to make from $50 to $100 a week in Radio. You will be amazed at the variety of fascinating, money-making jobs this growing industry offers trained men. And you will be surprised how easily and quickly my famous 50-50 method of home-study trains you to fill any of these big-pay Radio jobs. (Lack of high school education or Radio experience are no drawbacks.) Moreover, you will learn why my training is the only training that makes you a "Certified RADIO-TRICIAN"—the magic words that mean valuable recognition for you in whatever type of Radio work you take up after graduation.

Earn While You Learn

You don't have to quit your present job to take my training! You stay right at home, hold your job, and learn in your spare time. I teach you to begin making money shortly after you enroll. My new, practical method makes this possible. I give you 8 big laboratory outfits that teach you to build and service practically every type of receiving set made. Many of my students earn $15, $20, $30 weekly while learning. Earle Cummings, 18 Webster St., Haverhill, Mass., writes: "I made $375 in one month in my spare time, installing, servicing, selling Radio sets."

My course is complete, up-to-date in every respect. I not only train you to fill a good job in any branch of Radio, but also give you instruction in all new developments in the Radio field—such as Television, Talking Movie operation, etc. You learn Radio from A to Z.

Get My Free Book

Why go along with $25, $30 or $45 a week when the good jobs in Radio pay $50, $75, $100 and some up to $250 a week? You don't have to! Send for my 64-page free book and see exactly what Radio offers you—see what I offer in Radio training and how I help you get a good job after you graduate. I back my training with a signed agreement to refund every penny of your money if you are not satisfied with the lessons and instruction service I give you. Mail the coupon NOW!

The Reality of the Spiritual World

(*Continued from page 50*)

Both operations accompanied as they are by physical phenomena are also accompanied by psychic phenomena. Neither can be understood completely without the recognition of the reality of the spiritual world, and, in fact, human life itself is full of puzzles and misunderstandings and misconceptions unless that world is taken into account.

Identifying myself with this more scientific group of investigators, I say that the region of matter and the region of religion are both important, the physical and the spiritual are interlocked. The methods of dealing with the two regions are not so distinct, so isolated, so discordant as has been thought.

WE ENTERTAIN the ambitious hope of bringing the two bodies together and raising, as it were, Jacob's ladder between the two worlds, extending the methods of science into another dimension and breaking into the region of spirit as through a trap door.

We are seeking to verify strange assertions and to extend the methods of scientific proof beyond their recognized scope and into regions where they have been thought to be inapplicable.

We are not surprised at the opposition we meet with. We are aware of random utterances of believers of whose weakness we are fully conscious, and yet we hope that in due time our work will be judged by its fruits.

Speaking for myself, I believe that existence is continuous and that death is not a break in its continuity but a mere sloughing off of the material body. We go to a spiritual body, a body which we have though it makes no appeal to a large percentage of us. We shall continue in the spiritual body when the material body has been left behind. I hold that we are incarnations of spirit here and now, spiritual beings in contact with the physical world and living on this planet for something under a century. Existence in the physical world is of considerable importance in the history of the soul and appears to be the beginning of an individual existence or personality. Whatever has happened before, I know certainly that the individual continues thereafter and carries with him his powers, his memory, and his affections. These, and these only, are his inalienable possessions; all else of the material order he has perforce to abandon and leave behind. Powers, memory and affections—these he retains.

The process of growth and development continued apparently without limit, and whilst his friends are struggling still with the material organism, he is able to help them and occasionally communicate with them. We are surrounded by a cloud of witnesses and helpers, and our terrestrial activities form an insignificant proportion of the whole of existence.

We have concentrated too much upon matter and have attended too little to the possibilities of space. Space is enormously more extensive than matter. The worlds in space, though so numerous and huge, occupy an infinitesimal portion of the space available. Already science is discovering that all activity, all energy, all spontaneity is to be traced to the properties possessed by what we call empty space, and matter that speaks to our senses is purely demonstrative.

The loud speaker had nothing to do with inventing this utterance of mine, and yet it articulates, I hope distinctly, and in many respects is acting like a brain. The vibrations of the diaphragm show what is going on in space. They have initiative of their own.

We are only now beginning to real the immensity of the powers which m about those pointers and bring about the phenomena, some of which we familiar with.

The real fact is that we are in midst of a spiritual world which dom nates the material. It constitutes great and present reality whose powe we are only beginning to realize, and force of which would seem prodigio and terrifying had we not been assur that these majestic energies are all co trolled by a beneficent power whose nam is love. Knowing this, we can face a destiny that may call us, and so let take courage and proceed and greet t unknown with a cheer. God bless yo

Lowell Thomas—Radio's New Voice

(*Continued from page 9*)

On this man's head the Turks had placed a price of $250,000. Allenby told Thomas this glamorous and romantic character was Colonel T. E. Lawrence, archæologist and soldier. "Would you like to meet him?" Allenby asked. "It could be arranged."

So Thomas met Lawrence in the heart of the desert land closed to Christians for thirteen centuries. He went with this Nomad into the Desert and witnessed the organization of Lawrence's wild army. The story of how this army was assembled and how it saved the Allied cause in Asia Minor was brought back by Lowell Thomas, the only person to obtain an imperishable record of that historic conflict.

When finally the Cross had triumphed at Armageddon and blazed throughout the Holy Land, the British Government, to insure the safety of the precious films taken by Thomas and Chase, detailed a special warship to bring the two adventurers back to Europe in order that copies of the films might be preserved for the British Imperial Museum.

There were still adventures lurking nearby, and Thomas wasted no time getting into the centre of action. The Armistice was signed while he was in Paris. Almost before the final barrage had ceased, Thomas was attempting to gain entrance into Germany. Fifteen times he tried. The sixteenth attempt was successful, and Thomas was the first man to see the Central Powers in the convulsion of revolt and to bring back the story of the German Revolution. No only did he use his own eyes to witne history in the making. He imprisoned forever on the imperishable record o celluloid by using the camera's eye.

After reporting his experiences in Ger many to the Peace Conference in Paris Thomas embarked on a speaking tour i 1919, telling of his experiences as a wa correspondent. The tale of his exploit with Allenby and Lawrence quickly caught the public fancy.

THOMAS returned to America for a short time after his round-the-world tour. But he was not home for long. In 1922 he accompanied the Prince of Wales on his trip, through India. After that he headed expeditions into Malaya, India, Upper Burmah and Central Asia, returning to Paris late in 1923 to tell of his adventures on these expeditions.

Pausing only long enough to catch his breath, Thomas set out on another adventure. He acted as historian of the first world airplane flight and later hopped off on a 25,000-mile jaunt over Europe, Asia and Africa.

The wanderer finally returned home. He had written many books of adventure, among them "With Lawrence in Arabia," "Beyond Khyber Pass," and "Count Luckner, the Sea Devil." There were more books to be written, more stories to tell. And a young son, Lowell Jackson, was growing up.

BIGGEST MOMENTS IN MY LIFE *by* MARIA JERITZA

Miss Adams tells you how to procure your own solar horoscope—FREE

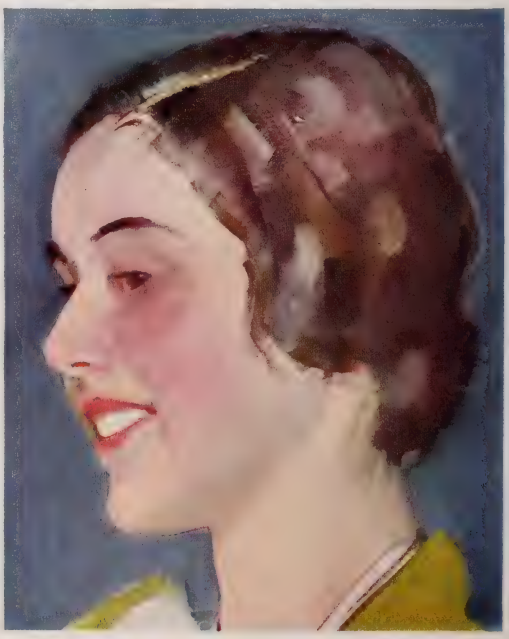
The Dentists' Dentifrice should be your FAMILY DENTIFRICE

MANY people remember the time when trips to the dentist were made only to get relief from pain. In those days, no one thought of going for prevention, before pain developed.

And today, there are people who do not think of using Forhan's, until their mouths are beyond the help of ordinary tooth-pastes.

But the well mouth needs Forhan's. It is a dentifrice safe and pure and mild—as fine as a dentist can make it, for it was developed by a dentist, R. J. Forhan, D. D. S.

The tiny teeth of children—those precious first teeth which have such an influence on the future health and beauty of the mouth—need the scientific cleansing which they will get with this gentle dentifrice.



The teeth of boys and girls also need Forhan's protection, to supplement the dentist's watchful care. No dentifrice can do a more thorough job of reaching every fissure and crevice of the teeth during these critical years.

In the adult mouth, Forhan's serves a double purpose. It cleans the teeth, of course, but in addition it helps to stimulate the gums. Used as recommended, with massage at the time of brushing, it rouses sluggish circulation, brings to gum tissues a pleasant tingling, and helps to keep them in the coral glow of health.

Do not make the mistake of thinking that Forhan's is only a pyorrhea treatment. If you suspect that you have this ailment, if your gums are tender, see your dentist at once. When the mouth is healthy—before any tenderness develops—is the time to adopt Forhan's as your dentifrice. It is far better to avoid disease than to treat it after it develops. The use of this scientific dentifrice will help you to keep the mouth of youth well into middle age.

NOW ON THE AIR!

New Forhan's program—featuring Evangeline Adams, world-famous astrologer—every Monday, Wednesday and Friday at 7:30 P. M. Eastern Standard Time—Columbia network.

YOUR TEETH ARE ONLY AS HEALTHY AS YOUR GUMS

FOLLOW MY STARS OF YOUTH TO A

★ ★ Clearer, softer skin

rances Ingram herself tells how to keep the skin lovely at its 6 vital places

YOU are just as young and attractive, or just as old, as your skin looks," told a charming woman who recently ame to consult me. "Keep your skin im-aculately clean... Keep it youthful at my .x stars... And *you* are youthfully lovely."

Then I explained to her my method vith Milkweed Cream.

"To cleanse the skin, spread my Milk-veed Cream generously over your face nd neck. Let it remain for several min-ites, to allow the delicate oils to pene-rate deeply into the pores, and then emove every vestige of it with soft linen.

"Now—apply a fresh film of the Milk-veed Cream. With outward and upward trokes pat it into the skin at the six oints starred on my mannequin.

"There are special *toning* ingredients in this Milkweed Cream. These penetrate the cleansed pores and defend the skin against blemishes and aging lines and leave it clear, soft and lovely."

This charming woman came back to see me, a day or two ago. Her skin looked *marvelously* clear and soft and fresh! She looked at least five years younger—and said she felt it!

I have recommended my Milkweed Cream and my method to so many women, and I have *seen* their skin grow fresh, clear, young. Won't *you* follow my six stars to a clearer, softer, younger skin?

If you have any special questions to ask about skin care, write for a copy of my booklet, "Why Only A Healthy Skin Can Stay Young." Or tune in on my radio hour, "Through The Looking Glass With Frances Ingram," Tuesdays, 10:15 A. M., E. S. T., over WJZ and Associated Stations.

STUDY MY MANNEQUIN AND HER "STARS" TO KNOW WHY

"Only a healthy skin can stay young"

★ THE FOREHEAD — *To guard against lines and wrinkles here, apply Milkweed Cream, stroking with fingertips, outward from the center of your brow.*

★ THE EYES—*If you would avoid aging crow's feet, smooth Ingram's about the eyes, stroke with a feather touch outward, beneath eyes and over eyelids.*

★ THE MOUTH — *Drooping lines are easily defeated by filming the fingertips with my cream and sliding them upward over the mouth and then outward toward the ears, starting at the middle of the chin.*

★ THE THROAT — *To keep your throat from flabbiness, cover with a film of Milkweed and smooth gently downward, ending with rotary movement at base of neck.*

★ THE NECK — *To prevent a sagging chin and a lined neck, stroke with fingertips covered with Milkweed from middle of chin toward the ears and patting firmly all along the jaw contours.*

★ THE SHOULDERS — *To have shoulders that are blemish-free and firmly smooth, cleanse with Milkweed Cream and massage with palm of hand in rotary motion.*

New Year Greetings —and a Message

Happy New Year! And may 1931 bring you a full measure of prosperity. That is our sincere wish for the many friends of RADIO DIGEST.

It is fitting at this time to look back upon the accomplishments of the old year, and although the New RADIO DIGEST has been in existence but four months, we view with deep satisfaction the progress that has been made and the words of praise, encouragement and help that have come from all parts of the country from our readers.

There is pleasure, too, in the thought that by reducing the price of RADIO DIGEST from thirty-five cents to twenty-five cents we start the new year with the performance of a service to our readers.

We look upon 1931 as a period of opportunity; a time during which plans for the further improvement of RADIO DIGEST may be brought to fruition.

There are many problems to solve but we are confident of attaining our goal with the support of our friends. You can do your part toward overcoming a problem of distribution by subscribing for RADIO DIGEST by the year. By doing this you will help us to stabilize our circulation and you will also insure receiving RADIO DIGEST each month at your home.

There will be no let-down in the quality of RADIO DIGEST. Our policy as announced in September, 1930, that——

> "RADIO DIGEST *will not be edited with any endeavor at salacious or cheap appeals. It will aim to enable the American public to appreciate in a greater degree and in larger numbers the world of romance, entertainment and knowledge which is open to them through the Radio.*"

——remains unchanged. That is our pledge for 1931.

THE PUBLISHERS

Coming *and* Going

Observations on Events and Incidents in the Broadcasts of the Month

HAPPY New Year! Yip-eee! whoop the Light Hearted . . . Watch Your Step, warn the Clipped Wingers and . . . God be with You, wish Veterans of Time . . . before you know it we'll all be wafting farewell to "Old 1931."

* * *

IN THE meantime let's take a peek into the pages of the calendar just ahead—Aha! Bright lights . . . tables with snowy napery . . . gleaming highlights . . . musicians . . . fair faces . . . swirling figures . . . and we hear the muffled glide of nimble toes on polished floor as the music swings from fast to slow to fast. One bright scene melts into another. A voice that we all know is speaking. Rudy Vallee, regular contributor to RADIO DIGEST, will be our guide in an article he has written for the February number. He calls it Night Clubs of New York. It is the most intimate thing Mr. Vallee has ever written, in our opinion, and you meet the various night club hosts and hostesses as his guest.

* * *

OUR Miss Lillian G. Genn is a most agreeable young person. She slips into the office quietly, talks scarcely above a whisper and listens a great deal. Before you know it you have told her everything she wants to know and then she goes. The next thing you know she has a story. Last month she brought you the exclusive story of Billie Burke in her own home. Now she has a story from the lips of Mrs. Fred Stone, wife of the famous comedian. What kind of a person is a great stage comedian in his own home? Well, sometimes he is funny when he doesn't mean to be. Take, for instance, the time when Mr. Stone dug 5,000 holes for 5,000 trees on his 2,300 acre ranch. It was to be a great forest. And when the trees came—Oh boy, you must read what Mrs. Stone says about that. It's all very special for RADIO DIGEST readers next month.

* * *

And while we are on the subject of rib tickling it will interest you to know that we have a special article for one of our issues of the near future dealing with some of the comic idiosyncrasies of well known stage and mike stars who sometimes behave like they had lost their minds when they find themselves in a broadcasting studio. The title of the article is *I Thought I'd Die!* Don't know right now whether we will be able to cram this into our overflowing February number or not. But the old diaphragm is going to get a twist when you do read it.

ONE of the most remarkable characters of Ameri success romance that we know about is the story of B. A. Rolfe, leader of the Lucky Strike da orchestra. He has made millions lost millions. Did you know that has twice been one of the great of motion picture producers? knows what it is to be a millionai with landed estates one day practically broke the next. But is never down hearted. It's all it life-time. It is a thrilling story a reads like fiction as it has be especially written for RADIO DIGEST by Alma Sio Scarberry, author of the first Radio novel, and you'll seeing it soon.

* * *

What's Doty Hobart going to have? somebody as That's funny. We started him off to get a story abo what we called the Radio Police Patrol, sent wir around to correspondents to rush material in fro various cities where the police are cruising around Radio equipped automobiles waiting word from hea quarters to dash in and run crime ragged. But Do reported back that he had run across a better story. H wants to call it Watchdogs of the Air, and it's all abo what Uncle Sam is doing to keep all of his big family Radio stations in their proper places, so they won't t treading on each other's toes, yelping and spoilin things for everybody. Now we're as keen as you are t see what he's going to bring in. But in the meantin we're getting that other story into shape to use anywa

* * *

DO YOU know that one of the greatest of moder conductors could not see a score unless it wa placed against his nose. But what a memory! Artur Toscanini, maestro of the New Yor Philharmonic Symphony orchestr knows intimately every note h heart in ninety operas! His nea sightedness has been remarkabl compensated by the gods. He ha been known to remember for a yea one tiny mistake by a player which a the time seemed to pass unnoticed Musical errors have been known t send him into paroxysms of rage Read the close-up word sketch o Toscanini by David Ewen in the February RADIO DIGEST

"Ask the broadcasters to take off the programs offering recipes. Who cares about recipes? People who don't have cooks go to restaurants anyway." So writes a woman in Florida. She makes a plea that instead of recipes an educational subject should be substituted—English, for example. Watch RADIO DIGEST for a series of articles on educational programs.

Enthusiastic Station Supporters

RALLY ROUND

Many New Nominations Arrive By Every Mail In Thrilling State Championship Contest

NOW is the time to do honor to the four stations in your state that you think are most deserving of honor. Practically all the leading stations have been nominated. Some of them have been nominated over a ...e of times.

...he contest editor is receiving many earnest letters from the ...ners who are rooting for their favorites. Along with the ...nination slips they tell why they have ...de their selections as indicated. Each ...ion has its own individuality repre...ted by a name or a voice. Just how ...portant those identifications are is ap...ent from the following letter from Mrs. ... M. Rice of Dallas, Tex., who makes ... following order of nominations. ...AA, Dallas; KRLD, Dallas; WBAP, ... Worth and KTA, Ft. Worth. She ...tes:

"In my opinion the announcers have ...s to do with the popularity of a station. ...eir personality comes to us like their ...n voices. All of the announcers at my ...orite station, WFAA, have pleasant ...ces that carry conviction. WBAP was ...g my second favorite until they let ... C." go. He seemed part of the sta...n and was a favorite generally. On the ...ner hand there is a certain market an...uncer that would make a nervous ...man have hysterics and a man pull ...t his hair. Above all give us educated announcers," says she.

Typical of one of our Midwest correspondents is the letter ...m Mildred Drabek, 204 S. Lincoln Ave., Aurora, Ill., who ...es up the Illinois stations thus: WENR, WMAQ, WBBM and ...LS. All are located in Chicago. Miss Drabek writes:

"My reason for choosing WENR as the favorite is because of ...wonderful studio staff. It gives plenty of variety—symphony, ...pular orchestra, comedies, dramas, Hawaiians, solos, organ and wonderful staff of cheerful announcers. WMAQ also has a number of features we enjoy, mainly Dan and Sylvia, also the chain programs. The rest follow as a change. Here's lots of luck to you."

We have space for just one more letter and will choose this Eastern one from Miss Margaret Krell, 1372 Ogden Ave., Bronx, New York. Miss Krell's ticket reads in this order: WABC, WJZ, WEAF and WMCA, all of New York City. She says in her letter:

"My first preference, WABC, has given me the greatest of pleasure. It gives me the greatest of variety of entertainment. I am truly grateful each week as I listen with pleasure to Ozzie Nelson, Wallace Silversmith, the Show Boat, Guy Lombardo's marvelous orchestra, Tone Pictures, Henry and George, Mr. and Mrs., Sandy and Lil, Van Heusen, Mystery Drama, True Story and the inimitable Radio Follies. In all Radioland no program has ever equaled the Radio Follies, directed by Norman Brokenshire—'Whata Man'!" Miss Krell also writes enthusiastically of WJZ and WEAF entertainers. Of WMCA she says, "this station has risen to a high standard almost over night with its new apparatus."

It's just too bad we haven't the space to print all the letters for many, many other stations that have been nominated in this new kind of a contest. Be sure to clip the coupons below. Send in your four favorites from the state where you live, on the nomination blank, hold the voting coupon for the bonus allowance by sending all consecutive ballots together.

Now turn to the rules on page 94 and see what you get in the way of bonus votes, and details as to the conditions of the contest. Remember you are to vote for the four *most* popular stations in *your* state. The four winners will be awarded *each* a medallion.

Radio's Little Boy Peep

Walter Winchell

"Broadway" Heckler Finds Gossip Pays Dividends —You Hate Him or You Love Him but You Can't Leave Him Alone if You Read Him at All

By DAVID EWEN

N THAT prehistoric day before the advent of the tabloid and the Radio into our everyday life, parents were accustomed to frightening bad little s by warning them:

"The goblin will get you,
If you don't watch out!"

Today, there is only one way of frightng bad little girls. And that is by exining to them that the goblin is none er than Mr. Walter Winchell—"Vulte Winchell," as one journalist so sweetcalled him—"Radio's Little Boy Peep." apply Mr. St. John Ervine's celebrated ase.

Walter Winchell has the distinction of ng one of the most provocative people this country today. For several years w, his gossip about Broadway and oadwayites has trickled through the lumns of the tabloids throughout the untry—earning for him a whole army worshippers and a still greater army enemies. Now that the Wise Shoe mpany brings Walter Winchell and his ssip into your very parlor once every ek, his army of worshippers and of emies has swelled prodigiously. He s become more and more something of national issue. You are either a great lmirer of Walter Winchell, or else he is gone ahead and spread some gossip bout you. There is no mid-channel.

For a person who thrives on gossip, Valter Winchell has succeeded, with rearkable and strange elusiveness, in keepg information about himself in the ark. The name, of course, is known to veryone in the country, but how many eally know who the man is, or what sort f a personality is his? What follows is, herefore, something more intimate about man whose life-work consists in giving to the world something more intimate about everyone else.

Walter Winchell was born in New York City, and raised in the theatre. For, long before he ever thought of glorifying gossip, Winchell was a man of the theatre. At the age of 12 he may have been no nearer the stage than the aisle; he served as an usher in a movie-house in Harlem. But the aisle leads straight to the stage, and before very long Walter graduated from out of the class of ushers and into the class of performers. He conceived the idea that song-slides should be accompanied by someone singing on the stage, in order to encourage the audience into singing (the idea was his own, and therefore it was Winchell who started the fad for singing-slides); he brought his idea, together with his pleasant soprano voice, to the manager of the movie-house who liked both, and decided to engage ambitious Walter for the job. The idea took the audiences by storm; it soon became a regular feature of that movie-house—and one of its best. Before long, Walter decided to take two other ushers into partnership, both of whom had agreeable voices, too, and who, Walter felt, were meant to be on the stage. And it was not long before all of Harlem knew about these "three little men with the big voices," and of their attraction. This feature, incidentally, ran for many months at this movie-house and with constantly increasing success.

OH yes! you may have heard something about these two other ushers. Their names were Georgie Jessel and Eddie Cantor.

One day, a celebrated vaudevillian—Mr. Gus Edwards of the Keith Vaudeville circuit—stepped into the movie-house and listened to the three young men entertain. He decided immediately that at least one of the three had talent for the stage. And so—passing up George Jessel and Eddie Cantor, both of whom he was to select at another time—he walked straight up to Walter Winchell and asked him if he would like an important position in a featured revue. The proposition, and the salary, stupefied young Walter; he was too dumbfounded to answer. Heaven's gate had opened for him. And with a dazed expression on his face, he nodded his assent eagerly.

He remained with Gus Edwards' Revue until he outgrew his juvenile parts—and received full stage experience. Then, meeting a pleasing young girl with a nice voice, he decided to team up with her in a song-and-dance act. The girl did the singing; he did the dancing, interspersing his steps with wise remarks about this-and-that—but all in all it wasn't a "wow" of an act in the first place. It played in all of the smaller circuits, never hitting the bigger theatres, and—if the truth must be known—never was it very much of a hit with the audiences. They merely tolerated it. Winchell, consequently, became dissatisfied before long with the whole business and swore that at the first excuse he could find—in the form of a decent livelihood—he would escape from the vaudeville racket. In the meanwhile the song

Guy Lombardo with a Gun

And To Tell

Illustrations by Joseph L. Sabo

Another "Thrills" Interview

By LEONARD STEWART SMITH

WE WERE seated at dinner in the grillroom of the Hotel Roosevelt in New York; Guy and Carmen Lombardo, Billy Goodheart, head of the New York office of the Music Corporation of America, who manages the Royal Canadians, and myself. Seated at other tables nearby were Leibert and Victor Lombardo, Freddie Kreitzer, Larry Owens, and the other members of the "sweetest band this side of heaven".

The talk at our table was light talk. Guy and Carmen were taking me back seven years to Cleveland—to the Claremont Inn and the Music Box—whence the band started on its rise to world fame. We were talking of the days four B.C. (Before Chicago), when the "beauty and brains of the family" and I were among the handful of regular patrons of the Claremont Inn who were predicting a roseate future for Guy Lombardo and his Royal Canadians before national advertisers ever dreamed that such an organization would be very instrumental in the merchandising of their products over Columbia Broadcasting System hookups.

"Have you learned to play the trumpet yet?" Guy asked me. He was kidding me about the "threat" made by the "beauty and brains of the family" that unless I learned to play the trumpet like Leibert, she would leave me.

"Have you found the perfect sweetheart from among the ladies of your fan mail?" I retaliated.

ONLY once during the dinner did the talk get serious. And that was when Billy Goodheart interposed that no other band in the country had achieved the record of keeping the same men together, without a single change, through the seven years of their existence. One addition has been made to the original ten. That came only a few months ago, when

d Battles

man

Ar ives
Te he Tale

"It was the night before New Year's Eve at the Granada. Suddenly, amid the laughter and hilarity I heard two shots fired in rapid succession"

tor Lombardo, upon reaching his nine-nth birthday, was given a new saxo-one, a ticket from London, Ontario, to w York, and a seat on the bandstand h his famous brothers. The other ten n have been together since the begin-g. Goodheart, veteran orchestra man-r, who has had under his wing many ier "name bands" said unqualifiedly it in this respect the Lombardo group s in a class by itself.

"I guess it is because we like to work gether," Guy explained. "There are no tty jealousies in our bunch."

Then, for the seventh time, I asked the portant question of this interview:

"What would you consider your greatest thrills?"

"That," said Guy, "is a very hard order. Off hand, I would say that three incidents in our career brought unforgettable responses. One gave a tug at my heart strings that has been so lasting that I still have to fight back tears every time I recall it. That was the time we played *My Buddy* at the request of a dying war veteran and his pal. Another was the time Al Quadbach, the man really responsible for the success of this band, raised a mortgage on his Granada Cafe in Chicago to pay for broadcasting time, bringing the thrill of our first real success. The last brought a fright that nearly scared me to death and actually made my hair stand on end. That was the time two men were shot during the Nutty Club session at the Granada. I will tell you about them in the order of their occurrence.

"The mortgage came first. That was back in 1927. Quadbach was operating his Granada Cafe which still holds forth at 68th street and Cottage Grove avenue in the Windy City. Chicago was full of bands, good bands too, but Quadbach wanted something other than the organizations playing around Chicago at that time. So he went on a trip in search of a band. His wanderings brought him to Cleveland. For a week, without our knowing who he was, he sat through our programs at the Claremont. Then at the end of the week, he approached me, introduced himself and thrust a contract at me for forty weeks at the Granada at more than double what we had been receiving in Cleveland.

"I thanked him for his flattery; thought him a bit out of his mind, but declined the contract. Actually, after I had talked with the boys, we were afraid to venture into the big city of Chicago. Afraid to take the chance in unknown fields.

"BUT I was soon to learn that Quadbach was all seriousness about his offer and was not going to take 'no' for an answer. Every day for the next week he continued to offer the contract. Finally, still spurning the forty-week offer, we decided to take a chance and go to Chicago for a six-week period only as a trial. I arranged with the Claremont that if we failed in Chicago, we could return in six weeks.

"For the first four weeks of our Chicago engagement I felt very sorry for Quadbach, and on no less than twenty occasions offered to release him from our six-week agreement, and every time I brought up the matter, he would push forward the forty-week contract as his answer.

"Our opening night on September 1, 1927, was a nice gesture from the music publishers and Quadbach's many personal friends. We received many telegrams, mostly from our Cleveland friends, and some Chicagoans sent flowers. Maybe there was some irony in that, however. Then for the next four weeks we played to empty tables, with from twenty to thirty couples on Saturday evening, when there should have been from two hundred to three hundred couples.

"At the end of the fourth week I didn't want to take Quadbach's check. We were costing him a lot of money. I told him I was going to take the band out of the Granada and was going back to Cleveland.

"He reached out his hand to take the microphone away . . . I gave him a shove back"

He pleaded with me with utmost sincerity.

" 'Please stay until you get a bad check, Guy,' he urged.

"He was so earnest in his appeal, that I submitted.

" 'Get us a Radio connection,' I suggested, 'Maybe that will help.'

"That was no easy task, getting us a Radio connection. The stations in Chicago were overloaded with good bands and didn't want to take chances with unknowns. Quadbach was near the end of his financial resources. Business had not been good before our arrival and since our arrival it had been worse, if anything. He went among his many friends to borrow the money to pay for broadcasting time. His friends also thought he was 'off his nut going the limit for a bunch of school-boy musicians from the sticks'.

"But Quadbach was convinced that our slow tempo music, so radically different from the fashion of that day, would catch on and be a sensation.

Finally he raised enough money to pay for 15 minutes a night for one week over WBBM. Early in October we started broadcasting.

"Never will I forget that night of our first broadcast! Our fifteen minutes of the first night were almost up. The band played as even I had never heard it before. I got a thrill standing out in front directing. I had always felt certain that I had a real band, but their playing that night convinced me even more thoroughly. And apparently it convinced others.

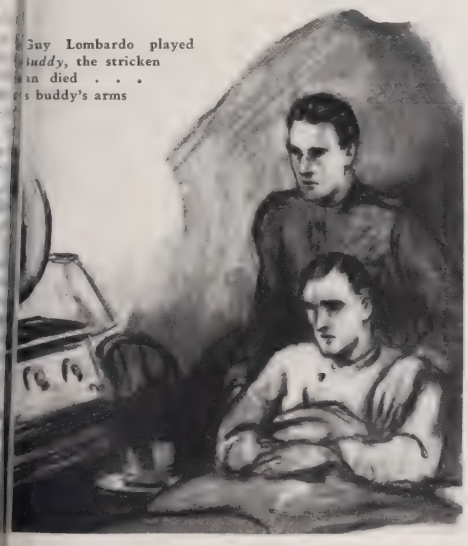
"WE WERE playing our last number when the announcer said the studio downtown was asking if we could stay on the air another thirty minutes at the station's expense. We stayed on the air. That thirty minutes up, they still wanted more. There had been many requests, they told me, to repeat numbers we had played. I believe we played *I'll Get By*, at least twenty times.

"Well, at 1.30 a.m., after four and a half hours of con[illegible] playing, we were pe[illegible] to stop.

"The results were [illegible] diate. The next [illegible] following the first bro[illegible] the Granada was j[illegible] to capacity and fro[illegible] time on space was [illegible] premium every night [illegible] week. Within ten [illegible] Quadbach let a contr[illegible] enlarging the place. [illegible] faith in the band's [illegible] bilities was well repai[illegible] with that faith cam[illegible] success. Of course [illegible] only natural that mo[illegible] dio contracts should f[illegible] First came a local bro[illegible] for a clothing store. [illegible] on this hour that we [illegible] heard for the first ti[illegible] William Wrigley, Jr. [illegible] signed us for our firs[illegible] tion-wide broadcast, ar[illegible] rest of the road to s[illegible] was easy. Any wonder [illegible] I say that Al Quadba[illegible] the man responsible fo[illegible] success of this band?"

GUY ligh[illegible] fresh cigarette, and [illegible] tinued:

"The shooting affair c[illegible] next. That incident, o[illegible] quence of incidents, pa[illegible] a lot of action into two [illegible] brief periods of time.



"At the time we wer[illegible] viding our nights betw[illegible] the Granada and the C[illegible] dy Club, a favorite [illegible] dezvous for theatrical f[illegible] playing Chicago. The s[illegible] must be divided into [illegible] sections. The first at [illegible] Comedy Club and the second, and [illegible] climax, two weeks later at the Grana[illegible]

"At the Comedy Club during dance [illegible] termissions, it was my duty to tell [illegible] listeners something about the persona[illegible] present. While the band took a little [illegible] I would introduce the stage stars [illegible] others present.

"The spirit of the place was one [illegible] good-fellowship. Not all the patr[illegible] were abiding by the management's wa[illegible] ing about the prohibition laws, and qu[illegible] a few hip flasks were present. I was [illegible] the midst of my introductions, stand[illegible] in the center of the dance floor with [illegible] microphone in my hand.

"I noticed a rather hard looking gro[illegible] at a ringside table. Two of the m[illegible] were attempting to restrain one of th[illegible] number from getting up. He appear[illegible] very tipsy. He wrested himself free a[illegible] started for the center of the floor whe[illegible] I was broadcasting and reached out h[illegible] hand to take the microphone away fro[illegible] me. I gave him a shove, hurtling hi[illegible]

e. The place was crowded to capacity.
roughout the cafe were happy laughing
rties, the women in beautiful evening
wns, with comic paper hats at rakish
angles on their heads. Everybody was enjoying the party.

"On Nutty Club nights at the Granada I took the microphone to the center of the floor during intermissions. I could hardly hear myself talk, there was so much noisy fun in the room.

"Amid the laughter and hilarity there came with inexplainable suddenness two shots fired in rapid succession. There was no mistaking the sound. They were pistol shots and nothing else. The hilarity stopped as suddenly as the shots were fired. In a brief moment of stillness several more shots pierced the silence of the room. Then panic and pandemonium reigned.

"I WAS nonplused. I realized I had stopped talking into the microphone. I knew the listeners would sense something of what had occurred. I tried to continue talking into the microphone. All about me was panic and excitement. I looked toward a table where I knew a celebrity was sitting whom I wanted to talk about. Instead of a happy party of a brief moment ago, I saw a fat man trying to get under the table—a table under which two others had fled for security. I looked at another table that had had a particularly happy party. Three of the women had fainted, and the men were trying to get them to the door. A crowd gathered in the back of the room. A hysterical woman kept crying out. 'How horrible!' I couldn't see what had happened. I was trying to continue talking. There was nothing I could think to talk about. So I tried to sing.

"That was the first and last time I have ever tried to sing in public. Carmen does a much better job of it than I do, so I confine my singing to bathtubs and the like. But I did sing, I guess. At least folks told me I sang. And the number was *I've Got a Woman Crazy For Me, She's Funny That Way*. I'll never forget it. That was a sickening thrill.

"I started singing without accompaniment. Then Freddie Krietzer, our pianist, took his place at the piano and followed me in the song. *'She's not much to look at, not much to see,'* I sang. I have no idea how I knew the words, but they just seemed to come to me.

"Right in front of the band stand another woman collapsed. Carmen and Bern Davies, our tuba player, carried her to a table and came back to join Freddie and me.

"'I can't save a dollar, ain't worth a cent,' I continued.

"The police had arrived and were fighting their way through the dense crowd which was near the door to the dining room and massed in the back of the room. Jim Dillon took up his trombone and Frank Henry grabbed his banjo and picked up the chorus.

"'But she doesn't holler, she'd live in a tent.'

"The police were having a lot of difficulty with hysterical persons. They were ordering people to stand back. 'Don't touch!' they commanded, their staccato commands breaking the silence. The back of the room cleared and two forms are lying on the floor. The police officers are leaning over them, making an examination.

"'I've got a woman, crazy for me, she's funny that way.' The song is over. I sign off hurriedly. I return the listeners to the WBBM studio. I want to know what has happened. Al Quadbach is approaching me.

" 'Thanks, Guy, for carrying on that way,' he starts. I want him to tell me what has happened!

" 'You remember Georgie Maloney. The guy you had the tangle with at the Comedy a couple of weeks ago. Well, that's what's left of him, the body lying farthest from the door. He came in looking for trouble and he got it. He opened fire on one of his rival gang leaders who he thought was trying to 'muscle in on his territory'. He killed him all right. But apparently Georgie forgot to put on his bullet-proof vest, because he got himself killed for all his trouble.'

"That whole incident took less than three minutes, but it seemed like three hours to me! One thing is certain, I never want another thrill of that kind again!"

GUY paused for breath. He was so excited he seemed to be living that hair-raising adventure all over again. He smiled.

"That was thrilling, wasn't it?" he asked. Then without waiting for an answer, he resumed:

"The *My Buddy* incident also emanated from our 'Nutty Club' broadcasts. During such programs, late at night, we generally got from two hundred to three hundred telephonic and telegraphic requests for numbers, and I think Radio fans will admit we did our best to fill all requests. In fact it has always been our policy to fill every request we get. We believe it our bounden duty to entertain, and we feel that the carrying out of that duty demands that we play requests as soon after they are made as possible.

A picture taken in 1910, at Jim Jeffries' camp, when John L. Sullivan signed the peace pact with Corbett.

THE Friars' Club grillroom is a busy place at lunchtime. The social life of the club starts at this time. Here actors, directors, newspapermen, singers and lay members gather in numerous groups to fraternize.

As the Interviewer enters the scene he sees Corbett, standing by a table, speaking earnestly to those seated.

CORBETT: . . . and soon as I had dressed I was rushed over to a hotel where an impromptu party was being held in my honor. (He sees the Interviewer) Oh, Hello, Doty. I'll be
you in a minute.

THE INTERVIEWER: No hurry, Jim

CORBETT: I guess you know mo
these gentlemen. (*There is an exchan
greetings between those at the table
the Interviewer.*) I was just telling
of an incident that happened after
fight with Sullivan, when I won the cl
pionship. My friends were celebr
and champagne was flowing like w
There were plenty of reporters pre

ood that the American youth would ell to follow.

PTAIN O'HAY: That was great pub- , Jim, but what's the point to the ?

RBETT: I hate milk! I didn't want or tea. I wanted something cold the only thing I could think of on our of the moment was milk. So nk it. I don't suppose I have ever ed a full glass of milk since. Come Doty, let's have lunch by ourselves. *leads the way to a vacant table. sit down*) Now, what's on your ? I got your message to meet you this noon.

HE INTERVIEWER: An interview.

ORBETT: About what?

HE INTERVIEWER: Your Radio work, self and the heavyweight situation looks to you today.

ORBETT: Seems to me you're trying over a lot of territory. But I'm ready nswer questions as best I can if you're ng to listen. Before you start firing order the food. (*He tells the waiter uring him orange juice, two fried eggs, 's liver and coffee and the Inter- ver duplicates the order.*) All right. y ask me some questions.

HE INTERVIEWER: What was the big- thrill the Radio ever handed you?

ORBETT: That's an easy one. I was ening to the broadcast of the fights n the Polo Grounds on the memorable y night in 1927, when Joe Humphries ounced from the ring that there would one minute of silent prayer for the who, at that time was waging a lone- e fight against the elements over the antic Ocean—Lindbergh. I think that s the biggest punch ever delivered in ing.

HE INTERVIEWER: Yes, I heard it, , and it handed me a kick. But why you claim it was such a big thrill?

CORBETT: Because it struck home to . Several years ago, before Radio me into its own, I was at one time a ry sick man. In fact, the doctors at e hospital where I was being treated d given up all hope for my recovery. ght here, in this very room where we e sitting, a number of Friars were thered. George Cohan was one of em. Every little while George would ll up the hospital to inquire about me. fter receiving a decidedly unfavorable port George turned from the telephone and said, "Listen, fellows, Jim isn't expected to last until morning. I don't know that any of us stand in any too well with the Lord, but it won't do any harm to sit quiet for a little while and offer up a silent prayer for Jim." Of course I never found this out until later but it is a matter of record that I passed the crisis and started on the road to recovery at the very time that prayer was being made.

BUDDY DOYLE: (*Approaches*) Hello, Jim. Heard your broadcast last night. Nice work.

CORBETT: Thanks, Buddy.

BUDDY DOYLE: Say, was that story you told about your reception in Dublin true?

CORBETT: Absolutely. Funny situation, wasn't it? By the way, do you know this gentleman who is giving me the third degree?

BUDDY DOYLE: Know him! I should say I do. He gave me my first break at the microphone on a national hook-up.

THE INTERVIEWER: And you did a splendid job, Buddy. You were understudying for Eddie Cantor at the time, weren't you? Too bad you lost that job, now that Cantor is in pictures.

BUDDY DOYLE: Best thing that ever happened to me. Say, I never missed showing up at the theatre for three years—and neither did Cantor! He's one actor who is too healthy to give an understudy a break. Don't let me interfere with the interview. See you later. (*He walks away.*)

THE INTERVIEWER: Sorry I didn't catch your broadcast last night, Jim. What was the story Buddy referred to?

CORBETT: It was about the trip I made to Ireland when I was champion. Jack McVey, one of my sparring partners, accompanied me and when the train pulled into the station at Dublin Jack started to leave the coach ahead of me. The platform was jammed and when they saw big, bulky Jack they mistook him for the champ. In a jiffy he was surrounded by a cheering, over-enthused mob. Before he could explain that they were in error he found himself lifted on the shoulders of a bunch of huskies and carried down the street to a hall where a reception was to be held. I waited until the crowd thinned out and took a carriage to a hotel. It was fully an hour before that crowd, after discovering the mistake, located me. Poor Jack. He was full of apologies—but, do you know,

Time hasn't been able to call the count on the ex-champion. His mike talks are knock-outs, with all his old ringside vigor.

I think he got a thrill out of it at that.

THE INTERVIEWER: Did you ever broadcast a fight, Jim?

CORBETT: Yes, once.

THE INTERVIEWER: Where was it?

CORBETT: Grand Rapids, over Station WASH.

THE INTERVIEWER: How did you make out? Enjoy it?

CORBETT: Yes. I enjoyed it but I don't think the listeners did.

THE INTERVIEWER: What do you mean?

CORBETT: You see, I didn't broadcast a blow-by-blow description, as other fight reporters do. Now, far be it from me to criticize fight broadcasters. They paint a mighty fine word picture of the fights as they see them and for the average fight fan this description is just as true as the actual contest would look to the fight fan were he present. But remember, I have been in the ring and I know what really is taking place there.

There is plenty of action in a good fight, but only a small percentage of that action is given over to blows that are worth recording. If four or five good blows are landed during one round, then that round has been a huge success. The other blows are insignificant to the trained fighter. Glancing blows, grazing blows, off-balance blows, choppy blows, straight-arm blows—all those mean little or nothing as far as the actual blows are concerned. They are necessary. And they are all a part of the game, but of much more importance to the trained fighter is the foot-work, balance, shift, blocking ability, aggressiveness and mental poise of the contestants during the time these ineffectual blows are being thrown. See what I mean?

THE INTERVIEWER: I think so. You attach as much importance to ring generalship as you do to the flying leather.

CORBETT: More. That's what made Gene Tunney a much greater champion than the public gave him credit for being. When you spoke of flying leather you expressed the very thing which the average fight fan wants to see—plenty of gloved action.

THE INTERVIEWER: Then you don't like to listen to fight broadcasts, I take it?

CORBETT: Oh, don't I! Say, if I am not at the ringside I'm sitting at home in front of the loud speaker taking it all in like a real fight fan. And, believe me, I enjoy a fight broadcast. The announcers certainly know their jobs. But I have learned to discount the effectiveness of many of the blows they tell about. Why, there isn't a fighter in the world who has stamina enough to deliver really telling blows to the number which an enthused announcer describes. Not that the blows themselves aren't seen by him. They are. But they are of value only as points. On the other hand no fighter could stand up against the number of blows credited as being effective by the announcers. But all this talk about fight broadcasting is from a purely personal angle. I'm not wanting the announcers to change their style of reporting a fight just for my benefit. They are doing the job for the benefit of the fight fan and the blow-by-blow description is the best method of giving the fan a true picture of the contest.

THE INTERVIEWER: Why did you say a little while ago that you didn't think the listeners enjoyed your broadca- that fight?

CORBETT: It was too technical. I s only of the effective blows and dev the rest of my description to a de account of the ring generalship displ by the fighters. I honestly believe best part of my broadcast, as far as enjoyment of the listener was concer was the analytical talk I gave bet rounds and after the fight. I guess method of describing the actual fight too cold-blooded. I know I didn't enough flying leather in it to meet the approval of most of those who listening in.

THE INTERVIEWER: Anyone ever anything to you about the broadca any listener, I mean?

CORBETT: Several people told me t enjoyed hearing my voice the air and said it was too the fight I broadcast wasn better one—with more act The joke of the thing is it was a pretty good fight plenty of action. No one e asked me to broadcast anot fight so I guess I wasn't good as a reporter on the

THE INTERVIEWER: Tell about the broadcasting you doing now—it's a wee sponsored program, isn't it

CORBETT: It was.

THE INTERVIEWER: What you mean—it was?

CORBETT: I finished th series last night.

THE INTERVIEWER: Are y going to renew your contrac

CORBETT: There never w any contract. It just we along from week to week. Y see, I was given seven mi utes for a little talk on ea program so, rather than co fine myself to the subject ring battles, I told the listene of amusing and interesting pe ple who had come into m life while I was champion an afterwards; of my friendship with such men as Grover Clev land, Mark Twain, James Whi comb Riley, Bernard Shaw an others.

THE INTERVIEWER: Wha was the reaction to thes broadcasts? By that I mea was there much fan mail?

CORBETT: I should say so It amazed me. Look here (*He pulls a package of letter from his pocket*) These cam in this morning—and every on is a request for my autograph

THE INTERVIEWER: How did you happen to quit the broad cast?

CORBETT: That's a funny one, too. The sponsor was dead set on my giving my own

Jim Corbett in his heyday as a boxer.

Ray Perkins the Old Topper

He Takes a Coupla Pineapples and Shoots a Paradox—Faithful Old Piano Follows Him Through a Putterish Career

By Betty Lloyd Walton

"How Is Everybody?" asks Old Topper as He Settles Down to Entertain the Radio Audience.

"WELL," welled Ray Perkins, (Raymond Lamont Perkins to you!) as he tilted the old topper a little more [illegible] he left eye. "So you want to know [illegible] out my early life, eh?" Then he [illegible]d a few more "wells" for good [illegible]ure, tilted the topper even a little [illegible] to the left, and began:

"I guess I might as well begin by asking 'How is everybody?' You know I [illegible]s like to begin a broadcast by saying 'How is everybody,' not that it means [illegible]ing, but it does break the ice and [illegible]of open up the conversation. And [illegible] know when a Radio performer asks [illegible] intimate questions like 'How is [illegible]body?', the theory is that it brings [illegible]h, ever so much closer to his audi[illegible] and the audience is supposed to [illegible]o itself:

'Isn't he the nice fellow to take that [illegible]est?'

"Of course, that's the theory. I know [illegible] me when I hear anyone ask that [illegible]ion over my loudspeaker I always [illegible] 'What's it to you?'

"Anyhow, it is a silly question, because [illegible] say, a Radio audience cannot talk [illegible]. One thing about broadcasting is [illegible] fact that your audience can't get [illegible] and heckle you. And I don't think [illegible]e is anything so fatiguing as being [illegible]cled. My grandfather was the best [illegible]der in Kennebunk County. Grand[illegible] used to bake a great big heckleberry [illegible] for dinner, and after the dishes were [illegible]hed and polished and all the chores [illegible]e for the day, they'd sit down for a [illegible] quiet evening of heckling.

"But nowadays, it's different. Take [illegible]tical candidates for instance. They [illegible] the Radio, and the fine art of heck[illegible]li is getting as out of date as a mous[illegible]ne cup. Shall I tell you what's wrong [illegible]h this country today? No? Well, [illegible]l. The thing that's wrong with this [illegible]ntry today is the fact that there are [illegible] many political candidates telling us [illegible]at is wrong with this country today. [illegible]d there are not enough hecklers to [illegible]nteract them. Well, anyhow, what [illegible] heckle. This is supposed to be an interview about my early life.

"They tell me that Old Sol (that's what the Sun is called by his most intimate friends. I am one of his very most intimate friends and I sometimes call him 'Good Old Sol') outdid himself this year out on the Hawaiian Islands, turning out bigger and better pineapples. They are not only numerous but there are plenty of them. Some of the pineapples are bigger than Paul Whiteman. You know Paul. He's the man who made a cool million playing hot music. Say, that's a paradox, boys and girls—from hot music a cool million.

"Now you probably think that a paradox is a couple of physicians. But you are wrong again. A paradox is something apparently self-contradictory, like, 'I'll meet you tomorrow night at sunrise,' or 'here's a check for a million dollars'. If it isn't self-contradictory, you lose the paradox.

"YOU'VE all heard of Milton's paradox lost. Well, Milton (I don't recall his last name) kept a sporting goods store on the corner of Fourteenth Street . . . where Fourteenth Street meets Harry Richman. Well, it wasn't exactly on the corner, it was back a little from the corner, because they used the corner itself for a sidewalk and a telegraph pole. Otherwise the cop on the corner would have had nothing to lean upon. The cop was a Pole himself, so the two got along very well together.

"Well, it seems some customer asked Milton for a paradox, and Milton asked: 'what size,' and the customer said, 'Thirty-eight stout.' So Milton brought out a pair of green dox with white spots. And would you believe it, good people, the customer snapped his fingers at that paradox and threw a seven, five times running, so that he was able to buy a very fine pair of shoes for his offspring.

"But every time Milton threw, why, that paradox lost.

"But speaking of stores, in the old days you could go to a drug store and be reasonably sure of being able to buy seidlitz powders or rock candy. But now, I wonder why do they call it a drug store. On the other hand, you never see a meatless butcher shop.

"You know song-writers are a great lot. I am somewhat of a song-writer myself. One of the biggest, unforgettable events in my life was the first time I heard a phonograph record of one of my compositions. That was *Bye Low*, which I wrote shortly after my graduation from Columbia University back in 1917. *Bye Low* was my second song. The first I ever had published, *Table for Two*, made me richer by $7.37, but *Bye Low* was a hit, and I sure was thrilled.

"But there I go drifting to the real purpose of this interview, and that will never do. I was talking about song-writers as a lot. Of course, song-writers

(*Continued on page 104*)

She Followed Him into the Depths of Death Valley—for Love. But She Wanted a Real Bureau instead of a Starch Box with a Cracked Mirror.

"Let's hear a song and forget all our hard luck," said Joe.

She Burns

HEAT . . . shimmering, breathless heat blazing down from a red naked sun and staggering back from white hot sand. A winding trail going down. Bleaching bones, lime-white, fleshless, disintegrated and powdering into the hard dry grit. A line of covered wagons, stumbling and rumbling . . . reeling oxen with hanging tongues and parched hides . . . down, down into the blazing maw of Death Valley.

This scene flashed back to the mental vision of the Old Ranger as he dropped into a kitchen chair of the tidy little home where he was now a guest—the first guest of the bridal pair. He raised a grizzled eyebrow and squinted quizzically at the busy little hostess.

"You what?" he asked hitching back in the new kitchen chair of the immaculate kitchen.

"I said I was glad that I happened to discover borax, it just happened you know," gushed the bride. "Nobody told me about it. I just happened to run onto it and it does so many things—"

"So you discovered borax, my girl?" the Old Ranger still struggled with the scene that flared across the retina of his mental eye while he tried to reason with all the dainty cleanliness of his present surroundings.

"Oh, yes, yes . . . um, I see." He poked a bony finger into the ashes of his old cob pipe, extracted a small cloud of smoke and then twinkled reminiscently at the smiling girl.

"Now you are laughing at me," she said, "I don't care, I can tell you a lot of things I know about borax—" She paused.

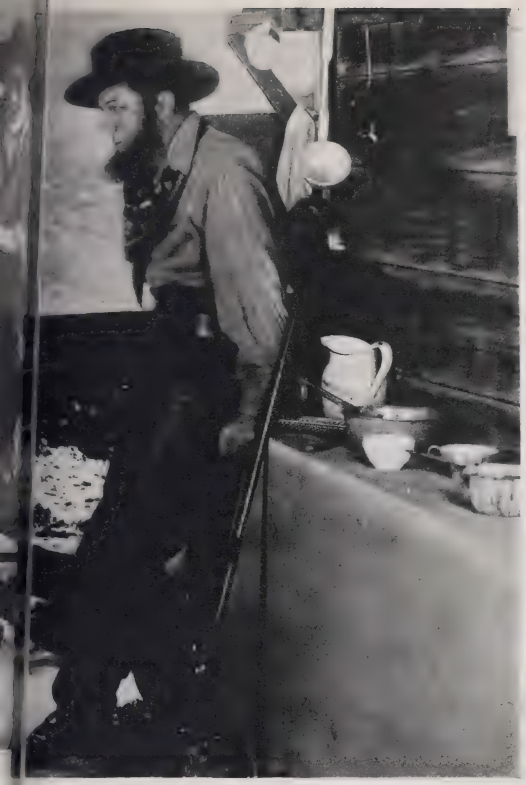
"Of course, Rose, my dear, I reckon you're just smart up on it—probably a heap more than I am. But what struck me was your sayin' you discovered it—"

"Well, you know what I mean. I suppose mother knew about it—"

"Bless you child, she shore did. But I was just a-thinkin'—you, with all your book larnin' did you ever know who was really the first woman to discover borax?"

"Heavens no! Was it Noah's wife or who? Why? Do tell me!"

"'Tain't an awful pretty story but maybe you'd like to hear it."



"Oh, I'm dying to hear it. Do tell me all about it while I get the potatoes ready. Please!"

Old Ranger reloaded his pipe and hitched his chair back against the wall while Rose continued her preparations for dinner.

"Well, let's see—'t wa'n't so far b as Noah but—but—why her name Rose, too—just like your'n. Rose Wint was her name—Rosie an' Aaron Wint who first struck borax out in Death Vall She was a Spanish-American gal—pu as a picture . . . but frail and drean like. Her little feet was never meant go a-trampin' over the sharp rocks burnin' sands of the desert round Dea Valley . . . with that grizzled old pr pector husband of hers. But she stuck Aaron Winters, Rosie did . . . for bet or for worse. I reckon she thought it w mostly for worse . . . that night back 1880, as she was gettin' supper for the t of 'em in their little one-room shack Ash Meadows near Death Valley." A as the old man talks, the scene—

* * *

AARON: What's for supper, Rosie?

GRIEF and Sacrifice Attended the Discovery of the Rich Deposits of Death Valley as Told in this Vivid Radio Drama Broadcast over the National Network.

Green

ROSIE: Beans.

AARON: Is that all?

ROSIE: Chahwallas . . . if you can them. Me, I cannot. Little crawling kes . . . bah!

AARON: Oh, chahwallas ain't snakes, sie. . . . They're lizards. An' just good eatin' as frogs' legs . . . in Delonico's in New York. Most as good, yway, if you're hungry.

ROSIE: I am not hungry.

AARON: Bacon all gone?

ROSIE: Weeks ago.

AARON: How about the flour?

ROSIE: Would I be serving mesquite ans if we had any flour?

AARON: Well, I saw the flour barrel er yonder 'gainst the wall.

ROSIE: It is empty . . . like my heart. he rice bag, too. That is why I ride venty-five . . . thirty miles . . . to the esquite trees to gather beans for our supper. And they're hard to get.

AARON: That long ride ought to have give you an appetite, Rosie.

ROSIE: No . . . not in all that desolation. Bare, like our lives here.

AARON: Now, Rosie . . . ain't you got so's you feel better about this by now?

ROSIE: No, Aaron . . . always it grows worse. Aaron, for a score of years now you have been searching for wealth here in Death Valley, in all this desert. And what has it ever given you for all your pains? Nothing.

AARON: I've come across traces of silver in these mountains . . . and once even gold, Rosie.

ROSIE: Silver, gold? A glint. A gleam, nothing more. . . . Just enough to raise your hopes . . . to make you double your efforts, to spend what little money you had saved. . . . Only to find out that it was all a mirage. Oh, Aaron, leave this country and take me with you!

AARON: But, Rosie, where could we go? You know why I stay here . . . one of the reasons.

ROSIE: You mean because of that man you killed.

AARON: Rosie! For heaven's sake.

ROSIE: Who is there to hear? It is 200 miles from this house to the nearest settlement.

AARON: Even so . . .

ROSIE: Even so, that shooting took place over twenty years ago. Who would remember by now?

AARON: Sheriffs have got mighty long memories. Don't forget that. No, Rosie, if ever I leave Death Valley, it's got to be with such a big strike that we can pick up an' go far away from here.

ROSIE: This desert . . . she is your mistress! You love her better than you love me.

AARON: Now, now, Rosie . . . you know that beside you there ain't nothin' in this world worth havin'. It's for you I been tappin' around here all these years, hopin' to make a rich strike. It's all for you. I don't care about it for myself.

ROSIE: Then take me away from here. Take me out into green lands again and let me know what it is to have a real home before I am too old a woman to care.

AARON: But Rosie, I couldn't give you no better home than this, lessen we make a strike before we leave here.

ROSIE: I don't want more than a one-room shack like this . . . but I want it under a green tree . . . where I won't have to think how much water I may use to keep everything clean. I want to hear soft breezes blowing outside and know they're bringing gentle spring rain to do my flowers good, instead of a sandstorm. I want a real bureau . . . not a starch box with a cracked old mirror resting on it. And Oh for something to clean with!

AARON: You couldn't look more beautiful if you had a fine full length pier glass, Rosie . . . for to admire yourself in.

ROSIE: Admire myself? Me, with my hair all dry and faded? . . . and my skin rough and cracked from hard work and hard water?

AARON: It still feels right soft and nice to me, Rosie. But mebby if you used some more of them beauty preparations . . .

ROSIE: What beauty preparations?

AARON: Why them bottles you got up there on the shelf. . . . Hogan's Magnolia Balm . . . and Felton's Gossamer for the Complexion . . . an' Floridy water. . . .

ROSIE: Aaron, they have all been empty . . . those bottles, for two years.

AARON: Well, Rosie . . . next time we take a trip to town, I'll buy you some more.

ROSIE: And some strings for my guitar, too, Aaron? I live in fear that my last strings will break . . . and then, alas! I will not even have my music left in this wilderness.

AARON: Unwrap your guitar, Rosie, and sing me some of the old Spanish songs . . . the way you used to sing them in Monterey. It'll make you feel better maybe.

ROSIE: Very well, if you wish it, Aaron.

AARON: You keep that instrument covered up like it was a child.

ROSIE: The only child I have. If I did not tend this old guitar and keep it wrapped and oiled, it would have dried out and cracked apart in this furnace long ago. But listen to it . . . it's still sweet. (*Rosie twangs a string and hums a phrase.*)

(*She sings old Spanish-American song with guitar accompaniment.*)

AARON: It's true enough, Rosie. You shouldn't be buried out in this wilderness, two hundred miles from the nearest railroad . . . with none to appreciate your talents but a dried up old bag o' bones like me.

ROSIE: My talents are for your pleasure, Aaron . . . here or anywhere.

AARON: Come over here and sit by me, Rosie . . . and don't think too hard of me for keepin' you out here. (*Faint sound of horse's hoofs outside.*)

ROSIE: Aaron, what's that noise? It sounds like horses.

AARON: Nonsense, Rosie . . . why nobody's come along Ash Meadows Valley past this shack since I can remember. (*Hoof beats come nearer. Sound of man whistling "Oh Susannah".*)

ROSIE: But listen, Aaron, I can hear the jingle of the bridle . . . and somebody is whistling too. Hark.

(*Voice outside sings*):

"Oh then, Susannah
Don't you cry for me
I'm goin' out to Oregon
With my banjo on my knee."

AARON: By gash, you're right! We're goin' crazy together, Rosie! That's what it is. . . . The desert's got us at last!

ROSIE: No, Aaron, it's real. I know it is. Whoever it is, is stopping outside.

VOICE: (*Calling from outside*) Hello, there!

AARON: He's flesh and blood all right.

ROSIE: Aaron . . . you don't think . . . that sheriff with the warrant?

AARON: Good Lord, no!

VOICE: (*Outside*) Hallo, there!

AARON: Here, Rosie . . . let me go. I'll see who it is. (*Calls*) Hello. Who's there?

VOICE: (*Outside*) A traveler . . . headin' south from Nevada. . . . Lo... way a few hours back an' jest go... pitch camp for the night when I s... your light. Can you grub stake me...

AARON: We ain't got much, str... but you're welcome to share it.

VOICE: Thanks.

AARON: Hand me that la... Rosie. Now, come along with... stranger and I'll show you where yo... picket your hoss for the night. ... Rosie . . . see if you can't rustle a... extra food together for supper.

ROSIE: (*To herself*) Extra ... Holy Saints! The man talks as if w... a pantry stocked full. Very well ... Aaron, I'll do my best. There's s... little coffee and some sugar in the l... under the bed . . . saved against a ... day. Now . . . have we a third cup ... plate? No . . . perhaps I could us... old tin can I was growing the cactus ... in. The men will not notice. (... *heard approaching.*)

AARON: (*Coming in*) Drop ... saddle right there by the ... stranger. Rosie, this is Joe ... bons, from up Nevada ... Meet Mrs. Winters, Joe.

ROSIE: We are very happ... make you welcome here in ... poor little place.

JOE: Well, I can tell yo... looks mighty good to me ... after ridin' alone down this ... forsaken desert for days.

AARON: Where are ... headin' for?

JOE: Down South. Me ... over Texas way. Thought ... try my hand at cattle rais... . . . Taken a crack at ab... everything else in my day ... gold-huntin' . . . orange gr... in' . . . teamin' . . . lumbe... . . . farmin' . . . minin' . ...

AARON: Had luck at any ... 'em.

JOE: Oh, I done well enou... here and there . . . but no r... strikes anywheres. Somehow ... always jest manage to miss o... I hear tell that in the next to... . . . beyond the next mounta... over the next river . . . ther... a big chance to make money. I move on . . . but I alwa... I'm jest too late.

AARON: Yes . . . I kn... how that is.

JOE: Take what happen... here a while back. I heard ta... one night by a camp fire in Or... gon about some wonderful ne... discoveries of a thing calle... borax in Nevada . . . at Colun... bus and Teels Marsh . . . an... how it was goin' to make th... fortunes of a few lucky me... I'd heard about this here bora... before . . . over to Clear Lak... in California . . . and I kne... there was money in it. . . . So...

(*Continued on page 91*)

"Did you ever know who really discovered borax?" asked the Old Prospector.

TOWN CRIER TALES

Ever Hear the One About Empress Josephine's Long Lost Necklace?

BY
ALEXANDER
WOOLLCOTT

Alexander Woollcott from a sketch made in France in 1919 and Called *Soldier With Book*

THE scene is a studio of the Columbia Broadcasting System. The time, any Monday r Friday evening at a quarter er seven, EST., period of - Gruen Guild Watch. It's mall studio. A grand piano s half of it. Alexander oollcott, famous raconteur, s the other half.

THE announcer rts his introduction. Woollt, seated before a table crophone, glances at the dio clock. And says:

"Tonight you must think of the old own Crier as having come in out of e storm and sought a moment's peace d warmth beside your fireplace. He ts his bell and lantern in the corner id spreads his thin old hands to the blaze your friendly logs. As his spectacles ow misty and his smelly old tuppet bens to steam, he grows expansive and beins, in his garrulous fashion, to spin a w old wives' tales. If you, there in the rner will stop making such a noise ith that cocktail shaker and if Junior will op scuffling his feet and take his algebra omework into the next room, the Town rier will tell a story or two. Some years go, when I was lolling one afternoon in he studio of Miss Neysa McMein—in hose days her studio was about as hushed nd sheltered a spot as the Grand Conourse of the Grand Central Terminal—here came breezing in a young painter named Baskerville. He was in a state of considerable excitement because of an extraordinary chance that had just befallen a friend of his. She had been ambling along Sixth Avenue when her eye was caught by a dusty old string of beads in a pawn shop window. What particularly interested her was the lovely old clasp of curious and intricate design, with which the string was fastened. Being a born shopper, she went in and priced it. The pawn-broker said that this bit of junk had been pledged there some two or three years before by a wild and shabby wayfarer who never came back to redeem it. It was therefore on sale and he proposed to ask a cool $2.50 for it. Well, $2.50 about represented her working capital at the moment. "Easy come, easy go," she said to herself, and went off with the darned thing in her pocket. Afterwards, she cleaned it up a bit, and used to wear it with great pride. As it happened, the clasp was so old that it was worn through, and one day, a few weeks later, as she was prancing up Fifth Avenue, it broke.

"With one clutch she caught the string before it began to disintegrate into the oblivious traffic. Cursing softly but sincerely to herself, she stood holding her collapsing necklace together and looking distractedly around for assistance. It was then she noticed for the first time that this mishap had befallen her directly in front of the elegant and snooty jewel shop of Black Starr & Frost. Now normally she would no sooner have taken a bit of Sixth Avenue finery to that shop for repair than she would have asked Revillion Freres to sew up a rip in her little boy's mittens. But there was help right at hand and in she went.

"She was very apologetic about it. With that curious and purposeless mendacity in which we all indulge at such times, and by which we seek to conceal the humble facts of our existence from total strangers who aren't interested in them anyway, she explained to the clerk that this was an old necklace that had been in her family for years, that she treasured it for sentimental reasons, and would be greatly obliged if he would do a little tinkering with the clasp—that is, if it wouldn't cost too much. She scarcely cared to spend much money on a mere matter of sentiment.

The clerk yawned, gathered up the two ends of the string, and sauntered off to the back of the shop. Two minutes later he returned, his eyes snapping with excitement. Accompanying him was the big bewhiskered jewel expert clothed in Olympian calm, his excitement, if any, masked by his personal shrubbery. He wanted to know if Madame would be interested in selling the necklace. Madame felt as if an elevator had suddenly started to fall with her, but with one frantic clutch, she recaptured her self control, and four generations of horse trading Yankee ancestors took possession of their offspring's spirit. The necklace, she said, was not for sale. The jewel merchant began to hem and haw.

"She did a bit of hemming and hawing herself. Finally she expressed a purely academic interest in what Black Starr & Frost would be willing to offer. The reply was immediate, $20,000.00.

"That darned elevator began to fall again. Again the good old Puritan ancestry sustained her swooning spirit. I could go on with the story this way indefinitely, but I will rush on to the conclusion. The necklace was of diamonds. The final stone on each end was carved with an initial. On one end the initial was 'N'. On the other end the initial was 'J'. It was the long lost necklace of the Empress Josephine.

"That was the story as young Master Baskerville told it to me. I confess it fascinated me, and being a member of the staff of The Evening Sun at the time,

My Biggest

MARIA

Great Austrian Star Trembled in Fear as She Made Her Debut—then a Miracle Happened.

Maria Jeritza, famous prima donna of the Metropolitan Opera, New York.

THE life of every prima donna is filled with big moments. It is one profession which, despite its many hours of hard and exacting work, the self-denial and the eternal care which it demands, is yet colored with so many rich moments, that one feels amply rewarded for all one does.

Sometimes these moments may not be big ones in the eyes of the public, yet they are dear to the prima donna. They may be little things which happen on the stage during the course of the opera which turn a threatening disaster into a dazzling success; they may be when one sings before royalty, before the disabled war veterans or the crippled children in hospitals. They may be the moments when the response of the audience is such that it grips you by the throat and the tears come. Or it may be a moment when you have so lost yourself in the soul of a character that the composer himself is overwhelmed by your interpretation.

Then, of course, there are those moments that mark a definite progress in your career. The ones that have helped to bring you nearer to the goal. Naturally these are the most vital ones in my life and the first will therefore always stand out pre-eminently in my mind.

When I was a very little girl in Olmuetz, where I was born, my voice showed exceptional promise. My father encouraged me to study and he took me to Professor Auspitzer of Bruenn. He was an excellent singing teacher and I made splendid progress with him. However, I was considerably handicapped by the fact that I was so timid and shy, I could not be persuaded to sing for anyone. The mere suggestion was enough to terrify me.

Professor Auspitzer was in despair. He pleaded; he begged and he argued. How was anyone to know that I possessed a singing voice if I would not sing? How was I going to make a career for myself? But nothing he said was of any avail. Then one day, when I was taking my lesson, he asked me to sing my arias. One after another he took them until I finally protested. But he merely smiled and went to the door of the room.

"Come in," he called. "I'm sure you have heard Maria sing enough to know what she can do." And in walked the director of the Olmuetz Theatre! Professor Auspitzer had hidden him in the next room and there he had listened with ease while I unknowingly had gone through my repertoire. I was so astonished I could not speak. But imagine my greater amazement when he said to me: "You are engaged for my theatre. You will make your debut as 'Elsa' in 'Lohengrin.'"

I need not describe the terrors I went through at the rehearsals. I am afraid the company did not think very much of me. On the night of the p formance I quaked and trembl and shivered. I did not see how could sing before so many peop Only once later in my life, at t Metropolitan Opera House, was again overcome with such acu fright. However, the director the Olmuetz Theatre tried his be to soothe me. He kept assuri me that everything would go c well once I was on the stage. was pretty skeptical about that an thought to myself that my debu would mark my last public appea ance.

However, on the night of th performance, when I finally hear my cue, I went on the stage and it w simply a miracle the way all my fears d appeared. I completely forgot everythin but my role. I loved the part of El and for the time being was Elsa. I w so absorbed in my role that I did not s the audience. Yet there was an electri feeling in the audience that goaded m on and you can imagine how thrilled was when they enthusiastically applaude me at the end of the performance. I wa very grateful for it too, as the succes that I had, inspired me with the confi dence which I needed so much.

Just as every American singer has he eyes on the Metropolitan Opera House, so in Austria, the greatest achievement is an engagement at the Hofoper. It is one of the most magnificent opera houses in Europe and before the war there wa no more wonderful sight than to see the men with their colorful uniforms and glittering decorations, and the women with their costly gowns and jewels. There was such an air of splendor about the place that it made one tingle with excitement just to be there.

Since the Hofoper only accepted mature artists who had had several years of experience and who were known to the public, I naturally could not try there right away. So I first went to the Volksoper, a municipal opera house which was also in Vienna and which had a very fine reputation.

I worked very hard at the Volksopera and I sang all kinds of parts. This was valuable experience to me as it helped me to build up a solid foundation and a fine technique. I missed no opportunity

Moments by JERITZA

udy and to learn and to work over smallest detail of my part. Gradu- I began to be known and I was often d to appear in other cities as guest t. Then, one season, the directors he great Hofoper decided to give hrodite." As this was its first pres- tion, they were anxious to insure its ess in every way. They found, gh, that they could not engage any heir own singers for the leading role use none was young or slender gh to interpret it. It would not do ave a fat and middle-aged Aphrodite, matter how glorious her voice might be. My fond hopes expanded.

Thus the very dream of my life came true when I was asked to create the title role of this opera at its world premiere.

Another moment that will always remain a significant one for me was when Gatti-Casazza offered me a contract to sing at the Metropolitan Opera House. I was not acquainted with Americans and the thought of singing to such a totally different audience, made me hesitate. I felt safe and secure in Vienna. Why venture so far away to a land about which I had heard so many strange stories? It was better to be satisfied with what one had. But Gatti-Casazza would not listen to my refusals and he kept coming back to me until I finally signed the contract.

It was a rainy, dismal day when I arrived in this country. I knew very little English at the time and I had to rely on others to make myself understood. In addition I had to prepare to make my American debut in one of the most difficult of operas, "The Dead City." All these things combined to bring back my former fear of singing to an audience. Every day I wished myself home in Vienna. I felt I could not go through the ordeal. I constantly reproached myself for having signed the contract.

As curtain time drew nearer, I was seized with such trembling that I could not move. Everyone attempted to comfort me and to cheer me up. But I

Mike Resolutions Ma Bring You Bigger a Than Ever—They S Brand New Gags, Son

Muriel Pollock

IF RADIO delivers and fulfills but half the hopes, during 1931, of your favorite entertainers, you will unconditionally agree that the new leaves that are being turned over this New Year's Eve, have not been turned in vain. What a mass of good intentions!

And they'll be made good, too, or I don't know the mike stars I've been writing about these many months and years.

Rapidly flipping the pages of a notebook filled in the course of a score or more of interviews with the air's great, I humbly beg to report that you fellow dialsters are in for more variety, novelties, laughs, sunshine, cheer, beauty, artistry and intelligent efforts. Better orchestrations, sound effects, rehearsals, preparation, manuscripts and continuities are in the bag for 1931, and as for drama, watch for more plays based on historical fact, and better dramas produced better.

One of your best liked stars hopes to see a Radio rejuvenation of the old, backwoods square dance; another looks forward to giving you more of the soothing, native American folk music, a third trusts that the new year will bring a renaissance of grand opera on the Radio, with its greater appreciation by the public the cause for its production.

But who (see if you can guess)—who would dare to wish for "louder crooners" and "softer trombones"? You're right—Ray Perkins, the famous *Old Topper* and *Prince of Pineapple*. Waxing facetious just to keep in character, Perkins said:

"After painful introspection and deliberation (resulting in a headache), I am still able to announce the following resolutions which I shall break in 1931:

"(1) I will not climb the studio portieres. (2) I will stop crying when I hear sob-ballads. (3) I will have my overtones examined for flats. (4) I will not compete with Vallee, McNamee or Gibbons. They have their public, and I have mine. (5) I will not attempt to imitate Four Pineapples.

"I hope that 1931 brings louder crooners, softer trombones, bigger midgets, greater Garbos and a couple of new t wearable neckties. And God bless Mi Audience and Papa Public, and m Ray a good boy to listen to."

Phillips H. Lord was next. The cre of *Uncle Abe and David* and *Seth Par* answered my New Year's query in genuine vernacular of his beloved hy

ging character:

"Wal, now, I don't know about this solvin' business, but I do have two rograms that I'd like mighty well to send listeners in 1931. An' if resolvin'll elp to put 'em across, I'll make the esolution. One is the ole time, down ast, backwoods square dance with fid-

Muriel Wilson

dles scrapin', harmonickies wheezin', feet shufflin' and the head man singin' the calls in the background. That's one thing I'd like to do on the air in 1931.

"The other is to bring back in a Radio program the Big Band Wagon that used to tour the countryside in the ole days, goin' from town to town and promotin' the neighborly spirit. What we need next year is tolerance, tolerance and more tolerance, and don't you forget it, young fellow."

Whether Jessica will make more than "Olive", or vice versa during 1931, is something for you to worry about, but what the Misses Dragonette and "Palmer" (Virginia Rae) hope to accomplish during the ensuing year is best told by the famous sopranos themselves. Petite Jessica, of Cities Service concerts, said:

"Who can estimate the force and power engendered by the concentration of millions of minds and hearts by the beauty of a song? And where shall this lead us? The microphone is my gateway to the hearts of men. The magic carpet, the seven league boots and Mercury's sandals were limited powers in comparison with Radio. My fervent wish for 1931 is that my art be part of your everyday life, for if it is not that, it is not art. May we create beauty together!"

And lovely Olive Palmer, Palmolive prima donna, sends you her greetings with the message:

"If my microphone were only Aladdin's magical lamp, it wouldn't be necessary for me to make a New Year's resolution. I'd simply ask it to convey to every one of my listeners the keen desire to give pleasure, which goes into every note of my songs. But without benefit of magic, I've decided to work harder, hoping that I may run the gamut of artistic preferences in my audience, bringing a little more intelligence, atmosphere and artistry to every song or aria I may sing. I'm interested in seeing better balanced, more finished programs of the concert type in 1931."

Lowell Thomas, reporting soldier of fortune and Radio representative of the Literary Digest, has a good idea to kill the blues early this year. "They tell

Here's one resolution we predict will make a good paving stone for warm regions—Nat Brusiloff and his Nestle Chocolateers promis to be more serious in 1931 than they have been in the past.

me," said he, "that I talk to more than 30,000,000 people every night. This fact seems to me fantastic and incredible, and prompts my first determination for the new year.

"In 1931 I'm going to spin more yarns and reel off more news flashes which are dominated by the spirit of optimism and good cheer. I think I have the 'swellest' job in the world, and a unique chance among Radio performers, because I can exercise a power of selection—an editorial choice of my material. Without sugar-coating the facts of life, or garbling the news, I can pick out and emphasize the cheerful angle of the day's happenings. That is my resolve."

ANOTHER Radio act, of which you perhaps have heard, is known as *Amos 'n' Andy* (film version *Check and Double Check*, Adv.), and who doesn't know this pair? Both Amos and Andy, or rather Freeman Gosden and Charlie Correll, their creators, tell me that 1931 will find their six-a-week skit packed full of good wholesome laughter and optimism. "We know business is good and getting better," the famous blackface pair maintained, "and maybe we can poke enough fun at the thrifty public so that they will start spending some of the money they've been hoarding, and causing tough times by so doing."

What Charlie Magnante, world's foremost accordionist, the *Pierre* of the Vermont Lumberjacks program as well as in Rolfe's orchestra program, wants to see in 1931, is more work provided for musicians by their unions. Charlie deplores the present situation. As far as personal resolutions go, he neither drinks nor smokes and hopes next year not to see his record broken. He also plans to work even harder than last year and better his best total of 31 appearances a week, besides recording and picture engagements. Magnante, by way of holding stock in his future, adds that he hopes the demand for "squeeze box" squeezers will increase and finally make this instrument surpass the saxophone in popularity.

"Yeah?" said Rudy Weidoeft, world's premier saxophonist and teacher of the leading players of that instrument, including Rudy Vallee. "Here's what I hope to accomplish in '31. I want to make my programs replete with more variety and novelties, better music and tone colorings to distinguish those programs from a dozen others. Better musical transcriptions will go a long way toward making this come true, and one other factor—the return of so many disillusioned songwriters from Hollywood. Personally I hope to improve my ability as player, writer and arranger.

ART KASSEL, whose Kassels in the Air orchestra is a prime favorite with the folk of Chicago and the Midwest, held one simple hope for 1931 which may have been fulfilled by the time you are reading this. "Give me," said Kassel, "one kind-hearted and wise sponsor of the none-meddlesome variet one who'll allow me to have my boy play the music the public likes best, an play it in the fashion we have become little famous for originating. Then I enjoy taking the entire responsibility fo the success or failure of the program o my own shoulders."

THE same sentiment i echoed by Russell Pratt, "My Bookhous Story Man" as well as one of the "Thre Doctors", of CBS and WMAQ fame "Most sponsored programs are too seri ous," he said. "I resolve to be seriou only for the children; never for th grownups. The best salesmanship is no the 'deadly' type but the sort that 'kids the prospective buyer into lowering hi guard, then slips the sales talk gently across. Trouble is," the "doctor" continued, "most sponsors interfere too much with the talent. Sherman, Rudolph and I know our audience, and we insist that we be allowed to play to that audience, if we are expected to bring in results."

More light opera and current shows on the air are the '31 hope of Ruth Lyon, CBS soprano who was honored to be selected as soloist with the Minneapolis Symphony Orchestra in its broadcasts last year. Though all her training has been for the classics, Miss Lyon prefers the Victor Herbert type of music. She sees this year bringing light operas to the stage as outstanding hits and hopes the Radio world will follow suit.

DIAMONDS

Famous Historian Tells Scintillating Story of How The Dutch Cornered the Gem Market of the World

Hendrik Willem Van Loon, noted author and historian, who broadcast this history of diamonds over the Columbia Broadcasting System on the first Holland to United States hook-up.

By Hendrik Willem Van Loon

AM sorry but I must not speak too oudly to you—for it is three o'clock n the morning, and this is a small country.

ouldn't do to wake up the good peo- They consider the night to have been for sleep, and turn off their rail- and steamers, and even the cows are sted to graze very quietly.

course, that is not exactly our system. e like to make the day as dark as by a little coal-soot and turn the into day by burning up a fortune ectric light.

aybe that is the way to do it.

d maybe it is not.

the average people here live a le of years longer (sounds funny! ask the man of the statistics)—they ive a few years longer by going to if not with the chickens at least with roosters, and if there is anything in ory—and there is a lot in history if will only take the trouble to read oroughly—there surely is something e said for the system of separating night from the day and not inter- ng too seriously with the arrangements his planet as they were originally in- ied.

or I am not speaking to you from this ant city because the sunsets are hter, or begin a few minutes earlier n in New Amsterdam, or because the runs four times a day instead of ee as in most other countries. Neither e all those intricate arrangements of e and air and more wire and right-of- v across that wire and through that ticular air and night-porters getting out of bed at half-past two in the rning—been the work of the last five minutes. We did not suddenly say yesterday evening, "That was a remarkably good dinner and now wouldn't it be fun to talk to home for a couple of minutes!"

On the contrary. The jeweler in whose interest I am speaking tonight has been at work since early March to get this connection through, and the reason why he has taken this vast amount of trouble—the endless official correspondence with foreign telephone and broadcasting companies — petitions to the weather bureau for good weather so that the ocean would not interfere with an otherwise honest Dutch accent (Dutch accents on the air and quite ordinary mild storms have been known to provoke cyclones)—all this was done for one purpose and for one purpose only—to give his prospective customer a chance to feel and notice—to realize in an almost tangible manner—that Amsterdam, this ancient stronghold of the diamond trade, actually exists. That it is not a mere fable like those famous mines of Golconda which sound so well in poetry and which never produced a diamond—being merely the name of a strong fortress inhabited by a Turkish adventurer who, having conquered the greater part of northern India, invested his surplus revenue in the largest diamonds that were available until his treasure-chest on top of Golconda's rocks—an immeasurably strong castle—came to be associated with the idea of diamonds itself.

But this town of Amsterdam which was built seven hundred years ago had very different beginnings from the old capital of Kuth Shahi, which was probably the reason why it has existed so much longer and bids fair to exist until we all pack up our little toys and move for further safekeeping to the next planet. Amsterdam's beginning was so prosaic that it is funny. For the town of Amsterdam stands upon the bones of an humble fish called the herring. I do not mean that the houses have been actually constructed on the skeletons of these long defunct fishes. They are firmly built on Norwegian pine—a couple of hundred trees to each house—but the prosperity of this village was dragged out of the sea and it took four centuries before those good people were able to transform a kippered herring into a well-cut diamond. And thereby goes a story which I shall tell you some time when I have a couple of years off, for it is the entire story of the world from the twelfth to the sixteenth centuries. But a fascinating story because it is in many ways the story of our own beginnings.

THIS town had nothing to begin with—nothing but flat mud-banks—a few thatch-roofed houses—a handful of people shivering and poor. If they had ever thought that their great-great-grandchildren should own so much as a single

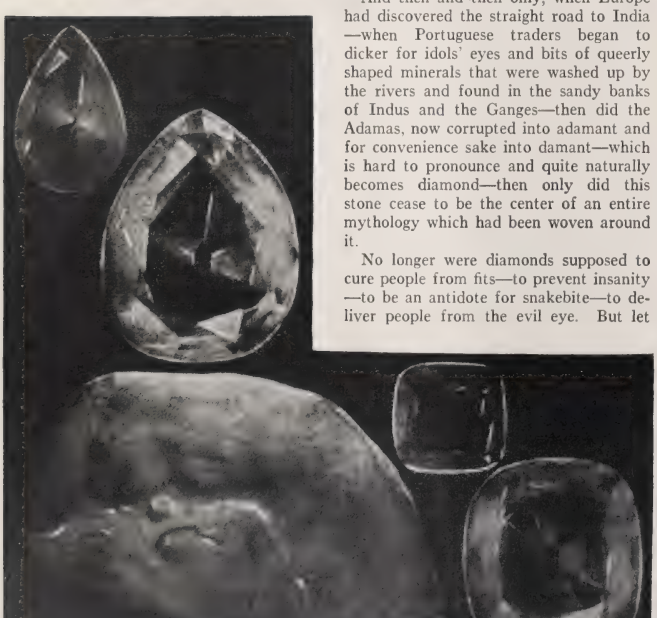
A diamond star from the Russian crown jewels, recently sold by the Soviet Government. Contains 1,500 carats of diamonds.

diamond—let alone be the central market for that trade—they would have wept tears from joy. They did not—in all the land there was not a single diamond to be had—in all of Europe there were not more than half a dozen. The Romans who in the matter of luxury were past masters where we are merely beginners had not bothered about them. The reason was that nobody knew how to cut them—the Indian diamond merchants polished them up a bit—cut away the rough places—polished the corners—the effect wasn't very brilliant. There are a few such diamonds which Charlemagne, the greatest collector of his time, seems to have gathered and given to the church—the church did not know what to do with them—pasted them into covers of books—pretty little pieces of stone—no great value—let the kids play with them.

And this ignorance continued for a long, long time, for when Charles the Bold was killed by Swiss mercenaries in the year 1477—those honest Swiss peasants took the diamond buttons which the Duke of Burgundy wore—he was the richest man of his time—his fortune was estimated at almost three million dollars and he was so incredibly rich that his daughter actually owned one pair of silk stockings—well, those Swiss peasants cut off those pretty round stones and played marbles with them and sold them eventually to a nimble-fingered gentleman from Mayence and held their tummies laughing when he gave them as much as a dollar a piece for those silly bits of glass.

THAT ignorance continued and was to continue until a certain Vasco da Gama did what nobody had done for the last two thousand years, he rounded the cape which rises at the southernmost point of Africa and reached a country called India and came home with stories of incredible wealth of golden temples and heathen golden images whose eyes were of a strange stone—this stone was the mysterious Adamas—the invincible stone of which Pliny speaks as the most valuable of gems known only to kings—of which he had heard people speak but which he had never seen.

And then and then only, when Europe had discovered the straight road to India—when Portuguese traders began to dicker for idols' eyes and bits of queerly shaped minerals that were washed up by the rivers and found in the sandy banks of Indus and the Ganges—then did the Adamas, now corrupted into adamant and for convenience sake into damant—which is hard to pronounce and quite naturally becomes diamond—then only did this stone cease to be the center of an entire mythology which had been woven around it.



No longer were diamonds supposed to cure people from fits—to prevent insanity—to be an antidote for snakebite—to deliver people from the evil eye. But let us not be too hard on what we so t call the ignorance of our media cestors. In many ways they wer that we often are willing to reco for all during the Middle Ages th lace firmly believed that in far off there was found a stone which co vent quarrels between husband a —yea, they even had a name for i called it the "stone of reconciliatio who shall say that they were v wrong? But all that happened lon ago and I doubt whether the most ing of wives today would feel s compelled to indulge in a great "reconciliationing" if she had beer one of those crudely shaped glassy baubles with which the better s among the Roman emperors thoug they could please the first lady of th The art of diamond cutting was such utter infancy that it almost sp

And even after the discovery Gama of a short-cut to the home adamant stone (for Brazil and Africa were not known to produc monds until three and four hundred later), the diamond industry would have got very far if the mathem had not come to its aid—the mat tician and the mineralogist, for in days science was not yet divided in numerable little divisions and subdiv and those two were one.

The art of diamond cutting wa developed at the court of those Dukes of Burgundy who played su important role in European histor who by a clever policy of what we call "consolidation" had accum every bit of valuable real estate in ern Europe. But it was not their v and their desire for splendor, but their intense interests in the arts sciences, which made their court a bination of university, school of ma symphony hall and business office—a bination which in our time is as unk as the unfortunate dodo who becam tinct because he was so funny lo that all sailors must take a coup them home to amuse the kids.

THEN finally in Bru mathematical genius discovered the nature of the diamond, and for that Charles the Bold who so miserably ished at the hands of the Swiss m naries he cut a number of raw diam and did it in the so-called "brilliant" ion which had given us a name which survived until this very day.

But then the stern and mysterious of economics began to take a hand in matter, for nothing in this world diamonds to a knowledge of the m Malay dialects or the peace of mind surpasses understanding is ever acqu

The famous Cullinan diamond as it peared when mined, and several of beautiful pear-shaped and square diam cut from it

…t giving something in return. And …re one wishes to obtain—no mat… what field—the more one had to …is seems absolutely just. I except …who belong to the amiable school …ing something for nothing and who …unately never graduate, as that …o does not seem to be able to get its …i to the final grade before they have …emoved to an institution which the …t Spaniards, according to their …e habit, called a prison.

…nothing is ever given for nothing, …is to have something to give in re… for the something one wishes to …—so then it appeared that the very …l, and ofttimes slightly close-fisted …nen of that noble herring pond …n as the North Sea and its small …dency the Zuyder Zee, had accumu… the wealth with which one could buy …self-same ornaments that looked so …on their own wives (still slightly …l with herring bones), but so well …e wives of Their Lordships to the …, and the East of them, who fished …neither did they plow, but who by …means could sweat enough taxes out …eir long-suffering peasants and serfs …tain whatever they wished to possess.

…d now we come to one particular …of the law of supply and demand—…n ideal law, but one that has the ad…tage of working with less general dis…ort than any other law we have …ed so far. That particular item tells …hat art follows the full dinner-pail—…since the full dinner-pail had moved …e banks of the Zuyder Zee, art fol…d too to the banks of the Zuyder Zee. …since the jeweler and the stone-cutter …in those days an undistinguishable …of the art world—as by rights they …ld be today—they too moved north…l and the full dinner-pail made them …come and learned their trade and then …and dickered with His Majesty the …of Spain, who owned the whole world …whose credit was almost as bad as …e. That is all right for an historian …very uncomfortable for the most …erful monarch of his day.

THEY showed His Majesty …s full of honest Amsterdam ducats and …Majesty signed on the dotted line—…ted in gold paint for the occasion, no …bt, but terribly dotted just the same …His Majesty, for a sum down in that …but agreeable commodity called "spot …h", guaranteed to sell all his diamonds. …erever found to the diamond cutters of …Majesty's former city of Amsterdam. …Majesty got the cash and the Amster…n jewelers got the diamonds, and judg… by results, His Majesty also got the …rst of the deal, but being a Majesty …d having signed on the dotted line, he …d to stick to his bargain and from that …oment on, about the beginning of the …hteenth century, the diamond trade …me to the banks of the Zuyder Zee and …s stayed there until today.

Why this should have been so it is not hard to say. The trade is what one might call a traditional trade—it is one of the few things in this modern world of machinery which cannot be left to machinery. It is not so much a matter of an ability to polish in a certain way, as an almost inborn knack to know exactly what one can do with the indifferent piece of quartz that has been fished out of the soil of South Africa or that has been brought down from the mountains of some unknown Indian frontier tribe. And such skill—like the skill of the weaver or the pottery-maker or the violin maker, cannot be learned from books but has to be absorbed with the paternal pap—has to have been part of the household conversation for generation after generation. And such developments can only grow and flourish in certain centers where life is placed and the conditions of living are such as to induce a certain peace of mind and great economic safety, born not only out of political conditions but also out of a well-understood policy of economic live and let live, based upon self-interest mitigated by tolerance and the desire to give the other fellow a chance.

THOSE conditions until very recently were to be found here and that undoubtedly is the reason why I was asked to speak to you from the spot where the diamond ceased to be the eye of an idol and became the idol of a great many eyes—the town where books were first printed so that they should be within the reach of everybody (perhaps the greatest spiritual revolution of the last six hundred years)—where first of all wool and linen were woven so that nobody needed go cold—undoubtedly a selfish arrangement on the part of the weavers but like so many intelligent manifestations of self-interest of more direct benefit to the community than altruism based upon a vague hope—and finally the town where jewelry in general and diamonds in particular were changed from an object of warfare and plunder and a cure-all for everything from snake-bite to squinting—to what it is today. But what it is today, alas, I cannot tell you, for my time is up—the man with the ominous watch and the threatening one finger tells me that I have only sixty more seconds and therefore all I have left is time to say—good-night.

This portrait of Queen Mary of England, now hung in the Ottawa National Art Galleries shows her wearing many of the costly crown jewels and decorations of England.

Is Romance Dead?

Fannie Hurst *Answers...*

Fannie Hurst is the most vivid thing in a vivid room.

An Interview
By Lillian G. Genn

WHAT has happened to romance? There are many of the beaux of yesterday who believe that when the frail and mysterious femininity gave way to the flaming flapper with her hard-working lipstick and her own pay check, it marked the demise of romance. That with the changing status of woman, her insistence upon man's code, and her freedom to adventure, love would never more be the alpha and omega of her life and that she would not make sacrifices for it. As proof they point to the increasing numbers of women who nonchalantly turn their backs on marriage or who divide it with a career.

Not that the fair sex is entirely to blame. These advocates of yesterday likewise admit that the materialism and speed of the age, and the revelations that science has made, have also played their part in hastening the passing of romance. For how, they claim, can romance flourish in a whirling maelstrom? How can there be any glamour about love when science has stripped it of its aura of mystery and illusion?

And so they wistfully sigh for the days when woman was an ethereal and elusive creature on a pedestal who knew nothing of the world. When life was lived more leisurely and there was time for chivalry and the sentimentalities of love.

But Fannie Hurst, for one, does not join their sighs. This brilliant writer, with whom the subject was discussed, has no patience with those backward looking souls who rhapsodise about the past. She finds that there is much about life today which is alluring and thrillingly romantic. Human nature remains unchanged.

And yet, as those who have read her short stories and her novels well know, she does not view life as a romanticist. She sees its dark and seamy side; its struggles and its heartbreak, all of which she portrays with the keen and sympathetic understanding that is her genius. But in her stories, there runs, too, the scarlet thread of romance; she points out the loveliness and the throbbing beauty of the world and depicts the yearning and the longing of the human soul for love. This is particularly true of her new novel, *Back Street*, in which she weaves a rich tapestry of life, centered around the story of a great passion.

Miss Hurst's studio apartment, where the interviewer went to see her, provided an appropriate setting for a discussion of romance. It is a room with a dim cathedral-like interior li by huge floor car bras. The color is red—a bright ro tic red that som makes one think o days of the Renaiss The luxurious rugs tapestries, the cushioned sofa wer of this shade. So was the smock the author wore ov gown of black silk.

Miss Hurst, bec she is a warm, hu personality, and much herself, is at the most vivid thin this vivid room. Sh dark beauty that st out effectively ag the striking backgro Her hair, which wears drawn stra back from a wide b is a glossy black, her eyes are lumino dark. Her skin is f less and her feat perfect. She speak a voice that is v modulated and swee

There is something about the l cathedral-like room, with its hus solemnity, and its religious images, t makes one imagine one is living in ano age. Not even the grand piano, cove with music, and the current magaz and books which filled the tables benches, and which brought a note modernity into the place, seem to di that feeling.

HOWEVER, despite old-world background, Miss Hurst is v much of a modernist. She sees no gl our in the past and does not worship its shrine. She further believes that wh the externals of life have changed, mance is as glowingly alive as it ever and that love is still the supreme flo

"TODAY it is love which is the mainspring of marriage...woman has the great thrill of going out to seek Romance herself."

"Her hair is a glossy black and her eyes luminously dark."

...It is the ideal motive force. ...ne of the changes that have taken ... she said, "have been able to up- ...uman nature. Human beings are ...entally the same. They still crave ...ce and are struggling to inject as ...of it as is possible into their lives. ... deep and beautiful thing that will ...r be loved.

...seems to me, too, that even though ... have been many outer, material ...s, the glamour of life is all about ...ertainly there is romance in flying ... of the world; romance in listening ...sic that travels the air for thou- ... of miles.

"THE whole trouble is that ...e apt to canonize the past. If the ...adours of yesterday could see a ... airplane against the sun or listen ... wonders of the air, they would call ...he romantic age. And viewed from ...n angles we are very much more ...ntic than the languid days when ...e lived under conditions that were ...ing but beautiful. If we examine ... carefully, we will find a good many ... and somber things. Cities were ...r filthy places in which to drag ... and brocaded gowns.

...am often asked, though, how I can ...our crowded cities with their gloomy ...ays, ugly oil stations and elevated ...ays, romantic? But in any age you ... find that corresponding conditions ...ed. The old Italian cities we rave ...t and we believe to be so romantic, ...e had to live in them today, would ... us. Indeed, they were so dark and ...gienic, that we would regard them ...lums. There was nothing attractive ...t the slaves who had to do all the ...g.

...ife then had just as many ugly as- ...s as it has today, but we are prone ...ast our eyes on the bright spots and ... over the rest.

There is romance in our surroundings ...e but look for it. When I walk ...ugh Central Park and see the well- ...med people, the lines of shining, ...tly moving motor cars, and the sky- ...pers and minarets looming up against ...azure sky, I can't say that life is less picturesque today. That the just-around-the-corner aspect of the city is any less romantic.

"The old days of open fireplaces and cold backs, of candles and smoky oil lamps, of traveling inconveniences and few diversions have no allure for me. It is perfectly true that we live too rapidly today, but aside from the romantic gentlemen who had time to celebrate life in verse and song, the romantic ages we talk about must have been most uncomfortable, and, considering the lack of medical knowledge, quite painful as well."

"But what about the fact," Miss Hurst was questioned, "that women now work side by side with men in the business marts? Hasn't that somewhat destroyed the romantic relation which once existed between them?"

"There's not so much artificial restraint between the sexes," she answered. "Young men and women no longer ascribe fictitious and over-idealized qualities to each other. Less illusion exists. Men and women are now human beings to each other and not gods and goddesses. In view of this, the antiquated relationship has become somewhat ridiculous.

"How can we any longer have any regard for the old relationship which relegated woman to the four walls and allowed her to look at life through the window blinds? Which accorded man an unequal share of power and of pleasures? Certainly there was something else in life for woman besides staying at home and having her hands kissed."

"NEVERTHELESS," the author was further probed, "hasn't the freedom between men and women and their greater frankness, all tended to rob love of its piquancy and its romantic glamour?"

"Not at all," she smiled. "Human relationships are just as exciting. In fact they have now become accelerated because woman has become more selective. An affair has also become a battle of wits. A woman doesn't look at a man through eyes dazzled by the matrimonial halo. There are so many things the modern woman can do in life, that marriage doesn't attract her unless the man has personal merits. If he doesn't measure up, she doesn't accept him for the sake of a meal ticket. She can earn her own.

"Today it is love which is the mainspring of marriage. It is only the feeling and the love of two people for each other which unites and keeps them together. A woman is no longer compelled to endure unbearable conditions in order to present a false front of wedded bliss to the world. Society has become more broad-minded: it does not condemn her if she seeks a divorce. Nor is any door of opportunity closed to her. She can continue to get just as much pleasure from life.

"The fact that a husband and wife have greater freedom, has also made their relationship more interesting. Marriage doesn't get a chance to pall through constant and enforced association of husband and wife. And because it is the accepted thing for each to associate with members of the opposite sex, they must be more on tip toe in their efforts to hold each other.

"With the relationship based on honesty and truth and mutual respect, it gives marriage more dignity and beauty and sanctity. The fact that there are more divorces is only because men and women will not tolerate hypocrisy and pretense in their marriages. While divorce is deplorable, yet it is certainly far better than the continuance of a marriage which was miserable and in which the spiritual values were dead.

"Woman has naturally gained more by the improved marriage institution. A man now doesn't expect his wife to devote twenty-four hours of the day to taking care of the house and serving him. He respects her individuality and concedes her right to life, liberty and the pursuit of happiness. She is not only allowed to use her own mind, but is encouraged to do so.

"All this, to my mind, has made the

Fannie Hurst, author of *Lummox* and *Back Street*, romps with her police dog.

modern woman a much more interesting and glamorous creature than the fragile, fainting prude of previous days."

"Do you believe," Miss Hurst was asked, "that the modern woman has become so self-centered and so intent on her own interests that she would not make sacrifices for love, as has been frequently charged? That she is incapable of the deep and enduring affection of her predecessors?"

"I know scores of women," she replied, "who are practically throwing their lives away for love. The heroine in *Back Street* is by no means an exceptional case. She is, on the contrary, a symbol of the deathlessness of woman's capacity to love.

"PERSONALLY I believe it is a mistake for a woman to give up everything for love. If she concentrates her life on a man, and allows her individuality to be absorbed by his, she is bound to find, when love fades, that her companionship has little to offer. She loses her hold on his love. And in the end, even if she has children, she finds herself alone. She has nothing she can give anyone. There is nothing she can do for herself."

"But love does mean more to woman, doesn't it?"

"No," Miss Hurst returned. "It has just as important a place in man's life and means as much to him. If he has not exalted it above all other things, it is only because he has never been called upon to make any sacrifices for it. It has always been woman's rôle to dedicate herself to making sacrifices.

"This is still very much of a man's world and it will take a long time before established customs will change. Men have never been required to subordinate their lives to love. But they are beginning to do it now. You find that there are men who have given up position and wealth and opportunities for the love of some woman. There have been a few rare and exceptional examples in history and in time to come it will not be an unusual occurrence. Women will have no monopoly on making sacrifices for love. Men are as romantic a sex as women and if they will be called upon to make the grand sacrifice, they will do it."

The novelist thought that while we may call this a materialistic age, yet life today is gayer and brighter than in the so-called romantic age. We should be athrill with the vast number of opportunities that are open to us to lead happier and more interesting lives.

"This is just as true for the men," she said. "If those who pine for the old-fashioned type of wife actually had to live with her today, they would re[fuse]. They may find it somewhat trying to h[ave a] woman, who once regarded them as [in]ferior beings, now challenging their p[re]rogatives and their supremacy. But I'm c[er]tain they would not exchange the n[ew] intellectual companion and comrade t[hey] they have, for the dependent clinging v[ine] of yesterday.

"AS FAR AS woman is co[n]cerned, she would not care to give up t[he] opportunities she has won for the chival[rous] and the courtesy which men once a[c]corded her, or for the duels which we[re] fought in her name. If life was roman[tic] in the days of knighthood, it was only [so] for the men.

"Women were kept cloistered in th[eir] towers, and the chief pleasure they ha[d] outside of embroidering, was the vicario[us] one of listening to the men's tales. Th[e] knights were the ones that had the a[d]ventures. Not their wives.

"What does the outward gesture, th[e] hand kissing and the pretty phras[es] amount to when compared with th[e] greater thrill that woman has of going o[ut] to seek romance for herself?

"We perhaps haven't so much of th[e] sentimentalities of romance and the ou[t]ward display, but real romance, the dee[p] sincere and durable kind, still flourishes.

From The Old Curiosity Shop Comes The Tale of

The Golden Baton

By DAVID ROSS
and DON CLARK

IS dark in the Old Curiosity Shop,
id the firelight casts a gentle glow
n the strange and curious objects
hich litter its shelves and overflow
ery nook and corner of the crowded
"Tick . . . tick . . . tock . . ."
e old French clock, green and tar-
where it once was bright gilt; and
g time with the measured rhythm

t has a strange and interesting
"

golden baton! Tell me about

the Shopkeeper begins. "One
I was in my shop alone. It was
erable, rainy night, and the wind
howling through cracks in the
and down the chimney. The
was beating against the windows
drum. I was just about to close
or the night when I saw a man
ng across the street toward my

He spoke in a broken, cracked voice,
a strong German accent, and asked
was the keeper of the shop. When I
ated, he hesitated and inquired, 'You
—second hand things? I have come to
my baton! My precious gold baton
You will buy it?'
looked at the inscription, which was
aved in German. With my slight knowl-
of the language, I could make out
words, 'affection and esteem—Herr
ann Kindler—Leipzig Symphony.'

"The old man, Johann, lifted his head proudly, 'Ja—they gave it to me! It is all I have left, my friend. All—all I have left! And now I must sell it . . . Ach—I

HERE in the mellow gloom of your shop, Old Curiosity,
How many dreams were ransomed!
How many hopes were forfeited or sold!
Here are mute witnesses of joy and sorrow
And the blind urgency of gold.

WHAT is this tarnished baton?
A bauble? Or worthless tinsel?
A worthless toy its only counterpart?
Nay, fool not yourselves
Once was this baton burnished and bright
Wielded by one who was master of musical art.

(Adapted)

remember that night when all Leipzig acclaimed me . . .' "

As the Shopkeeper goes on with his story we see a great concert hall in the city of Leipzig:

BURGOMEISTER: Herr Kindler—as Burgomeister of the city of Leipzig, it is my happy privilege to show you, in part at least, the honor that is rightfully your due. In so doing, I speak for all the people of our city, from whose hearts comes this expression of esteem . . . You have just completed the final concert of the season—a season that you have made signally successful as the conductor of the Leipzig Symphony Orchestra. Your place in the world of music is certain and assured—and now I have the honor to show that your place in the hearts of the people of Leipzig is as strong and keenly felt.

In behalf of this city, I have the honor to present you with this golden baton, on which are inscribed the words: "Presented to Herr Johann Kindler by the people of Leipzig, as a token of their affection and esteem for his work as conductor of the Leipzig Symphony Orchestra." (*Great burst of applause.*)

May health and good fortune go with you always, Herr Kindler, as do the affections and love of the people of Leipzig.

JOHANN: Herr Burgomeister, I thank you from the bottom of my heart. It moves me very deeply to see my efforts thus rewarded, and this baton of gold will inspire me to even greater things than ever before. Thank you!

(*After the concert. Johann approaches a slender, lovely young woman and both enter a waiting carriage.*)

JOHANN: Helen!

HELEN: Ah—Johann—I wanted to see you—and tell you how happy I am about your success.

JOHANN: Helen—all of this—the applause of the people of Leipzig—the success that I have had—is nothing.

HELEN: Nothing! Johann . . .

JOHANN: Nothing—if I do not have your love. Ah I know—I have never spoken of it before. But now I must, or my heart will break from what it would have me say. Helen—I love you—with all my heart I do!

HELEN: I know—Johann.

JOHANN: The symphonies that I play—they are only your lovely voice speaking to me. I hear you in every note, my dear. The tempo is the beating of my heart for you—and once in a while I even think I hear you say—I love you—so softly.

HELEN: I thought I could sense that, Johann, in your music.

JOHANN: Then—you do love me, Helen? You do care for me?

HELEN: Yes, dear. I love you, too. I only wish that I might be worthy of a thing so fine and great as your love.

JOHANN: But you are, dearest. You are more than worthy.

HELEN: You are so fine, Johann. You are to be one of the world's greatest musicians—one of the masters of all time. And I . . .

JOHANN: And you are the woman I love, Helen. Oh—I am so happy! I shall do such great things—because of you! Now I shall live—really live—because I love! Think of it, Helen—our life together—our love—our music. I—I want to kiss you, Helen.

HELEN: Yes. (*They kiss tenderly.*)

JOHANN: You—dear heart—you are my symphony. You are the expression of all that is beautiful in life—all that is beautiful and good.

HELEN: Is it not strange, Johann, that love can stand against the world? That love lives for itself and by itself? From now on, I shall live but for you!

JOHANN: Helen!

But their happiness is short-lived. War, the great interrupter, comes to spoil their dream of a life together. And at their parting Johann speaks of his faith.

"I believe in our love, Helen. It will be like a light guiding me through the blackness of war. Always I shall see your face, looking at me, and urging me on. We'll show them that our love can stand the fire and terror of war. And when it is over—"

Helen continues the thread, "I shall be here—as I always have been—waiting for you to come to me: Waiting for you to take me in your arms and mend my broken heart, my dear."

They kiss farewell and Helen sobs, "Goodbye—Johann!"

(*A lapse of time. Johann lies in a war hospital, forsaken, delirious.*)

JOHANN: (*In a sick, broken voice*) My baton—my gold—baton! Ah—Helen—my Helen—come closer, Helen. I want to play for you—the Symphony Pathetique! Listen—I will play—where is my baton—Helen.

FIRST NURSE: Poor chap—he's been out of his head ever since they brought him in from the field hospital.

SECOND NURSE: Yes. And always he mumbles something about Helen and his gold baton—and some symphony. He must be a musician.

FIRST NURSE: Yes—I expect he is. I don't know why he seems any more pathetic than the other cases, but he does.

SECOND NURSE: Perhaps it's because no one ever comes to see him. Nearly everyone else in this world has a guest now and then, but no one has ever come to ask about Kindler.

FIRST NURSE: Kindler?

SECOND NURSE: Yes—that's his name. We found out from some of the papers in his uniform yesterday. Nobody knew who he was before.

FIRST NURSE: Then—somebody has thought of him, at least.

SECOND NURSE: What do you mean?

FIRST NURSE: This letter. It came several days ago—forwarded from the front. I couldn't find out who Johann Kindler was, so I tossed it in the drawer of this desk.

SECOND NURSE: Yes—that's for him alright. But—I don't believe he'll be able to read it—for a long, long time.

FIRST NURSE: Even when he comes into his right mind again, we must be very careful about it. The doctor told me this morning that any shock—even the slightest little thing—might keep him from ever getting his sanity back again.

SECOND NURSE: I know . . . This seems to be a woman's handwriting. Do you suppose—

FIRST NURSE: What?

SECOND NURSE: I was thinking—it might be well to open the letter and read it. Perhaps it should be answered immediately.

FIRST NURSE: But—I'd feel peculiar about opening someone's mail. It's probably very personal—perhaps it's from this Helen that he mutters about.

SECOND NURSE: That's all the r reason why we should open it. Prob she's his sweetheart, and doesn't k where he is.

FIRST NURSE: That's so. Well— it.

FIRST NURSE: (*She tears open the velope*) Oh!

FIRST NURSE: What is it? What say?

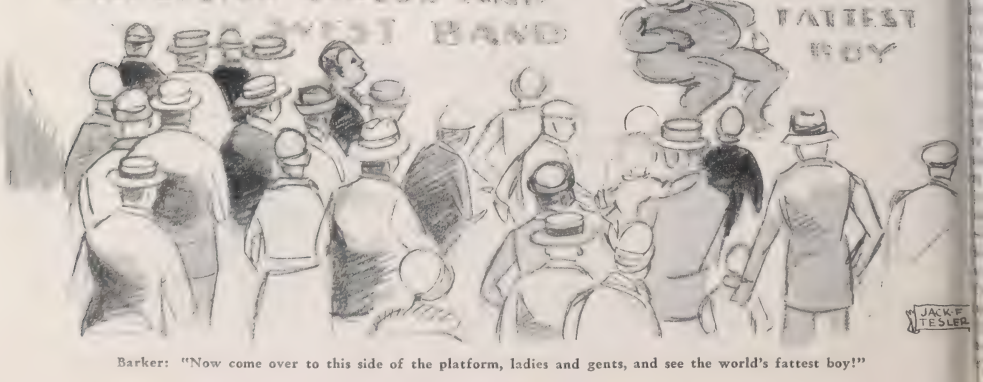
SECOND NURSE: Oh! It's a good t we did open this. We could never h shown it to him. It *is* from the Helen he's been talking about. Listen. . . .

"Dear Johann: I am sorry to hav write you such a letter as this will be. I feel that it is the only fair thing to That it should come at a time when are away at the front gives me greater concern, but to delay in telling would be to make matters worse. Joh —our love has been a very tender an very beautiful thing. I shall always member it as one of the loveliest thing my life. But it is just that beauty— fragility—that tells me it would no stand the shocks and trials of life. Joh —I have found love—the kind of love is sturdy enough to last through, and I to be married next week. Please try understand, my dear, and know that memory of our love shall always be most beautiful part of my life. Helen."

FIRST NURSE: Oh! How can we him. How can we ever let him know?

SECOND NURSE: We can't. He wo never stand it. No—we must wait u he is fit again—and let him go to Leip and find this thing out for himself.

FIRST NURSE: Yes . . . Oh—h many souls has this war torn apart?



(*Some time later—still in the hospita*

JOHANN: Nurse!

FIRST NURSE: Yes, Mr. Kindler.

JOHANN: Did you hear what the Do tor just told me? Did you?

SECOND NURSE: Yes—because he t me, too. Does it make you happy to kn that you are discharged—that you c

. Nurse—have there been any letters
mail for me at all since I've been
?
ST NURSE: Ah—n-no—no mail, Mr.
er.
ANN: No matter. I'll see them all
anyway. Did I have any papers
I came in? There must have been
in my uniform.
ST NURSE: Yes—there were some
s. They're over there in the corner,
t desk. I'll get them for you.
ANN: Don't bother—I'll get them.
goes to desk) This desk? Here in
orner?
RST NURSE: Yes—but—
COND NURSE: (*Coming up*) June!
's the desk his letter is in! Don't let
look in that drawer!
RST NURSE: I can't help it now—
oo late!
COND NURSE: Oh! I'm afraid of
this is going to do to him. The
tor said he didn't discharge him be-
e he's *cured*, you know. It's just a
er of time, I guess.
OHANN: (*Calling*) Nurse! Nurse!
ning up) Why—why didn't you tell
—this—this letter from Helen—oh!
en—dear John: (*He reads a few
s*)
IRST NURSE: I'm sorry, Mr. Kindler.
asn't going to show it to you.
OHANN: I know. Helen—that's all
e was in life for me—and now she's
me—gone—but—but—I can be
proud. I have my—my music, you see. I shall put all my life into my music. Ohhh!

FIRST NURSE: Mary—go and get a glass of water—will you? He's ill.

JOHANN: No — nothing — that lung again! (*coughs*) No matter . . .

(*It is circus day in town. Milling crowds are clustered around the "Big Top." On a platform, plastered with posters and pictures of the Living Skeleton, the Fat Woman, the Snake Charmer and the rest of that galaxy of human freaks, stands the barker.*)

BARKER: Now come over to this side of the platform, ladies and gents. Here we have Mario, the human skeleton—the thinnest man in existence! Inside the tent he'll show you how he can wrap his arm three times around his head! And while we're waiting for the show to begin, ladies and gents—we're glad to announce a new attraction to the big show. We've just secured the services of Professor Johann Kindler, the former leader of the Leipzig Symphony Orchestra, to conduct the Excelsior Circus and Wild West Band. Professor Kindler—play for the folks!

JOHANN: But—Mowry—I—I can't go on tonight. I am ill—I cannot conduct tonight!

BARKER: Oh yes you can, old boy. Don't try to renege on me like that. Get up there on that stand and give 'em a concert, or you don't get paid this week. Hurry up.

JOHANN: I can't—I—

BARKER: Don't want your pay, eh?

JOHANN: Ohhhhh! All right—all right! . . . Ready, men! Attention . . . one, two.

(*A fantastic circus march is heard. It blares forth with a loud fanfare.*)

JOHANN: Stop! Stop the music! Ohhhh! Stop it I say! I can't stand it any longer! My head is going around! Stop!

(*The orchestra becomes panic-stricken and confused, playing out of rhythm and with false notes*)

JOHANN: Stop! Ohhhhh! (*He faints and drops to the floor.*)

BARKER: Here — here — what's the matter?

VOICE: The Professor—he's passed out.

BARKER: Pick him up off the floor there! Pick him up and carry him outside!

VOICE: Better get a doctor—he's sick.

BARKER: He'll be all right. That's his last turn for us, anyway. Steve.—get up there on the stand and lead the band—this show's gotta go on, professor or no professor. Hurry up there!

VOICE: Okay.

BARKER: Never mind, folks—the professor has a little attack of indigestion. But now the show goes on as usual. Right this way and hear the Excelsior Band!

(*Back in the old Curiosity Shop.*)

JOHANN: (*In an old and broken voice.*) So that is why I must sell my baton—my dear golden baton. It is the only thing—that—that I have saved—from my past! The only thing that—tells me that I was once young—and had dreams and ambitions—

SHOPKEEPER: I know. I understand all that this golden baton has meant to you. But fear not—it shall not be orphaned. I shall keep it for you.

JOHANN: No. Something tells me that I will never—

SHOPKEEPER: It will be here until you call for it—that I promise.

JOHANN: You are a kind and under-

(*Continued on page 102*)

Tuneful Topics

"Know Your Songs"

You're Driving Me Crazy

WALTER DONALDSON seems to be in his writing streak again. For a period of over twenty years he has given us a list of hit songs that is staggering, but during the past two years, following *At Sundown* and *My Blue Heaven*, his contributions have not been outstanding. Mr. Isaac Goldberg, who has just published his book, "Tin Pan Alley," in which he discusses thoroughly the evolution of popular songs and the subsequent formation of the publishing houses along Broadway, which constitute Tin Pan Alley, stated that it seemed necessary for Irving Berlin and Walter Donaldson to feel the pressure of starvation before they could write a hit song. While I do not agree entirely with him in this, I am wondering whether or not Walter Donaldson has been devoting too much time to golf, the beaches of Florida, and the race track, rather than to the writing of songs for which he is so eminently fitted.

Contrary to popular belief, the writing of a hit song is not, in most cases, a few hours' work, nor is it easy. Rather, if you talk with the writers of most hit songs, you will find that it took much wrinkling of the grey matter, much changing, revamping and remodeling, before the song took the shape of the melody and lyrics which brought it into great popularity. In fact, I think Walter Donaldson will admit that the lure of California and the writing of theme songs with a big pay-check every week whether he wrote them or not, was not inclined to stimulate him to work hard on his songs, and although he did turn out *Romance* and some other very fine songs, none of them came up to the popular appeal that *Little White Lies* seemed to have, and that was written on his return from the Coast when he seems to have buckled down to business.

There in the Park Central, where he has an elaborate suite, he works, sometimes for days on end, until he completes the song on which he is working. Last Sunday night we spent a few hours together at a grill at which I was the guest of honor, and he confided to me that *You're Driving Me Crazy*, especially the middle part, was changed and changed and changed and changed again, until he found the twist which it now carries. It is partly this middle twist, with the sensational title, which is perhaps as sensational as *Little White Lies*, which will bring this song into the big money class. It is already second from the bottom on the list of popular best sellers of most sheet music jobbers, and it will not be many weeks before it will head the list, although the bottom seems to be out of the music industry, especially that of songs, at the present moment.

You're Driving Me Crazy is one of the best songs I have ever sung, and from the very start it has been sensational wherever I have had the opportunity to present it. I have always felt that half the applause, or even more, that I receive after singing a good song, is rightfully that of the composer who is never t ordinarily to receive it. In other wo "The play's the thing." Too often cr is given to the delivery artist when creative artist deserves so much praise

On two occasions I have had the pl ure of having Walter in my audi when I rendered *You're Driving Me Cr* and I know that he was very happy w the song brought down the house. Victor Company feels that my record it is the best thing we have ever m for them. My throat was tightened on the day I made the record, and it with great effort that we finally mad "master" record that passed inspecti I feel I could have done better, but long as the severe critics at Camden satisfied, then I should be.

The song has a beautiful and unus middle twist, though the first and l thirds of it are skillfully constructed, b in melody and lyrics, and with the o standing title the song should be w popular indeed. It *must* be played slow We do it at about thirty measures minute. I am sure you'll like it.

AGAIN, this month, Rudy Vallee, the famous Radio Star, picks ten songs and tells you all about them. With his wide Broadway acquaintanceship and his many friendships in "Tin Pan Alley" he is in a position to reveal interesting sidelights about these popular hits . . . their authorship, public debut, history, unusual characteristics and his own personal experiences with them.

The Editors are happy to announce that this will be a regular monthly feature in RADIO DIGEST.

Cheerful Little Earful

HERE is a song from a revue, and very daring revue at that, *Sweet a Low*, but it is a song that in any pla would be tremendously popular, not or because of the optimistic and happy tre of the song itself, but because it is liltin bright, and tuneful. Three song-write contributed to its excellence—Harry Wa ren, whose *Crying for the Carolines* a many other songs have brought him in the ranks of the great song writers. fact, he is one of the highest priced write in the ally); Ira Gershwin, brother George Gershwin, and Billy Rose, th vaudeville artist and song writer who h turned producer and has cast his ow wife, Fannie Brice, in his revue, *Swee and Low*.

These three have achieved a song whic I firmly believe is going to be very, ver popular with everyone. There is an un usual resemblance in the end of the mai phrase of the song to the end of the mai

By

Rudy Vallee

Ten New Leading Song Hits Are Picked For You This Month By The Master of Rhythm

The Author . . . Rudy Vallee.

of *Sing Something Simple.* In *omething Simple* the last line is lassic, I love you;" whereas in the the main phrase of *Cheerful Little* it is "the well-known I love you." er, I am the last person in the o accuse anyone of plagiarism, and y believe it is possible for the same al thought to spring up in two simultaneously, just as did the ian Theory. However, I am sure will be no blood shed over the mat- d both songs can be very popular r own way.

erful Little Earful is introduced onderfully in the show by Hannah ns, and is reprised throughout the performance, so that eventually one ut humming it. We do the song at ht tempo, yet not too fast, or at forty measures a minute.

Stolen Moments

ERY beautiful song in the unhappy vein, and yet not pessimistic. Writ- y three newcomers to Broadway— st the names are new along Tin Pan The melody seems haunting and quite unlike any song that has pre- it. We play it quite slowly, at about y-eight measures per minute. It s a great number for two violins. ne of these newcomers, Mr. A. R. , bears watching in the future.)

When the Organ Played At Twilight

HIS is a waltz known to the music ublishers as a "simple" waltz. The of the word "simple" is not difficult xplain; the term is used contemp- sly, meaning that the song is very entary, almost trite. In fact, it is ys applied to a waltz that makes you of the waltzes that our fathers and ers danced to ten or fifteen or even ty years back. The song is usually imple that as one phrase is being ed the listener naturally knows the . Such simple waltzes have been *olina Moon, Let Me Call You Sweet- t, I'm Forever Blowing Bubbles,* and so on. The remarkable part of it all is that although this type of waltz is known definitely to be a money maker through its strong appeal to the masses who buy music, yet publishers are always looking for the beautiful type of waltz that is also popular, such as *Ah! Sweet Mystery of Life.* Not that there is any disgrace in publishing simple waltzes, nor is the publisher trying to educate the public mind, but there is pardonable pride on the part of those who select songs in seeking to see their judgment of a hit indicated in a number that is beautiful and different and yet catchy.

With the music business in the dumps, most of the publishers are publishing such waltzes of one type or another in the hopes that they will have another *Carolina Moon.*

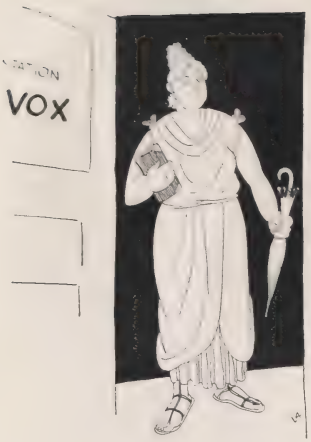
Carolina Moon was peddled around from publisher to publisher, and finally accepted by a very small organization. This organization "went to work" on the song, that is, began trying to get the tune played here, there and everywhere. Week after week passed as "plug after plug was landed," and finally the song began, in the jargon of Tin Pan Alley, to "show up," then it gained momentum like a snowball rolling down a hill and became one of the greatest hits of the industry. In fact it made a fortune for the small two-room publisher who bought it. It seemed to be just one of those things, and yet every publisher secretly hopes, when he takes a simple waltz, that he has another *Carolina Moon.*

When the Organ Played at Twilight is reminiscent of a song I used to sing up in Maine, about fifteen years ago, yet it came from England, written by two of my friends over there, who, as the American publisher says, "seem to have written it merely as a filler-in to be recorded on the back of a record, one side of which was already a big hit."

I would have picked it for a mediocre hit, but it is even better than that, being perhaps the best seller in the country right now; not that "best seller" means much now, but before it finishes it will have earned the American publishers a tidy sum. Of course, it is done very effectively by theatre organists in all sorts of ideas and combinations. The public certainly seems to like the song immensely.

Three Little Words

HERE is a fox trot that everyone predicted would be a big hit, and it really did become one. In fact, it is one of the quickest big hits I have ever seen. The song itself is really clever and well written, but being reprised throughout the first picture—*Check and Double Check*—made by Radio's foremost figures, Amos 'n' Andy, it could hardly help becoming well-known and well-liked. Duke Ellington and his band, a very wonderful negro combination, play it very effectively throughout the course of the picture, and the vocal renditions of it enhance it greatly.



I was advised to record it, but was unable to do so due to complications, but I regret it now because it is a feather in my cap to record hit songs. We play *Three Little Words* at strict fox trot tempo, bright and snappy; i.e. about fifty measures per minute, and the lyrics at that speed may be easily sung.

I'm Yours

JOHNNY GREEN, the Westchester society boy of whom I spoke with regard to *Body and Soul* in my first "Tuneful Topics", has another hit on his hands. Lester Allen, diminutive comedian with the large feet, making a Paramount-Publix picture in Astoria, L. I., needed a song for the picture. Green wrote a beautiful melody, but a chap named Harburg wrote the lyrics for it.

Personally, I found it necessary to make two changes in the lyrics. In one place I leave out three words in order to secure enough breath to go up to a passage that stays high for some time; and

(*Continued on page 83*)

STATION VO

Julius Caesar Runs A Broadcasting Station —Gets Into Difficulties With His Wife Over Cleopatra, The New "Hot" Blues Singer

A Playlet In One Spasm

By

MONROE UPTON

THE scene takes place in Caesar's private office. The curtain rises upon Caesar, sitting at his desk. (*phone rings*)

CAESAR: Hello! Yes, this is station VOX, Rome. Julius Caesar speaking. Oh. Yes Mr. Scipio. How is the bath business? . . . He did! Well, we'll put a stop to that. You say the announcer gave the temperature of the baths at 69, when it's really 96? . . . Well, he probably had the papyrus upside down. And it's 11 a.m. to 4 p.m., not 11 p.m. to 4 a.m? . . . I'll tell you what happened there, the announcer's candle went out just as he started to read. We'll fix that up. OK, Good-bye!

Oh. Miss Publius, will you ask Mark Anthony to come here a minute.

FEMININE VOICE: Yes sir.

(*Phone rings*)

CAESAR: Station VOX, Rome, Julius Caesar speaking. (*With false sweetness*) Oh, hello darling. Yes, I did, dear, I didn't forget . . . I mean I won't forget . . . Yes, the string is still on my finger . . . Did you want new heels, too, or just half soles? . . . I see . . . Yes. I'm going to speak to Mark Anthony about that this morning . . . Yes, it's disgraceful. I'll tell him we need more GOOD music on this station . . . I certainly will, I'll have him take off that blues singer immediately. That's right, dear. No dear, I don't *need* you . . . Yes, you may come if you like . . . Good-bye.

(*Mark Anthony knocks*) Good morning, Mark! Have a seat.

MARK ANTHONY: Good morning, Julius.

CAESAR: Say, Mark who is that blues singer you're using every night? Seems like every time I tune in I hear her. It's got to stop. What we need on this station is more GOOD music.

MARK ANTHONY: Her name is Cleopatra. She's been working over on the big Carthage stations and I figured I was lucky to get hold of her. She is going over big. We get stacks of mail every day on her. Last week she got over a thousand requests for *Those Lonesome Tiber Blues* alone.

CAESAR: Miss Publius, bring me on all the mail you have received so far on that new blues singer, Cleopatra.

FEMININE VOICE: Yes sir.

CAESAR: People are getting sick of all this popular stuff. They're fed up on jazz and moaning females. Now I want you to use the concert orchestra two hours every night. And throw this girl Cleo—

Cleo—what's her name?

MARK ANTHONY: Cleopatra.

CAESAR: Cleopatra off. Get it?

MARK ANTHONY: Yes, sir, but I don't like to fire her. I just hired her.

CAESAR: Send her in to me. I'll fire her.

FEMININE VOICE: Here is Cleopatra's mail, sir.

CAESAR: What! All of it? Just that card? Well I'll be——

FEMININE VOICE: Yes sir.

CAESAR: That looks like the post-card I—let's see that post-card . . . That's all Miss Publius.

FEMININE VOICE: Yes sir.

(*Cleopatra enters—sound of deep*

CLEOPATRA: Oh Mark, there you I've been looking all over for you. a brand new song I just know you'll May I sing it for you?

MARK ANTHONY: Of course, Cleop but first meet Julius Caesar, manag the station. He was just speaking of

CLEOPATRA: Nothing bad, I hope. do you do, Julius. I've heard so n wonderful things about you.

CAESAR: Yes, Yes, Hello—How do do. Eh—

CLEOPATRA: Would you like to my new song too. It'll slay 'em. Lis

(*Cleopatra sings a low down blues n ber with plenty of ing. A number that also be sung by a prano.*)

CAESAR: Great! Gr I like that.

CLEOPATRA: Oh. I'm glad you do, Julius— sweet old thing!

MARK ANTHONY: her what you were going to, Julius.

CLEOPATRA: Yes, do. I'm dying to h

CAESAR: Yes, of course. I was just s ing to Mark that he should give you m work. I hardly ever hear you. M give this little lady some good spots the air. That's the sort of thing people want. Good popular stuff, jazz. They get too much classical n

CLEOPATRA: You darling!

(*Mrs. Caesar—Calpurnia—enters.*)

CALPURNIA: Well, well, well! Am interrupting a private rehearsal? don't mean to say, Julius Caesar, t you intend to put that sort of singing the air. It's perfectly disgraceful. civilized Romans would turn it off. even the Goths would listen to that.

CAESAR (*meekly*): Mrs. Caesar, this Cleopatra—Cleopatra meet—

CALPURNIA (*brusquely*): How do y do!

CLEOPATRA (*sweetly*): How do you d

HERETOFORE the male v e has monopolized the whis- ing warblers but now we have M s Hilda Harrison, the "Whis- ing Soprano" at WPCH, N w York, and her very suc- sful technique would seem to e solved the soprano broad- ting limitations for everybody concerned.

Hilda Harrison

Dorothy Beckloff

HERE is a face to delight the character readers. Miss Beckloff, billed as a "crooning contralto" at WTAM, Cleveland, looks the part of a prima donna of the opera. She has been with Roxy and Shubert's—but loves her friend Mike Rofone best.

Jessica Dragonette

THEY call her "The Mary Pickford of the Air," and why shouldn't they call Mary Pickford the "Jessica Dragonette of the Screen"? At any rate this delightful young soprano consistently remains the star of stars of the National Broadcasting Company.

Sylvia Winters

WHAT to do for a new delicacy for dad? Simply tune in Miss Sylvia, the household economist expert at WGY, Schenectady, N. Y. She can give you the latest from brooms to biscuits. There's another Sylvia now. When Miss Winters recently awarded a prize to one of her listeners for a cake recipe the prize arrived at the same time as the stork with a baby girl. The baby has been named Sylvia, after Sylvia Winters.

orothy Aggas
nd
Aelvin Wilkerson

THEY have real names, as you see, but KMOXers all up and down the Mississippi valley know them best as the Singing Redheads. They sing with the glow and sparkle of real youth, and St. Louis claims them as a sort of city institution. Cute looking, aren't they?

Lillian Bucknam

SOME of us are satisfied to hit all eight on the head for one octave, others can make two octaves but Miss Bucknam can ripple musically over three octaves from D below middle C to D above high C. She is dramatic soprano at WABC and over the CBS.

PROBABLY nobody else in the whole world has a name just like that—Gogo Delys—but then there's nobody can sing the blues just like Gogo. Recently she kissed Vancouver farewell and moved down to KHJ, Los Angeles, where she promptly became an instantaneous hit.

Gogo Delys

Fifi Dorsey

"Oooooooo—an' now just you listen! Didja ever hear about the great big Skippenwhoofen? It runs along the side of a mountain with two little bitsa short legs at the top and great long legs stretching down the side?" You are listening to Fifi, the movie queen, as she sits here on the piano story-telling to the WCAU children in Philadelphia on a Sunday morning.

Hill Billy Blues

HILL BILLY ZEKE of KMPC has no high ambitions as Glen Rice discovered when he tried to coax him into an airplane. Hill Billy Zeke is one of the Beverly Hill Billies where the Cinematians dwell, and once were reigned over by their famous mayorial dictator, Will Rogers.

World Bound

"GOODBYE, come again," and these are the "Musical Crusaders" who sing to you every Sunday afternoon from WJZ and other NBC stations in the course of their "cruise around the world." Alfred Heather, as Professor Cadenza, stands in the shadow smiling with dignity.

Adams & Ross

EVANGELINE ADAMS and her announcer, David Ross, have a sort of informal partnership in the horoscoping program over WABC and the Columbia System that is said to produce more mail than any other program in the country. Miss Adams is proclaimed one of the world's most successful astrologers.

Veona Socolofsky

GRANDCHILD of Jennie Rupert, famous French prima donna of the '70's, Miss Socolofsky comes naturally by the vibrant soprano voice that has brought her hosts of friends in the audience of KOMO, Seattle, Wash. She made her Radio debut in Boston where she studied music.

Longshoremen

COUNTLESS requests have come for "more Pacific coast" pictures. Marcella demands that The Musical Longshoremen of Long Beach, Calif., simply must appear in this January roto section. So here they are, Dick Voils, Cleo Hibbs and Bob Whittaker. They are heard over KGER and are identified with all the KGER de luxe programs.

Salt and Peanuts

THIS duo (right) dropped big time vaudeville to do their harmonizing over WLW, the Nation's Station, at Cincinnati. Frank Salt is well known to the variety stage. His partner, Peanuts, had also acquired fame in a dancing act of her own, under another name.

Audrey Marsh

CHARMING and sweet is this young woman whom you hear in the course of the A. S. Beck Brevities over the Columbia System from New York. That youthful timbre is genuine—she is not yet twenty. You are going to hear a lot more about her at the rate she is going.

"AIRIAS" come easy for petite Marie who solos from the flying field as readily as she does from the WTAM studios at Cleveland. During the Cleveland air races she flew for fifteen hours. She has been in other aviation events. But she is best known for her voice and has been heard from various stations for the past six years. Little has been heard of Miss De Ville recently. She is recovering from a serious illness. She finished at the American School of Music, Paris.

Marie DeVille

KISSES

Hot and KISSES *Cold*

History of Osculation Down Through The Ages

By
Dr. Frank H. Vizetelly

Latest medical theory—kissing provides us with microbes useful for digestion. Dose before and after meals will be cheerfully taken by all.

MAN has been the slave of the kiss almost since the dawn of the world; for, with a kiss, woman has tamed the wildest men, and by a kiss the strong man's has been broken. The kisses with ch we are concerned are of the sort the poet has told us "extinguish the of life, yet awaken the longings of heart, and kindle the flames of love." was Paul Verlaine who described kisses fiery music on the clavier of the teeth ch accompanied the sweet songs of beating in passionate hearts." But have:

"Kisses hot and kisses cold,
Kisses fresh and kisses bold,
Kisses sweet and kisses sour,
Spiteful kisses and kisses dour,
Kisses short and kisses long,
Kisses weak and kisses strong,
Kisses that can dry a shower,
Kisses lasting half an hour."

n every grade of society but one kisses by favor—in that one it can not do since there is no kissing. Away down South America is a tribe, discovered by a recently returned traveler, among whom kissing is unknown.

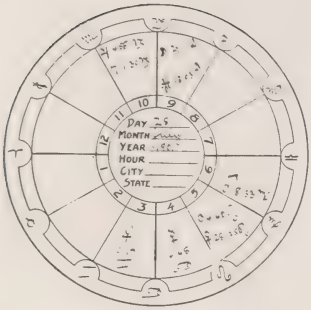
To the young woman a kiss given and received is often the token of love offered and accepted, for the soul of a young woman is as a ripe rose; as soon as one leaf is plucked, all its mates easily fall after; and a kiss may sometimes break out the first leaf.

We derived the custom of kissing the hand from the worthy citizens of Cos, for they came upon the beautiful Psyche, one day, as she slept in her bower of roses, and making obeisance before her, kissed her hand.

The kiss is as old as Creation. Eve learned how to kiss in Paradise and no more fitting place could have been chosen. There, it is said, Adam taught her all its varieties "for better, for worse, for richer, for poorer" as the marriage service says. Ever since then we have known kisses as messengers of love. But do you know that every time you indulge in kissing you shorten your life by several minutes? If you want to reach a ripe old age, you've got to cut out the kiss.

What is a kiss? It is a seal that expresses sincere affection; a pledge of future union; a gift, which, as given, takes from us the impression of our heart; a crimson balsam for a heart-broken soul: in fact, kisses are the grains of gold and silver—precious gifts from the mine of the heart—that enrich the store of happiness when hearts are surcharged with love's electricity.

A touch of the lips, that is all; yet it conveys a marvelous thrill of emotion and devotion. It is the passion in a kiss that imparts to it its sweetness; it is the affection in a kiss that sanctifies it.



The kiss has many significations. It is regarded as the seal of faith, loyalty, truth, reverence, and love. According to its purpose, it is given in the most open publicity or in the strictest of privacy. Public kisses are required by law, court, and religion; in private practise kisses are restricted to salutation, love, and passion.

The kiss of the first-born doubtless originated with Mother Eve, and so the

(*Continued on page 94*)

PROOF that wisdom is no deterrent to humor! Dr. Frank H. Vizetelly, Editor of Funk and Wagnalls New Standard Dictionary and author of this article, knows the 60,000,000 words in that monumental work. Although he doesn't use them all in his weekly broadcasts over the Columbia System, he is highly entertaining.—Editor.

Venus Makes Rudy "That Way"

Horoscope of Rudy Vallee reveals him as a True Knight of Romance

"She must be Fragile as an Orchid" Whisper Stellar Arbiters of The Famous Crooner's Astral Mate

By Peggy Hull

EVER since Rudy Vallee's first song of love swept through the air and awakened romantic yearnings in the hearts of the female sex, personality specialists, psychologists, analysts and other experts have been telling the world the kind of girl Rudy Vallee could love; the sort of man he is at heart and the reason for his phenomenal success.

But at last we have the real inside dope on the fair-haired crooner of WEAF and NBC. Here is an authentic, strictly scientific analysis of how Rudy got that way; what has made him so successful; how he feels about life and people and the sort of girl, in his secret heart of hearts, he knows he could love. This information comes straight from the four corners of heaven and is vouched for by the stars.

If you are one of those girls who likes to have the boy friend come in, grab you up, toss you in the air, catch you with a big bear hug and then administer a smart clip behind the ear as a gentle token of his undying love, read no further. You won't be interested. Send to the editor of the RADIO DIGEST for a copy of the November issue of the RADIO DIGEST and read about Floyd Gibbons. He's your meat. But Rudy Vallee, never!

LET us stop here and consider what has made Rudy such a hit. Being a mere mortal we can only come forward with the explanation that it is "something" which he puts into his songs. A "something" which breathes the very essence of romance to lonely and love-starved girls everywhere. A gentleness and sweetness which is every girl's first mental image of love. A curious note which suggests poetry, moonlight on castle walls, roses and the days when knighthood was in flower and romance held sway.

And there's the secret! Over the air comes Rudy's voice singing a sweet melody and immediately the room is filled with gallant knights of long ago. Their hats sport great plumes and long capes swing gracefully from their stalwart shoulders. Ah, sighs the lonely woman in her chair before the Radio, it meant something to be loved in those days. Every woman was a queen and reigned in a palace and love did not end with the marriage ceremony. Her knight remained always, the romantic, eager, pursuing, devoted lover. And Rudy Vallee's crooning notes builds dreams on dreams for the girl whose daily life is a drab and monotonous existence.

BUT why can Rudy Vallee, of all the Radio singers, recreate such a scene for his invisible audience?

We open an ephemeris for the year of his birth and look at the position of the planets for July 28th. The Sun is in the lordly sign of Leo . . . Venus occupies the same sign . . . our finger moves across the page and before we have completed the journey . . . out of the jumble of symbols rides a white charger and on it a knight in a plumed hat!

Courage, independence and pride are written on his brow and in his eyes. Gentleness and charity in his mouth. He sings, but it is not the song of a troubadour for he is no vagabond. He is a proud prince of the blood and to everything he does he brings the majestic dignity of royalty. There is a sword at his side but he is not a swashbuckling cavalier ready for a lusty brawl or a battle on the slightest provocation. He draws the blade only in defense of honor or for the sake of some sweet lady, yet we find that he is none the less skillfu combat.

And this is Rudy Vallee, a nobleman his innermost heart of hearts, a true mantic, a modern reincarnation of th gallant lads whom Tennyson wrote ab When he sings this hidden well is ope and he transmits to his music just deftly as an artist touches his can a true reflection of his own soul.

When his critics cry out that Va is egotistical, or conceited, what t really resent is his inner knowledge his superiority, his consciousness of high ideals and unswerving integrity.

There is no doubt that Rudy is one the most misunderstood artists now bef the public. His horoscope shows the l of the beneficent protection which was prominent in the chart of Will Rog Instead, Rudy must face bitter criticis false accusations and uncalled for enmi His Mercury is opposed to Satu squared to Mars. This is the influe which has brought him litigation a trouble through false reports, contra letters and writings in general.

THE Moon is coming an opposition with Neptune which cau scandal and slander and as most of masculine planets have bad aspects, receives much opposition from the m sex. He hates vulgarity, coarseness manner or speech, rough and uncou conduct.

Rudy is extremely sensitive and h had some sad experiences through m placed confidence. His Venus, which w in Leo at birth but passed into Virgo t days later, caused these experiences. was while this transit was taking pla that he learned not to be too trustin and too impulsive. It was this positi

taught him that he must exercise caution in selecting his friends and ...tes. But Venus is now entering ...n of Libra where he will learn to ... his affections and to be less gen... and profuse.

... Sun is Leo which has made him ...ous, persistent, affectionate and a ... leader. It also made him sus...e to admiration and through this ...ibility he suffered some painful ...ionments. But as his Sun has ...ltered the practical, analytical and ...inating sign of Virgo this tendency ...adually disappear and he will have ...re trouble from that direction.

... planets in Leo predestined him for ...r before the public. This sign rules ...s and places of amusement, while ...enus and the Sun occupying this ...learly indicated that Rudy Vallee ... succeed in some work connected ...usic, for Venus in this sign shows ... for music and acting.

...ood aspect between Venus and the ... both feminine planets, explains ...women have always rushed to his ...e when columnists ...itics have unsheathed ...pinions. Women will ...s fight for him and he ...ever lose his popular... with the opposite sex. ... aspect also explains ...ep attachment for his ...r and will keep him ...or with the public in ... of the attacks of his ...es.

...rcury, the ruler of ...nind, is in the dis... sensitive, impression... and emotional sign ...r, which has rulership ... the public. The posi... of the major planets ...te what an extremely ...d nature Rudy pos... In his expression of ...ion, although demon...ve, he would never be ...ssive, but subtle, ten... ...nd spiritual.

IT WOULD ... a girl whose horoscope ...ed the same high vi...ons and refining influ... to understand and ...eciate the delicacy, the ...ess, the depth of an ...tion which stood mute ... humble in the presence ... own greatness. ...e would have to be as ...le as an orchid, as ...ful as a violet, as dainty ...ignonette, as pure as a ... but with a character ...trong and invincible in ... presence of disaster or ...otation as the hardy ...x is to the elements. She must be exquisite rather than beautiful, delicate rather than vital, innocent rather than sophisticated.

But above all, she must be able to create and maintain an illusion of romance. She must never forget, even in those trying moments every couple face at some time in their married life, to be gentle and understanding. If once she gave way to a fit of temper, or hysterics; if once she became ungracious, brittle, or unjustly critical, Rudy's lovely image of her would be destroyed and the fine flavor of their romance would be ended.

IT IS no sinecure to be an angel, yet every girl longs to be enshrined in her lover's heart in just such a form, but maintaining the picture is something else, and few in the history of great lovers have been able to do it.

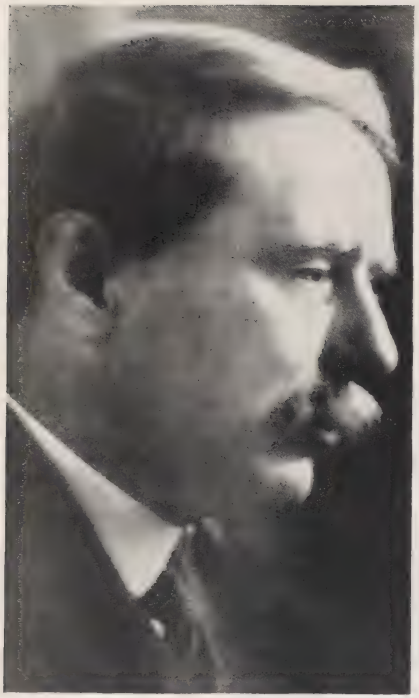
The girl who wins Rudy Vallee's heart will have something to cherish which few women in this mad age can claim. But when he gives his heart he will also give fidelity and no matter how many alluring damsels seek him out, questions in their eyes, he will turn his back and remain constant and adoring to the end. He will, in other words, bring to his marriage a spirit of eternal romance.

According to Astrology the best mates for the Leo born are usually found with their Suns in Aries, March 22nd to April 21st, or Sagittarius, November 23rd to December 23rd, but birth dates from other signs could be compatible also, if the positions of the planets showed harmony but not otherwise.

One of the reasons Rudy was able to come forward in this age of jazz, gin and savage drums and substitute dreamy, sentimental songs for wisecracks is the position his Sun occupies in regard to Uranus. The trine makes for originality and as Uranus rules the ether, it is not surprising that Vallee's success came from his work on the air.

Jupiter in Capricorn enhances the fine qualities he has received from Leo. It adds fuel to the fire of his ambition. It ennobles his nature and fortifies those sterling characteristics, sincerity, honesty and industry, which he also inherited from Leo.

It would be impossible for Rudy to commit a mean or debasing act. He would never stoop to trickery for any purpose whatsoever. Success must come, only through honest endeavor. And it is because he has attributed these same upright characteristics to others that he had learned to his sorrow, all people are not expressing the highest vibrations.



AS LONG as he lives he will have to guard against being defrauded, against law suits, and against dishonest people. He will have to be careful of the letters he writes, the papers he signs and every word he speaks.

The ensuing period has its ups and downs and he must guard his health as well as his business interests. But he will always remain on the top of the heap, although it will not be the bed of roses which those who envy him believe it to be.

Whatever his trials in life, and whatever periods of disillusionment and regret he may experience, his idealism will carry him through safely and unscathed to a satisfactory conclusion of this incarnation and that is all that anyone, no matter what the position of the stars at birth, could ask for.

Rudy Vallee has retained enduring friendship for his first saxophone teacher—Rudy Wiedoft

H. G. Wells . . . Author and Visionary

The World of our Grandchildre

"Collective Buying will Solve Present E Economic Problems" Predicts British Auth In International Broadcast

By H. G. Wells

Our grandchildren will live in a veritable Utopia, was the prophecy of H. G. Wells, prolific writer of novels and economist. Poverty and ugliness will vanish in a world which will care for its fellow men.

Mr. Wells' forecast was broadcast from London over station WABC and the Columbia Broadcasting System as one of a series of international broadcasts.

—EDITOR.

I HAVE been asked to talk to you about the "World of our Grandchildren," which means talking about the sort of world we are going to have for our grandchildren. What sort of world are we making for our grandchildren? That is a question that has a number of possible answers. If we make so-and-so today the world of our grandchildren will be so-and-so; if we do not make so-and-so, the world of our grandchildren will be quite different. It may vary from a world full of disaster to a world full of happiness. My answer depends on a lot of "ifs."

I have been especially asked not to speak about peace propaganda tonight. I am told you are tired of hearing it and tired of thinking about it. Still, war is the most important of those "ifs" on which my answer depends. If you do not want to hear about it or think about it, I see no good in talking about it.

So, in spending these fifteen minutes with you, I am going to assume that the world of the future is going to be without war, without disaster. We are going to assume that by the time of our grandchildren, the world will not only have solved the war problem, but also will have settled the second great riddle. You may ask me what is the second great riddle. The second great riddle is the economic riddle.

We are living in a world of bad times. This is true of America almost as it is of the Old World. Great multitudes of people are out of work. Many people are distressed by loss of capital and by the prevalent insecurity. Great stocks of goods remain unsold. Just what has brought about this situation, and how is it going to turn out?

There is too much goods that cannot be sold, too much cotton, too much iron and steel, and so on. We have all this merchandise. Now, on the other hand, there are swarms of people who cannot use up these things because they have not the money to buy them. We have the merchandise, but the people cannot buy it. There is not the ability to bring those two together. That is the fantastic paradox of world business today.

NOW, for the solution. I would like to suggest that this is the paradox and that a solution will be found.

What is the cause of this extraordir situation in the world today? We h mass production. We can produce same quantity of stuff with fewer fewer hands. We produce more more, and we use fewer and fewer ha to do it.

I should like to give you a hint as the kind of world that lies ahead of We have brought mass production to highest level. We can produce goods everybody. However, not one of us given consideration to mass consumpti Let us begin to think about that. W do I mean by mass consumption? I s gest to you that mass consumption balance mass production.

LET us consider first tl familiar phrase mass production. Th are employed in the great industrial ganizations thousands and thousands people to do similar work every worki hour of the day. Let us try and tu that same proposition around into ter of consumption. What is the equivaler The equivalent is not buying piece-m but community buying. You ask n how can the community buy houses automobiles and all the other articles mass production that people are so an ious to sell? That is a social and ec nomic problem. I don't propose to sta how. I am putting the idea before yo and I am merely going to assume th these difficulties will be solved by ti time our grandchildren are ready to bu

We have big production, but we ave to attain community buying. e living in a world where produc- as been modernized, while buying in a state of medieval chaos. That way I will put it. Even now we ommunity buyers for certain things. stance, you buy battleships on a unity basis, and I buy battleships same way. If we can buy battle- and submarines and airships as a unity, I refuse to believe that we t buy hotels, perfectly equipped and boots and shoes for all the en in the world in the way. Collectively we could everything we could col- ely produce. That is a idea I am putting forward u now.

instance, while I am talk- you, there are scores of ands of people living in old tumbledown houses ut proper windows, houses imes older than the oldest nobile. There are also d-hand houses that have put up piece-meal, floor by and room by room. Most e people who live in them adly in need of food, and buy their clothes bit by bit. shouldn't we as a com- ity take these people, her they like it or not, and for them better houses, bet- clothing, better food. We afford it. They should live e best, and we can produce best. I do not propose to erize them, I only propose ive them better value for r poor little bits of money, make the district better and nselves better.

I DO not believe the world which has pro- ed the Ford factories will produce parallel mass meth- on the consuming side. I sure that by the time of our ndchildren this problem also be solved.

What sort of effects will the rld of our grandchildren be ring? If you look at the rage contemporary town, you see it is still in a frightful, le, dingy, old-fashioned con- ion. There is always some le piece-meal change going There is a house here or a use there being rebuilt or a d torn up. Why shouldn't have a new town as well as w houses? You cannot go one ndred yards from where you e without seeing houses that ould be cleared away. You nnot walk any distance with- t seeing people wearing clothes that ought to make you feel uncomfort- able. Engineers and architects will tell you that people ought to live in houses that are up-to-date. They have the plans to suit most any city perfectly. They even have the plans for the roads. They have the materials and the thousand de- vices to make these things possible. They have the ways and the means to make a town up-to-date.

We have not been educated in the method of community buying. We have plenty of battleships, but we do not have plenty of the proper houses and schools. For these constructive things, we have to wait many generations. The textile peo- ple will tell you of the most delightful gowns they could supply if only the peo- ple would buy and wear them.

So, my generation is going to die be- fore our present day possibilities of peace are used. Our grandchildren will find out how to buy homes as we buy battleships, and there will be little houses and cities even more adapted to the ways of the world than we are living in today. They will have all the abundant delightful food that could be grown today that we cannot use because we do not know how to distribute it. The common people of to- day are certainly far better clothed than ever before. They have fresher material and finer and better garments. The change in this respect, even in my life- time, has been immense. But, it is lacking to the change that must be. Bad distribution and our buying habits is what is holding us up. That is the cause of our difficulties. So, these lovely, wonderful cities, and this beautiful clothing I dream of and shall not see, will come into existence in the gen- eration of our grandchildren. There will be finer clothing cov- ering healthy bodies and healthy bodies mean healthy and happy minds.

Mr. Wells relaxes in his orchard

THE clock tells me my time is coming to an end. This proposition I have been putting before you has been in my mind for a long time. Mass consumption, the idea that we might buy for all instead of each individual buying scraps for himself, is the idea I have in mind. That phrase, mass consumption, has excited my mind. Perhaps it will excite yours. Anyhow, this is the gist of what I have to say to you now: What do you think of these two phrases, mass produc- tion and community buying? What do you think of them as doors towards relieving business of its present pessimism and slackishness?

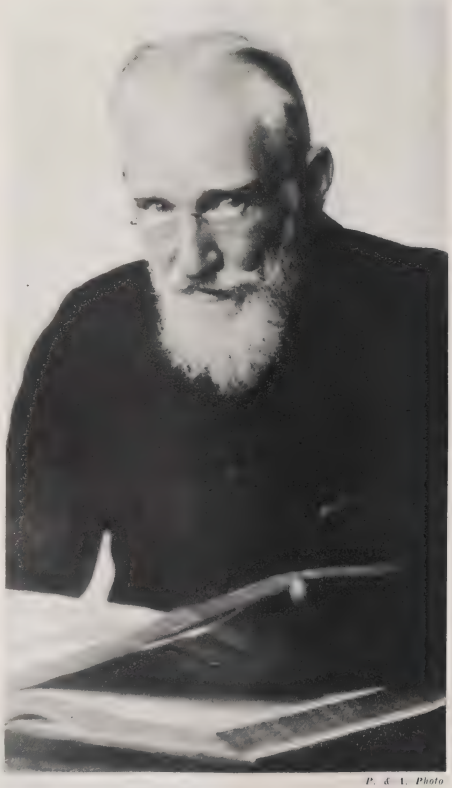
* * *

"THE inmost ego, possess- ing what I call the in- escapable attribute, can never be a part of the physical world unless we alter the meaning of the word physical to spiritual," says Professor Sir Arthur Ed- dington in transatlantic speech which you will read in the February RADIO DIGEST.

The Universe of Einstein

George Bernard Shaw

HERE in London we are still a great centre but I don't suppose we shall be a great centre long. All that will be transferred presently to the United States, but for the moment I am speaking in a capital where the reception of great men is a very common event. We have a string of great statesmen, great financiers, great diplomats and great generals, even occasionally an author. We make speeches and we toast them but still the event is not a very striking event. In truth, in London, great men are six a penny and they are a very mixed lot.



When we drink their health and make speeches we have to be guilty of scandalous suppression of disgraceful hypocrisy. There is always a great deal to conceal. Suppose that I had to rise tonight to propose the toast to Napoleon. Well, undoubtedly, I would say many flattering things about him but the one thing which I would not possibly be able to say about him would be perhaps the most important thing, and that would be that perhaps it would have been better for humanity if he had never been born.

BUT tonight, perhaps, it will be the only time in our lives we have no suppression to make. I have said that great men are a mixed lot, but there are orders of great men. There are great men who are great men among small men and there are great men who are great among great men. That is the sort of great man you have among you tonight.

Napoleon and other great men were makers of empires, but these eight men whom I am about to mention were makers of universes and their hands were not stained with the blood of their fellow men. I go back 2,500 years and how many can I count in that period? I can count them on my fingers. Pythagoras, Ptolemy, Kepler, Copernicus, Aristotle, Galileo, Newton and Einstein, and I still have two fingers left vacant.

Even among those eight men I must make a distinction: I have called them makers of the universe, but some were only repairers. Only three of them made their universes. Ptolemy made a universe which lasted 1,400 years. Newton made a universe which lasted for 300 years. Einstein has made a universe, which I suppose you want me to say will never stand but I don't know how long it will last.

These great men, have been the leaders of one side of a great movement of humanity, which has two sides. We call the one side religion, and we call the other science. Religion is always right. Religion solves every problem, and thereby abolishes problems from the universe because when you have solved a problem, the problem no longer exists. Religion gives us certainty, stability, peace. It gives us absoluteness, which we so long for. It protects us against the progress which we all dread more than anything else. Science is the very opposite of that. Science is always wrong and science never solves a problem without raising ten more problems.

P. & A. Photo

George Bernard Shaw

A great dramatist met a great scientist recently, and paid tribute in words which were heard around the world. Mr. Shaw's broadcast speech is reproduced here.

WHAT have these great men been doing? Each in turn claimed the other was wrong, and now you are expecting me to say that Einstein proved that Newton was wrong. But you forget that when science reached Newton, science came up against that extraordinary Englishman. That had never happened to it before. Newton left a power so extraordinary that if I was speaking fifteen years ago, and I am old enough to have done, I would have said that he had the greatest mind that ever man was endowed with. Combine the light of that wonderful mind with credulity, with superstition. He knew his people, he knew his language, he knew his own folk, he knew a lot of things; he knew that an honest bargain was a square deal and an honest man was one who gave a square deal. He knew his universe; he knew that it consisted of heavenly bodies that were in motion, and he also knew the one thing you cannot do to anything whatsoever is to make

The Rise of Radio—or

From A Toy to The Nation's Joy"

THE "Horatio Alger" rise of Radio in the last ten years is taken for granted by a sophisticated nation of listeners. But Radio set owners were not always blasé. It was back in 1921 and 1922 that they paused to give thought to the wonders of broadcasting. Radio was called a "craze" in those days, and its magic attracted and inspired thousands throughout the world to learn more about it. Where did it come from? How did it work? How could it reach so many cities and homes simultaneously? How could music and words fly through the walls of houses and even penetrate mountains? It was a wondering world that greeted the first broadcasts. Radio was new to the public. They had heard of wireless and had marvelled at the dots and dashes that carried messages to and from the sea. But when this new medium began to bring music and voices into the home they wanted to know more about it. It seemed so complicated. Books and booklets were written hurriedly to take care of an urgent demand. Thousands of copies were sold. Hundreds and hundreds of enthusiasts sought wiring diagrams and instructions on how to build a crystal set. There were no factory-built sets.

It's the entertainers that count in Radio these days. The program is paramount!

The young Marconis, the youth of the land that had been experimenting with amateur wireless, rallied to their attic and cellar work benches in an effort to meet the neighborhood demand for a machine that would pick up music from a nearby studio. What a scientific triumph it was for a New Yorker to fix the cat-whisker-wire on a piece of galena, silicon or carborundum, then move a slider across a coil of wire wound on a cereal box and hear a piano or a phonograph playing on the other side of the Hudson, over in New Jersey.

It required an expert to operate the first vacuum tube sets. The panels were decorated with multiple switches, dials and knobs. Listening in was a complex science. Tuning was an art. So it was no wonder that commuters boasted of what they had picked up in the air the night before. To pluck music from WOC, Davenport, Iowa, off a wire hanging from the chimney to the apple tree in a New York suburb was something to be proud of. Long distance tuning became a real sport. In order to surpass the neighbor's record it was necessary to "read up" on Radio. Sets were built and rebuilt to improve their sensitivity, to make them tune sharper and cut through interference, because in those days the "bloopers" or regenerative whistles caused by the type of circuit then in use, filled the air with sound hazards.

BUT the situation changed. The glory of the headset led to the loudspeaker. Factory-made receivers competed with the home-made instruments. The professional engineer sought to simplify Radio reception and make it foolproof. Radio was made all-electric. It

became necessary only to snap a switch and to turn a single knob instead of four or five dials. Radio in the home became as simple to use as the telephone or the electric light. Children could tune in and travel from city to city on the air waves.

It was no longer necessary, after 1926, to be an expert technician in order to qualify as the owner of a Radio set. So the public ceased to learn about what was inside the cabinet or of the wondrous waves that brought the melodies across the horizon. They dropped their interest in electrons, harmonics, kilocycles, regeneration, frequencies, induction and oscillations. The Radio chassis now ranks with other machinery, with the mechanism of the automobile. When something happens to the motor car the owner usually calls upon the garage. When something happens to the Radio the service man is called into consultation. No longer does the motorist himself get out and get under; no longer does the Radio listener open the cabinet and shake the wires in hopes that the difficulty will disappear.

The Radio set owner of 1930 is interested first and foremost in what he hears. The program is paramount. If the performance is entertaining and of clear tone then the listener has no complaint. He does not care what the electrons are doing under the cover of the cabinet or out in the sky. If he happens to tune around and accidentally hear Cuba, Mexico or Japan, he merely passes it by as an ordinary thing in the kingdom of Radio. But, had he picked up a distant city ten years ago he would have called all the family and the neighbors to rush to the headphones to hear one of the wonders of the age.

RADIO listeners have long imagined that they are tapping an unfathomed reservoir from which entertainment drains —a reservoir that never runs dry of music or voices. One of the wonders of broadcasting, which listeners probably never think about, is that no matter how many millions are in tune with a certain wave, there always seems to be sufficient energy to actuate every detector, to make every loudspeaker sing. It is a good thing that nature has so provided else it might be necessary for broadcast listeners to rush to tune in Amos 'n' Andy or some other favorite program lest there be no power left for the late comers.

Only once, in the early days of broadcasting, did the ethereal reservoir seem to be running into an arid condition. That was when the funeral service of Woodrow Wilson was broadcast. It was in the middle of the afternoon when thousands of Radio set owners in the Pittsburgh area turned their dials to the wave of KDKA. But as the time approached for the solemn ceremony to begin the station's strength began to grow weak. Reports reached the engineers at the transmitter that something must be wrong.

NEVER had this pioneer acted like that. Quickly they inspected the equipment but everything was in good shape. The meters told a tale of efficiency. As soon as the funeral was over KDKA's strength came back. The strange effect was attributed to the fact that so many had tuned in on the wave that the energy was absorbed to a greater extent than ever before. It is doubtful if this could happen today because the transmitters are much more powerful, pumping thousands of kilowatts into space, whereas in the pioneer days only a few watts were used.

The earth and its objects, the sun's rays and the emptiness of space, [illegible] the great portion of Radio's powe [illegible] that most of it goes to waste, never [illegible] ing the antenna wires that reach u [illegible] pluck the words and music from the [illegible] But the listeners of 1930 with their sc [illegible] grid tubes and powerful amplifiers n [illegible] worry that there isn't scale after scal [illegible] musical notes running up and down [illegible] lead-in wire begging for entrance. [illegible] know that all they need do is sna [illegible] switch, the tubes glow and in c [illegible] the flood of entertainment. A j [illegible] melody may impress the hearers an [illegible] may a political speech, or a news [illegible] letin, but the wonder of Radio's m [illegible] the basis of the achievement, goes [illegible] heeded.

And it is that very lack of thou [illegible] fulness that caused Dr. Albert Eins [illegible] to shake his finger at the Radio audi [illegible] of the world. He declares that liste [illegible] ought to be ashamed to make use of [illegible] wonders of science embodied in a R [illegible] receiving set while they appreciate t [illegible] "as little as a cow appreciates the bot [illegible] marvels in the plants she munch [illegible] So spoke the distinguished Pro [illegible] sor at the opening of the rec [illegible] Radio exhibition in Berlin, wh [illegible] he took occasion to express [illegible] regrets at public apathy tow [illegible] scientists and science.

Professor Einstein has the ri [illegible] picture of the 1930 Radio [illegible] owner. The modern auditor mer [illegible] tunes in, and on many occasi [illegible] continues to read, talk or p [illegible] cards while the faithful loudspe [illegible] er, never to be insulted, plays [illegible] talks on in a vain effort to attr [illegible] attention. Alas, 'tis true that [illegible] the cow munches the hay, the c [illegible] ver and the grass, so the liste [illegible] listens with little appreciation [illegible] "the God-given curiosity of t [illegible] toiling experimenter and the cr [illegible] structive fantasy of the inventor [illegible] as Professor Einstein remarked.

Olga Petrova in WJZ's first studio in Newark, N. J., in the days when getting a station was a scientific triumph.

WHAT have t [illegible] American broadcast listene [illegible] "munched" since the dawn [illegible] 1930? No medium has dealt wi [illegible] such a wide variety of events, a [illegible] there can be little doubt that t [illegible] invisible audience has appreciat [illegible] what the Radio waves have brough [illegible] to their homes.

'Tis true that the mail bags [illegible] applause are not as full as in th [illegible] days of yore. When broadcastin [illegible] was a novelty thousands wrote t [illegible] express their appreciation or t [illegible] report on the distance the prograr [illegible] traveled before being plucked fror [illegible] space. Times have changed. S [illegible] has the psychology of the Radi [illegible] audience. Few listeners write un [illegible] less they bite on the bait tha [illegible] offers something free—a sample o [illegible] tooth paste, a horoscope or a book

Ten Years Old and Earns $10,000 a Year! Fathers, Mothers and Doting Aunts—Read How He Got His Start . . .

Junior

Brings Home the

Bacon

Jimmy McCallion—*Sam* of the *Penrod* skits.

'y *Alma Sioux*

Scarberry

hor of HIGH HAT *and other popular novels*

A POPULAR young Radio satellite whose salary is $10,000 a year breezed into his place of business to be interviewed one afternoon time ago looking very much the e for wear.

s face was scratched, his eye black- and there was a piece nicked out of of his front teeth.

e caught his breath and shook his with great solemnity:

Gosh, you'll have to 'scuse me for e a little late. I was in a terrible h-up!"

e sympathized, as a woman should: Why, you poor boy! One of those ble taxi drivers, I suppose. You can't them! They'll kill you every —"

he young man shook his head again examined the nicked tooth.

No! Nobody was to blame but me. as going down hill on my scooter— I slam-banged right into a big bank. h, golly!"

urtain!

he gentleman of the great crash was e other than our little friend Jimmy Callion, ten years old and worth his ght—professionally and otherwise—in inum.

n other words, Jimmy is a honey. n probably have the impression of him that he made when he played "Sam" in the *Penrod* skits for so long. But he's a good boy.

Fresh from the little boy scooter incident, Jimmy suddenly changed into a solemn little man with the weight of an interview on his shoulders. He was wearing a sailor suit with long pants and he crossed his legs and looked up gravely:

"Shall I go ahead and talk or do you want to ask me questions? I think I know what you'll want to know."

So, Jimmy set forth on his narrative.

"Well, I'm the youngest of nine kids. I guess that's something. If you've never had the experience of course you wouldn't know. I'm the only one in the show business except my sister Rosalie, eighteen. She's in *Sons o' Guns*.

"My father is Joseph McCallion. Mother is named Nellie. Dad is a secretary in a local carpenters' union. By the way, we moved Friday from 348 West 56th Street to 136 Riverside Drive."

Realizing the modest salary Mr. McCallion would make as a secretary at this point we asked Jimmy how much he earned. He studied thoughtfully:

"Well—now, oh, I don't know. Maybe two hundred, maybe five hundred dollars a year. I know I earned a hundred dollars doing a picture one day."

The lad has absolutely no idea of his tremendous earning capacity. Fortunately, the father and mother have been wise enough to keep him a little boy, free from all conceit as regards his commercial value and talent. It was refreshing. Jimmy went on:

"YES, we have seven rooms on the Drive now. I want to tell you it's different from the noise over on 56th Street. It's a lot nicer for mamma and the girls. They can look at the river—and it's high-hatter. Girls like that, don't they? But, gosh, I wouldn't care about that.

"Gene Buck discovered me when I was a little tike. Guess I was about four or

five and going to dancing school. He got me into vaudeville awhile. It was good training—but hard work. I go to Professional School, you know. Otherwise I'd be out of luck, playing in shows."

At the time of the interview Jimmy was playing in *Lysistrata*. But it was decided he was working too hard with so many Radio programs a week—and his parents took him out of the show. Some of his other outstanding productions were *Yours Truly*, with Leon Errol; *This Year of Grace*, *Nice Women*, and *White Flame*.

"I've had a lot of movie experience," Jimmy volunteered when he was telling about his activities away from the mike. "I've been in twenty-five pictures. Last Christmas I did a talkie short—starred in it. I think it was called *There Is a Santa Claus*. I was a poor little boy in it.

"LEON ERROL is my best friend and pal. We play golf together very often. He's a great inspiration to me. Some day I want to be like him. I want to be a comedian when I grow up. Of course, I'll stick to the show business. A lot of the fellows say they'll save their money and go into business. Not me. My heart is in the show business—especially Radio.

"I like golf, baseball and swimming. My hobby is collecting autographs. You'd be surprised if you could see some of the names I have in it. Mother wants you to come for lunch some time and I'll show it to you. That day you were to come and couldn't get there we had a swell lunch fixed for you. I've got such names in my book as Coolidge, Errol, Tommy Meighan, Harry Lauder, Sir Thomas Lipton. It's great!"

You could listen to Jimmy reel off his experiences and tell of his future plans for hours without getting bored. These Radio youngsters could give cards and spades to the older stars when it comes to giving out intelligent interviews. Perhaps it is because they are free from self-consciousness.

The elder McCallions are two hard-working, home-loving Irish-Americans who handle their little child prodigy with rare intelligence. If Jimmy happens to get a bit up-stage at home and demand his rights as the chief bread earner of the family, it doesn't take the rest of the McCallion offspring long to put him in his place. They razz him. There are only two girls. You can imagine that a family of seven boys could do just that! Jimmy poses frequently for artists and advertising. But not at home!

You'll remember the Wragge youngsters, Eddie and Betty best, no doubt, as *Gold Spot* and *Shrimp*, their first important roles on the air. Betty, 12, was *Gold Spot*. Eddie, 10, *Shrimp*.

These two delightful, talented mike infants are of Holland Dutch parentage. The father and mother still speak with a Dutch accent. Especially the mother, who speaks English very poorly. Betty and Eddie were both born in New York.

Christian and Susanne Wragge are a bit awed that their two children were discovered and made famous at such an early age. There isn't another actor on the Wragge family tree.

Christian, the janitor of the ramshackle stone apartment building, where they live on the west side of New York, is the janitor of the building. This means they get the top floor, four flights up, rent free.

When Eddie was four years old the cute little tow-head was riding on the street on his tricycle when a man came along, looked him over, then went upstairs to inquire of his parents if he could put him in pictures. Since that s his income has averaged not less tha a week and is often much more wit stage shows, movies and Radio wor

These Radio children—all of them as different from the average stage as an opera star is different from a s in a honky-tonk. They are na There is no show. The Wragge chil despite their years as professionals into their Dutch household as natu and wholesomely as though they never been farther than Sunday Sc

Pride shines from the eyes of Chri and Susanne as they sit in the big petless studio-like l room and listen to E and Eddie, with beautifully modul voices and in their fect English, talk visitors.

One can see that Wragges live for children. Everyw there are pictures them in all sorts of tumes. Trinkets baby days—toys and mentoes. Eddie's bic and boxing gloves the big fireplace. Be piano piled with her sic and the things loves. They live in t rooms.

Penrod himself in person—Howard Merrill.

LITTLE fashioned Betty laug when asked what t did with their combi Radio income of $12, a year:

"Well, you can bet none of it has g into Wall Street! are going to stay h and live reasonably well. We tie our s ings up in insurance sure bonds and put in the bank. I think is foolish to be extr agant and try to sh off. We never h cared for it." She was business-li

The family lives in three rooms. Th are spick and span but plain. Du thrift is in evidence everywhere. Mot Wragge loves her home.

Eddie Wragge, a handsome blond ch with the typical Dutch blue eyes (Bet is the same type) is an all 'round ent tainer. He is also well known to the fans in *Penrod*, *Empire Builders*, a *The Lady Next Door*—singing and tal ing.

His first stage appearance, at the a of four, was in *The Glass Slipper*, wi June Walker. Then he was in *Mismat The Enemy*, *The Silver Box*, *Topaze*, wi Frank Morgan, and in *Mima*, with Leno Ulric. He left *Topaze* to go with *A Mon*

Eddie Wragge is a veteran performer.

And so is his sister, Betty Wragge.

Country, with Nazimova. Later he l in *Kolia*, with the Theatre Guild. ng both German and English.

ty, who is growing fast into a most iable young blond lady, started her career as the comedian with Char- Walker. Then she played with Belle and in *My Maryland*, *Trigger*, with rne Foster, *The Silver Box*, *Peter ion*, with Rollo Peters, *Liliom*, and meo Revue. Betty did *Her Unborn* with Effie Shannon on Broadway ter was in the picture.

is an accomplished singer and r. Both of the little Wragges ap- d in pictures in *Yolanda*, *Peter Stuy- t*, *Citizens of Tomorrow*, and *His ren's Children*. Eddie had an excel- part in *The Love of Sunya*.

BETTY is in her glory she is hired to pose in a fashion . What young lady wouldn't be?

en they are playing on the road is an arrangement made with the ssional School whereby they may eir lessons by correspondence. Betty the eighth grade this year, and little e in the fifth.

ristian Wragge came to America een years ago. The mother came n years ago. The father is proud e fact that for twelve years he has been an American citizen.

The Wragges are so natural and unaffected — not the usual "cute" types —that their interviews are grown-up, straight - from - the-shoulder affairs. There is little comedy or childishness in them. Their smiles are gay and happy and they radiate health. Eddie interrupted once to remark:

"We don't use any kind of a diet. We eat everything that is good for us. And don't forget to tell them that I've never been late for school once in my life. Betty hasn't either."

One of the pioneer Radio lads is growing up. He'll soon be out of the child class — that naughty *Penrod* of the ether waves, Howard Merrill. For Howard will be fifteen his next birthday. And, oh, how he is shooting up and growing out of knee breeches . . . And then, Long Pants!

However, Howard says he's rather glad. He hasn't Radio plans when he grows up. He wants to be a newspaperman! In fact, his mind has taken quite a literary turn. Howard's bedroom is lined on one side with a book case—hundreds of books. With them he has kept an index file. Every card contains a few typewritten lines of crisp criticism of the author.

Howard's parents are Russian. They live next door to Carnegie Hall on 57th Street. Howard likes to tell you that Mark Connelly, the famous playwright who wrote *Green Pastures*, lives upstairs.

Of all the Radio child homes visited Howard's home is the most artistic. There are only three rooms—but the living room is huge and tastefully furnished with a grand piano and paintings. The father, mother and an uncle live in the apartment.

Mother Merrill—who is a decidedly young looking, attractive dark woman, doesn't like to cook. So, Uncle John does the cooking and she takes care of the house. What a cook! Fried chicken and all the trimmings.

Mr. Merrill is a tailor with a modest income. The Merrills eat in the kitchen —such jolly, gay meals. Howard is a modest, well-bred boy with the typical Russian dark hair and brown eyes. He has been an actor since he was three.

Howard gave this account of his start, after a heavy chicken dinner. (Picture us all leaning on the table after one of Uncle John's banquets, while Howard spun his life story.)

"One evening when I was three years old I was sitting in a restaurant with mother when a woman came up and asked if I'd pose for an ad. That's the first time mother ever got the idea that I might have theatrical possibilities. I began in pictures when I was a little over four. Since then I've played in fifty-eight of them. However, nobody knew much about me until I went in Radio three years ago. It made me.

"I'VE played with Lillian Gish, Dick Barthelmess, Johnny Hines, Richard Dix—Clara Bow. Just about all of them. And I've posed for Christy, Noles, Hare—Renwick. I go to private school. They don't like to have professional children give the name. I don't know why—I guess they don't want the publicity.

"I was with Walter Hampden for two years in *An Enemy of the People*, on Broadway. I like the stage and pictures. But Radio is even more interesting. It is harder in a way because you don't get the reaction of your audience. But it

(*Continued on page 104*)

Broadcasting from

The Quality of Making Friends

IT WAS a real pleasure for the Editors of RADIO DIGEST to participate in the ceremonies at which the famous Mystery Announcer was presented with the Diamond Meritum Award. For those of us whom extensive travel has enabled to behold the master works of all time—with all their great cultural and intellectual inspiration, one must confess that there is nothing greater in all the world than the man who springs from an inconspicuous existence to a position where he commands the love and esteem of his fellow men. To win a niche in human hearts seems to be the supreme achievement of mankind. Fame and Fortune may follow and in large degree, but as measuring sticks of success they can never compare with the humble but human ability to make friends and to keep them.

Some may believe that RADIO DIGEST has conferred on the Mystery Announcer this honor known as the Diamond Meritum Award. Such, however, is not the case. To be sure, we presented the diamond set medal, which is symbolic of the public popularity won by the Mystery Announcer, but the people—the Radio public itself determined who should be the proud recipient. In conducting a contest to determine the most popular individual program, we put the decision squarely up to the Radio audience. We did this not only to be entirely fair, but also because we felt that public approval of this or that program—at least the true depth of public approval—could best be established by what the Radio public would do to prove its friendship for a particular Radio star or group of stars. Voting in this contest, therefore, required specific individual action on the part of Radio fans.

Also, we had in mind that through such contests the owners and managers of broadcasting stations, as well as the creators of sponsored and sustaining programs, could gauge more accurately what the Radio public likes best. Obviously, all broadcasters want to please the public, but the extent to which they can be guided in doing so necessarily depends to some extent on proper expression from the public itself. Contests such as this one, which was won by the Mystery Announcer of Philadelphia, we believe serve a constructive purpose in this matter of focusing attention on the type of programs which is most pleasing to the Radio audience.

When an individual entertainer has won a friend in his Radio audience that friend is often anxious for an opportunity to express his friendship. He sometimes writes a letter, which helps some but does not always express adequately what the friend would like to express.

Years ago RADIO DIGEST recognized this position of the true Radio listener and, largely as a matter of service, sponsored the presentation of prizes. At first it w annual gold cup to the most popular announcer; then it to a contest for the most popular station, and the popular orchestra. When the Federal Radio Commi divided the country into sections RADIO DIGEST awarde prizes to the leaders in each section and a top prize fo contestant that held the greatest number of votes.

There has only been one other top prize awarde RADIO DIGEST to Eastern stations during the past years—and that one was to Graham McNamee. He treasures that gold cup in his home.

The high art of winning friends knows no social or m barriers. Second and third generations of the most trious families more often than not grow soft and spo The example of the Mystery Announcer should be a po ful inspiration to those young men and women who are bitious for success but who shrink before the apparen stacles. Here we have the Mystery Announcer alread mous and successful and yet without the benefit of any man name—with his face still hidden behind a mask—his real identity still unknown. The public has bec acquainted with his talents and personality only thro the medium of the ear. How marvelous! How mysteri And yet how easy to understand when we stop to re that the career of every man must begin and end in the n ing and keeping of friends.

Nineteen Thirty-One

THE year which has just elapsed and, in fact, a g part of the one which went before did not leave n of us rolling in capital wealth and burdened w problems of how to spend enormous incomes. Indeed, suspect that many of our millionaire friends are entering new year shorn of much in the way of worldly goods.

But what of it? Is money really quite all it is cracked to be? And were the so-called boom times really taking where we wanted to go, or just taking us up and up and where the higher we went the greater was bound to be fall. Life at best is a queer thing to analyze, but of one th we may rest very much assured. The human wisdom the world has not suddenly grown out of a greatly inspi new generation. Wisdom is still the ongrowth of the c lective intellects of millions upon millions of people a centuries upon centuries of experience. Panaceas and mir ulous solutions of human problems are matters of myth.

The old adages may have grown stale in popularity a in the race for limelight may have been outgeneraled by impetuous rush of Youth which laughs in overhasty d dain at the knowledge and understanding which comes or with having lived for three score years or more.

The Editor's Chair

...o DIGEST is not robed as a preacher or prophet. But ...nad rush for enlightenment as to where business and ...ple dependent on it are going, RADIO DIGEST can at ...ounsel its readers to pay heed to the wisdom of ages— ...e of wisdom which in the long run has proved most ...g.

...tever goes up must come down. In other words, ...us values and fictitious incomes must come down. ...ch a return to normal cannot long spell depression; ... soon rewrite prosperity and sound prosperity at that. ... is nothing black about the horizon if we will but ...t facts instead of fancies and if we will accept the ...e that success is in the last analysis the result of ...ork.

...e New ...ilanthropy

...HE really great people of the world have stood out ... not so much for what they took out of life as for ... what they gave to the world. In fact, the principle ...nselfish service to one's fellow men constitutes the ...goal of human beings is constantly gaining momen-

...t twenty-seven years of age, Andrew Carnegie, who ...d virtually in poverty, decided to retire at thirty-five ... would have enough of his life left in which to dispose ...natever wealth he might have accumulated by then. ...D. Rockefeller will be famous through centuries, not ...uccessful oil magnate, but as a great benefactor of man- ...in many vital directions. George Eastman, the Hark- ...family, George F. Baker—their names are growing ever ...er for their thoughtfulness about human souls and hu- ... hearts. Indeed Dr. Dorrance, the man who made ...d soups so famous, and Hetty Green, the hoarder, ... out in their wills as sad contrasts to the noble gen- ...ty of most of our modern day money barons. However, ... descendants are very likely to bring eternal glory to ... family names through some outstanding acts of public ...ce.

...his movement toward more and larger benefactions is a ...d wide trend. Undoubtedly it is part of the spiritual ...ress of man and as such undoubtedly it will accelerate. ...nd why not? Have second and third generations ever ...ed that silver spoons make them finer people. There are ...ptions, of course, but for every son or daughter who ...been made superb by dint of great material inheritance ...e are at least ten who have been spoiled. Indeed, all ...nts who are more than ordinarily fortunate in the ac- ...ition of wealth can serve even their own children best ...etting an example of unselfish human service.

...he living endowment or the endowment by will of li- ...ies, hospitals, schools, research in medicine, cultural institutions and the host of other channels into which millions are being poured stand as the great voluntary answer to the odious and confiscatory application of inheritance taxes.

Only recently a great new field for philanthropy has opened up. Radio broadcasting presents opportunities for public service which few, if any, of the other channels can equal. The ownership of broadcasting stations is not a prerequisite, in fact is for many reasons undesirable. The entire income from *Radio broadcasting endowments* can be used for the program phase alone—to buy time on the air from one or more stations—to prepare programs of outstanding merit—and to engage talent that can do the most justice to the particular objective the donor may have in mind.

Right now sponsored programs represent considerable of a burden to many broadcasting stations and yet there must be definite limits to the percentage of programs on any (and every) station that are sponsored by advertisers. In between the sustaining and sponsored programs there is considerable room for *endowed programs*.

In connection with this new and marvelous possibility which is looming on the horizon the Editors of RADIO DIGEST earnestly suggest to that group of worthy citizens who will come to be crowned as *The Benefactors of Radio* that the following definite principles be always made to govern:

First, all endowed programs should be properly paid for as regards time on the air, administration services, and talent. The fulfilment of the purposes of charity should never be made dependent on supplementary charity.

Second, give the administrators plenty of latitude. Times will be ever changing and Radio programs must be popular in character to attract wide spread interest and attention.

Third, pick administrators on the same basis that you would for such as Scientific Foundations, Academies of Art, Hospitals and Universities.

Fourth, avoid any and all types of propaganda.

Fifth, make only the income available to the end that your endowment can be as near perpetual as possible in the service it renders to your fellow men.

It will be fascinating indeed to observe who the first and, therefore, most outstanding benefactor of Radio will be. It will be thrilling to see whether the programs provided for by the first great Benefactor will be for the promotion of health, of marital bliss, of individual morals, of music, or some other impressive phase of culture, education or even entertainment—which, after all, is a great contribution to the happiness and welfare of mankind. It will be interesting to see who are the administrators selected by the first *Benefactor of Radio*.

In any event, here's hoping and predicting that Radio will soon establish itself as a new and great medium of public philanthropy—and as a medium with the power to bring to millions of people benefits which cannot be brought to them in any other manner either so immediate or so humanly intimate.

RADIOGRAPH

Intimate Personality Notes Gleaned from the Radio Family of New York's Great Key Stations

By Rosemary Drachman

THANK GOODNESS I wore my fur coat when I went to see Mary Charles at her apartment on East 50th Street. Shiver my timbers, but the girl doesn't believe in steam heat.

Mary Charles.

Thinks it makes one soft. Guess she's right. For there she sat perfectly comfortable, clad only in some fetching blue pajamas (it was eleven in the morning), while my knees knocked together underneath my coat.

Miss Charles' hair is red, her eyes are blue, her skin has that pink and white delicate quality that so often goes with red hair. She looks frail, flowerlike. But the next time you hear her lilting soprano voice coming over the air on the Palina Hour, Wednesday nights, CBS, just remember she's the girl who stands New York's zero weather with the radiators turned off, a direct challenge to Jack Frost.

This North Pole idea Miss Charles probably brought back from England where she is better known professionally than in America. Isn't there some joke about the English people taking ice cold tubs every morning because the water is so much warmer than their houses? However, let's stop talking about temperature.

Mary Charles was born in Germantown, Philadelphia. She says she was singing and dancing ever since she can remember. She made her stage debut at five in a charity entertainment. She was perfectly calm and collected, but her mother fainted from the excitement.

To her mother Mary Charles gives all the credit for her success, because her mother was marvelous at dialects. And she was almost always getting up amateur performances at home in which Mary took part. "I think," said Miss Charles, "that Mother would have liked to have had a theatrical career herself; and now she has double satisfaction through what I am doing."

Since Miss Charles has come into Radio, her mother sits by the speaker almost day and night, listening not only to her daughter but to all the other singers, so that she may give Mary the benefit of her observations.

Mary Charles had the typical education of the daughter of a socially prominent family. She attended fashionable schools, she made trips to Europe. In Berlin she studied voice with several teachers. Back in America she began to attract attention through her entertaining at amateur and private affairs.

In 1928 Miss Charles was in England and through a theatrical producer's seeing her at a private entertainment in London, she was engaged for a leading role in a play called *Virginia*. Then she came back to the U. S. A. and played in *Interference*. Then back to England again to play for eighteen months in *Charlot's Review*. Then here again for Ziegfeld's *Show Girl*. She has played in several Paramount short movies and last winter was with Jack Buchannan at the Casanova Club.

Her first Radio work was with the Paramount Publix hour. She was immediately successful with her impe tions and dialect songs. Now featured on La Palina hour, a "spotted," as they say, in many Columbia programs.

She lives, as I said, in a charm somewhat chilly, apartment on Eas Street. And if you go to see her, colored maid will open the door an "Come in, honey, and rest yo' hat.

Ozzie Nelson

THERE are times when this P —Poor Working Girl—feels should take her salary check and r right back to the Editor of RADIO D (Just a minute. Ed., I'm really not to do it.) And one of those tin

in a name? Look at his picture.
e lad whose orchestra, whose sweet
g voice, you hear Thursday, Fri-
d Saturday nights over CBS.
you think he looks like the sort
son who'd play quarterback three
at Rutgers, who'd be a champion
er and boxer, who'd win oratorical
s, who'd be art editor of the Rut-
magazine of humor, who'd be a
n of the debating team, who'd be
mber of the Literary Society, Ivy
Fraternity, Cap and Skull, who'd
about the most popular and active
on the campus? Because if you
he looks like that then you've hit
il exactly on the head.

Ozzie Nelson won about every Rutgers had to offer. And he put himself through college with music.

ding an orchestra has been a hobby Ozzie Nelson since he was a small His father organized glee clubs and ur choruses from among his son's ls, and this was Ozzie's first and musical training. When he was en Ozzie organized a boys' orches- nd played throughout New Jersey aternity and high school dances. It only natural that when he entered ers University in 1923 he should ize an orchestra there.

nen he graduated from Rutgers, expected to give up his music and te his entire time to law. But at this time his father died and young on did not then wish to take money his mother. He went back to his estra work, playing in country clubs Westchester and New Jersey. Also he hed football at Lincoln High School ersey City. As a result he had both w degree and a reputation in the ical field.

e was ready to take the bar examinations and start practising law. But could he let his very lucrative hobby go just yet? Looming ahead of him were the starvation years which seem inevitable in the law profession. He decided to play a little longer.

It was his conceit, he said, that got him into Radio. "I suppose you'd call it conceit," he went on, "but I have a funny quirk in my character. I always think I can do anything anyone else can. And when I'd hear these orchestras playing over the air I felt that the boys and I"—he gestured toward the eight men on the dais—"could do just as well if not better. So didn't we go to WMCA and tell them so. That led to an engagement at Glen Island Casino last summer and then to Columbia. And here we are."

Even so, this orchestra leading is just an interlude. There is criminal law ahead. Not that he looks down on his present profession. Gone are the days when orchestra leaders were long-haired temperamental people, just a step above the head waiter. "But," says Ozzie, "this game is something to do while you're young. I can't see myself leading an orchestra at fifty or sixty. But law, there's a career where age is an advantage."

Far-sighted, that. I was not surprised to hear him say that he thinks musical success depends more on good business than on talent. I'll bet his law firm will be a success.

As I said before, he sings as well as directs. He plays the violin, saxophone, and banjo. He wrote the words to *And Then Your Lips Met Mine*. He wrote both music and words to *I'm Satisfied With You*, and *I Dare You*. . . . And he's an artist, too. He's just signed up to do a series of cartoons for *Life*.

"Is there anything you can't do?" I asked.

"Lots of things. I have no mechanical skill. I couldn't fix a broken electric light plug. Changing a tire is about my limit.

Rosaline Greene

ROSALINE GREENE. Tall, dark, and terribly upset. She was ten minutes late for her appointment with me. Just imagine it, ten minutes! (If she only knew how long some people have kept me waiting. P. S. Freddie Rich, please take note.) But Miss Greene puckered her brow and shook her dark head. "I don't like it," she declared. It might be all right for a stage star to be late, she explained, but Radio doesn't function that way. Time and the microphone wait for no man—or woman.

And Rosaline Green is signed and sealed to Radio. It was in Radio that she got her start, and in Radio she will remain. She has tried the stage and found it wanting. But more about that later.

She really had a perfectly good excuse for being late the afternoon I saw her. She had just returned from a trip to Europe. If you missed her for a while from the dramatic sketches broadcast from the NBC studios, that was the reason. She was traveling in Europe, visiting the countries of all the heroines she portrayed in *Famous Loves*. And she had a thrilling time doing it. But she was more thrilled about getting back to her work. Much more thrilled, she laughed, than she would have been if that work had been school teaching instead of broadcasting.

You see, Rosaline Greene intended to be a school teacher. The girl who played *Joan of Arc* and *Cleopatra* over coast-to-coast networks began life as just another freshman up at New York State College in Albany. But when she left State College in 1926 it was with the strangest honors ever obtained at that institution, for she took with her not only her A.B. degree—granted *cum laude*—but also the recognition of possessing America's most perfect Radio voice.

It all began in her sophomore year, when Edward H. Smith, the director of the WGY studio at Schenectady, and the creator of Radio drama, offered auditions to the members of the senior class of State College. Rosaline was taken along

MARCELLA

Little Bird Knows All—Tells All—Ask Her about the Stars You Admire

BLINKETY - blink - blink - blink - ?XT?-!!-Z! All of which means well, Agnes Doherty, Memponset, Mass., wants to know if Rudy Vallee ever swears. By putting the right words in the place of those "blinketies" you'll know exactly what Rudy Vallee says when he gets mad. Of course, Peggy Hull doesn't say a thing about Rudy's facility for swearing in his horror-scope, printed on another page in this book, but stars don't know as much as Marcella, anyway. As a matter of fact the stars ordained that Marcella would be married in 1861—well—now, there goes my age—but her Prince Charming never came. However, she is still hoping, and occasionally she and Toddles (she's the Presiding Pigeon of Graybar Court) gaze far out in the distance over the stretch of Broadway to see if the snow white charger, carrying her Prince, is approaching.

Dolores

But going back to Rudy Vallee, Don LeGeorge — he's the manager of the Villa Vallee Club — tells me that when Rudy gets real mad, he blinkety - blinks. But that shouldn't disturb you, Agnes. Now, hold on Don, don't run away, Agnes wants to know lots more. What is his brother like? With whom does he live? What degree did he get in college? What did his year book say of him? Is it true that he joined the Navy during the World War when under age? Yes, I guess that's all. Yes, uh-huh, um-m, Yale, did you say? and a Ph.B. uh-huh. Well, that's fine. Yes, I'll meet you for dinner next week. Good-bye! Next WEEK! Well, now Don's gone. He says, Agnes, that Rudy's brother is very cute and in some respects better looking than Rudy, being short, blond and gifted with the same personality. Rudy lives with the gang whom Don defined as a miscellaneous collection of college friends in a suite of rooms known as the barracks; that Rudy's new pet, Andy, better known as "Scotty," has been recently added to the occupants of this crowded apartment and sometimes has to be "wedged in" under the bed or behind the radiator; that Rudy joined the Navy during the World War while still under age, having trained at the U. S. Naval Training Station at Newport, Rhode Island, in the Spring of 1917. Now that we have the inside on Rudy, we'll give a vote of thanks to Don—m-m-but that's going to be some dinner next week.

Everett Sittard

* * *

MRS. DELIA of Willimansett writes, "Why don't you publish something about Everett Sittard? Young talented musicians should be encouraged by RADIO DIGEST." Of course they should, and thanks to Mary Bresnahan, we have been able to get Mr. Sittard's picture from WHDH, Boston, from which station he broadcasts. He certainly looks as if he has dominion over those rows of keys and I can even hear beautiful strains of music tip on silver toes.

As worlds release their treasures
From imprisoned bars
And sighing measures
Fling their music to the stars.

Well, Mr. Sittard broadcast way back in 1922 over WBZ, and while in high school he played the organ at the Strand Theatre in Holyoke. He was also guest organist in the Presbyterian Church in that city. Everett is one of the you professional organists in Massach and is very popular around Bosto his piano and organ recitals over WE

of Tunneltown, W. Va., writes enn Riggs' happy laugh over is enough to drive any frown away. Glenn, as you know, is the announcer over that station. Even his eyes sparkle with the wealth of joy behind them. Juniata College at Huntington, Pa., is his alma mater and when he stepped out on the threshold of the world, he became interested in dramatic sketches and plays and joined several stock companies. When he's not behind the mike at KDKA, Pittsburgh, you will probably find him playing baseball, football or tennis. This is also for Sally of McKeesport.

Farmer

* * *

AGNES MOOREHEAD appears in such NBC features as the Silver Flute, East of Cairo, and Mystery House. Her father, a minister, showed no opposition to her inclinations for a theatrical career but insisted that she finish her education at the University of Wisconsin, where she got her master of arts degree. She took parts in college shows and won her way, five years ago, to roles in several Broadway shows—*Candlelight* and *Soldiers and Women*.

* * *

GUESS who yodels Emmett's *Lullaby* every Friday night on the Nestle Program over WJZ. You're wrong. It's Chick Farmer and when Chick yodels—well he yodels and there is no mistaking it either. Chick is a graduate of Ogelthorpe University at Atlanta, Ga. He has only one aversion—he can't stand song-pluggers—so those who are engaged in the activity of song-plugging take this as a warning, and never rush into the studio when Chick

Eddie East and Ralph Dumke

Farmer is broadcasting and ask him to plug a song.

* * *

DEAR Gladys, Clark G. Myers of WENR says that he was born in the State of Ohio, where most of the presidents come from, and that he is now waiting for his turn. He has brown eyes and auburn hair—five feet, six inches in height (not quite as tall as Lincoln) and weighs one hundred forty-five pounds. I think he'd make a scrumptious president—don't you? He hasn't told me yet how old he is—and he hasn't confessed to being a bachelor. Farmer Rusk, Uncle Luke and Aunt Mirandy are separate individuals—occasionally, however, Clark has used the name of *Farmer Husk*. Uncle Luke and Aunt Mirandy, off-stage are really married—their names are Marian and Jim Jordan.

EVERYONE knows that Sir Arthur Sullivan, of the team Gilbert and Sullivan, originators of those famous operettas, wrote some very beautiful hymns. And now Gene Arnold, director of the Weener Minstrels at WENR, Chicago, once stage director and teacher of dancing and public speech, is also composing hymns. Gene was connected with Henry W. Savage, Montgomery and Stone, Victor Herbert and other well known musical producers. It was through his experience on the stage that he became interested in broadcasting. That spiritual something in us "will out," and in Gene Arnold it has found a channel for the composing of hymns.

Gene Arnold

Virginia Lee

* * *

I FOUND Virginia Lee's picture on my desk, and she had such a wistful expression, that I said, "All right, I'll put you in." Virginia is the "blues" singer, and she and Andy Mansfield do a Radio vaudeville act over WLW—that's the station that had a little romance not long ago—Natalie Giddings and Ralph Haburton—and now they're married!

* * *

TWO hundred and fifty pounds! That is exactly what Ed East weighs. Mr. East, as you know, Alice of Milwaukee, is of the team, East and Dumke, star Radio comedians of WGN, Chicago. Ralph—that's Ralph Dumke—weighs just a trifling 240 pounds. East was exposed to the higher education at Indiana University, but having been inoculated against it, the contagion didn't affect him—so off he went to vaudeville. He is married and has one daughter, Joan, aged 13. Ralph was born at South Bend, Ind., but he didn't weigh very much then. He attended Notre Dame University, took leading parts in Gilbert & Sullivan operettas, and was (*Cont. on page 100*)

and Hea

When is a quartet a quintet? When the four NBC Revelers get together with their director. Left to right: James Melton, Lewis James, Frank Black (director) Elliott Shaw and Wilfred Glenn.

PUGILISTS, columnists, astrologers, aviators, showmen and their wives . . . sooner or later the little black box, mike, gets them all. For example. Billie Burke, who Radioed recently, "When a woman ceases to be jealous everything is all over." That from the woman who married the man (Flo Ziegfeld) who glorifies the American girl! Other revelations she made about her showman husband: he is the only man she knows who can tell at a glance what a woman is wearing; "he is an expert shot, a regular Dead-eye Dick who can aim by using a mirror;" he owns fifty-six pairs of moccasins and uses them for house slippers; and he loves to go to little out-of-the-way theatres and cafes looking for new talent.

* * *

CHILDREN cost a lot. That's why Paul Wing works for his salary as Uncle Toddy. He has two of his own, Lorraine and David, and the older they grew, the more expensive they became, until he decided they would have to do something to help support themselves. So he told them stories to keep them from crying for food which he lacked money to buy. If they liked the stories, Paul Wing wrote them down and sent them to his publisher. Now he lives in Darien, Connecticut, writes there, but commutes to the NBC New York studios every Thursday.

Paul Wing, "Uncle Toddy" to boys and girls.

* * *

A VIOLIN worth $3,500 today was bought for almost nothing a few years ago by Pa Crockett of Columbia's mountaineers. How come? Outside of a hole in its back, several thousand scratches and a shattered neck, it was almost perfect when he found it in a second-hand store. But it bore the imprint of Jacob Steiner, so the elder Crockett, who is official repairman for the instruments used by

Billie Burke, who recently Radioed inner secrets of married life with Flo Ziegfeld, who likes camping, comfort and a midnight snack before bed.

himself and his five sons, fixed it up and today he could if he wished. Although it's too valuable to be used in o playing, Allan, his youngest son, sometimes uses it f numbers.

TWO of the world's most confirmed yachtsmen are Gus Haenschen and Jack Parker, of the *Men About Town* trio. But fond as he is of water, Parker can't swim. So he ties a stout rope to his middle, gets a friend to hold the end, and then drops overboard for his "swim." But Frank Luther, third member of the trio, prefers land and sticks to his saddle. He first learned he had a voice back in his Kansas ranch days when he sang ditties to keep cattle from stampeding.

* * *

THEY told Gertrude Berg it couldn't be done . . . that a Jewish dialect program would never go over. But the lady was little Miss Persistence herself and finally got an NBC audition. From then on, her rise was even more rapid than *The Rise of the Goldbergs*, the sketch which she writes and in which she plays the principal part of Molly. Another proof of the fact that talent will out!

* * *

AND Talent will be Up too! As witness Tom Truesdale and his Musical Aviators—all eleven of them are licensed air pilots. Musicians first, they got a contract on an RKO circuit and, disliking Pullmans, learned to fly. If the plane needed adjustment, the sax player would put the carburetor right. Now they are at the Park Central Aviation Grill, and broadcast over the Columbia network.

Tom Truesdale, leader of the Musical Aviators

Jack Brinckley Makes Hit at WTIC

CONTRAST—that's the element that makes certain personalities stand out in bold relief above others. And it is almost certain that it's the secret of the popularity of Jack D. Brinckley, announcer of Station WTIC of Hartford.

For it is something of an anomaly to hear such a dyed-in-the-wool southern voice as Brinkley's coming from a New England Radio station. The contrast between his slow, mellow drawl and the crisp, staccato voices of his fellow announcers was bound to attract attention in his direction.

Jack was born in North Carolina. In the few years that have elapsed since he first saw the light of day he has packed a variety of activities. After a try at "higher learning" at the University of Richmond, he joined the staff of the Richmond Times-Dispatch. From there he hopped to New York, where he annexed himself to the staff of The New York American, eventually becoming Radio editor. It happened that Lucille LaVerne was then playing on Broadway in a play based on southern life entitled "Sun-Up". Jack stepped into Miss La Verne's dressing room and told her if anybody was equipped to play in that show it was he. After hearing him read a few lines from the script, she agreed, and so Jack stepped into the cast.

Meanwhile his activities as Radio editor had brought him in contact with the metropolitan broadcasting studios. Officials of WOR of Newark liked his voice and his ready wit, so they invited him to join the staff. He made such a hit at WOR that National Broadcasting C officials obtained him for the announcing staff of WJZ, w announced several important programs and where he wro duced and played the leading part in a series of sketches "Southern Cameos."

On November 1, 1929, he transferred the now well-know to Station WTIC, and there he is today. A few month joining the WTIC staff he took unto himself a wife, Miss Merchant, daughter of Grace W. (Merchant) Towne, su of the artists' service bureau of the National Broadcastin pany. Mrs. Brinckley is herself a talented Radio actr often plays in her husband's dramatic skits.

* * *

HUGH WALTON, former Columbia System announc joined the staff of Station WTIC of Hartford. Wal Missourian and a graduate of the University of Oregon, w majored in journalism. His success in undergraduate the prompted him to abandon his journalistic ambitions in f the stage, and then he turned to Radio.

* * *

IT'S beginning to look as New England may have a r all its own. Station WTIC o ford is transmitting programs New England stations each M evening. "Hawaiian Echoes" features Mike Hanapi and H Hawaiians, is relayed to the a of WTAG of Worcester, and Parker's Old-Fashioned S School" is dispatched by v WNAC of Boston, WEAN of dence, WORC of Worceste WLBZ of Bangor.

* * *

Jack D. Brinckley (top) hasn't the crisp, New England tones expect way down east from Hartford. No, the good-looking announcer is a Southerner by birth and accent.

Betty McKee and Dot Harding (above), assisted by the two in the background, contribute KDKA's program, "Twenty Fing Sweetness" from the Pittsburgh station's studios.

Caught holding hands! But Jimmie Barr, baritone and Anita Mi soprano of the Silver Slipper Cafe program at KPO, San Fra aren't a bit ashamed. Cotton Bond is at the piano.

m'el kitchen adjacent to the studios, where every recipe and st estion is tested before described over the air. A device w h would transmit the savory odors from the kitchen would le atmosphere to the programs, say WTIC broadcasters. F ie Bishop Bowering, who is supervising the cooking broadcasts, r ntly attained a record for "fan mail". The response to one br dcast from WTIC totaled 1,032 letters requesting recipes!

* * *

'ATISTICS from the South—The Gondoliers of WJSV, Mount Vernon Hills, Va., have received from admirers 0 letters, 763 picture postals, and on their part have led over 4,000 autographed pictures, signed their names 700 i s for autograph collectors and played over 2,600 different ections on the Radio. No—they don't come from Venice . . . r real names are Manon and Clyde Stoneberger, born and ed in the heart of the Blue Ridge Mountains at Luray, Va., this month they celebrate their second anniversary with the unt Vernon station.

* * *

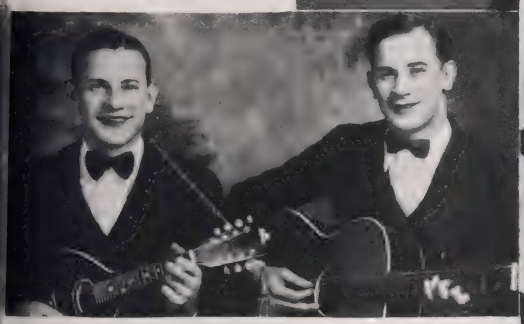
'ONY CABOOCH, star and only member of the cast of the Anheuser Busch One Man Radio Show, lives in St. Louis . makes KMOX his headquarters sday evenings, when he broadts over the Columbia Broadcasting tem. He is plumpish, wears polka neckties, is getting bald at the nples, and finds it no trouble at all portray sixteen characters in one ning.

* * *

O YOU know that the first play broadcast was from the studios WGY the General Electric Com- ny's studio at Schenectady, in Aug. 22. A little cast of veterans from legitimate stage successfully pro- ced a Radio version of Eugene lter's success *The Wolf*. This was lowed by another tabloid adapted m *The Garden of Allah* in which sandstorm was realistically pro- ced, probably the first time the old wind-machine of back stage lent its services over the Radio.

Frank Oliver, one of the pioneers of WGY and now director at that station, brought his many years of stock and road experience into the new field, the experience gained since boyhood days in the hard grind of provincial theatricals in Great Britain and Ireland. Coming to America in 1906, he saw what an earthquake could do to San Francisco and decided the best thing to do was to see the great American continent via the actor's route, which included nearly all the states in the union and Provinces in Canada. Then he tried the movies, when they were young, traveled a little more and then came to anchor in Schenectady where he just naturally drifted into Radio.

* * *



THE Buffalo Broadcasting Company and the destinies of Stations WGR, WKBW, and WMAK are now being directed by Carlton P. Cooke, president and treasurer. Irvine J. Kittinger, former president, is now vice-president and director.

* * *

RALPH ELVIN, of Indianapolis, who announces sports and special features for "the voice of the capitol", as WKBF is known throughout Indiana, has been to Hollywood. He met the leading luminaries of the talking screen, and upon returning to Indianapolis he told Indiana movie fans about their favorites and described his interesting experiences in the same breezy, clever style that has made him a headliner in sport broadcasting.

Elvin also announces the weekly American Legion boxing show broadcasts, a specialty that several years ago won him the "cauliflower orator" title which is his Radio nom-de-air. Broadcasting circus performances and parades is another forte of this versatile WKBF performer, who in private life is a successful Indianapolis business man.

Margaret Jane Kendrick (top) was favored by the gods, for she is possessor of a beautiful soprano voice, an accomplished pianist and an artist besides! She's on the staff of KQV, Pittsburgh.

The Gondoliers (above), who pluck strings at WJSV in Virginia, answer to the names of Manon and Clyde Stoneberger. Once they conducted an orchestra . . . now they rely on their talents alone.

What does "L" stand for? We don't know—it's the name of the Lohne Sister on the right. The other members of this popular singing team of WTMJ, Milwaukee, are, starting left, Fritzie, Billie and Bunny.

News and Views

YOUTH will have its say, KFWB thinks. And why? Page KFWB's new master of music, Mr. Charles Bradshaw. He is slender, tall, with restless hands, staccato speech, and the most friendly smile in existence. In addition to that, he has a tremendous earnestness and is only twenty-three!

His career can be summed up briefly: learned the banjo at twelve years old, brass in high school (no pun intended), went to the University of California, played trumpet and French horn in the Berkeley Symphony orchestra and conducted at rehearsals—a distinct honor for a student; was a member of the Musical Honor Society, and studied medicine.

But the sweet dulcet tones of the French horn sounded more intriguing, so he collected a variety of experiences in the orchestras of California theatres and the Victor Talking Machine Company.

And then—ah, then! Europe! Specifically, Monte Carlo, and more specifically, the Cafe Paris in Monte Carlo, as a member of the orchestra. Shades of Monte Carlo! When he came back to America, he was on the Publix circuit, and then he went back to the Victor Talking Machine Company, this time as an assistant conductor. And then he made his debut as a Radio personality at KFWB in the movie city, Hollywood.

Three early risers—Sam, Ed and Mandy of the KPO morning frolic

Beth Chase, popular blues singer, was arrested for speeding four days in succession on her way to the KROW Richmond studios. She claims this as a record, and challenges all comers, for she didn't get a ticket. Clever girl Beth.

* * *

Betty The Shopper, of KROW, is five feet five, blonde and has grey eyes. She claims an origin of Scotch and Irish ancestry. Five years of theatrical and newspaper experience have aptly fitted her for broadcasting the women's hour at KROW. Outside of shopping and running down the best bargains in town, Betty's hobbies are Persian cats and rock gardens. She says that before she went to work broadcasting she used to live in Berkeley, but now she only sleeps there. She is alive and alert and has a large following among women.

* * *

Don Allen, KTM's chief announcer and recently a proud father, doubles up on characters and becomes Arizona Pete on the ranch hour . . . sings, plays the piano and strums away on any stray guitar that is handy.

* * *

Al Schuss has three jobs . . . KJR announcer; football coach at the O'Dea high school in Seattle, and freshman basketball coach at the University of Washington. He does 'em all well. His football team won the city title in October.

* * *

XAVIER CUGAT, long a favorite violinist and tango orchestra leader around Los Angeles Radio stations, and whose caricature work has been frequently exhibited in the columns of RADIO DIGEST, is now down in Ensenada, Old Mexico.

The spot is some ninety miles south of San Diego. He is directing the new Hotel Ensenada orchestra . . . in the new resort center financed and managed by a group of American capitalists including Jack Dempsey.

* * *

KTAB's programs are being interspersed these days with "kid" songs, and fans have been wondering whether they are being sung by a youngster or some older person with a youngish voice. The answer is neither. It is Gerda Lundberg, 18 year old Berkeley miss, who is a good looker and a good dresser. With piercing blue eyes and fair complexion, her soft features are surprisingly set off by a stylish bob . . . just five feet tall and 155 pounds of loveliness. The staff announcers vie for the honor of announci her numbers.

* * *

JUNE PARKER, who left KHJ in S tember to free lance for awhile, w bumped in an automobile accident th kept her away from broadcast for nea three months. But she is practically covered and will be heard again in croo ing lullabies over Los Angeles statio during 1931.

* * *

HENRY STARR, known in the We as "the hot spot of Radio" h moved about again. Once heard via KF KMTR and other Los Angeles station he has been on NBC coast stations awhile. Now he is with KYA on its re ular staff for a nightly program.

Critics generally have been loud in the praise of his work, and many of the term him the best "single" act in th West's Radio today. Strange to say, th colored entertainer does not have th "typical" negro voice. Negro spiritua are not his special forte. Neither are th hot type of popular tunes. His best wor is in the pathos of tone which he lend to various ballads and popular numbe of more serious type. Besides vocal ir terest, Starr does all his own accompany ing . . . composes a bit . . . plays eleve instruments, including all the brass an wood wind instruments in the band.

Chatter From Chicago

By BETTY McGEE

"SCHOOL days," says Pop Jenks, "school days—ah, them are the best days of your life."

To which Harold Teen's reply is: "Ya can't tell, Pop. Ya can't tell. I mean when you're in school, things happen so fast, why Holy Cats, ya never have time to stop and figure out if school days are the best days of your life or not."

And that's the keynote of *Harold Teen* program at WGN, The Chicago *Tribune* station. Things—baseball, robberies, football, dances, wise cracks, club meetings, unemployment—all are subjects for their discussions and the engineers always keep an extra microphone ready in case one gets all filled up.

Harold is a perfect flaming youth—as much so in real life as in the cartoon strip or before the microphone. Bill Farnum is the off-air name of Harold Teen, and Bill is one smooth youth. He pursued the elusive Three R's first at Lake Forest College, where he was captain of the tennis team and leading light of the dramatic class. Then he went to Northwestern, where the fraternity boys whaled him into an outstanding Delta Tau Delta. On the legitimate stage, Bill has, at various times, played Willie Baxter in *Seventeen*, Merton in *Merton of the Movies*, and Tommy in *Tommy*. As they say in the *Harold Teen* theme song composed by Joe Sanders, of Coon and Sanders. Radio entertainers, he is "romance personified".

The Melody Maids (le
who lift their voices
gentle harmony ev
so often at Springfi
(Tenn., not Mass.)
the precincts of WS

Eunice Yanke plays the part of Lillums as sweetly in her own life as she does on the air. She's just out of college—still lives at the Delta Zeta sorority house, and likes nothing better than to have a crowd of college kids down at the performance. Her alma mater, like Harold's is Northwestern.

Jack Spencer's chief worry in life is that he's putting on so much poundage that he's looking as much like Beezie in real life as he talks like him before the mike. Jack, by the way, used to play football at Bowen High school-center, the same position as Beezie—and he thinks garters almost as quaint as mustache cups.

Blair Walliser, who writes the continuities, won the coveted Phi Beta Kappa key in his senior year at Northwestern and was associate editor of the *Purple Parrot, Scrawl* and a member of the editorial board of the *Daily Northwestern*. He keeps up on high school doings by slipping in on a dance now and then and listening to the boys and girls talk it over at corner drug stores.

NEW YORK'S "baby station" greeted the world in September, 1930, and two months later joined the Red network of the NBC chain. WBEN, Buffalo, already has taken its place as one of the most important stations serving Western New York State and nearby Pennsylvania and Ontario.

It is owned by the Buffalo *Evening News*, of which Edward H. Butler is editor and publisher, and the work of organizing the new project was undertaken and carried to completion by A. H. Kirchhofer, managing editor of the *News*. The station manager is Merwin C. Morrison, formerly of the *News*.

In addition to Bob White, the announcers are Louis Kaiser, who also is program director, and Edward Obrist, both formerly of WSYR, Syracuse, and William Cook, Buffalo. Merwin C. Morrison, manager of the station, serves as special announcer, while Mrs. Margaret Adsit Barrell, who sings frequently over NBC networks and is nationally known as a concert singer, is musical director. Arthur C. Snelgrove is director of the studio orchestra of this young, but lusty "baby station".

Of the twenty staff members, one of the most popular is "Bob White", who outside the studio is Gordon Higham (formerly of WHK, Cleveland). He sends an hour of cheer each morning to his listeners. Incidental music is furnished by Jack and Loretta Clemens, a brother-and-sister, banjo-and-piano combination already highly popular with WBEN audiences by this time.

Classical Music Simplified

A Monthly Feature By

Dr. William Braid White

Doctor of Music

Dr. William Braid White

Dr. White will answer readers' inquiries on musical questions in his columns. Address him in care of the Editor, 420 Lexington Avenue.

OFTEN the question is put to me: "Do you think that young children can appreciate classical music?" Or again: "Ought we to try to get our children interested in classical music when they are so young?" I could give many answers, all to the effect of saying "Yes" emphatically to both questions. I prefer however to quote something said the other day by a very great authority, by in fact the one man in the whole country who knows more about this very thing than any one else. I refer to my friend, Ernest Schelling, one of the greatest of contemporary musicians, who conducts the children's and young people's symphony concerts, in New York, Boston, Philadelphia and Cincinnati. This remarkable man knows more about the ideas that children have in matters of music appreciation, than any other man in the world does or can know. For years he has given each season to thousands of children and young people, the best in music. And he has worked out a system of giving his concerts whereby he is able to maintain the interest of his youthful audiences every second of the time. He gives them stories about the music, illustrated with lantern slides and pictures. He gets them to write their thoughts about what they hear. He has taught enormous numbers of them to think seriously and with deep happiness and satisfaction, about music. He is building up a new and musical generation in this country. He has well said, "There is no use having a series of great symphonic concerts all over the country if we have to be forever fighting for audiences . . . The time to begin is with children, and their interest must be aroused not by merely dragging them to concerts, but by more active and more direct means. The great danger is that a child should be bored.

Ernest Schelling, who conducts the Saturday morning Young People's Concerts.

"The desire for song," he continues, "for melody, harmony and rhythm exists in most of us. It is only a matter of awakening good taste at as early an age as possible. You may be sure that children who are having their interest aroused by concerts specially prepared for them will develop such a genuine love for symphonic music that they will always be patrons of symphony concerts."

Concerts for Children

Mr. Schelling has worked out his own way of giving concerts for children. He never lets his young hearers grow bored. At his concerts there is no intermission and hardly any pauses. He talks to his hearers, makes friends of them, shows them pictures, gets them to sing the melodies which the orchestra has been playing, teaches them to recognize the different instruments by their tone qualities; and all that sort of thing. Last year al 90,000 children and young people atten his concerts. Doubtless ten times many will hear them this season Radio. The hook-up is over the Colun broadcasting network from New Y The concerts take place on Saturday Carnegie Hall, New York, at 11 a eastern standard time.

May I suggest to fathers and moth who do me the honor of reading t words, that they should make gen efforts to get their children to listen good music this way? Mr. Schellin entirely right when he says that most us have the natural love for rhyt melody and harmony. The trouble that most of us hear far too little m of any kind, and that, since no one sta by to tell us what to listen to, most us listen only to what we are sure we derstand. Hence we get only the seco rate music, most of the time. Then say that we don't understand "classic music.

Let us give the children a chance. S them at it young and you will never sorry.

More Information About Musical Wo

Here are just a few more bits of inf mation about the language of music. gave you some last month. Here is a li more of the same painless treatment:

Movement: A symphony, sonata other work of the same general type (my words on "Symphony" last month) always divided up into blocks cal "movements". Music can always be c sidered primarily as the orderly movem of tones, and so the word "movement" very appropriate. There are usually f of these, and their general outlines always much the same.

First Movement: In this the compo sets forth the main musical them

Evangeline Adams' Fingers Undergo Character Analysis

HANDS *of an Astrologer*

By

GRACE STONE HALL

Special analysis for RADIO DIGEST

STARRING three evenings a week in the New York studios of the Columbia Broadcasting System, Evangeline Adams conveys in her much of her individuality. arm of her personality is carried to her Radio audience in a picture sioned by the sound of her voice. pression is felt of her modesty, her uction of ancestry, her wealth of ledge, her clear thinking, her fairness ner firmness.

ere it possible for her great audience e Miss Adams as she broadcasts it d be noted by her listeners how fully she uses her hands. Her deci- ess would also be noted as she ad- her copy to time, and how itely her hands quite as much as her record a picture of her very self. uch of her handclasp is warm, dly, sure, like the handshake of a surgeon.

is comforting, this handclasp of hers, though she must behead you, astro- ically speaking, and show you that by one your pet deficiencies must go he block for good of your horoscope. shape her hand is square with slight trend of outline. This makes it lar to the hand of Mme. Ernestine mann-Heink and somewhat similar nat of Jane Addams.

ull padding of tips of Miss Adams' l. high mounting of the side of her l. fulness of the saddle of her thumb, bined with fine-grained, pink texture kin shows that she is by temperament kedly sensitive to vibration, harmony, nentum. Squareness of her hand in- tes that this sensitiveness is balanced systematic exactness, orderliness, and hematical thoroughness.

Divine heredity," the something of ition that cannot be exactly defined probably wings her finger tips with their idealism while definite forces background her thumb.

It's a very practical thumb, aggressive, square-jawed and of pioneer type jutting out from her hand, firmly socketed and but slightly indented between the joints.

Inspirational qualities of her finger tips with their indulgent tolerance are given balance and dependability by her thumb.

Thumbs of this type command by sheer force of executive ability. What smoothness and other trimmings must follow up on a job they leave to other characteristics of their hands. Her thumb is quite similar to that of Mme. Schumann-Heink. It contrasts with that of the great philanthropist, Jane Addams, in that hers is somewhat less decisive, less straight to the grindstone.

Snell Photo

Shape and fulness of her hands are infallible proof of Miss Adams' great capabilities and power as an astrologer.

HAD the stars not given Miss Adams precedence as the greatest astrologer of the day with outstanding ability to interpret the humanism of astral forces, she might easily, according to record of her hand, have added stars to her crown in a number of other professions.

Warm fulness of her hand indicates mothering qualities. Home and its ideals will always have the protection of her hands. This combined with thoroughness of the square type of hand, exactitude and scientific turn of mind, might easily have given her prominence as the judge of a court of domestic relations, a research lawyer, builder of a subdivision of carefully planned homes, a congresswoman, or writer on subjects of political science and history.

And as the director of children's institutions she would have combined sentiment and sense in fashion to have added to her crown of success two, or three, or one comet, at least.

"But what about feminine frills and things," asks the feminine chorus of Radio listeners. "Would her hands thrill to possession of a new jewel, and what does the hand of her husband look like?"

Answering these breathless inquiries without even waiting for time signals, it may be said that the rounded molding of Miss Adams' hands tells her admirers that she does love beautiful things and that whenever her staunch upstanding, con-

Abigail Belinda in an Interview Discovers the

By Ann B. Laz

Simplitude ob DINAH *an'* DOR*A*

"LAWDY, Lawdy, am yoh still here?" I looked up and there was Abigail Belinda, broom in hand ready to sweep up the place.

"Yes, I'm here and I'm in a dilemma," I sighed.

"Whut yoh mean yoh am in a dilemma dis time ob night?"

"Well you see, it's this way, Abby," I confided, "I have a perfectly good invitation to the opera tonight. But I also have an assignment to see Dinah and Dora and they're on the air tonight—that's my dilemma."

"Yoh doan mean dem Gold Dust Twins —Dinah an' Dora?"

"Yes'm—those are the gals," I murmured.

"Can't Ah do somethin' dat will complicate dat dilemma foh yoh, Missy?" kindly offered Abby.

It was then that the idea occurred to me to let Abigail Belinda, our beaming, genial cleaning woman, go out on my assignment.

So while Marguerite was sailing away on those coloratura notes in the *Jewel Song*, I was wondering how Abigail Belinda was faring with Dinah and Dora.

The next morning Abby rushed into the office quite breathlessly.

"Well, how did the interview turn out?" I asked.

"Ah neber was receptionized wid sech hostility befoh in all mah life. Ah took mahself ober to WOR an' Ah walks right ober to de elevator boy. 'Boy,' sez Ah, 'take me to dem Harlem dames. Ah'se jes' about bustin' wid a glorified puhpose so take me quick.'

"So up Ah goes, an' Ah'se reproduced to Dinah an' Dora. Lawdy. Ah neber did see sech unperoxide coal blondes as Ah recountenanced—neber—an' so fair complexionated!

"'Ah'se Abigail Belinda,' Ah reproduces muhself, 'an' gals, dis am de mos' spasmodic moment in yoh ambuscaded careers. Ah'se gwine make yoh famous,' I sez to 'em, 'so famous dat notoriety an' renunciation will be qualified wid amplitude an' consecration.'"

"M-m, well that's interesting. What then happened?" I asked.

"Well, Ah sets mahself down much to home an' stahts makin' some interlocutory interrogations. But Lawdy dem two gals am de mos' unresumin', disostensibilized damsels what eber dis universe yet hab perused. Dey wouldn't disenclose nuthin' by no remarks dat would antagonize de feline ob de species. Wid great specularity I was invitationed to see de manager followin' de rehearsal ob de episode which dey wus goin' to broadcast," ran on Abby.

"FUST Ah wants to prescribe Dinah an' Dora so dat yoh kin keep dem in yoh mental opticals. Dora am one ob dem slenderized individualities wid a twilight cast ob countenance. Yoh kin look in dem great big eyes decorated wid elongated lashes and see in dem de germinology ob deep signification. She am one ob dem dreamy etherized creeturs —which if it wusn't fer Dinah's reliabilitude, would facilitate wid evaporation. Yoh knows de type—soft but unrepliable."

"Yes, I know the type exactly," I replied, trying to formulate some kind of a picture in my mind that would conform to this new softness and "unrepliabili

"Now, Dinah," continued Abby, " got a little moh waistline an' backb —if yoh knows whut Ah'se referrin' t both wid actuality an' wid immortal She am de kin' whut yoh kin lean a an' feel dat yoh ain't gwine to fall gravitation. She has whut one mi entitle de spirituality ob sustensibil yoh know what Ah mean."

"Yes, it's very clear to me, Abby, cl as crystal," I replied, trying to extric myself from the bombardment of extr agant verbiage.

"Waal, den dey goes in foh a li'l c logatude," continued Abby, "an' I w jes' roarin', so I busted in at a periodi moment consolidated dem wid hilarity de harmonious success ob de dramati act.

"Now Ah knew, Missy, dat you d wanted to be apprehended on de appe dese two damsels retired in. Dora w one ob dem stylish gingham dresses, wuz soht ob a sky blue checker bo affectation wid a baby pink thread r nin' shyly through an' embracin' de m conspicuous blue at intervals. Law she looked as magnified as a refract skyscraper. Now on top ob de dress w a green apron—it's wid residual difficu Ah kin prescribe de shade—de green c make de window shades from—an' Law dat was some symphonic contrast ob h mony. Now Dinah dressed wid a trivi ity ob conspicuousness wid neverthel de exactitude ob de rules manufactur by de fashionalities ob de punctilious."

"I should say you have made so very extraordinary observations, Abby I interrupted.

Beauty and the Job

The Handmaid of Success in a Woman's Career Is Attractiveness—and Beauty Treatments Provide Important Steps to Loveliness

By Frances Ingram
Consultant on Care of the Skin
Heard on NBC every Tuesday morning

THE other day a girl of about twenty-two came into my office with a letter of recommendation from a friend in Pittsburgh.

"ease help Dorothy to get a position w York." I read. "She was gradu- from college with high honors last and I am sure that with your help ill have no difficulty in making a for herself in the business world."

w. I had always considered this l of mine rather a pessimist, but reading her letter, I was thoroughly nced that she had become one of the s most outstanding optimists.

tainly no one but an optimist could getting a job a simple matter in days of depression and unemploy- and the fact that anyone would con- Dorothy an outstanding prospect used me.

r mutual friend had claimed in her that this girl was intelligent. But was nothing intelligent about the in which she was going after a posi- In the first place, she was inappro- ely dressed. She wore a raccoon coat what appeared to be a pretty elab- dinner dress; her beige gloves were d; her heels were badly run over; she ed a manicure; and I was hypnotized he absolute griminess of her com- on. She told me that she had been ing for a position for three weeks she seemed honestly surprised that no yet had attempted to employ her in way. After three weeks of job hunt- she was a little bit discouraged, but ink I was the more discouraged of two of us.

owever, I was anxious to do what I d for the girl. While she waited, I honed to Miss Wilson, a friend of e who runs an employment agency. I her that I would like to send this girl to see her.

All right," she said, "but for heaven's tell her the story of Elizabeth Adams ore she comes, will you? It's hard ugh these days to place an experienced , and if this girl is just out of college, going to be harder still to get her any d of a job. And by the way, I could you over here. Most of the girls d a beauty expert more than they need an employment agent. I get positions for them, although, to tell you the truth, I don't know why the people hire them. Some of these girls have been out of jobs so long that they have forgotten all they knew about the importance of appearance. So I'm never very much surprised when they're back in a week or ten days—fired again. You haven't told me what this girl looks like, but before you send her over here, don't forget to tell her about Elizabeth."

Elizabeth's is a success story. Six years ago she came to New York with the remains of a debutante's first season's wardrobe, a degree from Vassar, and nothing else. Her first job paid her twenty dollars a week. She didn't do much in this position and after three months she was discharged. Her employer told her that a more attractive girl was going to take her place. He was very fair with Elizabeth and he explained to her that an attractive appearance had a real business value. He told her that he preferred to hire good looking girls because they made his office look successful. He said he thought Elizabeth would profit by this experience and he advised her, as a business investment, to learn to be as attractive as possible before she even began to look for another position.

Naturally Elizabeth was somewhat crushed. But not for long. I'll never forget the rainy Saturday morning she telephoned me and asked me to have lunch with her. I met her for lunch and she told me the whole story.

"And he was right," she said, speaking of her ex-employer. "And so this afternoon I want you to help me buy a dress which is appropriate for an office and I want you to tell me everything you can think of that will improve my appearance." I was rather dubious about the dress because knowing Elizabeth's salary, I was sure she could not have saved much toward the type of dress which I thought she should have. I was right on this, too. Her capital consisted of six dollars—five dollars for

Tells about the

Romance o

The Modern Ice Cube is the Offspring of Sixteenth Century Cooling Methods—Spring Houses and "Buckets in a Well"

THE other day I wandered into the headquarters of the National Radio Home-Makers Club to learn the news on modern home keeping. I found the entire staff grouped around a new piece of equipment in the Kitchen Laboratory. Their eager curiosity puzzled me and I edged myself up to a point of vantage. There before us stood a gigantic ice cube—no, really a new electric refrigerator. But it looked as frosty as Jack himself, and as efficient.

I looked that new refrigerator over, inside and out, and I became fascinated with this latest development in food refrigeration. But the more I thought about it, the more curious I became about the beginnings of food preservation. I went to the public library and succeeded in unearthing one interesting fact—I'm sure you know the story from your early history books. It is this: in the fifteenth century meat was commonly preserved by spicing it. As these spices were procurable only from India, Columbus set out to discover new and shorter water routes to that country. The result of that voyage led to the discovery of America, and incidentally to the real preservation of food, for the most modern methods are American inventions.

But that bit of a story did not satisfy me. "Surely," I thought, "someone can trace the development of refrigeration more thoroughly." And I went back to see Mrs. Ida Bailey Allen, president of the National Radio Home-Makers Club.

SHE had all the facts at her fingertips. I shall give you her story, verbatim: "We seem to accept as a matter of course the fact that refrigeration has been in common use for centuries But in reality it has not. Man has learned by a very slow process of development to use cold in preserving food. Nero, one of the early Roman Emperors, ordered his slaves to bring snow from the mountains for this purpose. To keep it, they packed the snow into deep trenches lined with straw and sod for insulation—a principle adopted later in making the first refrigerator.

"The use of snow for refrigeration, popular so many centuries before, came into use once again in France in the 16th century, when the far-sighted physicians of that day realized that food on the verge of spoilage, was a menace to health.

"The scientists told their French compatriots to keep their foods as cold as possible, but the government taxed ice so heavily they were forced to discontinue this custom.

"The high cost of ice—fancy thinking of the high cost of anything in the 16th century—set scientists to looking around for a substitute.

"But the only suggestion they could give was to place the containers of food in vessels of water to which salt petre had been added and so to lower the temperature. If this was impractical they suggested lowering the food in buckets from the well or placing it in a spring house.

"All this while, the scientists had no inkling of the real reason why food should be kept cold, they merely knew that when food was spoiled or spoiling, people who ate it were made sick.

"Later in the same cen however, a Dutch janitor r a magnifying lens, and nounced to the horror of friends, that when he lo through it he could see thous of tiny things crawling everything. People though was crazy; they thought he sessed some evil power that prod those so-called animals.

"But this discovery was responsibl the science of bacteriology, and knowledge that cold was essential to food in a health-promoting state.

"The first record that we have of delivery of ice to an American home, in 1802—here in New York City. B long the manufacture of ice-boxes be an important industry, and for years homes were visited each morning in w weather by ice men—dragging in ice during the cold weather from neigh ing lakes and streams and preserve sawdust-filled icehouses. But physi found that this ice made people ill. epidemics of typhoid and other trou were traced to the sources from w the ice was obtained.

"To keep food cold was not eno the source of cold must be pure—so covered Pasteur, the French chemist, found that microbes were responsibl

Recipes for Frozen Dishes

Chocolate Nut Fluff

1 tablespoon gelatin
¼ cup cold water
¼ cup boiling water
2 squares melted chocolate
½ cup chopped nuts
3 eggs
½ cup powdered sugar
⅛ teaspoon salt
1 teaspoon vanilla

Soak the gelatin in the cold water for five minutes; pour over the boiling water; and stir until dissolved. Add the melted chocolate, salt, sugar, and vanilla; and fold in the nuts and the eggs, beaten separately. Transfer to a mould rinsed with cold water; and chill in an electric refrigerator until firm. Unmould; and serve with whipped cream.

Filled Snowball Cakes

12 cup cakes
½ cup heavy cream
½ cup applesauce or raspberry jam
½ teaspoon lemon juice
½ teaspoon gelatin
2 teaspoons cold water
Speed boiled icing
Colored sugar crystals

Remove the tops from the cup cakes; and scoop out the centers. Soften the gelatin in the cold water; melt over steam; and add to the applesauce or jam and lemon juice. Fold in the cream whipped stiff; and fill the cup cakes. Replace the tops of the cakes; cover with speed boiled icing and sprinkle with colored sugar crystals. Chill before serving.

◆ ✦ ◆

Frozen Tomato Salad

1 quart can tomatoes
1 sliced onion
1 small bay-leaf
2 teaspoons salt
½ teaspoon celery seed
2 cloves
Few grains paprika
1 tablespoon vinegar
1 tablespoon lemon juice
1½ teaspoons gelatin
2 tablespoons salad oil

Combine the tomatoes and the seasonings; and simmer until the liquid is reduced to three cups. Strain; and add the oil and gelatin which has been softened in cold water for five minutes. Cool; transfer to a freezing tray of an electrical refrigerator; and freeze to a mush. Mould with a large spoon or ice cream scoop; and place in nests of lettuce. Garnish with mayonnaise and cress.

Savory Crabmeat Mould

1 tablespoon gelatin
¼ cup cold water
¾ cup mayonnaise
1 cup flaked crabmeat
½ cup minced celery
2 tablespoons minced parsley
½ cup chopped cucumber
2 tablespoons minced stuffed olives
½ teaspoon salt
½ teaspoon paprika
1 tablespoon lemon juice
Few grains cayenne

Soften the gelatin in the cold water; melt over steam; and add to the mayonnaise. Combine with the remaining ingredients; and transfer to a ring mould rinsed with cold water. Place in an electric refrigerator until firm. Unmould; and fill the center with lettuce hearts and sprigs of watercress. Garnish with cut lemon dusted with paprika.

Refrigeration

In an Interview with
Catherine Adams

vilage of food and also for disease. icrobes he discovered lurked in ice d from lakes and streams.

this point another scientist, Michael y, rose to help investigate the cause ealth, and to him we owe the prin- f refrigeration as it is used today— condensing gas to a liquid on the tion of pressure and changing the rapidly back to the gaseous state t absorbs heat during the process— lucing a temperature low enough to ce.

once this principle was applied to es for making artificial ice. Then machines were used to create a low ature for cold storage plants, so could be kept over long periods of Finally, certain manufacturers put heads together and said, 'There is son why ice should not be manu- d in each home instead of at one location.' And so individual home ration was launched.

e modern home-maker realizes that p her family healthy, she must hem only food that is pure and ome. How to keep the food in ondition is her big problem; but be solved very easily with a modern electric refrigerator to help her.

"The woman who purchases need no longer feel she cannot afford it, for she can buy an electric refrigerator now that meets all her needs and some of them are very moderately priced. One beautiful new design of gleaming porcelain looks like a large white music cabinet. It has hinges and fittings of chromium plate.

"THE door opens into the interior which is equipped with commodious shelves and sufficient trays to freeze eighty-four ice cubes at a time—plenty for the guests at even a large party. The cold control device, with which this new model is equipped, enables the housewife to regulate the temperatures to suit her needs. She is thus assured that foods kept in the refrigerator will always be fresh and sweet, ready to use. By a swift turn of this control she may increase the cold and in an hour's time make any of the delicious cold-cooked foods, recipes for which are given in this article.

"By owning an electric refrigerator the busy housewife can save herself much time and considerable money if she plans her meals a little in advance, and purchases at one time enough food to last for two or three days. Quantity buying is always cheaper and eliminates the necessity of going to market every day. Large quantities of fruit can be kept on the floor of the refrigerator where the temperature is just right. Milk, butter and meats, because they need to be kept very cold, may be stored on the top shelf, nearer the icing unit.

"In the household model of this refrigerator, there is space for bottles twelve inches high, and a second space on the bottom for holding five bottles, eleven inches high.

"Electrical refrigerators are offering a whole new vista of possibilities for making unusual and delicious cold-cooked foods.

". . . What do I mean by cooking with cold? Just this: cooking is the changing of foods, physically and chemically, by the application of some external agent.

"Therefore freezing, or congealing with cold is cooking, just as boiling or congealing with heat is cooking. And since home-made frozen foods are new, they are also smart. Serving ices, ice creams, mousses, frozen salads, soups, fruit cups, hors d'œuvres, and ice-box cakes at your parties or dinners will at once lift them above the average. But best of all, the preparation of such foods is actually simpler than cooking them with heat.

"COME on back to the Kitchen Laboratory with me. I want to show you some of the results of our experiments with our new refrigerator.

"Making frozen party salads, desserts, sandwiches and other fancy foods is a simple matter when there is an electric refrigerator in the home. These foods can be prepared in advance and placed in the refrigerator, with the cold control properly set, until they are ready to use. Even sandwiches may be made up in advance and kept fresh for hours."

It is impossible for me to describe to you how those cold cooked foods tasted. So that you, too, may enjoy these tempting dishes, I am giving some of the recipes which Mrs. Allen has prepared for me, and they all can be frozen in one hour or even less than that. So why not surprise the family with some of these corking cold cooked dishes?

Many of the new porcelain electric refrigerators have the shapeliness of music cabinets.

Batters, Puddin's an' Stuffin's in Great Stir as Betty Crocker Broadcasts Cooking Lessons

By

Pauline Chesnut

"I'LL NEVER do this again!" exclaimed Betty Crocker as she turned away from the microphone in a middle western Radio station six years ago.

In speaking of this first broadcasting experience, Betty Crocker said, "It's hard to realize that only six short years ago I could have been so panic stricken and so sure I had been talking to empty air—that no one had listened to me or would listen!

"I was used to teaching cooking school pupils in a classroom and to standing on a stage platform with hundreds of women watching me as I mixed an angel food cake and explained the why and wherefores of every move I made. Those girls' and women's faces were stimulating. I could tell what they liked best and what they needed. But to sit alone in that silent, empty room talking to an expressionless owl-faced little instrument called a microphone! No, I couldn't go through that again."

"BUT you did broadcast again, and you've been broadcasting ever since," Betty Crocker was reminded. "What made you change your mind?"

She laughed, "Changing one's mind is a feminine prerogative, I suppose. But I'll tell you what sent me back to the microphone—and with enthusiasm and an assurance that I was doing something really worthwhile. It was the huge pile of letters from women who actually had listened to me!"

It must be remembered that those were the days when the Radio was very new and still regarded as a man's plaything. Most of the programs then were in the evening and on Sundays when the men were home to enjoy them.

The idea of putting on a morning program just for women seemed so absurd that those who heard of Betty Crocker's new venture shook their heads and declared it wouldn't, it couldn't succeed—that Betty Crocker had better stick to her classroom and community cooking schools.

In the first place, they said, women were too busy mornings to sit down and listen to the Radio, and even if a few did listen—how could you teach them cooking when they couldn't see you stirring your cake batter or mixing your bread dough?

It is little wonder after all this that Betty Crocker considers the reading of that first pile of Radio letters as the most thrilling experience of her life. What a panorama they unrolled before her of the lives of her listeners! Letters from lonely women living on farms miles away from their nearest neighbors wrote that they regarded her as a friendly neighbor dropping in of a morning to discuss recipes. Discouraged women in towns and cities hailed her as the friend they had secretly longed to know whom they could turn to for advice and encouragement.

One letter in particular stood out from all the others in that first Radio mail, and impressed on Betty Crocker the marvelous opportunities that the Radio offered her of being truly a friend in need to women whom she never could have reached in years of teaching cooking in a classroom and from the stage platform.

The letter was from a nineteen-yea bride who said that she and her tw year-old husband had been married a few months. She wrote to Crocker:

"You probably will be surprise know that your talk yesterday an recipes you gave for a delicious one meal have saved me from a div When we got married, we both th I'd just naturally know how to cook meals for him. But, oh, Miss Cro Everything went wrong when I tri cook. Something in the oven would while I was watching something on of the stove, and I really didn't l how to do a thing right. He'd home and just look at what I'd fixe the table or maybe he would take taste. Then he'd say, 'I can't eat stuff'—and slam out of the house an downtown to a restaurant to eat, I'd just sit at home and cry over terrible failures.

"The Radio happened to be going terday and I heard you telling about one-dish meal. You made it soun good and so easy to make that I th maybe I could do it. I wrote down bit of it and fixed it up just as you s and then I made the salad you about to go with it. When he saw things on the table, I wish you could seen his face, and then heard him he tasted them. He just couldn't be I'd fixed them up all myself. After per he dried the dishes for me, an went to a movie. Oh, Miss Cro I can't thank you enough, and I hardly wait to hear you again."

AS THE days went Betty Crocker returned regularly to studio to broadcast. She was no lo conscious of the silent, empty room, the owl-faced microphone. She was iting with her new friends.

"You see," she explained, "I have anticipating television in a reverse of fashion—for instead of my liste seeing me, I always see them and that I am right there in their h whether they are isolated farms, kitc

?POSE IT SAID "FORDOGS"?

Heard on the air:—

Mrs.—"Sandy, don't you see that re washing your hands with my y cent tooth paste?"

Mr.—"Yeah, I know, but it says , "Forhans".

Valentine Sadowski, Buffalo, N. Y.

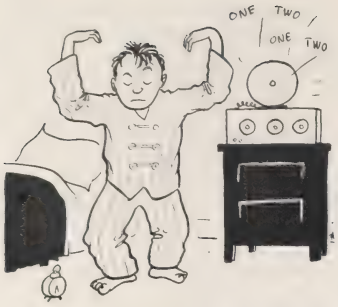
It is a cold and cheerless and humorless winter day, with the wind whoo-ing and rattling the window-panes. But in the inner sanctum of Indi-Gest's retreat it is warm and cheery. Slit *goes the letter opener and out pops a joke that's so funny it would warm the icicles off the very tip of the North Pole itself. And then another and another, and the stack of hits and slips grows higher and higher.*

Suddenly the laugh thermometer drops a dozen degrees. "It's another one," groans Indi-Gest, and the Office Nurse rushes in with a pepper shaker, (aromatic spirits of ammonia never seemed to bring Indi out of a faint) and revives the stricken sense of humor with a sneeze.

"That's the ninetyfour billion six hundred forty nine thousand three hundredtwentyninth one since I last oiled my funnybone," gasps the poor joke editor. *Little White Lies* . . . if Toscanini himself conducted and Werrenrath sang it I would stop my ears with cotton and rubber. This morning it was a politician who was making a campaign speech full of promises, which was followed by the orchestra playing, *Little White Lies.* At 11.00 A.M. a real estate agent describing his new subdivision was preceded by a tenor rendering *Little White Lies.* Just before lunch a Grampus, Kanstucky correspondent had to let me know about a big bargain sale announcement which came hot on the heels of two xylophonists, a jews harp, a piccolo and a clavichord in the throes of a stirring rendition of *Little White Lies.*

So the Office Nurse offers a word of advice to aspiring Indi-Gest contributors. Don't mention lies, prevarications or falsehoods in your Indi-Gest contributions . . . don't tell what happened before, during or after Little White Lies.

IT MUST BE SATAN



Announcer over National Broadcasting Chain, announcing song just played. "I Want to be Bad with special permission of the Copyright Owners." Who owns the copyright on being bad?—*Ray Martin, Grandview, Mo.*

GOLF ADVENTURES OF AN ANNOUNCER

One day George Hicks, NBC Announcer, was slicing and topping the little ball worse than usual. He lost every ball but one. Then that landed in a pond.

"I've lost enough balls for one day and I'm going to get this one", he declared. Taking off his shoes and socks, Hicks rolled up his trousers and waded into the pond. The mud was deep, and as Hicks sank up to his waist while fishing for the ball with a pole the other three members of the foursome sat on the bank and sang the Song of the Volga Boatmen with wisecrack interludes. Hicks got the ball.

Radio calisthenics—starting the "daze" work.

They say it takes a joke sixteen years to go around the world. But here's an old family friend which in Indi-Gest's early days was told about two ladies in the theatre. Now it's graduated to Radio.

Several ladies were sitting around the parlor of a hotel listening to a radio program. The music had started soft and low, changed suddenly to a loud prestissimo until with one large sweep the band gathered momentum, then suddenly stopped. The ensuing silence could almost be heard—it was so still. And in that hush, one of the talkative ladies shrilled out loudly, "Why, we fry ours in butter."—*Mollie Zacharias, 3106 Park Avenue, Kansas City, Mo.*

JUST IN CASE

Heard on "Something for Everyone" (C B S)—

A woman was buying material with which to make her young son a pair of trousers.

"My!" my'd a friend. "Do you need all that material for one pair of trousers?"

"No," was the reply, "some is for the reserved seats."—*Miss Florence Haist, Box 157, Lindenwold, N. J.*

A STRANGE QUIRK OF FATE

It's been a tough life for Walter Soderling, the veteran character actor who plays in *Harbor Lights*, NBC's seagoing serial. Once he thought it would be smooth sailing. In 1915 he was cast in a small part in one of Charles Frohman's plays.

When the first night performance was over, Frohman, as was his custom, called the cast on the stage and censured or praised each one. "Where's the old man?" he asked. The "old man" in the play happened to be Soderling, who stepped forward, ready to be called down.

"My friend," said Frohman, "you did a splendid piece of work, and I'm going to take care of you from now on. You have nothing to worry about. Cast dismissed!"

Soderling nearly jumped sky-high for joy. But not long thereafter Charles Frohman, the man who had assured his future, lost his life in the torpedoed Lusitania!

Checks of $1.00 each are awaiting the following Indi-Gest contributors upon proper identification and receipt of address: A. M. Davis, Florence May and M. Dowd.

At first it worked . . .
I liked it so
I thought of it
As Radi-oh!
But now it feeds
A chronic grouch . . .
I call the thing
My radi-O U C H!

RADIO BUSINESS

Crawford—I understand there's been no slump as far as the Radio is concerned.

Crabshaw—Of course not. That business is picking up all the time.—*J. J. O'Connell, New York.*

SLIPS THAT PASSED IN THE MIKE

Over Radio Station WENR, Everett Mitchell announced, "Now Little Joe Warner '*Singing in The Bath-tub*' with Sally Menthes." (Sally is the accompanist at WENR.)—*Joey Foley, 810 Bradley, Peoria, Ill.*

At KGHL, Billings, Montana, the announcer said, "The next record we present as Paul Whiteman plays it '*Sitting on a Rainbow.*'" I am afraid it would take a rather large rainbow.—*Alice Leslie, Oregon Basin, Wyo.*

Phil Cook had completed his morning program and CKGW's announcer began extolling the virtues of Quaker products. "Don't delay a moment," he said. "Buy a package of *Craker Quackles* from your grocer.—*Harry S. Hawkins, Muskoka Hospital, Grovehurst, Ont., Canada.*

PAGE THE CENSOR

I heard the cutest thing over the RKO Theatre of the air. Here it is:

Jimmy—How many pages are there in a bedroom farce?

Johnny—I thought it was unlimited. How many are there?

Jimmy—Two sheets.—*Roberta Rodman, 220 E. Central, Fairview, O.*

A BED TIME STORY

Heard over WOWO:

Mr. Brown—Did you ever hear the story of the man who drowned in bed?

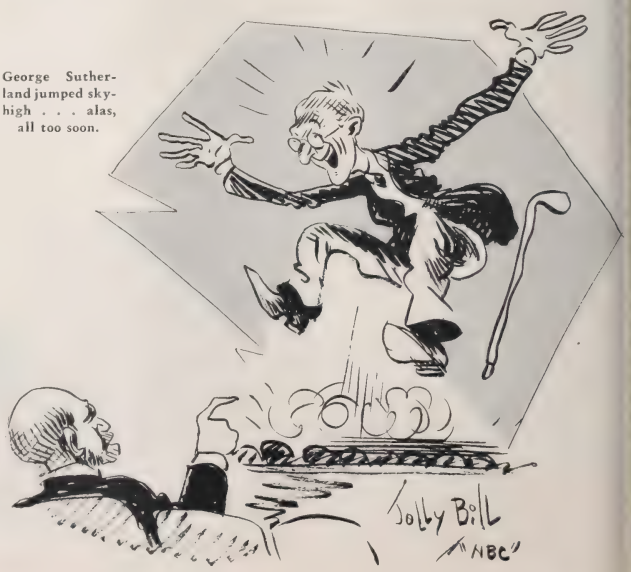
Mr. Truck—No; how did that happen?

Mr. Brown—The bed spread, the bed slipped and he fell in the spring.—*Mrs. R. E. Ulshafer, 666 Wabash Ave., Wabash, Ind.*

The next one hit the bull's eye in that shooting-for-laughs-gallery of Phil Cook. "Do you get it, Phil?" pipes Crackles)—

English tourists in a New York station asked:

"Where does that train go?"



"Buffalo in 10 minutes."

"It's sure going some."—*Frances Cherry, Wayne, Neb.*

GOSSIP SHOP

Add to list of outlandish pets: Guppies (or goupies or gyuppies) . . . a boful possessed by Annette Hanshaw of CBS, sent her by a Florida fan. They're the queerest fish in the world . . . able as long as your finger nail, but related to the whale because they're one of the few fish that bring forth full-fledged children instead of laying eggs. They're cannibals too.

George Sutherland jumped sky-high . . . alas, all too soon.

Tuneful Topics *By* Rudy Vallee

(*Continued from page 35*)

other place I thought that the part
I'll be lost alone" was rather far-
d, and I changed it to "I'll be left
" I even had the audacity to make
nge in the melody, a change of one
which seemed to me more logical
the way Johnny Green originally
ived it.

I layed the number the way I saw fit
ange it one night for Mr. Green
he was a guest at my club. As we
old friends I asked if he minded the
e, to which he replied that he did
nasmuch as he thought I should play
way I "felt it," which, after all, is
ensible way for the writer of a song
el when the artist, unless he is a
amateur, seems to feel it necessary
ke a few changes.

play it at twenty-eight measures
inute, and although it is written in
, I find that I can sing it more com-
bly in the key of D.

Home and Tell Your Mother

ERE is a song published by the same
firm that at one time boasted of the
us *Pagan Love Song*. In fact, this
too, is in a Metro-Goldwyn-Mayer
re, and although it is by two great
rs, as was the *Pagan Love Song*, it
never see the popularity that the
er song did. Jimmie McHugh and
thy Fields, writers of *I Can't Give
Anything But Love, Baby*, wrote this,
of the last songs that they wrote while
on the Coast.

heir original lyric is sung in the pic-
Love in the Rough; it was deemed
suggestive by the officials of the
onal Broadcasting Company and the
may be sung on the air only with
sed lyrics. The original lyrics were
really suggestive, but were possibly
a bit too human. For instance, the
"For she certainly did a wonderful
on you" and "That we're marryin'
respectable people do."

ot knowing that the lyrics had been
ored by the National Broadcasting
pany, on one of the Fleischmann
grams I innocently sang the original—
he consternation of the censors of the
ional Broadcasting Company—but it
their own fault for not notifying me
only revised lyrics could be used.

e play it snappily, or about fifty
sures a minute. It is a difficult num-
to sing when the throat is not open,
to the fact that it hits the high notes
stays there. We have had to trans-
e it to various keys from time to time
ending on the condition of my throat
n I have tried to sing it. It was very
received the first time I did it at
Brooklyn Paramount, which is one of
indications of how the public likes a
g.

To the Legion

HERE is a song with a very unusual history. Every day I receive manuscripts from outside organizations, and one day this manuscript came to me from the Commander of Post No. 1 of the American Legion in Memphis, Tenn. The song in its unfinished state was called *For the Legion*. It was originally intended to be sung by this particular post as its own marching song, stating that they were the marching legionnaires from the banks of the Mississippi, or Tennessee.

In the piano arrangement sent me, the authors had either innocently or deliberately taken a few measures of Victor Herbert's *Babes In Toyland*. On hearing the opening few measures played on the piano, it struck me that these composers were better than amateurs, and then the origin of the introduction came to me. The verse and chorus, while rough in spots, showed me that there were the possibilities of a real song there. I realized, however, that it must not be sectional or provincial, but should apply to the legionnaires of the entire United States, or the world, for that matter.

Being a member of the American Legion, Post No. 62, Westbrook, Maine, I recalled that the American Legion had no song of its own, and felt that such a song might be welcome, so I hastily reconstructed the lyrics and melody in an effort to make a song that the legionnaires of every state in the union might be able to sing as they marched along, or wherever they might gather. I obtained permission from the Post No. 1 Commander and the composers to reconstruct the song as I thought fit. Although I finished the song before the big Legion Convention in Boston, it was not in the hands of the publishers until several weeks later. Contracts were issued for the three members of Post No. 1, and one for myself as the fourth composer.

I think our Victor record of it is one of the finest things we have ever made, and at times our Connecticut Yankees sound like Sousa and his orchestra. During Armistice Week I did it at the Brooklyn Paramount, where it received a tremendous reception. It is a song that grows on you, one that I hope will eventually become the favorite song of every legionnaire throughout the country.

Being in 6/8 time it is played in a snappy, march tempo.

Blame It on the Moonlight

HERE is a simple yet effective song, dealing with the moonlight as the cause of one's falling in love. Published by a small but very energetic firm, it is already becoming very popular. It was written entirely by Milton Ager, who, with Jack Yellen, during the past ten or fifteen years, has written a series of hits as long as your arm.

The number is well-constructed and of a sweet, lilting nature. Ager is one of the few men who write songs and play the piano excellently; he is a very cultured scientific man on many matters other than music. It was a pleasure listening to this song before it was published, when Ager insisted that I hear it. I found its composer, who had just returned from the Coast, and whom I met for the first time, to be a quiet, refined and extremely intelligent individual.

We do it quite slowly at about thirty measures per minute.

We're Friends Again

HERE is another odd thought, written by the two boys who gave us that very unusual hit, *I'll Get By*, and who followed it with *Mean to Me; To Be In Love Especially With You*, and who have been out on the Coast writing for pictures for the past year and a half, since the advent of sound pictures. They have returned to New York and perhaps the first song which has told Tin Pan Alley that they are back officially, is this song, *We're Friends Again*.

They played it for me while it was still in embryo, and struck by the odd thought and beauty of melody and harmony, I suggested that it be published. Roy Turk, who is the lyric writer of the pair, inclines toward slang lyrics; in fact, in all his songs there is a tendency to use American slang, and in this case he dwells on such phrases as "my honey," "I spoke out of turn," and "why bring that up now?" yet the song is typical of the daily conversation of hundreds of young clerks and young business men who might tell this story of how they quarrelled with their sweetheart, but made up again the morning after the quarrel.

Fred Ahlert, who writes the melody and plays piano, is a student of melody and knows what he is about when he sits down to write. The song begins with a dropping glissando; that is, the voice drops from the high note to the low note in a sort of water-fall, with the end of the melody of the high note brought down to the low note, with hardly a break between them, almost chromatically. This type of dropping glissando must be heard to be understood. It is the use of it both in upward and downward glissandos that has led to the use of the word "crooner", a crooner being merely an individual who employs a great deal of glissando.

Glissando makes a song very appealing and tender, as it takes the harsh intervals out of the composition. This number should do quite well with the song-loving public. We do it quite slowly, at thirty measures or possibly thirty-five per minute. Although it will probably be published in the key of E flat, I find that the key of D makes it more easy to render in my particular case.

Read Rudy Vallee's Special Article, Night Clubs of New York in February Radio Digest—Editor.

Voice of th

FIRST TRY—AND HE MAKES V. O. L!

THIS is my first letter to your splendid magazine, although I have read almost every issue of it since I got my first Radio in March, 1926.

Just as Radio is said to be essential in a home as a necessity, so is RADIO DIGEST if the listener, wants to know what is going on in Radioland. He cannot learn all that is in RADIO DIGEST even if he listens twenty-four hours a day to his Radio. RADIO DIGEST gives you, as it were, the inside dope of all in Radioland. As a constant reader of RADIO DIGEST for four years I like it better all the time because of the great improvement. You have a great magazine!

I was very glad when you published the Official Log because it comes in handy when DX'ing. When I had my first Radio four years ago it was a two-tuber and I logged 241 stations in two months. Now I have a nine tuber.

—George A. Phillips, Jr., Smith Falls, Ont.

* * *

REQUEST FOR BACK NUMBERS

WITH reference to copies which you can not supply, we are venturing to make a suggestion. It is that a notice be placed in a forthcoming issue of RADIO DIGEST that the numbers mentioned are needed in the Library's file and that the courtesy will be appreciated if readers, who no longer need their copies will present them to us. Publishers frequently do this for us and almost invariably with successful results. We shall be grateful for any assistance you may render us in this connection.

Copies wanted:—1928—June, September. 1929—January, February, April, August, September, October.—E. H. Anderson, Director, New York Public Library, Fifth Avenue and 42nd St., New York, N. Y.

We will appreciate any cooperation you can give the New York Public Library. Send requested issues to the address given.—EDITOR.

* * *

YOU'LL FIND WTMJ WELL REPRESENTED IN THIS ISSUE

JUST got the November issue of the RADIO DIGEST, your splendid book. It's a book that's interesting to everyone with stories, household hints, and other short articles good to read as well as the wonderful Radio articles, but there is one thing I'd like to write about.

One reads so much about Chicago Stations, WENR, WMAQ, and very distant stations in great number. But, why not more of WTMJ, Milwaukee Journal Company, Milwaukee, Wisconsin—the best station in Wisconsin. One artist, particularly, I want to mention is their staff soprano, Myrtle Spangenberg. Hearing this soprano I'll say she possesses a very sweet and pleasing soprano voice, and her very wide selections of numbers—both popular tunes of to-day and classical numbers—is fine.

Their organist, Terese Meyers, is also very fine, with her melodies, and WTMJ announcers are pleasing to hear too.

Will look forward to be reading more of WTMJ—A RADIO DIGEST and Radio Fan, Margaret R., Prospect Avenue, Milwaukee, Wis.

* * *

APPRECIATION OF "JERRY BUCKLEY" ARTICLE

I WANT to voice my appreciation to the RADIO DIGEST and Mr. Robert L. Kent for devoting your magazine column in behalf of our dear friend "Jerry" Buckley who was so cruelly assassinated for fighting so bravely for the "common herd," which he so loved. The "common herd" of Detroit miss his voice each night. Such "friends of the poor" are few. —August Keranen, Detroit, Mich.

* * *

WESTERN STATIONS, MEND YOUR WAYS!

AFTER reading my first copy of RADIO DIGEST—the best on the market—I decided immediately to become a constant reader. I would like very much to become a member of the V. O. L. Club.

I am an ardent Radio fan, but there is one thing I would like to know. Why do stations out here cut in on chain programs to advertise a special make of washing machine or candy or give the football scores? We do like the Eastern programs but don't like to have someone chop the beginning or end off them to give us the news items or the market reports. One San Francisco station in particular has this habit.

—Dorothy Graham, Morgan Hill, Cal.

* * *

WHAT DO OTHER READERS THINK OF THE RADIO LOG?

I HAVE just received the November copy of the RADIO DIGEST and after looking it over have decided to write you one more letter suggesting that in all issues you make your official list of wave lengths more complete. As I have written you previously, I have taken your magazine ever since the very first issue, when it was a weekly, and during all of these years I have taken it for one purpose only, and that is to get a complete and up-to-date Radio log.

The thing that I miss most from your November issue is the list of stations arranged by states, which I have found by experience to be almost as useful as the list arranged by wave lengths. I think a list of Canadian, Cuban and Mexican stations arranged by wave lengths would be a very valuable addition to your magazine.

I am sure that the "fan" matter contained in your magazine is very interesting to most of your subscribers and am finding no fault with it although it does not interest me.—C. L. Farnsworth, Omaha, Nebraska.

RADIO DIGEST is interested in readers' opinions on this subject. Please write us—EDITOR.

* * *

FROM A GRANDMOTHER—74 YEARS YOUNG!

I BOUGHT my first copy of RADIO DIGEST to get Harlow Wilcox's (WGES) picture. You say, "he has made good"—I'll say he has—and How! He has the best voice and is the most natural reader we hear. We are worried all the time, fearing he may quit for some cause. He is too good to be true!—A Sincere and devoted fan.—(Mrs.) G. A. Lijean, Oak Park, Ill.

* * *

A LITTLE ANTIDOTE FOR "THE HAMMER WIELDERS"

WHAT does it matter if we aren't "crazy about" Amos and Andy or that we can't "rave" over Rudy Vallée any more? Did you ever stop to think that if we heard our best friend, or even one of our beloved parents, sing or speak along the same lines every day, perhaps two or three times a day at the same hour, we would perhaps grow a trifle bored.

And how trying the daily grind must be to the entertainers themselves! If we are a little weary, turn them off for a while, but don't "knock" them. They are untiring in their efforts to please and I, for one, consider myself fortunate to be able to hear this super-talent free of charge.

I have Radio-ed for at least ten years. My first lasting Radio thrill was when I heard John Drew give a sketch of "The Taming of the Shrew." And the singing of John McCormack on one New Year's night. Living in a small town then, I knew I was tasting some real and hearing famous artists whom I would probably never see.

May I say a word for the endless "pep" enthusiasm of Phil Cook? I hear him to day and never seem to tire of him. And two lovable characters, Abe and David. they take you back to the days our p used to tell of—husking bees and s matches—and can't you just smell ginger and wood fires and hickory smoked meat: how I enjoy Mike and "Hoiman," and adorable couple Cecil and Sally, whom I from my home station WMBD.

I bought my first copy of RADIO DIGES was shocked to read the knocks in V. O. this old world of hard knocks why pass on? A word of praise does so much more

—Mrs. E. R. Harris, Peoria,

DY FANS ARE RALLYING ROUND

)NIGHT I bought my first copy of RADIO
DIGEST and I know right now, it will cer-
not be my last.
e real reason I made this edition my first
ause I saw on the cover that Rudy Vallée
going to write in it. Rudy is my weak mo-
and I read anything he writes or that is
en about him (if it's favorable) so many
I have it memorized.
going through your magazine I noticed
interesting and original every article was.
ow that there have been countless stories
t Rudy Vallée but I feel that since he likes
magazine so much that he writes in it,
because it deals with Radio, his first love,
y you would be able to get a more original
view of him, one that gives different sides
m. What is his brother like? Whom does
e with? What degree did he get in College?
s he swear? Is it true that he joined the
y during the World War when under age?
ess that must be true, for he marched in
Boston Legionnaire Parade, and what a
l he got! Even the men said he wasn't so
after all, and you can guess what that admission meant coming from those who have always growled when their wives gave up all engagements to listen in on Thursday nights.

Couldn't you please have one of your staff answer my questions? I know it would also please those ardent Rudy fans I'm going to tell about your magazine and who are sure to buy anything that even mentions Rudy's dog.
—Agnes Doherty, Neponsit, Mass.

Marcella is going to try to answer all your questions, Agnes, so watch her columns.

Rudy Vallée joins RADIO DIGEST in thanking the many admirers who wrote to express appreciation of his article. So many letters were received that there wasn't room for all. We're especially sorry we couldn't print the masterly epistles from Helen Kruse, Wood Ridge, N. J., Verna Geideman, Niles, Mich., Dorothy R. King, Brownsville, Pa., Christine H. Vass, Kenosha, Wis., Harriette Whalen, Neponsit, Mass., and R. N. Walker of Seymour, Ind . . . they *were* good.—EDITOR.

* * *

MORE VOTES FOR MOST POPULAR ORCHESTRA—GUY LOMBARDO AND BEN BERNIE

THIS is my first appeal to the "Voice of the Listener."

I give first place to Ben Bernie and his orchestra (not forgetting his long-necked pianist, and gum-chewing drummer), siding with Ed. Russell, of Wasco, Calif., in my opinion of Guy.

For those who stand up for Ben and Guy, more power to their pens!

A rabid Bernie and Lombardo fan.—Robert Macgregor Eeadie, Pasadena, Cal.

* * *

MANLY PRAISE FOR WILL OSBORNE

I THOUGHT perhaps you would like to hear a man's opinion. It's Rudy's voice, not him that they have fallen for! American people want plain, untrained, naturalness which we all have to admit Rudy has. But for real man's appeal give me Will Osborne.—Gene Bailey, Portland, Me.

* * *

A BOOST FOR COON SANDERS

FOR my first attempt at V. O. L. I am going to try to boost Coon Sanders' Original Night-Hawks, a little, as I sincerely believe they deserve this praise, even though they may not need it.

Here is one dance orchestra that can do justice to any type of musical number, from the slowest, dreamiest waltz to the fastest moving *Tiger Rag*. In all of these, the arrangements are very clever and the rhythm perfect.

Then comes the important matter of the vocal chorus. Here again, they excel. "Coonie" is a steady reliable singer, with a good voice and plenty of pep. His partner, Joe Sanders, can croon with the best of them, but how many crooners can "open up" with his quality and range?—Philip N. Clarke, Hindsdale, Ill.

* * *

WRITE TO V. O. L.

CHAIN CALENDAR FEATURES have been omitted this month because several readers say they don't like them. What do you think? Give us your opinion and join the V. O. L. Club.—EDITOR.

TCK! TCK! HE SIGNS IT "FRIEND"

I take this awaited opportunity to point out that I haven't the slightest interest or use for your magazine. I am sorry to see Radio Broadcast go, and it could have become no more worthless if one had tried to accomplish the ultimate in that direction. It is now—junk, with my regards—H. H. Friend, Engineering Dept. RCA, Photophone, 153 E. 24th St., New York, N. Y.

* * *

ALL RIGHT—SO LONG AS YOU'RE CRAZY *ABOUT* US

I WANT to tell you we are simply crazy about your magazine. I have been reading it every month for nearly two years, and think it gets better every issue. We enjoy our Radio much more after we read RADIO DIGEST. It is chuck full of the most interesting Radio news—and is by far the best magazine published.—Mrs. E. L. Loudder, Lueders, Texas.

* * *

POEM—WITH APOLOGIES TO LITTLE JACK LITTLE

When I'm down and out and feeling blue,
Can you imagine what I do?
Why, I jump to the Radio, turn the dial,
"Yes we have no bananas," can be heard for
a mile.
Joe and Vi, the loving pair
Make me glad I am far from there.
Sanderson and Crummit sing their songs,
As the train of the Fast Freight sounds its
gongs.
The Crocket Mountaineers with songs of yore,
And Heywood Broun with admirers galore.
Up steps Burbig with talks so amusing,
That we almost forget our friend Ted Husing,
California Melodies out of the west,
For the latest of tunes, this is the best.
Radio Follies bring Eddie Cantor and Helen
Morgan,
Jesse Crawford, world loved poet of the organ.
Paramount Publix, I almost forgot,
Brings stars, music, and news served hot.
—Richard C. McGinnis, Oil City, Pa.

* * *

WE CAN'T ALL BE SWEET, LIKE THESE SOUTHERNERS!

PLEASE may I join the V. O. L.? I'd love to! I thoroughly enjoy the RADIO DIGEST. It has so many pictures and articles about Radio artists I've always wanted to find out about, and now that I've discovered the R. D. I know I'm getting up-to-date news.

It seems to me there is rather an unpleasant argument going back and forth in V. O. L. What I can't understand is, why be unpleasant about it? There are plenty of artists for everyone—different people require different attractions. So let's please be sweet about our arguments. Those of us who like Rudy—say so, but not at the same time condemning some one else.—F. C., Memphis, Tenn.

* * *

M. A.'S EARS SHOULD BE BURNING!

THE Mystery Announcer and his gang of WPEN are wonderful. A person couldn't be blue and listen to them at the same time.

There's Melody Mac who is a pianist, organist, comedian, singer and what not, all rolled into one. Then there is Bill. Everybody likes him for his voice, impersonations and happy-go-lucky ways. Every boy at the station is an artist in some way. M. A., short for Mystery Announcer, is grand. He has a most wonderful personality and he puts all he's got into his work to make people happy.

Some of your other V. O. L. fans write in and tell us what you think of our M. A. and his gang, won't you? And, please print more about them in the next issues.—Dot Martenson, Haverford, Pa.

Scientific Progress

By Howard Edgar Rhodes, Technical Editor

Radio and Aviation

DURING the years that have elapsed since the Wright brothers demonstrated that flight was possible the airplane has been developed to its present efficiency. In recent years the bonds tying together Radio and Aviation—each the fastest thing in the world in its own realm—have steadily grown stronger until today the mail and transport pilot is relying more and more upon Radio to bring him, through fog and storm, safely to his destination.

Here is an interesting tale of the value of Radio in aviation. Recently a plane roared over Hadley field in New Jersey from the west, but the clouds were so low that the pilot hesitated to drop below them. The Radio operator at the field, appreciating the situation, got into instant Radio communication with the pilot.

"You passed directly over the field. Turn around. The wind is east", came over the air to the pilot.

The plane roared back over the field. Then, by Radio, the pilot heard, "You have a 300 foot ceiling. Turn around and land. Floodlights are on," was the message.

The noise of the plane's motor died down. Suddenly the ship broke through the low hanging clouds and glided down to an easy landing. The pilot cared for his plane, then went over to the Radio room and with a grin that meant more than words, said to the operator, "Thanks".

Radio receivers installed on both mail and passenger planes are now used to bring to the pilot information regarding weather conditions in the path of his flight. Beacon systems. Radio searchlights, that send out beams of Radio like a lighthouse sends beams of light are now located at various points throughout the country and send out signals that enable a pilot to keep to his course, though the fog be so dense that he cannot see more than a few feet ahead. The Radio beacon system between New York and Chicago is complete. Also it is now possible, by means of government beacons, to fly a continuously defined course from Boston to Omaha and from Boston to Savannah. National Air Transport now has about 25 planes operating in the Boston to Omaha territory and the pilots consider their Radio beacon receivers as important as the compass.

An air mail plane with rigid Radio antenna installation to insure safety, and (left) tuning control which is located in front of pilot.

A pilot leaving Hadley field to fl Chicago would tune his receiver to beacon at Hadley field. So long a hears one long dash he knows he i his course. If he hears a long dash a short dash he knows he has drifte the right of the proper course; a s dash followed by a long dash indic that he is to the left of the course. fore the signals from Hadley field come so weak as to be useless he will himself within the range of ano beacon; and so he continues along definite, unfailingly infallible be course until he reaches his destinat

Some of the beacon systems give a ble indications which the pilot h through a pair of telephone recei clamped over his ears. Other bea systems use a visual indicator, mou on the instrument board, the indic consisting of two reeds which vibrate w the pilot is flying a beacon course. long as he stays on the course both re vibrate equally. If he gets off the co the reeds vibrate unequally, and then simply steers his plane back until b reeds are again vibrating with equal tensity. The importance the governm officials attribute to Radio in aviatio indicated by the fact that the governm pays an additional three cents per mil mail planes equipped with Radio.

Safe landing is another field where dio will be used. Imagine the task trying to land a plane on a field cove by a dense fog, the ground absolutely visible and with no instruments to ir cate exactly how high the plane is ab the ground. But experiments have b made with very, very short wave leng and it has been found that if the tra mitter is located a few feet above ground that the signals shoot forw parallel with the ground for a short tance and then gradually curve upwa When a pilot wants to land, but can see the ground, he needs simply to his plane into the path of those sign then follow them down along that perf curved path until the wheels of the pl are but a few inches above the grou

Radio's part in increasing safety gaining prominence every day.

Programs from Records

UT OF modern Houses of Magic
now comes a new type of program for the broadcasting station. On a piece of soft wax is a carefully planned and flawerformed program suitable for ting. From this soft wax record r plate is then made. Finally, over the intermediate processes, per" is produced from which a any ordinary phonograph records manufactured. We hem phonograph rec-But the organizations oduce these programs rl on discs never refer by such a prosaic They refer to them in h-sounding scientific "electrical transcripnd it is with this apn that the recorded ns are described when e presented over the any Radio broadcastions are experimenting his new type of proaterial; in fact it has been adopted by a of stations.

trically transcribed ns make it possible for ation—even the smallation in the smallest to present entertainfeaturing the greatest and all the well known musical ations; entertainment essentially l as that transmitted by the largest s. They guarantee to the audiences e small stations the finest of talent. sponsors of these electrical tranns feel that they have a number of t advantages. In the first place cords can be made in a very caredesigned studio and the program can eated as many times as is necessary in perfection; mistakes made in an ry broadcast cannot be rectified. made they leave the station with eed of light, never to return.

records when pronounced perfect shipped to stations throughout the y and can be presented over the the most desirable time in each y. This eliminates the difference e between east and west coasts that a serious drawback in chain broadcasting. When a program is sent over a chain at eight o'clock eastern standard time it is heard in San Francisco at five o'clock in the afternoon. With recorded programs this time difference is eliminated and west coast listeners can hear the program at eight o'clock or at any other desired time.

Possibly the most important objection the listener will have to recorded programs will be that he misses the feeling

The final testing of electrical transcriptions.

of listening to an actual performance, a feeling that many listeners apparently believe is an essential part of Radio entertainment. It is too early to say how serious a factor this will be in the adoption of recorded programs, for the production of electrical transcriptions especially for broadcasting has not been under intensive development for much over a year. Personally we don't care whether we listen to actual performances or electrical transcriptions, so long as the program is good.

When the recorded programs are broadcast from a station they are not played on a phonograph placed in front of a microphone, such as was done in the early days of broadcasting. Instead the output from the pick-up placed on the record is directly fed into the transmitter. The pick-ups used, much more costly than those found in phonograph-radio combinations designed for the home, are generally operated in pairs so that as one record ends the next one can be cut in without any pause.

At the present time some 95 per cent of the broadcasting stations throughout the country will accept electrical transcriptions for broadcasting.

The organizations engaged in this electrical transcription work, in almost every case select talent, create the programs, supervise the making of the records, book time on the air and if necessary supply suitable reproducing apparatus to broadcasting stations.

High Power Broadcasting Stations

IT HAS been reported lately that the Federal Radio Commission is viewing with satisfaction the present power of broadcasting stations and hesitates to permit stations on *clear* channels to use higher power. The reader should understand what is meant by "clear channels". The broadcast band is divided into some ninety-eight channels and out of these a certain number are clear channels and only one station in the entire country is assigned to any one of these clear channels; on all other channels more than one station is operated. The limitation of power on those channels used by several broadcasting stations is necessary to prevent serious interference—but when there is only one station in the entire country operating on a particular channel it is difficult to understand why its power should be limited.

We discuss this subject because it definitely affects the listener and the quality of broadcast service which he receives. It is high power that makes it possible for small towns and rural listeners to hear good programs unmarred by static and other local interference. It is high power that makes it possible for a single broadcasting station to give consistently good service to millions of listeners, instead of thousands. We believe that the advance of broadcasting is predicated largely on the use of higher power, by broadcasting stations, so that they can serve a continuously increasing number of listeners.

Stations Alphabetically Liste

Do you use the logs? Then don't forget to fill in the questionnaire on page 97 which puts their continuance to a vote.—EDITOR

What About Logs?

FOR years RADIO DIGEST has published station listings under various arrangements for handy reference. As these listings have become fairly stable, and the list of one month is practically the same as the list of the next month the question arises as to whether the readers of RADIO DIGE would not prefer only intermittent publicati of the lists, thus allowing for more space to be voted to features and personalities of the a Let's put it to a vote.

	Monthly	*Alternate*	*Drop*
Alphabetical List. Call letters in alphabetical order with power, kilocycles and wave.	☐	☐	☐
Official Wave Lengths. Frequency and wave in numerical order with city or town..	☐	☐	☐
State and City Index. Alphabetical order by state and city.....	☐	☐	☐
Chain Calendar Features. Day by day log of chain features. (Owing to the fact that this material must be prepared six weeks in advance, and changes are taking place daily it is impossible to keep the listing accurate.) Such as it is do you want it?	☐	☐	☐

Check in the square as to what you would like RADIO DIGEST *to do about the logs. Cut out this notice and send it to the Editor of* RADIO DIGEST, *420 Lexington Ave., New York, N. Y.*

She Burns Green

(*Continued from page 18*)

up and come to Nevada to see if I
find me a marsh of this stuff.
ON: Did ye find any?
I saw plenty . . . but none that
dy else hadn't located first. I
ising in price, too, and the market
ettin' bigger an' bigger . . . but as
'd jest missed out.
ON: Well, that's a queer thing.
stuff with a name like borax.
it good for?
It's got so many uses, I
know hardly where to be-
hey use it in makin' drugs,
ina, an' glassware. An'
jest beginnin' to discover
ful around a house too. It
omen folks get their clothes
hes cleaned an' shinier. It
water soft. It helps starch
It drives away bugs . . .
o . . . 'pears like it keeps
hing it touches sweet an'

ON: Ain't nothin' invented
many uses as that. Sounds
t another o' them sucker's
o me.
: No, you're wrong there.
ON: What's it look like?
: I got a little package of it
my saddle bag. I'll show
ou. And this other is what
s like when they find it.
mes like this, in crystals
sometimes like this . . .
balls they call 'em.
ON: Hm . . . why, that
jest like salt crystals an'
rock you see lyin' round

: Well, the feller that sees
f this stuff layin' around
as got a fortune waitin' for
I'm keepin' an eye peeled
all the time . . . though
on it ain't in the cards for
find any.
ON: Hm-mm. How can
ll when it's the real thing,
r?
: There's one test that
fails. See this little box?
inside are some chemicals.
nix 'em together and pour
er a piece of the stuff you've
d. If it burns green it's borax.
ON: Hm-m-m.
IE: Speaking of burning . . . the
has almost boiled away while you
ve been talking.
ON: I dunno's I want any coffee,
y, Rosie. You and the stranger
ivide it.
IE: No coffee? Why Aaron . . .
you feel good.
ON: No, no. . . . I've got some-
on my mind, Rosie. Leave me
alone, like a good girl. (*Back to the old Ranger and the bride.*)

"WELL, very next day, the minute the stranger had left in the mornin', Aaron Winters unfolded his plan to Rosie. He'd been lyin' awake all night . . . too excited to sleep . . . but afraid even to whisper the news of his hopes to his wife. He knew Death Valley by heart, an' he'd seen heaps of stuff lyin' around in

John White, who acts as the "lonesome cowboy" singer.

it that looked jest like the stuff that that tramp prospector had showed him from Nevada. In exchange for the hospitality of the Winters the stranger left them some of the precious chemicals. Then Aaron and Rosie went prospectin'. They pitched camp on Furnace Creek . . . this strange couple . . . the grizzled old prospector and his frail pretty Spanish wife. And then Aaron started off with his burro to a nearby marsh. Rosie waited for him, and jest shortly before sunset she seen him returning. He 'peared all excited."

ROSIE: (*Calls*) Hoo-oo—Hoo'oo. (*Faint answering call from Aaron.*)

ROSIE: Oh, I wonder . . . I wonder.

AARON: (*Calls*) Hello there, Rosie? You all right?

ROSIE: Yes. You . . . you got it, Aaron?

AARON: (*Coming closer*) You bet. Loaded as much as I could on the burro.

ROSIE: Oh . . . Aaron!

AARON: I found a heap of the stuff layin' around. But I dunno if it's worth anythin'. I been trampin' over it for years.

ROSIE: Let me see it.

AARON: Look, Rosie. Did you ever see a cotton ball as big as that before? Makes them Teels Marsh cotton balls the stranger showed us look like pinheads.

ROSIE: Did you stake, Aaron?

AARON: Not yet. We got to burn it first before we know for sure it's borax.

ROSIE: The chemicals . . . quick.

AARON: Not yet, Rosie. It ain't dark enough. We can't make the test till the sun goes down.

ROSIE: Oh, will it never sink?

AARON: Don't get your hopes up too high, honey. We been disappointed before now, you know.

ROSIE: Yes . . . perhaps it would be better for us if the sun never sank this evening . . . but hung, just as it is now low over the mountains.

AARON: Rosie, you talk like you was in a dream. You got a faraway look in your eyes, too.

ROSIE: I was wondering how a place that has been so dreadful to man and is so full of terrors can be so beautiful, too. See . . . all those colors of gold, from the palest to ruddy copper . . . and yet it is not like metal. Over there, it is like opal, like pearl . . . and there again like a creamy velvet. Living light . . . The valley floor . . . it is jade and turquoise and rose quartz. Those tremendous mountains . . . see how the old sun is wrapping them now in robes of purple and crimson to hide their terrors. This whole great valley is a lie. It smiles and puts on a beautiful dress to deceive . . . underneath is just a skeleton.

AARON: But tonight, Rosie, Death Valley is going to come to life for us.

ROSIE: (*Suddenly*) Look, Aaron . . . the sun's dropped behind the mountains. It's dark.

AARON: Sure enough . . . black as pitch, all of a sudden. Jest like those durn

mountains! They steal a march on you every time.

ROSIE: Aaron . . . where are the chemicals!

AARON: Right here. Now sit tight and keep quiet . . . . What did I do with that tin saucer?

ROSIE: Here it is.

AARON: Hold it steady, then, while I put the cotton ball on it.

ROSIE: I have it.

AARON: Now for the chemicals . . . Don't let your hand tremble, Rosie. I don't want to spill any of this solution.

ROSIE: It is *your* hand that trembles, Aaron.

AARON: I'm afraid of losin' it, that's all. Now, jest hold her tight . . . and I'll pour the second solution over her. Here goes.

ROSIE: Now light it, Aaron.

AARON: You light it, Rosie.

ROSIE: No, this is your discovery, Aaron. Set the flame to it with your own hand.

AARON: Well . . . here she goes, then. (*Sound of striking match.*)

AARON: Wait a minute. That match went out.

ROSIE: Oh . . . a bad omen.

AARON: Nonsense . . . just a puff of wind. Better luck this time. Now. (*Strikes another match.*)

ROSIE: (*Catching her breath*) Ah-h . . .

AARON: (*In a low voice*) The flame's taking hold now.

ROSIE: (*In a whisper*) Look!

AARON: (*With a great shout*) Hey! She burns green! She burns green! Rosie! By heaven, it's borax! . . . Rosie . . . we're rich.

ROSIE: We've made a strike at last, Aaron.

AARON: Borax in Death Valley! Acres and acres of it! Death Valley's going to yield its treasures at last. Oh, Rosie . . . thank God we stayed.

(*Back to the Ranger*)

RANGER: And so it was, ma'am, that Aaron an' Rosie Winters discovered borax in Death Valley . . . them same magic crystals you got in that package there on your kitchen shelf today.

BRIDE: Oh, what a story! But I want to hear the end. Did Rosie finally get the home of her dreams?

RANGER: Yes . . . the news about Aaron's discovery spread like wild fire, and he soon sold his claim for $20,000.

BRIDE: So they left the old shack by Death Valley?

RANGER: Yes, they moved up to Pahrump Oasis in Nevada, where they bought a ranch an' settled down to enjoy their riches. . . . An' one of the riches an' comforts Rosie enjoyed most was borax itself.

(*Signature—the bugle call as at the beginning. Repeated fainter and fainter until it finally dies away in the distance altogether.*)

Closing announcement:

Fifty years have passed since that memorable night when Aaron and Rosie Winters discovered Borax in Death Valley.

Near the spot where they pitched their little camp, there is today a fine hotel. . . . Furnace Creek Inn . . . probably one of the most uniquely situated hotels in the world. Here, in the midst of the desert, you now find all the comforts and luxuries of civilization . . . swimming pools, tennis courts, automobiles and saddle horses. Yet the romantic atmosphere of the early days still remains . . . Travelers recapture thrills. And the magnificent and unique scenery continues to cast its spell on all who venture that way.

Death Valley in October becomes a dreamy sunny climate, the home of Indian Summer, and until the middle of May the weather remains ideal for outdoor life. Furnace Creek Inn opens the 1st of November . . . for the winter season.

"From A Toy To The Nation's Joy"

(*Continued from page 56*)

let on how to be beautiful. That is how the broadcast sponsor tests the size of his audience. If he gets 50,000 requests he feels satisfied that more than 100,000 were in tune because a small percentage take the trouble to write.

But how many wrote to his Majesty King George V after his voice entered a golden microphone in London, at the opening of the Naval Arms Conference, for rebroadcast in all parts of the world early one morning last January? That was the first big broadcast in 1930, in fact, the most extensive ever attempted. It was estimated that 100,000,000 were within range of the monarch's plea for peace on earth. The press throughout the world heralded the broadcast as a scientific achievement while millions of listeners boasted that a king had entered their living rooms by Radio. That was on January 20, 1930. Had his Majesty offered all listeners some sort of a souvenir he would probably have a staff at work yet filing the requests.

THERE has been a change in programs since 1930 dawned. Full hour and half-hour presentations were the vogue. But as the year progressed, the fifteen-minute sketch, notably *Amos 'n' Andy*, *Uncle Abe and David*, and several others have won national popularity. Today there are more sketches on the air and fewer one-hour presentations, while numerous half-hour broadcasts have been cut to fifteen minutes. When business prosperity returns it is doubtful if the former popularity of the one-hour program will return, because then there will be a greater demand for time on the air. Shorter broadcasts will be encoura[ged] an effort to accommodate all who [wish] to sponsor Radio. Of course, this [does] not mean that there will be no ful[l] programs. Some of the larger orch[estras] and symphonies require an hour [to] justice to their musical presentation[s].

IN YEARS past ther[e] been much talk relative to mechanica[l] sic broadcasts, but the majority of l[ocal] power stations fought shy of the re[cords]. However, in 1930, new electrical tran[scription] tion devices were introduced impr[oving] the quality of the presentations. [This] encouraged many of the smaller st[ations] and a number of the more powerf[ul] test the possibilities of the records [and] also the reaction of the public. A [new] field seems to be developing in this [line] of mechanical music, and, no doubt [soon] the studio manager of a prominent [New] York station called "purely an ex[peri]ment" will be further tested in 1931. [So] far the public has registered no com[plaint] against electrical transcription. The [coming] year is likely to reveal much in thi[s] rection and if the entertainment is v[ariety] tuning in, progress will be made.

Announcer Ted Husing of WA[BC] staff, since the first of 1930, has m[ade] more than fifty-three excursions, [trav]eling more than 22,000 miles to c[over] Radio events, a list of which revea[ls] diversity found at the dial. The b[road]casts included a football game on [the] Pacific coast, the Beaux Arts Ba[ll] New York, basketball games, an airp[lane] broadcast with two-way conversation [from] land to plane, the funeral of the late P[res]ident William Howard Taft, arrival [of] the S.S. Europa after a record-ma[king] run across the Atlantic, a parade at A[lex]andria, Va., boxing bouts, a Congressi[onal] spelling bee, an intercollegiate track [meet] at Philadelphia, the Kentucky Derby, [the] convention in Bermuda, the Shriners' [con]vention in Canada, return of the [Byrd] Antarctic Expedition, intercollegiate [de]gattas, a marble championship con[test] the Open Golf Tournament of the Un[ited] States, arrival of transatlantic fl[iers] championship tennis matches, inte[rna]tional polo games. America's Cup R[ace] between the *Enterprise* and the *Shamr[ock]*, the World's Series and headliners of [the] gridiron.

And intermingled with all those ev[ents] were the world's most talented sing[ers], music of famous bands and orchest[ras], speeches by men and women promin[ent] in public life here and abroad. Rebr[oad]casts by noted men and women actua[lly] a microphone in London have been he[ard] regularly and clearly in America f[rom] coast-to-coast.

The year 1930 is noted for its achi[eve]ments in Radio. A survey of the p[ro]grams reveal the value of the investm[ent] made in a Radio set. It pays a ha[n]some dividend in the form of educat[ion] and entertainment for the entire fam[ily] from early morning until late at ni[ght].

Happy New Year

(*Continued from page 24*)

old Sanford, for years Herbert's friend and now considered the foremost Herbert conductor, fol- suit with his new year anticipations. "I lieve," said he, "that some great r will again come to the fore with coast-to-coast network and pre- full hour's program weekly, featur- dio versions of Herbert's operettas, perhaps including those of Lehar and

lovable and homely NBC Pickard have pretty well defined ideas re- g their New Year's resolutions. er resolves to make as many peo- ppy as possible; Ruth, to strive for success; "Bubb", to "work nd trust the Lord"; little Anne, to hard in school and Radio, and o live better, work harder and make people enjoy life.

the resolution Nat Brusiloff, clown- irector of the NBC Nestle Choco- s makes, he will probably have n before you reach this sentence. going to be more serious," Nat re- l. "What I'd like to see is better onization of affiliated stations on rk programs," the wag added. "Last I had reports that the station in a finished my concluding number easures behind New Orleans and a ehind Cuba."

nk Luther, tenor of Lucky Strike, and Sanborn, Happy Wonder rs—and others—claims he is going to st twice as nice to everyone this by way of repaying some of the esses shown him by Frank Black, Haenschen and Nat Shilkret, di- rs of programs for which he sings. , incidentally, hopes during 1931 roduce, and will produce he vows, r arrangements and orchestrations ever before.

e Sims, of CBS and pioneer fame e "ivories", hopes this year to see erfection of a type of program he been working on for many months—a ram wherein the music presents such rfect picture, or story, that the words he announcer will be superfluous. *ey generally are.—Editor's Note.*) and Ilomay Bailey, his partner in and at the mike, will thus hold the ue title of "Painters of Musical Por- s".

aul Whiteman, aside from resolving to his present "youthful figure", looks ard to one other thing this year. t is a successor to the "Rhapsody in e" which "is as good," to use his own s. As for Ben Bernie, one of the ld's most masterful masters of cere- ies—and band leader. Ben turns over w leaf and claims he will no longer any old gags, "that is," he explained, y that they won't laugh at any more. in 1931," Bernie added. "I hope they like it as well as they've been liking it."

Phil Spitalny, who deserted New York last year to crash into instant popularity in Chicago, hopes 1931 will bring many new and long-lived songs for his Edgewater Beach Hotel orchestra to play. "I resolve," he said, "to continue gratefully to give my listeners exactly what they want, so tell them to be sure to ask me for it."

Muriel Pollock, NBC composer-pianist who also commits herself to toil, said, "My resolve is to adapt for two-piano interpretation several of the longer compositions which I have written for orchestra. Among them are *Spanish Shawl* and *Shadows on the Teche.*"

Muriel Wilson, soprano of the Maxwell, Davey and light opera productions, said she plans this year to please and entertain, rather than simply elevate or improve the repertoire of her audience.

Lew White, of the mighty NBC organ console, already has his pet numbers selected for this year. "I'll give my audience programs of a unique nature including such numbers as Ravel's *Bolero* and the Cuban melody *El Manisero* (the Peasant Vendor). The modernistic note, expressed in new and unusual arrangements, will be an interesting aspect of musical programs for the year."

Steele Jamison, concert and operatic tenor, on the other hand, will specialize on grand opera arias and stress the dramatic spirit of those. "I hope 1931 sees a renaissance of grand opera on the air," Jamison added.

Judge Whipple of *Real Folks* and Cap'n Jimmy Norton of *Harbor Lights*—in other words, Edwin Whitney—resolves to lose no more hair during 1931, a resolution which will surely be broken. The famous Radio character actor and NBC production man hopes to present more "true characters" that will cause fans to say, "Isn't that just like so-and-so?" To play characters that are unconsciously humorous or pathetic, according to the situation, is also Whitney's wish for 1931. "My interest in program development is to see more dramas based upon historical facts, as *Death Valley Days*, or upon accurate local color, as *Real Folks.*"

* * *

And that's that. Many excellent resolutions, hopes and plans are to be carried out by our favorites for the loud speaker this new year. So I think I'll make a resolution too. It has been many a year since I sat down and wrote letters to my friends of the air and suggested ideas to them, applauded their work, or offered friendly criticism. I'm afraid I've grown to expect all and give nothing. That's my resolve for '31—to "take my pen in hand" more frequently. How about you too?

Guy Lombardo Battles A Gunman

(*Continued from page 11*)

"Well, to get back to the subject. As usual, hilarity reigned in the place. It was nearly 2 A.M. The headwaiter came to me and said a man insisted on talking with me. I went to the phone. The voice at the other end was full of sobs.

"'Mr. Lombardo, will you please play and sing *My Buddy!*' he asked. 'I am at the Soldiers' Hospital with my buddy of the other side. He is dying. There is a Radio in his room. We want you to play it so we can sing it with you.'

"We stopped playing almost in the middle of a number. I announced to the folks present and to the Radio listeners that the request for *My Buddy* had been made, and told them the circumstances surrounding the request. The tenor of the place changed from one of hilarity to one of profound silence.

"Never before or since have I heard the song played as we played it. 'Carm' outdid himself in the singing of the chorus. The patrons of the cafe were silent and reverent. There was nothing we could do but sign off after that song had been played. We couldn't possibly think of 'getting hot' again that night.

"We were packing our instruments when the headwaiter came over again. 'Captain ——— is at the door and wants to see you.'

"I asked that he be shown in. As fine a specimen of American manhood as I have ever seen came into the room. He was crying like a baby.

"'I don't know how I can ever thank you, Mr. Lombardo,' he began, 'I guess you thought the request was just a joke. Well it wasn't. This boy had saved my life in France and we had been constant companions since. He was all shot up and had been fighting death ever since just before the armistice.'

"'The doctor had told him he couldn't survive the night. And he didn't. He tried to sing *My Buddy*, as you played it, lying in my arms. That's how he died, just as you ended the song.'

"For more than a year the thought of that sad thrill was ever present in my mind. And it is one of the reasons why I will never refuse a request. Captain ——— and I still correspond."

And there are the outstanding thrills in the career of Guy Lombardo.

Kisses Hot and Kisses Cold

(*Continued from page 49*)

mother's kiss has come down to us from the dawn of time, but the first kiss of the Bible record is that of Affection and was given to Isaac by Esau. The others are: The Kiss of Adoration, Love, Brotherhood, Friendship, Salutation, Homage and Obedience, Lowliness and Solicitude, Subjection, Reconciliation, Treachery, Farewell, and Death.

Among the ancient Hebrews, kissing the beard was a sign of great homage. In the pagan world, those who failed to throw kisses to the statues of the gods on their feast-days, or to the sun and moon, were considered unbelievers. The rites prescribed the kissing of some part of the statues themselves. Among the Mohammedans, when the muezzin calls the devout to prayer, they kiss the ground that lies in the direction of Mecca, and the pilgrims to the Kaaba, or Mohammedan shrine at Mecca, all kiss the sacred black stone which they believe was brought from heaven.

Under Diocletian, the correct form of salutation, showing subjection to an emperor, was to kiss the feet of the sovereign, a practise that ultimately led to the kissing of the ground over which the august Cæsars had passed. Then the sturdy Roman fathers, "the best of men," were so bashful that, when in their own homes, they continued their postnuptial wooing, they never kissed their wives in the presence of their daughters, fearing perhaps, that example might shatter precept, and that the ingenious maidens might overcome maternal objection by inculcating such a principle as was established in later times.

In Roman families, kissing before marriage was not customary, nor is it so in the polite society of France today. In Rome, only the closest relatives were permitted to salute their kindred of the gentler sex on the mouth, and when a lover kissed his betrothed, she became heir to half of his worldly goods if he died before the marriage ceremony, and in the event of her death, her heritage descended to her next of kin—a custom, which, if it prevailed now, would put effective check on actions for breaches of promise.

In feudal times the kiss was an important feature of knighthood. When the oath of investiture was administered to an apprentice, after he had kept his vigil, he took his sword by the blade and kissing the hilt at its guard, which in those days was emblematic of the Cross, solemnly pronounced the words, "By my good sword I swear it." Later, at tournaments, balm for the wounds of the victors was found in kissing the hand of the Queen of Love and Beauty who presided.

In the days of the Pilgrim Fathers, kissing was the special privilege of husband and wife, brother and sister, lover and betrothed. Etiquette was better regulated in Colonial times. Then a lady reserved the privilege of kissing her hand for her most intimate friends, and the young girl gave her hand to a friend, her cheek to a relative, but kept her lips for [illegible] trothed.

A country damsel, describing he[r] kiss, said that she never knew h[ow] happened, but the last thing she r[e]bered was a sensation of fighting f[or] breath in a hot-house full of lilac violets, with the ventilation chok[ed] blush-roses and tulips.

"'Come, kiss me,' said Robin. I
said 'No.
For my mother forbade me to play
men so.'
Ashamed of my answer, he glided
Though my looks very plainly a[s]
him to stay.
Silly swain, not at all recollecting, n[o]
That *his* mother ne'er said that he
not kiss me."

The dangers of kissing, as an a[gent] means of infection, have received c[on]erable attention. Dr. A. E. Brid[ge] leading physician, has expressed the [o]ion that "in the act of kissing w[e] counter only beneficent organisms. [The] advantages of kissing outweigh it[s] finitesimal risk, for it provides us [with] microbes useful for digestion." We congratulate Dr. Bridger on havi[ng] remedy for dyspepsia, which has a[lso] rate the merit of acting agreeably. [If] teaching can hardly fail to make k[is]s even more popular than it is. It probably be found that the "bene[ficial] organisms" required flourish in gr[eat] abundance on the lips of the young[er] comely, and in carrying out the t[reat]ment sufferers will doubtless be eag[er] abjure the heresy of homeopathy kissing only persons of the opposite

Vote For Your Favorite Station in Radio Digest Popularity Contest.

See page 5 for Story . . . Here are Rules and Conditions

1. The contest started with the issue of RADIO DIGEST for October, 1930, and ends at midnight, April 20, 1931. All mail enclosing ballots must bear the postmark on or before midnight, April 20, 1931.

2. Balloting by means of coupons appearing in each monthly issue of RADIO DIGEST and by special ballots issued only when requested at the time of receipt of paid in advance mail subscriptions to RADIO DIGEST when received direct and not through subscription agencies according to the schedule given in paragraph four.

3. When sent singly each coupon clipped from the regular monthly issue of RADIO DIGEST counts for one vote. BONUS votes given in accordance with the following schedule:

For each two consecutively numbered coupons sent in at one time a bonus of five votes will be allowed.

For each three consecutively numbered coupons, a bonus of fifteen votes will be allowed.

For each four consecutively numbered coupons, a bonus of twenty-five votes will be allowed.

For each five consecutively numbered coupons, a bonus of thirty-five votes will be allowed.

For each six consecutively numbered coupons, a bonus of fifty votes will be allowed.

For each seven consecutively numbered coupons, a bonus of seventy-five votes will be allowed.

4. Special ballots will be issued only when requested at the time of receipt of paid in advance mail subscriptions, old or new, to the RADIO DIGEST when received direct and not through subscription agencies according to the following voting schedule:

1-year paid in advance mail subscription direct.	$3.00	150 votes
2-year; two 1-year paid in advance mail subscriptions direct.....	6.00	325 votes
3-year; three 1-year; one 1 and one 2-year paid in advance mail subscriptions direct.	9.00	500 votes
4-year; four 1-year; two 2-year; one 3-year and one 1-year; paid in advance mail subscriptions direct.	12.00	750 votes
5-year; five 1-year; one 2-year, and one 3-year; two 2-year and one 1-year; one 4-year and one 1-year; paid in advance mail subscriptions direct	15.00	1,000 votes
10-year; ten 1-year; five 2-year; three 3-year and one 1-year; two 4-year and one 2 or two 1-year; two 5-year paid in advance mail subscriptions direct.	$30.00	2,500 votes

5. For the purposes of the contest the United States has been divided into 48 districts, comprised of the 48 states of the Union.

6. The station located within the borders of each State receiving the highest number of votes cast by individuals residing within the same State will be declared the Champion Station of that State, and will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the second largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the third largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

The station located within the borders of each State which receives the fourth largest number of votes cast by individuals residing within that State will be awarded a medal and scroll inscribed to that effect.

7. In the event of a tie for any of the prizes offered, prizes of identical value will be given to each tying contestant.

8. Any question that may arise during the contest will be decided by the Contest Editor, and his decision will be final.

Classical Music Simplified

(*Continued from page 74*)

) which he has invented and pro- o use. These he distributes among truments of the orchestra, and then ps in various ways so as to build of them a large organized pattern nd, comparable, as I have said be- o the intricate yet intelligible pat- f an oriental rug. In this first ent the composer of a symphony his learning and fancy to build up rn in the most scientific way pos- The secret of listening to such is to get in one's mind the leading and then follow them throughout areful attention. The first move- of a symphony always constitutes ected and completed pattern.

nd Movement: This (see again t said last month on this) is usually at a slow speed and is rather in the of an extended song. The com- writes the most beautiful tune he ink of and then subjects this to ion in one way and another, so as oduce the deepest effect upon his s' feelings. The Second movement ally the sentimental part of a sym-

rd Movement: This is usually called Scherzo", which is another of those n words, and means "joke". It is olly part of the symphony, usually n in fast waltz time and often re- ng one of a very elaborate and licated dance.

ale or Fourth Movement: This is ly a sort of triumphal song and n combined. The working out of reat pattern is here brought to its nted end. Often modern composers luce into their Finales tunes from ther movements and thus, as it were, up the whole structure into one great tectural pattern.

re is another comparison to keep in . Music is architecture which flows. itecture might be called frozen music. ch the design, the pattern, the sub- ation of part to part, are essential. c is design, just as architecture is n, but the one moves and the other s still. The next time you think of ce of music, think of its design, and you hear it, follow the design in mind. That will help very much.

me: The rhythm of a piece of music at part of its design which must first ought out. In music we use mainly kinds of rhythm, the square and the gular. The first may easily be de- ed by saying that it is the same as rhythm or time of a military march 1 . . 2 . . 3 . . 4, again and again. other is equally well to be described aying that it is rhythm or time of a z . . 1 . . 2 . . 3, again and again. rhythms used in music are based on e two.

Key: Put your finger on the key C anywhere on the piano keyboard. C is the white key that stands just before two black keys. Sound it, and then the next to your right. Then go on sounding the succeeding white keys till you have sounded eight of them. Then you have played a "scale". Moreover, you have played it in the "key" of C major.

Start from F on the keyboard (the white key just before three black keys) and sound succeeding white keys to the right till you have reached the next F in the same way as you did in the case of the C scale. You will find that in order to make it sound right you must play the black key which is the third in that first group of three. Do this and you will have played a scale in the key of F major.

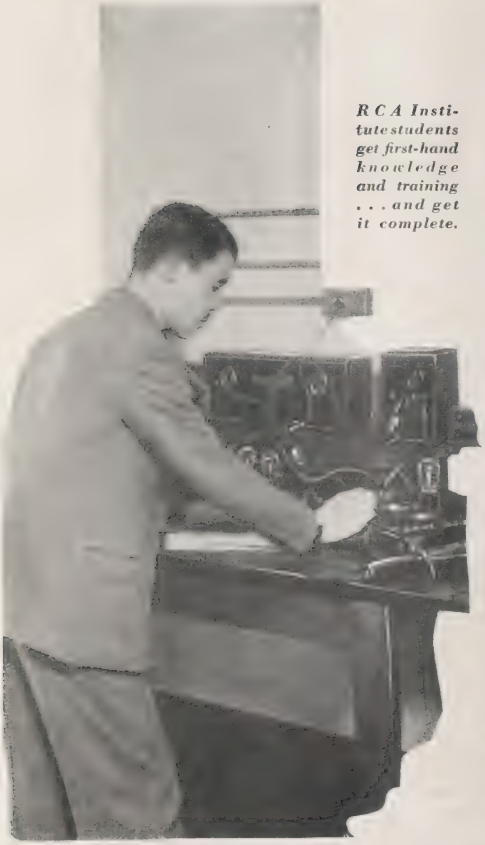
Start from A on the key board (white key two to the right of F). Play a scale on the white keys. You will get the scale of A minor. Notice that it sounds quite different from the major scales.

Every piece of music begins in some one of the twenty-four "scales" which may be had from choosing as a starting point any one of the twelve white and black keys in each octave of the key board, and then running the rest of the scale to sound major or minor. Beginning in whatever key is thus chosen, the music may vary from it into other scales every so often, but always it ends by getting back into the original key. Otherwise it would seem to have no end but to have been left "up in the air". This matter of "key" is the base of all musical structure, being that which gives to music its foundation of form.

I Have Heard

Toscanini's conducting of the New York Philharmonic-Symphony Orchestra on November 16th from New York (Columbia Network-WABC beginning at 3 PM eastern standard time) was a big, a very big, event. For one thing, the masterful Italian has an astonishing reputation. New York goes crazy over him. He is talked about as if he were the only man who could ever direct an orchestra as it should be directed. I candidly say that from these excessive eulogies I dissent. I find Mr. Toscanini altogether too much of a musical drill sergeant and I dislike his stiff brass-band-like playing. To say this just at the present time is to lay oneself out to be denounced as an incompetent ass; but that is how I feel about it all the same.

Anyhow, it was interesting to hear Toscanini directing a program of very classical music. He began with three chorales by Bach, orchestrated by a modern Italian, Respighi (I do not like Respighi's Italian ways of doing this sort of thing). He went on to Beethoven's first symphony and ended by the first symphony of Brahms. This was certainly a most classical program, as if to refute the complaints of persons like myself who say that they do not like classical music au Toscanini. Beethoven's first symphony is of course a youthful work. A young man wrote it, still inclined to lean on his predecessors, still not quite ready to do his own flying, solo. It is charming and it has (in the Scherzo especially) some suggestions of the giant power soon to burst forth in the third symphony; but in general it is definitely old-fashioned. Brahms' first symphony was held back by its composer for twenty years while he improved, refined and polished it. He was over forty in 1870 when it was first produced. It is a magnificent work, in most ways the greatest piece of symphonic work done since Beethoven's Ninth, which by the way was heard Wednesday morning, November 12th, from the Columbia studios in New York. I hope that many of you heard it.



But, do you know, I hope that the practice which has been started lately, of having some competent person talk to the Radio audience before and after the performance of a symphonic work, will be carried out more and more. Olin Downes, the very distinguished New York critic, did this for the first Toscanini concert. This is splendid. I should like to see it done universally. Schelling does his own talking at the children's concerts, but then he has the art brought to a pitch of perfection not reached by any rival. We need much, very much, more explanation at these affairs.

About Wagner

Speaking of Ernest Schelling once more, I hope that many of you heard his November 15th children's concert. It was entirely devoted to excerpts from Wagner's music dramas. The gifted conductor told his audience as much as they needed to know of the story of each opera and illustrated the music in his own inimitable manner. It may sound strange in most persons' ears, but the truth is that no music written is so easy to understand as Wagner's. The moment you know the story which the music is illustrating, the whole vast pattern falls into place, and the music becomes as clear as crystal. Wagner was one of the great pattern-makers of music. His scores are all melody; which perhaps is why some careless listeners have said that they cannot hear the tunes. That is doubtless because there are so many of them. It is the old story of the wood and the trees. We'll talk about Wagner some time in this department. No more fascinating personality, whether as man or as musician, ever lived in this world of ours.

WHY NOT GRASP SUCCESS

Study radio in your spare time at home

RCA Institute students get first-hand knowledge and training . . . and get it complete.

ARE you satisfied with the position you now hold? Do you that you're worth more money? Are you pleased with self, your work, your associates . . . and your future? What next year hold for you . . . and the year after that?

Are you content to merely plod along through the best yea your life . . . or do you want to get into far pleasanter wor meet more interesting people . . . and hold a well paid posi

The ambitious man ties his future to an industry that's dev ing rapidly . . . that's going *up and up!* Your life lies before . . . will it be a losing game or a profitable adventure? . . . you GROW with a GROWING BUSINESS or will you w your life and opportunities in an industry that is already f ing a losing battle?

If you are looking for a REAL opportunity . . . if you wa make the most of your life . . . to grasp the success that sh be yours, *then we say to you, "Study Radio."*

Everyone knows that Radio is the fastest growing indust the world today . . . countless opportunities are waiting for who have the training and ability to grasp them. Where you heard of any business that has developed as fast as Radio needs *trained* men and needs them NOW! *Think o future Radio offers you!*

You can easily obtain the training you need under the direc of RCA Institutes, a division of Radio Corporation of Ame which thoroughly trains men in every branch of radio and assists them in obtaining employment. You learn radio by ac experience on the very latest types of radio equipment. study under the direction of nationally known experts. You learn all about radio servicing and selling, ship operating, s station operating, radio telephony and telegraphy, and airp radio equipment . . . also instruction in sound motion pic installation, maintenance and repair!

Study at Home in Your Spare Time

The RCA Institutes complete Home Laboratory Train Course gives you all you need to know about radio. The les are of absorbing interest . . . easy to learn. You rapidly progr step by step . . . and you receive absolutely free the complete Institutes Laboratory Equipment, a modern outlay of appar furnished to every student . . . enabling you to easily solve r problems. This is the way for you to acquire, in your spare ti the commercial knowledge and ability that command good

Home Training Course By America's oldest and foremost Radio training organization

This home training course and free laboratory equipment backed by more than 20 years' experience. A signed agreem by RCA Institutes assures you of absolute satisfaction . furthermore, if after taking this course you are not satis in every way, your money will promptly be returned to yo

Read this free book

Everything you want to know about Radio . . . Describes in de the home training that has placed thousands of men in g paying positions. Forty fascinating pages of pictures and t all about radio.

RCA INSTITUTES, Inc.
Dept. DR-1
75 Varick St., New York, N. Y.

Gentlemen: Please send me your big FREE 40-page book which tells about the many opportunities in Radio and about your famous laboratory method of radio instruction at home.

Mail this coupon NOW . . . start on the road to success in radio TODAY!

READ HOW YOU CAN DO IT

Study radio in the finest equipped schools in America

You get commercial training that prepares you for success in radio.

In order to make it easy for you to study radio, RCA Institutes has opened six completely equipped schools throughout the country . . . at New York, Chicago, Boston, Baltimore, Philadelphia and Newark, N. J. Each of these six schools has the very last word in radio equipment. They all offer exactly the same training in day or evening classes . . . you study under the personal direction of RCA experts. In this way you learn at the very heart of radio itself, because you study under the direction of RCA . . . the great corporation that sets the standards for the entire radio industry. The very progress of radio is measured by the achievements of the famous engineers in the great research laboratories of the Radio Corporation of America.

Only training course sponsored by Radio Corporation of America

Graduates of these schools are thoroughly posted in all the very latest developments, the newest inventions and greatest discoveries in radio, because they study in the finest equipped schools in America.

That's what RCA Institutes does for you . . . that's the kind of training you want . . . the practical, thorough knowledge that you need for success in radio.

Opportunities for Trained *Men*

Graduates frequently obtain positions shortly after graduation. Every graduate receives the thorough training that gives him the knowledge and the confidence to hold a good paying position.

Come in today . . . See for yourself!

Step into the nearest school and then you will know why it is that thousands of men have acquired the training that has enabled them to occupy well paid positions in radio. Meet the instructors, talk to the students, examine the equipment . . . convince yourself . . . See what radio can offer you, and what RCA Institutes can DO for you. We will be glad to meet you . . . glad to explain everything . . . to show you everything . . . without the slightest obligation on your part! Come in today and get a copy of our free book, or send for it by mail. See what our course has done for others and what it can do for you!

BOARD OF MANAGERS OF RCA INSTITUTES, Inc.

The names of these men are known throughout the world as the greatest names in radio. Their experience will guide you in your training

Beauty and the Job

(*Continued from page 77*)

the dress and one dollar for beauty. Well, anyway, we started out, and to make a long story short, Elizabeth got everything she had planned to get and she began the following Monday morning on the career which has made her one of the highest salaried and best known stylists in the advertising business.

The improvement in Elizabeth's appearance not only helped her to get a position, but it changed her whole mental attitude. She became more alert, more efficient, more self-confident. And these qualities were reflected in her work. After all, there is a decided mental reaction which comes from the assurance that one looks attractive. Elizabeth was never a pretty girl. But, of course, looks are not a matter of regular features. They are a matter of attractiveness—and any girl can be attractive.

In this present period of unemployment, appearance is more than ever important.

On November fourteenth the newspapers quoted Miss Gilbreth, noted consulting engineer and member of the President's Emergency Committee for Employment, as saying: "The beauty parlor treatments are a splendid thing, not to be smiled at, for women looking for work should feel as physically, emotionally, mentally, and sartorially adequate as possible."

It doesn't make any difference how intelligent a girl may be. She is not using her intelligence if she does not realize that an attractive appearance will help her get a job and will be of inestimable benefit in keeping that job.

All of these things went through my mind as I sat talking to this girl who had come to my office with a letter of recommendation from my friend in Pittsburgh. And yet I found it difficult to persuade myself to say any of these things to her. A young girl starting out to look for her first position is usually embarrassingly sure of herself. While I was debating the advisability of being frank with this girl, my 'phone rang. It was the beauty editor of one of the national magazines.

"I wish you'd have lunch with me today," she said. "I'm awfully upset. I just had to fire my secretary and I certainly did hate to add to the army of the unemployed, too."

"Then why did you do it?" I asked her.

"Well, I simply couldn't put up with her any longer," she answered. "I've told her time and again that she was a blot on the landscape of our magazine. You know yourself how she looked. And I finally got to the point where I couldn't go on looking at her any longer. Besides, she was just as sloppy in her work as she was in her personal appearance."

That decided me. I felt that I could not allow this girl to go out again to hunt a position handicapped as she was by an unattractive appearance. And so I told her this story of Elizabeth Adams which, while it is a success story, is also a story of beauty and the job.

Free booklets on the Care of the Skin, by Frances Ingram, will be mailed to readers of RADIO DIGEST. *Send your request to Miss Ingram, in care of* RADIO DIGEST, *420 Lexington Avenue, New York.—Editor.*

The Simplitude of Dinah an' Dora

(*Continued from page 76*)

"Waal, de dramatical act which dey wuz playing had a multitude ob contraptions what done move 'long wid rapiditude, an' Dinah done give Dora sech inspired morsels ob consultation. Sez Ah, 'Dinah, let me bask in de good sound rarefied atmosphere ob yoh jedgment. How kin one git a husband in the scarcity ob dis war massacration?'

"An' she bein' so unresumin' said, 'Well Ah ain't claimin' to be no expert on macrimony jes' cause I's an actress, but Ah buhlieves dat wid persistent pursuance ob de objec' an' by runnin' jes' as fast as de fugitive, git up to him an' wid pretentious indignation, walk by wid casuality. Be sho' as yoh pass de objec' ob yoh affectation dat yoh nose air no shine an' dat yoh has dat Pola swing ob graceful simplitude.'

"Now when Ah hears dat, Miss wuz jes' about confabulated wid de smaht reasonin' back of dat a an' Ah sez, sez Ah, 'Dinah, Ah ain school teacher or preacher-mans de simplitude ob yoh remarks am sence ob yoh regeneratin' success. plitude reaches de haht-strings ob d ple folk wid more exhilaration dan ob de high-soundin' phrases whic sounds wid sech ferocity agin' de r way of hearin' words. Ah joins yoh as a exponent on de simplitu argufyin' by plain talk. Simpl my dear am what's needed mos' i continent ob political controversy, esty an' complicity.'

"Den Ah sez to Dora, 'Good-bye d an' if'n Ah wuz yoh, I'd repose a plen ob perennial repliance on de simplitu Dinah's admolitions.' "

"Yes, Abby," I gasped, "it woul well if we all showed a little more *si tude* in our speech."

"Well, as Ah wus stahtin' foh de Ah wuz reminded by de manager puts dis dramatical episode on de ai he repressed dis heah infoumation: Gol' Dust Corpulation airs Dinah Dora's affairs ebery Friday mohnin' de National Broadcasting Company, so as to extenuate de circumstance program continuations, de series broadcast ober WOR on Friday ni De identity ob de two belles am, Ah f Ann Freeman an' Artie Belle McG two resperienced theatrical professio ties. Dis heah gal, Dinah, come Nashville, Tennessee, an' dat gal, I come from Atlanta, Ga.

"Well, Missy, dat am all de refo tion Ah'se got. So wid great prid expansive proportions Ah shook de M ager's hand an' sez Ah, 'Ah hopes to de unremittin' pleasure an' privileg returnin' de compliments ob dis suspic occasion," finally concluded Abby, if yoh has any moh dramatical Missy, whut yoh wants me to criti wid aberration an' veracitude, Ah'd jes' love to do it."

Gentleman Jim Broadcasts

(*Continued from page 14*)

...ption of the fight with Sullivan ... I won the championship.

THE INTERVIEWER: And you objected?

CORBETT: Oh, no. But he insisted that ... the whole story in seven minutes ... refused to do it in so short a ... He suggested that I give just the ...hts but, man alive, there are ...h highlights connected with that ...o keep me talking for an hour or ... However, I did tell him that I ... boil it down and make it a con... story covering four seven-minute ...ls. He couldn't see it and, as his ... was set on my doing the job in ...roadcast, we agreed to disagree—... all.

THE INTERVIEWER: Well, here's hoping ...et a chance to spin that yarn on ...ir sometime. And, by the way, ...ing of Sullivan, is it true that you ...ne were never friendly after you ...ed him?

CORBETT: For several years there was ...endship lost between us. You see, ... L. had been champ so long that I ... he expected to carry on until his ... He said some pretty terrible ... about me and I'll have to admit ...ented those statements.

...emember one meeting I had with ...an very well. It was out at Jim ...es' camp in Reno a few days before ...fought Jack Johnson, in 1910. Sul... came around to watch Jeffries train ... gave orders to the gateman not to ...: John L. I was still sore about the ... Sullivan had talked. But that night ... to thinking things over and I de... that my action in refusing admit... to Sullivan was pretty small so I ... word to him that he would be wel...d at the Jeffries' camp any time he ... to come out.

... figured it out that Sullivan's pride ...taken a worse licking than the phys...one I had given him; that there really ... nothing personal in his hatred as his ...ngs would have been the same toward ...ne who took his crown away.

...ell, the next day when John L. ap...ed at the gate I was there to meet ... When I offered him my hand he ...sed to take it. But, as there were ...ral reporters about, I induced him ...ocket his pride temporarily and pose ...a picture. This he agreed to do. And ... for the benefit of the public, he ...ped my hand in what appeared to be ...friendly greeting. The picture was ...lished and the newspapers reported ... we had made peace.

... turned out to be a pretty one... peace pact, for Sullivan continued ...ay plenty of unkind things about me.

THE INTERVIEWER: Did you ever see ... again?

CORBETT: Yes. Two years before he died Sullivan came to New York to see the Willard-Moran fight. He was stopping at a little hotel in the fifties. One of the newspapers called me on the 'phone to ask if I would be willing to pose for a picture with Sullivan. I said it would be all right with me if Sullivan was agreeable. In fact, I offered to go to his hotel and pose for the pictures in his room. Five minutes later I was called to the 'phone again and told that Sullivan had consented to the arrangement and that if I would go at once to the hotel the newspaper would send a photographer right up. . . . I hadn't seen Sullivan since my fight with him but I had heard a great deal about his hatred for the man who had taken the belt from him. John L. had a sharp tongue and many of the things he had said were far from complimentary. As I made my way to his hotel I wondered what this meeting would be like.

THE INTERVIEWER: I hope this story isn't going to end in another fight!

CORBETT: Far from it. I went directly to Sullivan's room and the hand which clasped mine in greeting was that of a friend. We sat down and chatted while waiting for the photographer. It was two hours before the man arrived—two of the happiest hours of my life. Sullivan was abject in his apologies for the things he had said about me. He called himself all kinds of a fool and it was some time before I could get him to change the subject and talk about the old days. When I left he was in marvelous humor—a changed man. It was as though a load had been lifted from his shoulders.

LOUIS MANN: (*Passing the table*) Hello, Jim. (*He sees The Interviewer*) Hello, Doty. Say, I never got those cigars yet.

CORBETT: Hello, Louis. If there are any cigars going around let me in on it.

THE INTERVIEWER: This is a private quarrel, Jim. Louis was the guest artist on a La Palina Smoker which I directed a couple of years ago and at Christmas time I sent him, as usual, a card and kiddingly wrote on it, "Enclosed please find box of La Palinas."

LOUIS MANN: How about it, Jim? Don't you think I have a right to feel a little sore?

CORBETT: I should say so. Probably lead to a fight sooner or later.

LOUIS MANN: That would be nice publicity for both of us! Did you ever have a street fight, Jim?

CORBETT: Not quite. I came very close to it not many years ago. It happened during a vaudeville engagement and my wife and I were making the short jumps from one city to the next by auto. I was driving along merrily one day, when I overtook a hay-wagon which was taking up the entire road. I honked the horn but the driver paid no attention. I honked again and a voice having about the quality of the Leviathan's fog-horn told me in no uncertain terms where to go. I continued to honk and the voice continued to reply with language that grew stronger and stronger. At an intersection I slipped past and the string of oaths that were hurled at me was just too much for me to stand. I pulled over to the curb and started to climb out. My wife tried to stop me but I wouldn't be stopped.

I took a stand in the middle of the street and told my annoyer that no man could use that kind of language in front of my wife without taking a licking. The driver, up to his neck in the hay, pulled up and accommodatingly slid to the paving. If ever there was a more ridiculous situation exposed to public view then I never saw it. The man who owned the fog-horned voice and who came toward me bristling to fight couldn't have weighed over a hundred pounds. He was all voice and no body. It must have looked like a meeting between David and Goliath to the onlookers and the only thing I could do was burst out laughing. He stopped and glowered at me and when I finally got my speech back all I could say was, "Mister, you win!" I left him standing there, got into the car and drove away. That's the nearest I ever came to having a street fight.

LOUIS MANN: You should have laid him across your knee and spanked him, Jim.

THE INTERVIEWER: That gives me an idea, Louis. If you ever mention cigars to me again that's what I'll do to you. (*Louis Mann puts up both hands in pretended fear and walks away.*)

CORBETT: This is developing into an interview of interruptions. Here come Will Mahoney and Harry Hershfield.

THE INTERVIEWER: It's all right with me as long as the interrupters pull a good yarn out of you.

WILL MAHONEY: Greetings Jim. Hello, Hobart. What is this—a private conference or can anyone butt in?

CORBETT: It's supposed to be an interview, Will, but it's open to the public. If we had wanted to make it private we would have held it in the waiting-room at the Grand Central Station.

WILL MAHONEY: (*Starts away*) Oh, pardon me.

THE INTERVIEWER: Don't go away, Will. We meet all comers for one round. This is your turn. All you have to do is ask Jim a question.

HARRY HERSHFIELD: (*chiming in*) Do we hear the answer?

CORBETT: Sure. If I can answer it.

THE INTERVIEWER: No hitting below the belt, Harry. It has to be a fair ques-

Nothing to wear out, break out or corrode. Guaranteed satisfactory results under normal conditions.

Radiodyne "Groun-tenna" pulls signals in from the ground the most remarkable invention since the Aluminum Antenna. Eliminates all danger of outside aerial contact with electric power lines, lightning hazard, or damage by wind and storm. Saves it cost in a single year. Can be used with the set at will. Ideal for apartments to avoid outside aerial connections and interference.

DISTANCE brings in long distance stations with surprising ease and unusual clearness. Can be used with any type set—anywhere in the world.

SELECTIVITY Reduces interference to a minimum and assures extreme reception at ALL points of the dial.

EASILY INSTALLED Install a Radiodyne "Groun-tenna" on your own set in 5 minutes. No screwing, wires to ground and ground posts—no attic attach, present ground wire to enter post of "Groun-tenna." If your radio dealer does not yet have Radiodyne "Groun-tenna" one will supply you direct.

PRICE $6.00 POSTPAID

WESTERN COIL & ELECTRICAL CO., Dept. D, Racine, Wis.
Designers and Builders of Radio Equipment Since 1915

tion—one that can be included in the published interview.

HARRY HERSHFIELD: Who is the best prospect for the next American heavyweight champion?

CORBETT: If you mean who do I think is best I'll tell you in a hurry. Stribling.

GENERAL CHORUS: What!

CORBETT: This is what I mean. That boy has everything that a good fighter should have. Courage, speed, timing, a wallop—everything. But, and again I say, *but*—he has something else that he doesn't know he has.

HARRY HERSHFIELD: I'll bite. What is it?

CORBETT: The ability to take it. He's overly cautious because he's afraid to let his right hand go, fearing that the other fellow might let his right go at the same time. In other words, he is afraid to gamble his right against his opponent's.

Say, the first time I had the gloves on in a gymnasium out in 'Frisco I was knocked cold. When I finally came to my right senses I was on my feet trying to carry on. I didn't even know I had been out. And right then and there I learned the greatest lesson a boxer can ever receive—that it doesn't hurt to be knocked out. Once Strib learns, if he ever does, that his mind is master of his body—just watch him cut loose. As soon as an opponent looks aggressive Strib immediately becomes cautious. In that terrible contest he had with Sharkey at Miami Strib had the fight won and didn't know it. He landed a right that had Sharkey ripe for a series of follow-up punches that would have put Jack out but just because Jack, the instant that blow landed, looked twice as aggressive as he had before, he tricked Strib into laying off, by pulling his own right back in a position to shoot. Say, this will have to be all for this gab-fest. Got enough dope, Doty? If you haven't give me a ring on the 'phone and we'll have another session. Good-bye, everybody.

Curtain.

Marcella

IMOGENE of Odessa, Mo., wanted a picture of Sally Perkins. In the absence of a picture of Sally, the belle of the Happy Hollow program, will you be happy, Imogene, with a photo of Ted Malone? You know he is the author of the Happy Hollow sketches. Sally—her real name is Ruth Lee Bren—is a very charming little girl, not quite five feet tall. She has merry brown eyes and merry auburn-brown curls and a cheery, sunny disposition. In Happy Hollow, Sally is the little girl who is constantly falling in and out of love. In real life, Sally is a continuity writer and piano accompanist. But no matter where she is, Sally or Ruth unfailingly dispenses cheer.

Ted Malone

What some are ... to decry as ego is merely his su-... confidence in himself; his alleged ... it is faith in his art. You can't ...re a man because he believes in the ... he does.

A word of advice to the megaphone men, though. Accepting the gentlemen of the fourth estate, including the tablewd columnists, as men of intelligence and open mind, he is ofttimes prone to discourse a bit too frankly, thereby leaving himself "wide open" and innocently giving vent to utterances that become sensational copy. He should be cautioned against free discourse with the press lads who, although they invariably become Vallee fans after an interview, have a duty to their city desks. More times than once, an innocent remark uttered by a celebrity provides material for a story that can do irreparable harm.

Rudy Vallee,—clean, real,—a true artist, has done much for Radio. He has enemies, though. We insist that he refrain from making himself a target for those who find him good copy.

* * *

ONE of our pet peeves is the promiscuous use of "names" on commercial broadcasts, regardless of talent or suitability for broadcasting.

It is easy to comprehend the thrill that a "seeing" audience gets from viewing an erstwhile favorite, despite the fact that the star's ability may be definitely on the wane. But on the air, past performances are discounted; reputation is an empty asset. Not that the tuning-in public is hard-boiled; the reason is that little tricks of showmanship are lost via the air and nothing registers but "cold" results.

A beloved veteran of the operatic stage, for example, was recently offered by an important commercial hour as the "super-special" attraction of the evening, and the result was close to pathetic. Those in the studio to whom her name was a delightful tradition and a cherished memory must have agreed that her air debut was something like leading a lamb to the slaughter. Her voice "gone," she stood bravely and resolutely before the microphone, a vision to those who saw her, but, without doubt, just "static" to those who tuned in to hear her. Television, alone, might have saved her.

When will program sponsors realize that talent,—not "names"—is what the public wants? Radio's favorites came from nowhere. The biggest disappointments, from an entertainment point of view, have been the internationally famous "name" performers, ballyhooed for weeks prior to their appearance, and then, after it's all over, making the "fans" wonder what all the shooting was for.

You're in show-business, Mr. Radio Man. Use some ingenuity and dig up your own talent. There's no entertainment nourishment in a "name."

* * *

THE Society for the Prevention of Cruelty to Radio Fans should try, at their next meeting, to curtail the indiscriminate choice of songs by orchestra leaders.

By actual survey, one so-called "best-selling song hit" was played fourteen times one night recently from an important station, giving the listener, at about the tenth repetition of the "classic," a feeling much akin to good, old-fashioned nausea.

Can't something be done to regulate programs? Never, in a vaudeville theatre, will you hear a song offered more than once during the performance. Programs are carefully checked during rehearsals by the house manager and the musical director, and when two acts use the same number, one or the other must make a substitution.

Not so via the ether, however. And for several very good reasons, if you insist on knowing. *Par example:*

In many cases, your good friends, the orchestra leaders, have what Tin Pan Alley refers to as "cuts" in songs. These range from one-half cent to thrice that amount for each copy of music sold, thereby making it good business policy for the leader to give "his" song as much "plugging" as possible, regardless of its fitness to his program or its pertinence to his general presentation.

Then again, dear lovely people, a contemporary racket among many Radio columnists is either to write songs or permit the publishers to present them with a slice of the royalty melon. Subsequently, nice, juicy "puffs" are given obliging leaders and singers who offer these songs on the air, and those who do not are graciously ignored.

Just a few reasons why you're getting an over-dose of certain tunes, and why you'll keep getting it until the S.P.C.R.F. takes a hand. For Radio, like all other cherished institutions of this turbulent era, is not immune from the machinations of the great god Racket.

George D. Lottman.

Hands of An Astrologer

(*Continued from page 75*)

servative, straight, unbending thumb turns its back she is likely to indulge her fancy for things quite feminine.

Asking about her husband's hands reminds me of their country home. Their hands sought fastidiously everything that's in it.

It's a dream of a farmhouse in Westchester, high up on the hillside. Its wide spreading veranda merges into the branches of heroic trees. All the love of home and pioneer traditions suggested by Miss Adams' hands show in this gem of a house converted by her into this lovely place from a bare old Quaker meeting house as her ancestors had done before her in England in days gone by.

Old Currier and Ives prints hang on the walls of the numerous rooms of the house. Highboys and lowboys of early American days lend their interest to the furnishings. An old settle on which Rip Van Winkle himself might have nodded stands in a corner. Burnished pewter brightens old shelves in the dining room and treasures of clocks with wooden works still going hang in hallway and "parlor" while stiffly erect stand antique andirons of the days of Miles Standish.

You'd love to see how mothery are Miss Adams' hands as she pats quaint coverlids on the beds of guest rooms giving added gesture of good measure to her gracious hospitality.

And it's not for naught that the third phalange of her fingers—the ones next to her palm—is full molded for it's the grandest of food that comes from her farmhouse kitchen. But Miss Adams' own hand indulges lightly in food and often much of it is diverted to the moist-eyed, expectant little Lover, her pet of a dog, and to his dainty little Pekinese girl friend.

Leaving the coziness of her adorable farmhouse, the week-end guests who gather there, noted artists, writers, scientists, musicians, and business men and women of national importance, Miss Adams goes back to her studio in Carnegie Hall.

It is fascinating to watch her hands as she works there. All personal qualities seem to recede. She is now the scientist and astrologer dealing with lives and stellar promises. As her hand, deftly arched, turns the great astronomical globe beside her desk, she is guided by the most exact of mathematical knowledge, astrological lore, and long experience in making deductions pertaining to the human equation.

Her hands are now intense, vibrant. She studies, weighs the evidence, writes the record of a life. If it is burning brightly, it is well. If not her hand must write the word of caution, or courage, or calmness to keep this life true to its one particular star—the good star that guides each destiny.

"You've forgotten those other questions—" this from the feminine Radio audience.

Oh, yes, well—she does like jewels. I'm sure for she wears a magnificent diamond ring, and the hands of her husband—he's George E. Jordan, noted astrologer and business consultant—are the specialist type, angled thumb and irregular fingers, and he's enough of an artist that everything that was placed in the gem of a farmhouse had to suit his hands—just so.

The Golden Baton

(*Continued from page 33*)

standing man, my friend. I go now—

SHOPKEEPER: Until you come again, the—

JOHANN: Goodbye!

Once again the tick—tick—tock—of the old gilt clock marks the passing moments, as Jean sighs and says, "I almost felt the beating of the man's heart as I looked at the baton. So much of his life went into it. But tell me, Dad, do you know what has become of him?"

The Shopkeeper does. He answers.

"Yes. It seems that some kind people took pity on him and made him their gardener. Of course, he knew nothing of gardening—it was just an act of generosity. I was told that he would listen to the wind in the trees, because it reminded him of his music—and on moonlight nights he would sit out in his little garden and listen to the song. It was just such a night that they found him beneath one of his trees, and in his hand was clutched a little piece of wood that he had whittled into the shape of a baton. And there, in the moonlight, under the trees, he heard the last strains of the symphony of his life."

Copyright 1930 by the Grigsby-Grunow Company

* * *

Dramatic sketches are becoming increasingly popular with Radio listeners. No small part of this interest was stimulated recently by the introduction of Majestic's Old Curiosity Shop series which, since last October, has been presented Sundays at 9 P. M. by the Grigsby-Grunow Company over the Columbia international network headed by WABC, New York.

Both the verse which precedes the play and the idea of the Old Curiosity Shop were created by David Ross, Columbia announcer, who also takes the part of The Old Shopkeeper. Afterward Mr. Ross turned over his general theme idea and the synopsis for the scripts to Don Clark, head of Columbia's continuity division. It was Don's job to rewrite the stories and dramatize them. Although Ross's idea, the stories, as you hear them the air, are made into that form Mr. Clark.

The cast which portrays the st is a notable one indeed. For we many of the famous actors and actr of Arabesque fame playing leading Georgia Backus, the director of dram at Columbia headquarters, is the le lady in the plays.

Jean Sothern, whose name recalls movie thrillers of yesterday in which starred, plays in the prologue as Shopkeeper's daughter and in the within-a-play.

Frank Knight, Columbia's senior nouncer, is leading man. Reyn E another announcer, also plays in sketches.

Don Clark is one of Radio's pion He began his career as a newspaper in Albany, New York. Later he wen for Radio and became an announcer. rise to fame in this field was slow soon afterward Clark turned to wr Radio scripts, in which he has exce and his knowledge of broadcast req ments is reflected in his work.

Town Crier Tales

(*Continued from page 19*)

I rushed into print with it. Then bricks began to fall. By various cons and annoying readers, it was pointed to me that this was a story which printed regularly once every year. It pointed out to me that it had been an pated two years before by The Satur Evening Post.

"An angry old countess wrote me fr her villa at Monte Carlo that there n be some mistake because whereas thing had happened as I described it had happened to a friend of hers the before in Nice. A professor at Ohio S College wrote me that there must be s mistake because, whereas, it had h pened as I described it, it had happe four years ago to a friend of a friend his in Chicago.

"I knew then what I had done. I h and not for the first time, (or the time either, I might add) come upo piece of American folklore. There certain stories which, seem chronic recurrent. They are told not by wri only, not, indeed, by writers chiefly, by all manner of people—preachers, ba ball players, dressmakers. And they always told as true.

"The strange events which take pl in them are always told as having h pened to some cousin, or at least to so dear, dear friend of the narrator. T to trace such a story back to its first pearance and you will find yourself volved in newspaper files of thirty forty years ago in cities all over the wo

Station Vox

(Continued from page 36)

CALPURNIA: Mark, did you have anything to do with this? Here is the way that number should be sung. Give me the music (*sits at piano and strikes chord*). Why don't you get this piano tuned? It's all out of tune. (*Sings same number in high soprano voice, with plenty of trills.*)

(*At end of song a shot is heard. Both women scream. Then brief silence.*)

MARK ANTHONY: For the Love of Rome, which one did you shoot?

CAESAR: The one who didn't faint.

MARK ATHONY: If you've shot Cleo I'll tell the Senate and have you kicked out. Get some water quick.

CAESAR: Oh, you call her CLEO, do you? Here, help me lift her up.

MARK ANTHONY: Cleo, Cleo, are you all right?

CLEOPATRA (*feebly*): It's YOU Mark? Oh, Julius Darling, why did you shoot her?

CAESAR: Well, if she had just been a soprano, I couldn't have done it. If she had been both a soprano and my wife, I couldn't have done it. But having a soprano for a wife—and knowing you, at the same time, there was no alternative. Do you feel all right now?

CLEOPATRA: Yes, I feel swell.

CAESAR: Mark Anthony, I request that you submit your resignation.

MARK ANTHONY: I do not accept the request.

CAESAR: You'd better, I'll fire you anyway. I don't want you around here any more.

CLEOPATRA: Oh, Julius, don't fire Mark, he's a perfect peach.

CAESAR: You're fired!!

MARK ANTHONY: I'm not fired!!

CAESAR: You are!

MARK ANTHONY: I'm not!

CLEOPATRA: Boys, boys, boys! Stop it. This quarreling sounds terrible. Everybody is all heated up and bothered. I'll tell you. Get your togas and come with me down to the baths and we'll all have a swim together.

CAESAR: That sounds good.

CLEOPATRA: Then we'll go up to my house for a lovely bowl of punch.

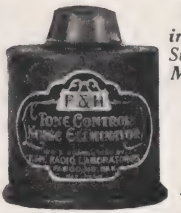
MARK ANTHONY: Cleo, you're a woman of ideas.

CAESAR: That sounds great—let's get out of here.

CLEOPATRA: That's the spirit. Come—Sweet Mark and Darling Julius—

CAESAR: I'll figure out what I'll do with you later, Mark.

MARK ANTHONY: I'll be doing some figuring too.



CLEOPATRA: Boys, not so loud. (*Very sweetly*) *I'll tell you both what to do!*

(*Curtain*)

Coming Next Month—The Sensational Story of Lowell Thomas' Greatest Thrill.

LATEST MARVEL OF RADIO

Make Your Old Set a 1931 Model for **$4.85** Complete for Any Set

Tune in That Smooth Mellow Tone and Tune Out That Noise

The F & H Tone Control and Noise Eliminator will vary the tone so as to conform with the personal musical tone taste of any individual, brilliant, treble, or that deep mellow bass found only in the high priced modern tone controlled sets. AS A NOISE ELIMINATOR 50% to 95% of the high pitched static and line noises can be eliminated. Finished in beautiful crystallized brush and comes complete with adapters and twelve foot silk cord for convenient remote control. Connected by anyone in a minute's time. Return in three days for refund if not satisfied.

REESONATOR

For distance and sharp tuning. Over 40,000 satisfied customers. Now only $3.95.

The Reesonator will increase the volume, distance, power and selectivity of your radio set to the equivalent of the addition of two extra tubes. It will enable you to play with dance volume stations which were barely audible without it. Attaches across aerial and ground leads without tools by anyone in less than a minute. It is especially recommended for all sets having an untuned antenna or floating tube such as: Radiola 16, 17, 18, 33, and 333; Atwater Kent models 30, 32, 35, 37, 38, 48 and 49. Certain models of Victor, Temple, Silver-Marshall, Knight, Apex, Dayfan, Crosley Bandbox and Jewelbox. Saves 25% on A and B batteries on battery sets. Return in three days for refund if not satisfied.

F. & H. AERIAL ELIMINATOR

Price **$1.25** Complete

Every Instrument Tested on Actual 1000 Mile Reception

The F & H Capacity Aerial has the capacity of the average 75 foot aerial 50 feet high. It increases selectivity and full reception on both local and long distance stations and is absolutely guaranteed. It eliminates unsightly poles, guy wires, mutilation of woodwork, etc. It does not connect to the light socket and requires no current for operation. Enables set to be moved into different rooms with practically no inconvenience. We predict this type of aerial will be used practically entirely in the future. Installed in a minute's time by anyone. Return in three days if not satisfied.

Ray Perkins

(*Continued from page 15*)

don't make as much money as a good fullback, but then I doubt if even Irving Berlin could kick a field goal.

"I see they found an ancient Roman galley in an Italian lake. One of those eight-oared barges of the time of the Caesars. The Naval Limitations Committee is all hot and bothered. They say Mussolini had it dug up on purpose as proof that Italy actually did scrap a ship at one time. But several editors say, however, that it is only a galley proof, so it doesn't count.

"I have often been asked if Perkins is the real name. Well, it is Perkins, and I didn't say Schmalz. However, you can call me 'Ducky Daddles' if you want to.

"One morning not long ago, the traffic jam was terrible. A traffic jam isn't the kind of jam you put up, it's the kind you have to put up with. This particular morning of which I speak it was spread all over both sides of the street. It got all over the coat of the cop who stands near the National Broadcasting Company studios. So I hollered: 'Some jam, eh, kid?'

"He had seen me crossing the street with a can of pineapple under each arm. I always bring along some pineapple because you never can tell who is going to drop in. And he said: 'Oh, yeah? Well, it will be a pineapple jam if you don't watch where you are going.'

"I guess everybody knows that for the past 13 years I have puttered about in every branch of show business. In fact, I gained quite a reputation as being one of the best putterers that ever puttered. You must also know that I have been an advertising salesman, and was second Lieutenant Perkins during the world war, and was assigned to the intelligence division, which may have been another paradox. But we won't go into that at this time again.

"My Radio debut in 1926 over WJZ as *Judge, Jr.,* was quite a thrill. But at that time I didn't much care for broadcasting. So after turning advertising salesman and then editor, I went to Hollywood and wrote theme songs. Hey! who threw that brick? *Under the Texas Moon* and *Lady Luck* were the most overplayed.

"Oh, by the way. You might want to mention the fact that I was born in Boston and therefore moved to New York as a small boy. Yes, that is true, I haven't grown very much during the ensuing years. That is, except that I have grown older and wiser with the passing years. But that isn't very original with me either. Everyone gets older with the passing years, and stops trying to fill inside straights.

"And so has life been with me. I have been going along in the whisky-tenor of my ways . . . just me and my little grand piano, which is my constant companion. My piano, always at my side, has been, these many years, from baby grand to concert grand, a one-man piano. But with it all my piano has been very tolerant of my wife and young son. Good old piano.

"WELL, it's early yet, so I guess I'll be up and doing. I can't waste a lot of time hanging around with Radio interviewers, you know. Glad to have met up with you all. Give my regards to the family and tell them you've been hanging out with me, and tell them I'm a fine upstanding example of young American manhood and all that"—you know—make a hit with the folks.

Carefully folding the old topper, and putting a muzzle and leash on "good old piano," Ray "Pineapple" Perkins, faded away into the lengthening shadows, and I stood on the dock, waving my handkerchief until he had gone under for the third time.

Maria Jeritza

(*Continued from page 21*)

simply could not calm myself. I actually delayed the curtain for several minutes, while the overture was repeated, before I could summon up sufficient courage to walk on the stage. Then the warmth and the friendliness of the audience at once permeated through me and soon I was singing with entire ease. I felt that the American audience had taken me to its heart. This was a big moment for me because it marked the beginning of an association with America that has brought me great pleasure and happiness.

In fact, it has now come to be that I consider America as my home. When I go to Vienna in the summer, to rest and to play at my country place, it is of New York that I speak as home. I love everything about this great city and I have made so many wonderful friends here that I would not make any but brief engagements elsewhere.

There is one more great moment in my life that I must mention—one that is precious in every woman's life. And that is my marriage to Baron Popper, who comes from a famous musical family. He is the son of Blanche Marchesi, who sang here years ago in concert, and the grandson of Mathilde Marchesi, the famous Paris teacher, who numbered Melba and other great singers among her pupils. Baron Popper himself is a pianist and violinist of talent.

I believe that no matter how successful and famous a woman may be nor to what artistic heights she may climb, her life is incomplete and unfulfilled unless she marries. In order to make it a happy and lasting one, she should prepare and train herself for it, just as she would for a career. She should regard it as a sacred obligation on her part to give of her best to it, for only in that way can she make her marriage the supreme adventure in life.

Junior Brings Hom The Bacon

(*Continued from page 59*)

makes you work really harder tha footlights."

Howard has a little twinkle in h that brought the question:

"Are you, by any chance, a *Pew* the air as well as on?"

He looked a little guilty. Ar mother admitted, trying to look sev

"You'd have thought so if you' the water fight he led at one c coolers at the National Broadc Company a few days ago."

Howard spoke up defensively:

"Well, mother, it wouldn't have any harm if I hadn't sprayed Fl Malone. I didn't see her."

Howard, when it comes to seeing prefers opera and musical comedy. though he is dramatic himself. W assured by the young actor:

"Nearly all my money goes towa college fund. I buy my own cloth sort of help sometimes around the But I want a good education. Th more acting. I don't think very successful child performers grow up real actors. Why not leave well e alone. Besides, I want to write. could go right out on a story no jump for joy. A good fire or a hot der story. Maybe I'll be a Radio That's a good idea, isn't it?

Responsibility for the success of children of the air may be laid a doorstep of a very young and golden-haired lady who has of all the NBC children's programs. is Madge Tucker, *The Lady Next*

Miss Tucker also may be given for keeping them natural and free the usual professional precociousnes freshness. One little conceited mov they are brought down to earth, dipl ically, but firmly. She punishes the keeping them off the air a while.

But there is nothing so inter about this whole Radio baby busin (mercenarily speaking) all the mone seems to be floating around throug ether these days.

It is quite safe to say that not o these fathers are earning more than $25 to $50 a week. The average s be about $35.

While baby, bless its li'l heart, get much for (sometimes) just about f minutes or a half hour on the air.

So baby is taking the family, mamma and brothers and sisters b boot straps and lifting them from po to the Drive.

If the roof needs a few new shing mamma needs a fur coat rush baby t nearest broadcasting studio at the sign of a boop-boop-a-doop or a dramatic emotion.

Maybe that temperamental fit junic last night was suppressed desire. It sound like static but you never can

Radiographs

(*Continued from page 63*)

rcargo—a lowly sophomore stood nce in the exalted company of

But when the auditions were osaline Greene was the only one o join the WGY Players.

as her first contact with either the or the Radio, but before the year er she was the leading lady of the ly. The following year she con- her work at WGY, and in addition d a position with a stock company ing a repertory of plays in Al- nd Troy. Then began a hectic e for Rosaline Greene. Her fam- k in Hempstead, L. I., where she rn, were not theatrical people, and t take kindly to their daughter's ic ambitions. Nor would the au- 's at State College have been at ised to learn that one of their s was appearing in stock. So e had to carry on her dramatic es under an assumed name and n imagine her embarrassment when ructor at the college stopped her y to comment on her resemblance leading lady at Proctor's Theatre. could not keep her identity hidden , however, and the year she grad- the dark-eyed girl who intended to a school teacher found herself t the Radio World's Fair in Madi- uare Garden as "the perfect Radio

Not long after that came her id only contract with the metro- theatre. Lee Shubert personally upon her to ask her to take the role in his new production, *The of Great Price.*" For two months Greene played at the Century The- nd then she made her decision. She cast her lot with Radio.

gives me so much more opportu- she explained. "On the stage I'm l in the parts I can play by my size, age, general appearance, and a hundred and one other things that have nothing whatever to do with my ability to feel and portray the character. In Radio there are no such limitations. I can play *Joan of Arc* one night and *Cleopatra* the next. On the stage the actress who played one of those parts would probably never be considered for the other."

But just at that time Radio wasn't considering many characters of any type. Radio drama was not so well established as it is today, so Rosaline Greene filled in the interval with post-graduate work in dramatics at Columbia University and with her first love—teaching. It was while teaching in a private school on Riverside Drive that she formed her own company of Radio players, wrote plays for them and introduced them to New York audiences over local stations.

Then, slowly, dramatics began to find their place among the jazz bands and male quartettes that crowded the air. With their establishment on the big networks came recognition for Rosaline Greene. She gave up her teaching, signed an exclusive contract with National Broadcasting Company, and ever since has been starred.

She loves to ride, swim, and walk, and has an ambition to become a famous writer of Radio drama as well as a famous Radio actress.

Walter Winchell

(*Continued from page 7*)

and dance act had to be continued.

During long train rides from one city to another, Winchell used to amuse himself by writing intimate stories about his fellow-vaudevillians. Little anecdotes, little human-interest stories, a little bit of dirt—these he pieced together into an altogether spicy column about vaudeville-life and vaudevillians. This column, he, one day, sent in to the *Vaudeville News*. To his surprise, *Vaudeville News* printed the article, paid for it—and asked for more. Two more such columns were written and printed and Winchell felt that, at last, a decent excuse had presented itself for his leaving the vaudeville game for good. He would return to 42nd Street in order to cover Broadway gossip for *Vaudeville News*.

And he did—with such success, in fact, that Sime Silverman of *Variety* was attracted by those writings and sent out a flattering bait to the young columnist. A neat contract was awaiting Winchell if he would only work for *Variety*. Would he come? For a while Winchell played with the idea of accepting. But then a still more flattering offer came which definitely decided for him. The *Graphic*, a new tabloid, was looking for interesting young writers, and its editor Bernarr Macfadden—sensing that in Winchell he had a columnist that would be a valuable asset to any newspaper—gave Winchell a breathtaking salary to work for it. Winchell grabbed the opportunity; he was earning now five times as much as he had ever earned before. And on a job which was as easy as it was fascinating. His columnar career was now fully launched.

This was five years ago. Four years later, the New York *Mirror* enticed Winchell into accepting a position on its paper by doubling his already munificent salary. His column was to be syndicated throughout the entire country. And shortly afterwards, the Radio got him for a weekly broadcast of Broadway news. Gossip had triumphed. Walter Winchell was its prophet.

WALTER WINCHELL is only thirty-three—yet, despite his youth, he is practically gray. Other characteristics which distinguish him include the fact that he writes with his left hand, he works only two hours each day on his column—usually from 5 to 7 P. M.; he is invariably up all the night, making the rounds of the night-clubs, and he sleeps all day; he does not dress well; his principal affections are night-clubs, good beverages—and gossip. But gossip above everything else. He could never have developed that truly remarkable scent for scandal, if he did not love it so.

It is generally a source of wonder for his readers and listeners as to where Winchell gets his remarkable revelations—some of which precede the newspaper headlines by weeks. The answer is that three sources supply him with his gossip. The first is Winchell himself. Snooping around night-clubs, important hotels, large restaurants and other important Broadway rendezvous-places, it is inevitable for him to pick up a considerable amount of first-hand gossip. Then (although this is not generally known), it is said he has a small battalion of spies working under him, whose duty it is to pick up information and scandal about anyone in the public limelight, and who get paid from Winchell himself. The greatest amount of his information comes from this source. Finally, generous readers swamp his desk every morning with information which, by chance, they happened to pick up. Winchell confesses that some of his best "scoops" have come to him in his morning's mail from some kind-hearted reader or Radio listener. Needless to say, all gossip is fully verified before it is put into print or told over the Radio. Otherwise there would not be enough lawyers in all of New York to defend Winchell against libel-suits. Incidentally—and this is, by no means, a small tribute to Winchell's accuracy—despite all the remarkable information, some of which is of the most intimate and bewildering nature, too, Winchell has never had a libel suit on his hands.

George Jean Nathan has recently complimented Winchell by saying that the latter is not only a superb journalist but that he has also enriched the English language. Winchell's vocabulary is almost as famous as his gossip. It is well-known, for example, that it was he who made of "whoopee" a national by-word. It is well-known that he coined such picturesque words as "literotic"; such graphic phrases as "having it Reno-vated," as "melting their wedding ring"; and such apt metaphors as his description of Broadway, "the hardened artery". He has brought a new vocabulary to the lingo of the average Broadwayite; he has made speech piquant and vivid.

Winchell himself has often spoken of himself, over the Radio, as "the man whom they love to hate." Broadwayites hate him because they have no secrets which this bewildering journalist does not learn and reveal; theatrical producers hate him, because he has disclosed so much of their sham. The Shuberts, as a matter of fact, will never permit him into any of their theatres—and two years ago Walter Winchell was able to see *Animal Crackers* only because Harpo Marx dressed him up as a woman and sneaked him in through the main entrance. Night-club owners, racketeers hate him. Anyone who has a secret hates him. Gangsters hate him. No man ever makes the rounds of Broadway's night-life being liberally hated as Walter Winchell.

And yet, paradoxically enough, he is also one of the most celebrated and best-liked columnists in the country. His stint is syndicated to thirty-two newspapers; it is estimated that more than two million people read his column each day. Something like ten million listen to his broadcast every Tuesday night, to judge by his correspondence. And the man who receives a salary of $100,000 a year—not to mention his salary for broadcasting—cannot be said to be unpopular. It all depends on which side of the fence you are. If you are of the group which Winchell exploits for his gossip then you are among his enemies; but if you are merely an innocent bystander who gets a tremendous kick out of learning the inside stories about Broadway, then you probably worship him. But no one is indifferent.

Incidentally, there has recently been a lot of talk, in and out of night-clubs, that Walter Winchell will be "bumped off" within the next few months. Those of his admirers who are terrified by a bit of inside information will, perhaps, feel a little more at ease if they know that the one who started this rumor circulating was none other than—yes, Mr. Walter Winchell, the man who knows everything.

Recipes via Radio

(*Continued from page 80*)

ette apartments in large cities, or substantial suburban homes. I see several brave, cheerful women who in spite of total blindness manage to keep house, prepare meals, and a certain lame girl sits beside her Radio taking notes and writing down recipes for her busy neighbors who cannot listen in. These and the others are before me as I talk. Ah, oh, how I try to give them each and all the help, encouragement and actual cooking information they feel they need and want!"

The next year Betty Crocker's hints were sent over the country as the new morning chain program. Her circle of homemakers was widened to include women living in the cities, towns and villages, and on farms and ranches all the way from the Atlantic to the Pacific Coast whose homes Betty Crocker now enters twice a week for a friendly visit by means of a National Broadcasting Company network through the courtesy of General Mills, Inc.

That Old Gang of Mine" by ROXY

Miss Adams tells you how to procure your own solar horoscope—FREE

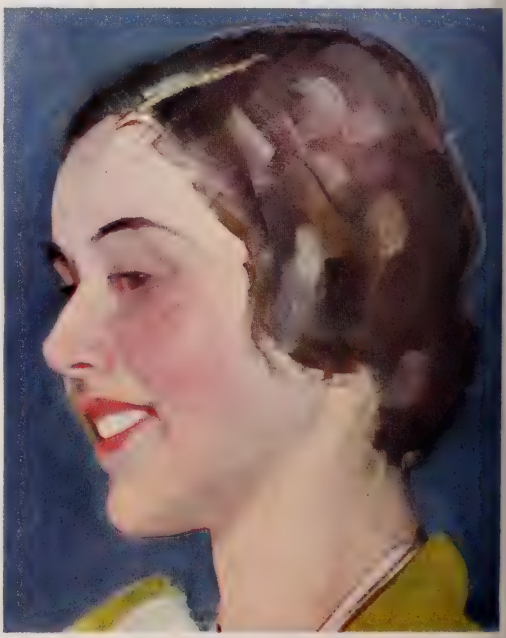
The Dentists' Dentifrice should be your FAMILY DENTIFRICE

MANY people remember the time when trips to the dentist were made only to get relief from pain. In those days, no one thought of going for prevention, before pain developed.

And today, there are people who do not think of using Forhan's, until their mouths are beyond the help of ordinary tooth-pastes.

But the well mouth needs Forhan's. It is a dentifrice safe and pure and mild—as fine as a dentist can make it, for it was developed by a dentist, R. J. Forhan, D. D. S.

The tiny teeth of children—those precious first teeth which have such an influence on the future health and beauty of the mouth—need the scientific cleansing which they will get with this gentle dentifrice.



The teeth of boys and girls also need Forhan's protection, to supplement the dentist's watchful care. No dentifrice can do a more thorough job of reaching every fissure and crevice of the teeth during these critical years.

In the adult mouth, Forhan's serves a double purpose. It cleans the teeth, of course, but in addition it helps to stimulate the gums. Used as recommended, with massage at the time of brushing, it rouses sluggish circulation, brings to gum tissues a pleasant tingling, and helps to keep them in the coral glow of health.

Do not make the mistake of thinking that Forhan's is only a pyorrhea treatment. If you suspect that you have this ailment, if your gums are tender, see your dentist at once. When the mouth is healthy—before any tenderness develops—is the time to adopt Forhan's as your dentifrice. It is far better to avoid disease than to treat it after it develops. The use of this scientific dentifrice will help you to keep the mouth of youth well into middle age.

NOW ON THE AIR!

New Forhan's program—featuring Evangeline Adams, world-famous astrologer—every Monday, Wednesday and Friday at 7:30 P. M. Eastern Standard Time—Columbia network.

Forhan's

YOUR TEETH ARE ONLY AS HEALTHY AS YOUR GUMS

FOLLOW MY STARS OF YOUTH TO A

★ ★ Clearer, softer skin

rances Ingram herself tells how to keep the skin lovely at its 6 vital places

YOU are just as young and attractive, or just as old, as your skin looks," told a charming woman who recently ame to consult me. "Keep your skin im- aculately clean... Keep it youthful at my xstars... And *you* are youthfully lovely."

Then I explained to her my method ith Milkweed Cream.

"To cleanse the skin, spread my Milk- eed Cream generously over your face nd neck. Let it remain for several min- tes, to allow the delicate oils to pene- ate deeply into the pores, and then move every vestige of it with soft linen.

"Now—apply a fresh film of the Milk- eed Cream. With outward and upward rokes pat it into the skin at the six oints starred on my mannequin.

"There are special *toning* ingredients in his Milkweed Cream. These penetrate ne cleansed pores and defend the skin gainst blemishes and aging lines and ave it clear, soft and lovely."

* * *

his charming woman came back to ee me, a day or two ago. Her skin looked *arvelously* clear and soft and fresh! She ooked at least five years younger—and aid she felt it!

* * *

have recommended my Milkweed Cream nd my method to so many women, and have *seen* their skin grow fresh, clear, oung. Won't *you* follow my six stars to clearer, softer, younger skin?

If you have any special questions to ask bout skin care, write for a copy of my ooklet, "Why Only A Healthy Skin Can tay Young." Or tune in on my radio our, "Through The Looking Glass With Frances Ingram," Tuesdays, 10:15 A. M., E. S. T., over WJZ and Associated tations.

STUDY MY MANNEQUIN AND HER "STARS" TO KNOW WHY

"Only a healthy skin can stay young"

★ THE FOREHEAD — *To guard against lines and wrinkles here, apply Milkweed Cream, stroking with fingertips, outward from the center of your brow.*

★ THE EYES—*If you would avoid aging crow's feet, smooth Ingram's about the eyes, stroke with a feather touch outward, beneath eyes and over eyelids.*

★ THE MOUTH — *Drooping lines are easily defeated by filming the fingertips with my cream and sliding them upward over the mouth and then outward toward the ears, starting at the middle of the chin.*

★ THE THROAT — *To keep your throat from flabbiness, cover with a film of Milkweed and smooth gently downward, ending with rotary movement at base of neck.*

★ THE NECK — *To prevent a sagging chin and a lined neck, stroke with fingertips covered with Milkweed from middle of chin toward the ears and patting firmly all along the jaw contours.*

★ THE SHOULDERS — *To have shoulders that are blemish-free and firmly smooth, cleanse with Milkweed Cream and massage with palm of hand in rotary motion.*

Coming *and* Going

Observations on Events and Incidents in the Broadcasts of the Month

LIKE a gleaming jewel in a changing light Radio programs scintillate and glow with new colors according to the evolution of new ideas and demands of public taste. There is a bit of the best from all forms of amusement—music, drama, literature, news, sports and positive cultural training from the primary to the higher forms of education. The light rests a moment on the move of educators to compel broadcasters to appropriate a definite proportion of the time on the air to education. Broadcasters are not so keen about making it compulsory as they are about the methods to be used to present the educational program. The broadcaster insists that a certain amount of showmanship must go with the program or there will be no one to hear it. The educators think that showmanship is unnecessary and supplementary devices would interfere with the fundamental practices of instruction. Important developments may be expected in 1931.

* * *

THIS old world needs more laughs and less grouching and grumbling. There is too much of morbid reading; too much prison pallor on the screen; too much moron catering and sex debauchery. Let's turn the page and get a laugh, turn the dial for a half-hour of chuckles. And for what better could you ask than old Brad Browne and his dear little Nit Wits of the Columbia system. They take the old world by the nose and shake the care wrinkles off his jowls. Marcella in this issue gives you a pleasant little sketch of Brad Browne. Next month we are going to entertain you with one of the skits which Brad says he thinks is one of the funniest they have ever produced. Don't miss it.

* * *

Did you subscribe to RADIO DIGEST before the new $3 rate went into effect? For those who have not already been so advised by our circulation department please be assured that your subscription as it stood on our books up to January 1, 1931, will be extended to comply with the $3 rate.

* * *

Incidentally we are very happy to announce that subscriptions are coming in from all sections of the country in amazing volume. We are indebted to the many broadcasting stations that have commended our magazine to their listeners. Thanks, gentlemen of the air!

* * *

Almost everybody wants a log in RADIO DIGEST. The votes were overwhelming. A Chain Calendar and Official Wavelength list will be published here in March. Next thing we know there'll be a big demand for fiction again. Wonder how many readers like Radio drama continuities? Suggestions are always welcome.

ISHBEL MACDONALD, daughter of the Labor Pri Minister of England, is a chip off the old block particularly interested in the rank and file of humani At the time we were in the ferment of activity to relieve the unemployment situation in America Miss MacDonald stood up before a Columbia microphone in London and gave us her views as to the right way and wrong way of doing things to help "the underdog." She thinks the world is too prone to dose its social headaches with aspirin instead of determining the cause of the trouble and curing it. She speaks a vigorous message strai from the shoulder. And she wants to know if Americ aren't wasting precious time on useless social work, we getting anywhere with constructive methods? W about it? You may have heard her talk, whether did or not you will be interested in reviewing it in March RADIO DIGEST.

* * *

Have you noticed the improved quality of the A 'n' Andy feature? There's a reason. Miss Peggy H who is one of the most competent astrologers in Amer has 'scoped both of the boys from the exact hour they were born. Broadcasters In Every State

WIN HONORS

Contest Nominations From Listeners Pour In To Acclaim Favorite Stations

THEY'RE off on the last two laps! Nominations are pouring in. From east and west, north and south, enthusiastic supporters are rallying to tell the world about the stations they consider the best in their states. For s interest in the contest has been gaining momentum and with the half-way mark passed, and the end in sight, each brings in votes. In many states at stage of the game the race is neck neck.

ere is a fine spirit of loyalty and enasm for favorite stations on the part ousands of listeners as exemplified e letters received by the contest edin every mail. Just read this one Miss Frances Cherry, of Wayne, aska:

VJAG at Norfolk is the home of the er's Devil. It is WJAG which has a big Radio family. It is WJAG h has an 'Everything's All Right '. It is WJAG which gives a list day of babies born into its family. .G does not have a Tom, Dick and y, but it does have a Karl, Ted and y. WJAG has a singer, 'Tim' Howstark who won the honor of being in first five boy singers in the recent Atwater Kent Contest. WJAG has od girl's trio, the Harmony Trio. .G has a wonderful mixed quartette." These are merely a of the reasons why Miss Cherry is rooting for WJAG. She ludes: "I could rave on for pages and pages about WJAG why, when it speaks for itself."

you listen regularly to the broadcasts of a favorite sta- Do you think its programs are the best produced for entertainment in your state? If you do give your station a break. Nominate it for the state championship. Do your bit to aid your station to win the honor of being declared the most popular in the state.

Many of the stations are being nominated not only because of their pleasing programs but because their announcers are popular with the station's listeners. "I wish to nominate station WEBC at Superior as the best Radio station in Wisconsin," declares Miss Eda Melland, of Yellow Lake, Wisconsin. "This is a good, live station, with fine programs and a staff of very good announcers. Without good announcers a station can not hope to gain much popularity."

Miss Madlyn Patton, of Philadelphia, Pa., also pays tribute to the announcers. She nominates WPEN as the first station in Pennsylvania. "First of all," she writes, "I nominate WPEN because our favorite Diamond Meritum winner holds sway the first thing in the morning. The Mystery announcer starts the day and then it's just good, clean fun the rest of the day. The announcers of WPEN are wonderful boys, everyone of them."

If you have not as yet nominated your favorite stations don't delay, but get on the band wagon now. Turn to the rules on page 100 and study them. There are ways of obtaining bonus votes that will loom large in the final count. Whoopee! We're coming down the home stretch and we'll cross the line at midnight, April 20th. Get those nominations in and then cast the votes that may make your favorite stations the honored ones in your state. Remember that there are four stations to be chosen from each state. Beautiful medallions as shown above will be awarded—one for each winner.

Arturo Toscanini

This portrait, posed three yea ago, is considered the best lik ness of the famous maestro, o of whose eccentricities is h unwillingness to appear befo a camera.

Intimate Glimpses of

Arturo Toscanini

Philharmonic Conductor Has Memorized Thousands of Scores—A Despot Who Flies into a Rage at Slight Errors, but Still is Sincerely Loved by His Men

By DAVID EWEN

[E WOULD have attained greatness in any field of endeavor which requires the commanding of men. For Toscanini rn to be a commander. Had he to be the general of an army or ler of a nation there can be no that he would have attained that minence that he now possesses as nductor of a symphony orchestra. e can understand what it is that his men obey him so meekly—his east of all. In his presence they strange electricity radiating from hey are humbled by the flash of his it eyes, and by that soft, tired of his which is their only reward after hours of rehearsing, they play

canini rules his men with iron des- —and yet, very strange to say, ove and worship him. I myself een his orchestra slave under him reuth, during the recent Bayreuth al, for ten hours, and yet after this is rehearsal one of the fiddlers— ith perspiration and tired to the of exhaustion—said to me: "What he is! If I could only play under rever, I would be the happiest of

WHAT strange magic his leader exert over his men? It magic of giving his men a mys- s insight into the music they are ming, an insight such as they have before had. It is the magic of a personality who loves his music such a passion that his love is con- sly spread to all who work under It is the magic of a man who is an to his finger tips—and the magic artist who is also a great man.

An incident which I witnessed three years ago, will perhaps serve to illustrate most aptly what this magic that Toscanini uses over his men really is. One afternoon during rehearsal, after putting the finishing touches to his rendition of Beethoven's *Ninth Symphony*, the orchestra, inspired by the insight into the music he had given them, rose and cheered him for several minutes. While the cheers persisted, Toscanini looked obviously uncomfortable and tried by frantic gestures to curb their enthusiasm. When the tumult had died down he rebuked them very gently, and tears were glittering in the eyes that so often blaze with anger.

"You see, men," he explained softly, "it isn't me—it's Beethoven!"

TOSCANINI was a great conductor from his earliest days. At first he floundered about in the 'cello section of the La Scala Opera House, in Italy, but then, during the illness of the conductor, he stepped from the 'cello section to the conductor's podium and rehearsed the scheduled opera—from memory. He has remained on the conductor's stand ever since—startling his audiences with performances which were unparalleled even for La Scala; startling the audiences by introducing into the opera-bill such foreign names as Wagner and Mozart, and to the concert-programs such barbarian names as Beethoven and Schubert; startling the audiences by forbidding them to come late or to whisper during performances. He startled his orchestra and singers by his scrupulous insistence upon perfection, by his indefatigable energies which constantly drove them to work harder and harder. He startled his management by the tremendous increase in the number of rehearsals and, consequently, in the expenses. And one and all they relented to his iron will. An entire revolution had come over the La Scala Opera House with its new, young conductor!

Toscanini was born with a very grave defect, especially grave for a conductor. He was near-sighted, so near-sighted in fact that he could not possibly see a score unless it were leaning against his nose. But, as though in divine repentance, the Gods have given Toscanini a memory that is almost phenomenal. That memory is one of the many causes for awe among Toscanini-worshipers. Everyone knows that Toscanini knows by heart some ninety operas, the entire classical repertoire from Bach to the most modern of modern composers and about a thousand other little odds-and-ends. Everyone knows with what rapidity he can memorize a new score. Two years ago he performed Ernest Schelling's *Impressions of An Artist's Life*. The score reached his hands on Sunday and the next morning he came to Carnegie Hall and rehearsed the whole work minutely from memory. He remembered every single note and every single instrument in that long and intricate score! The composer, who played his piano part from notes, looked at this man with gaping wonder. Toscanini's wife tells us that when he gets a new score, he goes to bed, huddles within

(*Continued on page 108*)

Night Clubs of NEW YORK

Texas Guinan, called "Queen of the Night Clubs" who once made the greeting cry of "Hello, Sucker!" her watchword.

THE night clubs of New York City of the present day are almost a lost art compared to what they were not so many years back. Therefore a discussion of them necessitates a background of former night clubs.

My first speaking acquaintance with night clubs, cabarets, and supper clubs, began in March, 1922. A great, rural state like Maine, with only a few big cities, which, in contrast to New York, could hardly be termed wealthy, knows little or nothing about night life which, to many New Yorkers, seems a natural and even tame part of city life. Most of the important cities of Maine have at best nothing but large public dance halls and exclusive clubs and hotels at which private affairs may be given.

The rise of the night club, or supper club, such as New Yorkers know it, seems to have been actuated by the desire of certain famous individuals to own their own room with their own orchestra, and to serve either food or liquor for those guests who were willing to pay well for the privilege of isolation from the ordinary habitues of public dance halls or hotel grills.

I know little or nothing about the places of the past decade such as Rector's and Delmonico's, the places where Sophie Tucker, Ted Lewis, and so many other stars became famous or were made famous, but my starting point is a good one,

inasmuch as the Royale achieved, mind, perfection in clubs. Certainly one of the most del places to spend an e for an individual sought diversion, th in dance music, gooc and a beautiful phere. Previous first arrival in New at Easter vacation i I had heard a great the famous young m who had come fr West with his orchestra to take Ne by storm and who found himself ens as a national hero in the beautiful Royale in New York City. The lo of its fountain and its acoustically room seemed almost like a dream. vacation afforded me an opportun my first visit to New York, and the places I resolved to visit was th Royale. I shall never forget th derful evening I spent there; Whit band was at its best. Although alone I did not feel out of place, a beauty and charm of everything a affected me most profoundly. I ha very fine lobster to eat; whether liquor was sold surreptitiously I know, but I do recollect that it w of the most perfect evenings of my

Later, when a freshman at Yale, frequented the Palais Royale with charming young lady, and enjoyed i than ever, as I was then able to d the inspiring music of the Whiteman The room had been remodeled an

A Picture of The Gay White Way

By RUDY VALLEE

Above—A detail of the wall decoration of the now defunct "Heigh-Ho Club" of Don Dickerman. This was the scene of Rudy Vallee's first triumph as a baton wielder.

ore enchanting than ever. Joseph rban, I was told, had made a study of and every point of beauty in the ceiling nd architecture was arranged acoustically.

In the same Fall of 1922, accompanied y some members of the Yale Band, I isited several night clubs on the eve of ie Yale-Princeton game at Princeton. At hat time the "Boardwalk" was very popu-rly acclaimed on account of its excellent evues and superior orchestra. There was lso the "Moulin Rouge," but the "Board-alk" was one place which attracted all of s and which we enjoyed tremendously.

The couvert of most of the clubs at that me approximated four or five dollars. If recollect rightly, the "Palais Royale" sked four dollars, and no one seemed to bject to paying it. Prohibition had been ore or less enforced for over four years, nd yet the "Palais Royale" and the Boardwalk" and similar Broadway places njoyed a huge success.

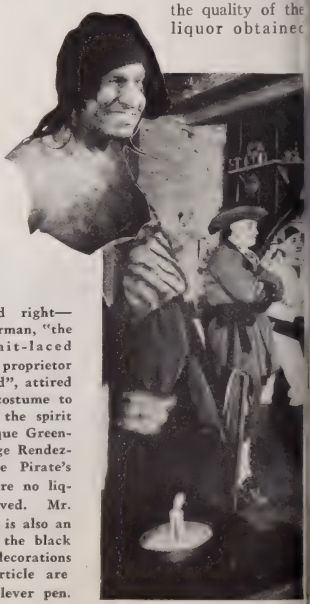
There were the clubs on the outskirts, uch as the Pelham Heath Inn and the Vestchester Parkway places, but these I ould not call typical night clubs; they ere, as the name implies, *roadhouses,* to hich one motored for dancing and dining. ather, in my mind, does "night club" ignify a club either on Broadway or in he heart of New York itself, with a floor how, a master of ceremonies, various ypes of acts with professional entertainers nd a chorus of girls.

Down through the years 1923-1924-925, there also came into existence the marter type of club, often termed the upper club, such as the Club Royal. hen, too, followed the vogue of the ttractive tea dances at the Plaza, the Villa Venice, the Lorraine Grill, and many other places where J. W. McKee, Joseph C. Smith, Ray Miller, Eddie Davis, Larry Siry, Art Hickman, and many others enticed the feet of New Yorkers to dance. Art Hickman attained great popularity during his short lived run in New York; I have often wondered why he did not stay and achieve the same success that Whiteman did, as he was even a little in advance of Whiteman as a forerunner in smart syncopation. In fact it was through his Victor records that Whiteman flooded the entire world with his new idea of dance music.

I would have been very happy indeed had I been able to dance at these various places to the music of their respective orchestras, for there was an atmosphere and air about everything in those days that seems to have disappeared today. The change has been gradual; whether this alteration is due to prohibition, financial conditions, or merely to the differences in fads and tastes I do not claim to know. It would not seem to me to be economic depression, because I believe people will always spend money to entertain themselves and will usually find the necessary amount to go out when they so desire.

Below—Plenty of pep and enthusiasm when the Crooning Tenor entertains for New Yorkers at the Villa Vallee—an unusual picture of the author, never before published.

The type of entertainment in the more decorous night club—Moss and Fontanne, ballroom dancers of the Club Lido, who are now on a month's leave in order to appear before the English King and Queen.



Unquestionably the enormous increase in the number, prominence, and daring of speakeasies in the past four or five years have been mainly responsible for the downfall of night clubs and supper clubs as a paying proposition. When one reflects *that there are over fifty thonsand speakeasies in New York City alone,* (over fifty mind you!) then, and only then, can we arrive at a clear conception of exactly what competition opposes the maintenance of an attractive but dry night or supper club. Membership clubs, like the St. Regis Roof and Grill encounter little trouble. They are established by the most exclusive of New York's society and are assured of a financial standing before they even begin the season; in fact, they do not welcome outsiders and are strictly formal, for they realize that that is an effective way of excluding undesirables. Of course, they are not averse to showing a profit, but they advertise only in the smart magazines and are solely interested in securing the right people as patrons.

Places like the Club Richman, the Montmartre, the Lido, El Patio, and many others (not to forget the place at which it is my pleasure to appear nightly, the Villa Vallee), are admittedly dry clubs where it is necessary to bring your own liquor if you wish to drink. They are obliged to face a proposition extremely difficult of solution —that of adequately appealing to their guests without serving intoxicants.

FROM my observations of middle class and elite society both here and abroad, of society in general, or may I even say human beings in general, there is little or no animation and *hilarious enjoyment* unless there is a stimulant. Please notice carefully that I say *"hilarious enjoyment,"* i.e. that New Year's Eve fervour which reminds one of a madhouse. Personally I am happiest where the excitement is moderately restrained, where one enjoys oneself in a reasonably quiet way, with conversation, dancing, good food, and refreshments at intermission. With the proper escort and the proper crowd I believe an evening may be very enjoyable this way, but there are people who seem to feel that unless there is over-loud laughter, an excess of back-slapping, hopping about, breaking of various eating utensils—in short, genuinely riotous pandemonium, then the party is not a success.

I admit that to attain this state of ribald excitement at a party, liquor is a necessary adjunct. I have watched many parties which commenced as respectably enjoyable become white heat orgies. The casual factor is nearly always the contents of a bottle poorly concealed under the table, or the latent effects of potent drinks recently imbibed. I have seen too much of this not to be brought to a realization of the fact that liquor can make people forget their worries, cares and normal selves, and to make them become, as it were, "Mr. Hydes" for the moment; some of the most meek, humble and quiet people have become transformed after a few drinks into the loudest, coarsest and most unreasonable persons imaginable; and it does seem that there are many people who enjoy this sort of an evening. My inevitable contact with such situations has led me to realize that whatever one may think, morally, ethically or legally, about drinking, there should at least be one universally accepted rule; everyone with any innate sense of decency ought to restrict his own share of liquor to tha amount which he is *positive* he can drinl without results that will render him figure of annoyance, disgust or ridicule

If one enters any quiet, refined clul such as those I have mentioned, one wil observe that even though everyone ha brought his own liquor, and is drinking the atmosphere is somehow kept quie and respectable; but go into almost an speakeasy where there is a piano, a grou of Hawaiians, two or three negroes aroun a piano, or even a dance orchestra a some of them have, and there you wil find quite a different atmosphere. Ther are loud peals of laughter and man hectically gay groups. In the midst of i all one finds several parties eating, an eating delicious food at that! And tha is where the speakeasy seems to surpas a respectable night club. To the speak easy the young man takes his girl an begins the evening with the realization o one thing, and that is this—that he pay only for what he gets. The couver seems always to have antagonized certai people, but it is simply a means of pay ing for the band and entertainment. I is like a ticket to the show. A clul featuring entertainment absolutely mus have some means of paying for it; th profits on food and beverages like ginge ale are not enough. The young man wh takes a girl to a speakeasy is steeped i an atmosphere of smoke and bad air al evening, as most of them are too smal to accommodate the crowds they attract; then the young man is astonished that he invariably wakes up with a "hangover" the next morning! Besides, he doesn't save anything by going there. His guarantee concerning the quality of the liquor obtained

Above and right—Don Dickerman, "the most strait-laced night club proprietor in the world", attired in pirate costume to carry out the spirit of his unique Greenwich Village Rendezvous, "The Pirate's Den", where no liquor is served. Mr. Dickerman is also an artist and the black and white decorations for this article are from his clever pen.

is no better than the assurances of a
r bootlegger, and the prices charged
are, in most cases, so exorbitant
before the end of the evening he has
as much as he would have if he
one to a night club.

As I have remarked be-
the food in most speakeasies is of
y high order; the proprietors have
enough to realize that with good
and good liquor, such as it is, the
ination is almost unbeatable! But
certainly not a matter of economy
he people who go there. They go
g to pay any bill presented them.
e is a certain *camaraderie* in a speak-
—the thrill of gaining admittance by
ssword, giving your card, or whisper-
through a little interviewer, being
ly let in and hearing the door
ned behind you—everyone locked
her, as it were, with the very slight
of arrest and the Black Maria hang-
ver everyone! In other words, the
of doing wrong is enhanced by the
of comradeship with a group of
le whom you know and like, in most
. Misery (or shall I say the thrill
oflawing?) loves company.

course, too, a great many people
to drink for the sheer joy of drink-
and a speakeasy affords them an
rtunity to do so. It also provides
nably pleasant surroundings with
rs who want to drink and eat good
at the same time. The places that
combinations of speakeasies and
er clubs resemble both in some
ects. I doubt whether these are
erous, and those in active operation
tantly court the danger of a raid
ss they are well protected. The easiest way for an enterprising prohibition administrator to secure publicity is to raid a famous place, whether or not liquor is actually sold there. Everyone knows that in every place where people gather there is some drinking of liquor that the guests bring themselves. This furnishes sufficient grounds for the raid itself, as the proprietor of any place *is supposed* not only to warn his guest against bringing or drinking intoxicating liquors, but to refuse to furnish accessories.

P. & A. Photo

Acrobatic dancers are features in the gayer clubs

There are the clubs in Harlem. Some do not welcome whites but cater strictly to their own colored group. It is not wise to attempt to enter these. Places such as the Cotton Club or Small's Paradise, especially the latter, furnish a great deal of entertainment for the out of town thrill seeker.

The Cotton Club is a respectable club with a most wonderful revue, beautifully staged with a line of very attractive colored girls. On Sunday nights various celebrities of the theatrical world are there and are always called upon to do something. Duke Ellington's band, one of the finest in the country, perhaps the finest, rhythmically speaking, holds forth and no one could resist dancing to it.

Small's is the place for the country relative you would like to shock. I am not going to attempt to describe just what goes on. Suffice to say that white men dancing with colored girls and vice versa, with singing waiters and a general atmosphere of ribaldry and fun makes Small's a most unusual place.

Down on the other end of Manhattan is Greenwich Village, with all of its odd and quaint places. Towering among all these odd places are the four that Don Dickerman himself created, devised, designed and built. I was very pleased to assist him materially in the building of the Daffydil Club. His other clubs, the Pirate's Den, which is ten years old, the Blue Horse, and the County Fair, are the most unique places of their kind. Dickerman is a specialist in artistic diversion and only he could create the type of place that he has there.

Dickerman is perhaps the most strait-laced night club owner and proprietor in the world; his clubs are all scrupulously clean in food, entertainment, music, and general atmosphere. He, more than anyone else, realizes just what the absolutely dry and refined night club is up against, as his places do a good business but are hardly worth the effort to keep them going. The Daffydil Club, which closed two weeks ago, was my own Sunday night hobby. It has been my pleasure to invite as many celebrities as I know and meet in the various theatrical fields down Sunday night, when we had a sort of amateur theatrical night with everybody doing a turn. Like the Cotton Club, it

The beautiful Central Park Casino (below), favored by the Four Hundred, presents a strange contrast to the usual down-in-a-cellar or over-a-garage club

Atop Mount Vesuvius Travelers Knew The Beloved Miketeer By His Voice Alone!

He Cried for Joy At His Welcome Home Party

That Old

By ROXY

The newest picture of Roxy (S. L. Rothafel) — taken aboard ship.

HELLO, everybody. It's good to be where I can say that to you again. I'm so happy to be home again I can't find appropriate words with which to express myself.

If you should ask me what I missed the most since I've been away I believe I would have to say it was "mike" and that old "gang" of mine. It's a great old world in which we live and I've been seeing a great many of its highly publicized "sights" but, do you know, the greatest sight of all was the one I saw from the deck of the steamship which brought me back to the United States. No, it wasn't the Statue of Liberty in the New York Harbor. It was a thrill to see the lady through the rain that night, but the thrill of thrills came after we passed her, and the little terrier-like tugs were nosing the liner into position alongside the pier.

Someone, I think it was Jacques Benjamin, my assistant who accompanied me on the vacation, said, "Look at that crowd on the pier." I ran to the deck rail as though pulled by a magnet, sensing that somewhere in the assembled throng there might be a friend or two who had braved the weather to speak a cheery word of greeting to this returning voyager. A friend or two, did I say?

The pier end took on the appearance of a misplaced stage-setting. That is, the carnival-like atmosphere prevailing thereon seemed misplaced to me. Surely, I thought, a steamship pier is no place in which to hold a fiesta. Tiny flags were being waved frantically by a hundred hands. Above the din of the noisy whistles I heard my nickname being shouted. Then, above the heads of the crowd on the pier, I saw a banner carrying this message, "Welcome Home, Roxy."

I don't remember much that happened after that. Honestly, I don't. I couldn't see anything clearly. I tried to brush the water out of my eyes. It wasn't rain which was interfering with my vision. I was crying for sheer joy and I didn't care who saw me.

The "gang" was there. Out there on the pier, in the rain. That old gang of mine! What a home-coming it was. Every employee of the theatre who could get away from his or her work had r the trip to the pier. Some were st make-up. In their anxiety to be pr when the ship came in they had ru directly from the stage to a taxi. T my idea of loyalty and, bless their he they know I'm a sentimentalist. S times I think they like to see me way to my emotions. But I don't n I saw drops of moisture sliding pell down many a grease-painted face. I knew they weren't raindrops, either

No matter what the philosophers you, I believe when all is said and d it's sentiment that makes the whole w akin.

My vacation? Oh, it was one of t things, you know, when a fellow has everlastingly at his job for so long he believes he should "get away fro all." And that's a funny thing. If have an idea that taking a vacatio going to get you away from it all afraid you're going to be awfully di pointed. At least, that was my exp ence.

Of course, I had a wonderful time. as I look back over my journeyings I the high spots have to do with pe rather than the sights I so often went of my way to visit.

There was that trip up to the cr edge of Mount Vesuvius. Ben an made the ride up in the cable-car fa trembling with excitement over prospect of seeing the cone of the g volcano. In fact, the tourists in car all seemed to be looking forw to witnessing an eruption, which, haps luckily for us, did not take pl Clambering out on the rim we loo over the scene and waited forty- minutes for something to hap

But nothing did happen and turned to me and said, "I don't th much of this show."

Now, rushing about Europe trying see everything worthwhile is rather ing at best and having spent three q ters of an hour waiting for a famous cano to do its stuff seemed like a terr

Gang of Mine

ROXY had been abroad for three months in the summer and fall. Most informally I dropped in to see him in his brary-office over the Roxy Theatre. It was my intention to tell he genial gentleman how glad the Radio fans were to have him ack at the microphone again, but somehow everything was eversed and I found myself listening to Roxy as he told me ow happy he was to be home again. My half hour with him as not in the nature of an interview. It was a happy-go-lucky iscussion of his vacation, highlighted with Roxy's anecdotes f seemingly trivial happenings—incidents which go to make fe so worth the living to this lover of life.

I wish you might all meet and know Roxy. He, in turn, ishes that he might personally meet and know every one of ou, too. He's that sort of a man. Perhaps I may be able to aint a word picture of the lovable, enthusiastic, sympathetic oxy if I let him talk to you—using, as best I can remember, the ords and phrases he used when chatting with me. I'll try.

Doty Hobart

ime. I guess we expected too much. ay, Ben's remark seemed quite ap- iate and I seconded it immediately "It's a complete bust."

strange voice beside me said, "You're Roxy."

rning, I faced one of the gentlemen e party of tourists. "How did you me?" I asked.

recognized your voice," he replied. , as he saw the puzzled expression on iace, he laughed. "Good Heavens, I've been hearing that voice on my speaker in my home in Battle Creek, igan, for several years now. I knew uldn't be mistaken." And with that troduced himself and the other mem- of the party. Various sections of Jnited States were represented by the group standing on the rim of Mount vius. And what do you think we d about? The "gang". Each and y one had some question to ask about ys Rice, Wee Willie Robyn, "Mickey" ee, Frank Moulan and all their other rites.

ere you are. In trying to "get away it all" and keep my identity a secret e sight-seeing I had stumbled right a real homey gabfest that lasted the cable-car deposited the entire y at the foot of the mountain. I "a good time was had by all." I I had a marvelous time telling those o friends from the States about the g".

ut I did get away from "mike". Not once did I get within twenty feet of a microphone while abroad. The closest I came to one was in Vienna. Ben and I attended a performance of Franz Lehar's operetta, *Das Land des Lachelns*, given in the Theatre Am Wien. From my seat in one of the stage boxes I spotted the microphone and learned that the operetta was being broadcast. It was a rather cheerful sight to see friend "mike" on the job and again my thoughts flew across the Atlantic to the "gang".

THE performance was a gala affair. On learning that I was to be present Franz Lehar conducted as only he can conduct his own work. The tenor, Richard Tauber, a great favorite in Vienna, was recalled innumerable times after his singing of *Dein Ist Mein Ganzes Herz*. Bows alone were not sufficient. Three times he was forced to repeat the song. The first repetition was sung directly to Franz Lehar, in the pit. Then Tauber embarrassed me by standing beneath the box in which I was sitting to sing, with appropriately changed words, *Dein Ist Mein Ganzes Herz*, to me! The third time he told the audience in song that it was all of his heart.

I'm sorry now that I didn't give more attention to European broadcasting, but as I have already told you, I went on a vacation to get away from it all.

Oh, yes, I did hear about an amusing program which is broadcast every noon from a restaurant in Copenhagen, Denmark. As I understand it this restaurant has an exceptionally fine orchestra and, ostensibly for the sake of the music, a luncheon concert is put on the air. Now it seems that this restaurant is a great meeting place for out-of-towners who are in Copenhagen for the day and while the government, which controls Denmark's Radio activities, prohibits the broadcasting of personal messages, these transient visitors have found a way to circumvent this rule. As the orchestra plays, the guests in the restaurant leave their tables and file past the microphone, stopping before the instrument to emit either a laugh, a cough, a sneeze or some other throaty signal by which wives, husbands or relatives sitting at home before the loudspeaker may identify them. The gentleman who told me this story insists that it is a very jolly affair.

Well, I have seen the Blue Danube. Perhaps this famous river may, at times, live up to its name but when I looked from my hotel window in Budapest in search of its lauded color it was about that of very good coffee.

A friend of mine sent word that he had made a luncheon engagement for Thursday, at which I was to meet a Princess. The message was delivered to me on Monday but I wasn't the least bit interested in Princesses on Monday and as the week continued my interest did not, I am ashamed to say, increase.

Poor Ben! How he must have enjoyed that stay in Budapest. He tried to cheer me up but I simply refused to get happy. Did you ever see a person who thought he was having a perfectly splendid time being miserable? If you have, then you know how to sympathize with Ben for I know I must have been the pest of Budapest those three days.

Gladys Rice, a favorite since the early days of the "gang".

You could never guess what brought me around to semblance of my normal self. It was a Gypsy band.

Thursday morning as I sat propped up in bed the door opened and in walked eleven Gypsies, each carrying a musical instrument. Now I don't advise any doctor to prescribe eleven Gypsies as being the ideal dose of medicine needed for an ordinary case of sickness but I always shall believe that the manager of the hotel, who was responsible for the appearance of the musicians in my room, decided that I needed drastic treatment.

And what do you think they started to play? Yes, you are absolutely right—*The Blue Danube Waltz!*

At the sound of the first strains I rebelled and my shouts had the desired effect of bringing that selection to a sudden and untimely finish. I begged them to play anything but that. And play they did. Wonderfully. Gloriously.

Wild strains of their folk tunes rang out in my room and, in spite of my determination to stay sick, I found myself well again. Literally, the magic of music had put me on my feet again.

Yes, I kept the luncheon appointment and met the Princess.

QUEER, isn't it the idea we have of Royalty? My own idea, up to then, had been that a Princess was one of these stand-offish persons before whom mere human beings like you and me must bow very low and, did Her Highness permit it, kiss her hand.

Perhaps some Princesses are like that but not this one. Of course, when I was introduced to the lady I bowed. But not very low. She didn't look a bit as though she wanted to see me bump my head on the floor. And she didn't offer me her hand to kiss.

What a regular fellow she was. We talked about music, dogs, golf and motion pictures, even as you and I. I told her about my family and she told me of her own life and of her husband, who is not a Prince at all, but a railway executive in Hungary. Of course I told her all about the "gang."

And that's the way it was during my entire vacation. The people I met meant so much more to me than the sights I went so far to see.

When we were in Berlin I dragged Ben out on a window-shopping expedition. From Unter den Linden we journeyed along Friedrich Strasse as happy as two kids on a lark. Here we could mingle with the crowds and no one would be liable to recognize us. Pasted on the window of a little restaurant I spied a bill of fare and paused to read it. The one item which commanded my attention was "sausages and mashed potatoes" and I must confess, after having lived on the best of the land at the various hotels, I actually craved sausages and mashed potatoes. I never remember wanting anything quite as badly before as I did a meal of sausages and mashed potatoes. And, furthermore, I didn't see how anyone could desire anything else that was on the bill of fare, so I insisted that Ben must also have sausages and mashed potatoes.

The place was fairly well filled and, as we were unable to obtain a table by ourselves, we sat with a very dignified bewhiskered gentleman who had just ordered his dinner.

Now, it is difficult for me to eat at the same table with a person and not strike up some sort of a conversation, and it wasn't long before the gentlem and I were chatting. Then came an change of cards. The one I received large and as expressive of dignity as the gentleman himself. It seems he a retired Obermeister from a little to not far away. I watched him as he r the cards we handed him.

VERY graciously Obermeister stated that it was a gr honor to meet "Herr Rothafel" "Herr Benjamine." And what do suppose we talked about? Believe it not, the principal subject was "he We learned that the water which g into the making of beer is responsi for its grading, which is why, accord to the good Obermeister, all beer is of the same quality. It all depends which part of Germany the beer is ma

And for once I actually was able "get away from it all." I'm sure h never heard of Roxy and how I did en my "sausages and mashed potatoes" I listened to his dissertation on brewi He was a great old scout but I'm gla don't have to wear the Obermeist whiskers.

Speaking of whiskers reminds me what happened as the steamer reac Quarantine on its way into the New Y Harbor.

Early in the evening I had gone to Radio operator's quarters and listened the program being broadcast from studio of the Roxy Theatre. It "gang" night and Milton J. Cross was charge. Familiar voices singing fami songs! In my mind's eye I could pict the studio in its nook high above stage and the realization swept over that I was really and truly back. T

The original gang, when Roxy first went on the air. Left to right; top, Eugene Ormandy, Melaine Dowd, Dr. Billy Axt, Mme. Elsa Str Louise Schearer, Frederick Jaegel, Yascha Bunchuk, Bruce Benjamin; seated, Carl Scheutze, Nada Reisenberg, Edna Baldwin, Roxy, B Ayres, Evelyn Herbert, Editha Fleischer.

Here's what you'll see when television comes—the Roxy Ballet. And on page 35 is another treat for your eyes—Patricia Bowman.

ard Milt say, come home. . We know re listening in where down ay. Welcome ." I was home! at was the start of a series of thrills from then on they came thick and

Quarantine reporters boarded the As the ship moved toward the River I talked with them and at ame time tried to pull into my very as much of the picture of the ap- hing New York skyline as I possibly . I wonder what I told those gen- n of the press? I have no recollec- of saying anything.

en, all at once one of the boys d forward.

SAY, Roxy, we've just vered a violinist who came over is ship with you. He's a steerage nger and has just learned that you board. He wants to meet you.

Come on, you! Here's Roxy if want to see him."

poorly dressed figure shuffled for- a violin case under his arm, his glorified with a set of whiskers outdid the Obermeister's. A pair arp eyes peered at me beneath an ouch hat.

ose eyes belonged to but one person world and I knew that person.

e next minute I had gathered the ist into my arms in a bearlike hug nust have driven the wind out of the lungs. They tell me I was shout- t the top of my voice, "Take 'em rno. I know you!"

was Erno Rapee. This orchestra ictor who has been with me so many had obtained permission to board hip at Quarantine and in an effort ve me a real surprise had disguised himself. But Erno couldn't disguise his eyes.

Then came the meeting of the "gang" at the pier. It's ten years now since the original "gang" made its first broadcast. There have been a lot of changes in personnel since then and many additions. It's wonderful though how a "gang" member respects his or her membership. They may leave for other work but when they are in town they never fail to drop into the studio on the night of a broadcast.

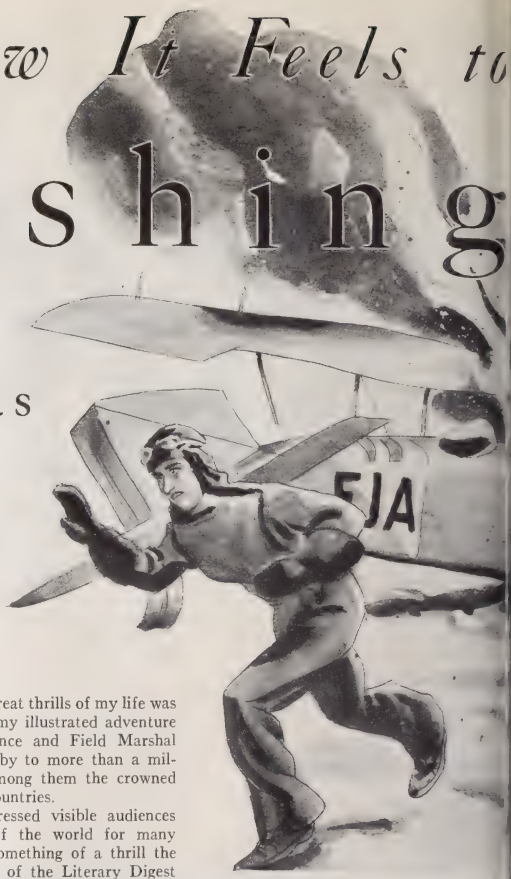
Just the other night as Harry Breuer was playing a xylophone solo I spied "Mickey" McKee, whose birdlike whistle was so familiar to the "gang" fans a few years ago, on the far side of the studio. "Mickey" is located in New Orleans now but during a recent visit to New York she had popped in unexpectedly to see the "gang." A fairly quiet reception in honor of her return was in progress but I caught her eye and motioned for her to leave the group and come over to the mike. Then I whispered to her, "Whistle the chorus of this number with Harry." The selection was *The Wedding Of The Birds* and without any hesitation "Mickey" whistled an obligato accompaniment. After the number was over I thanked Mickey for her impromptu bit and told the audience what had happened.

But that's the way with the "gang." They're loyal. Once a member, always a member. And I just can't help telling the listeners-in how proud I am of each and every member. If I can't be dignified (and who wants to be?) I can get sentimental. And if ever a man had something over which he can be sincerely sentimental I am that man over that old "gang" of mine.

. . . Yes, I know I'm watching the clock. The schedule here on my desk tells me that I am due at a "mike" rehearsal in five minutes. And mike is an exacting master. He demands punctuality from his subjects. In more ways than one—"what he says, goes." But I have learned that he'll work hard for you, too, if you treat him as a friend when making your contact with the great listening-in public. The reward for gaining "mike's" good will is both spiritual and practical. Of course you have to be sincere and dead on the level with him. You can't just use "mike" for a good thing. He's too wise. He has a way of going straight to the hearts of the people and if you don't succeed in touching those hearts genuinely, the fault is yours, not "mike's." He delivers your messages just as you give them to him.

HE'S helped me in so many, many ways that when I begin to check up on what he has meant to me I am convinced that he probably has been the most valued and indispensable friend in my long career.

Oh, yes. Before I rush away I'll let you in on a little secret. I'm planning to take the "gang" on the road for a concert tour. And Madame Ernestine Schumann-Heink has promised to accompany us. What do you know about that? Yes, she's one of the most loyal members of the "gang", bless her heart. But I must sign off or I'll get in Dutch.



"Goodbye, and God bless you."

How It Feels to be in a Crashing

By

Lowell Thomas

Description of His Most Thrilling Experience—when he was Almost Broiled Alive in a Blazing Plane

I ALWAYS had an idea that I would do a lot of traveling, and I often wondered when and where my big thrill would come. My travels haven't ended yet, so perhaps my most exciting experience hasn't happened yet.

My greatest thrill up to now did not happen in forbidden Afghanistan, or the frozen North or far-off India, as one might imagine. It came quite unexpectedly in romantic Spain in the form of an airplane crash.

Tied for second place are adventures and unusual experiences that began as far back as I can remember. Fourteen men were shot down before my eyes in the riots in the mining section of Cripple Creek, Colo., when I was eleven. A year later I saw some strikers bomb a train, blowing the cars to atoms and hurling their occupants in all directions. How many were killed I don't recall.

Then there were thrilling adventures in Alaska—far above the Arctic Circle, and the battles on the Allied fronts from the North Sea to Persia during the World War. Still etched indelibly on my memory are the historic conflicts in the Arabian Desert between Colonel T. E. Lawrence's wild Arab army and the hostile Turks. It will be a long time before I will forget a night back in 1919 when I was caught in the line of machine gun bullets fired by a group of German revolutionists in the streets of Berlin during the revolution that gripped the Central Powers following the signing of the Armistice. I was wounded, but not seriously.

One of the great thrills of my life was the telling of my illustrated adventure tale of Lawrence and Field Marshal Viscount Allenby to more than a million people, among them the crowned heads of six countries.

Having addressed visible audiences in all parts of the world for many years, I felt something of a thrill the day executives of the Literary Digest summoned me to the studios of the Columbia Broadcasting System in New York City for an audition for the rôle of their "Radio voice." For it meant that for the first time in my life I was to address an unseen audience, that no one would be present while I was talking. It was a most unusual sensation.

Each day brings me a new thrill—the thrill of preparing and presenting my nightly broadcast of "Topics in brief—the news behind the news." There is that same excitement, that same battle against time that one encounters each day in "beating the deadline" on a newspaper.

But the airplane crash in the south of Spain still holds first place. It was my narrowest escape from death.

IN 1926 my wife and I decided to go on a flying tour of Europe for the purpose of studying aviation and for pleasure. We spent seven months of continual flying over virtually every mile of Europe's new airways, covering more than 25,000 miles in every type of plane used on the Continent. It was the longest passenger air journey up to that t

From London to Asia Minor and b from Paris to Poland, from the Bal to Manchuria and from Moscow to S we flew through every type of wea with only one mishap—a nose-dive in lonely Spanish valley on a flight f Paris to North Africa. Mrs. Tho was my constant companion on t flights. It is a curious coincidence the only trip she did not make was flight on which the crash occurred.

Having just flown over Russia, to land and then to Berlin, my wife a sat down one day to discuss our destination. We had seen enough Germany for the time being and we a mood for adventure. Civilized c tries begin to get on one's nerves a awhile, and we had knocked abou the outlands long enough to like t best. As usual we ended by gro weary of hotel bell-boys, automats, ousines and movies, and experience craving for the barren wastes of Wa stan, the kampongs of Malaya or the

FALL Three Hundred Feet in Airplane

As the plane crashed to earth it burst into flames. We all dived head first over the tattered fuselage. Never in my life had I moved with such speed

tundra plains of the Far North. Well, where shall we go?" my wife d, travel literature in a pile before us. study of the library of air-route ers we had collected on our travels aled that there was a regular and irently quite satisfactory and com- ible sky service between Paris and occo. Morocco, it is true, is no upper azon or inner New Guinea; but still, ca is Africa. So to Paris to take an ca-bound plane.

OVER the river Elbe, a e forest, a fine chateau, a great plain, nall river—the Ober, and a few facto- and we were at Hanover, our first stop. m there to Cologne for another brief se, and thence to Le Bourget Field. was for setting off immediately for rocco, but Mrs. Thomas would have e of it. It was quite true that we e on a flying tour of Europe. There , however, one thing we had neglected; pping. Mrs. Thomas impressed this upon me. Here we already had been in Europe nearly seven months and she had not bought a single new frock or hat. It was all right to fly from Paris to Morocco, as we had planned, but now that we were back in Paris she was not going to hop right off again on the next plane. In fact, she was going to stay in Paris at her own sweet leisure.

"You fly to Morocco," she said, "while I flit about Paris."

And so it was that I started out alone on an aerial voyage, the itinerary of which was to be Paris, Lyons, Marseilles, Perpignan, Barcelona, Alicante, Malaga, Gibraltar, Tangier, Rabat, Casablanca, Fez, and return. That was the way the tour was intended, but it turned out somewhat differently. Because of her shopping tour of Paris my wife missed two forced landings, the second of which was the crash.

At Le Bourget Field I climbed into a Bleriot-Spad. It seemed like a toy in comparison with the big ships of the air in which we had flown for so many thousands of miles lately. Into the air we winged our way and were off on the first leg of our journey. Over miles of beautiful country with trim fields, graceful hills, towns nestled in valleys, lakes and chateaux we flew to Lyons. From there we continued on our way without mishap, making stops at Marseilles, Perpignan, Barcelona and Alicante for mail.

AT ALICANTE, in the south of Spain, we changed planes. After he had made a few adjustments, the pilot, Paul Noailhat, a mechanic from Perpignan, and I hopped into the plane and were off. We had traveled only a short distance and were about to fly over the jagged Sierra Nevada Mountains when something went wrong with the motor. It began to miss and knock and make weird noises, but despite this the pilot kept on

for several minutes until he sighted a flat stretch of desert. We circled round and round until Noailhat decided it was a fairly safe place to land, then came down.

As soon as we came to a stop, the pilot hopped out, pulled off a mask he had been wearing, his fur-lined boots and flying suit, and struck out in search of some habitation in order to telephone back to Alicante for a relief plane. Under a broiling sun, with dozens of Spanish peasants looking with wonder at us and the plane, the mechanic and I waited for the pilot for more than two hours. When finally he returned he brought us the news that he had found a telephone and that a relief plane ought to arrive shortly.

The three of us stretched out in the shade of the lower wing for another half-hour to get what relief we could from the furnace-like heat. While we were watching the antics of the Spanish peasants, who frankly regarded us as freaks, we heard the hum of the engine of the relief plane. A moment later we saw it circling in the cloudless sky—a mere glistening speck a mile above us.

Seizing a pile of faggots he had gathered, Noailhat held them under the engine, opened a valve and soaked them with gasoline. Then he ran into the middle of the level space where we had landed, touched a match to them and sent up a column of smoke as a signal to let the other pilot know the direction of the wind and where to land.

The second plane made a perfect landing. Out of it hopped the chief of pilots from Alicante and an expert mechanic. Instead of trying to repair our ship, they immediately switched the mail and all our baggage into their plane, the idea being that we could push on without delay while they could repair our disabled motor and then fly back to Alicante in our plane.

In fifteen minutes the five of us had transferred the mail, and Noailhat, the mechanic from Perpignan and I were in the second ship ready to take off. Our

Mrs. Thomas greeting her husband at the flying field.

faces by now were as red as fire from the blazing sun to which we had been exposed since early morning.

Waving adios to the chief of pilots and his mechanic, we went roaring across the desert. We had come down on a fairly level stretch of twenty or thirty acres, but just beyond were big boulders, stumpy olive trees and a mule. We roared nearer and nearer the trees, and it looked as though we were going to pick up the mule and take him along with us on our jaunt through the air. The plane gave no sign of leaving the ground, although we were running with the throttle wide open. It looked as though we were headed for a smash, the sort that Captain Rene Fonck had with his trans-Atlantic ship at Roosevelt Field. But Noailhat throttled down and switched off just in time.

Noailhat swung the plane around and taxied back to the other plane where he held a consultation with his chief from Alicante. Our pilot insisted that he had used every ounce of power in the engine. The chief then turned to the Perpignan mechanic who was sitting in the rear cockpit with me, and asked him if he was bound for Africa on company service and whether it would make any difference if he got out and waited a few days. Then he told him to get out and lighten the load.

But just as my fellow-sardine was throwing his leg over the cockpit the chief changed his mind, told him to crawl back, and ordered Noailhat to take a longer run this time. He said we ought to be able to get more speed with a longer run and thus manage to get into the air. If we could, it would be all right, he said. If we failed, the mechanic could get out and fly to Fez a few days later.

So once more we went roaring over the bumpy field. This time we seemed to have better luck. Two-thirds of the way across the flat towards the olive trees she bounced into the air and started to climb. My companion from Perpignan smiled and heaved a sigh of relief, because he was anxious to get on to Fez and had no desire to be marooned in the Sierra Nevada.

A second or so later we were about

as several minutes before the other
rmen whom we had left on the
ground when we started and the crowd of Spaniards arrived at the scene of the crash. They had been about a quarter of a mile away. At first the country folk stood around, wide-eyed, apparently too frightened to offer any help. They acted as though it were all part of some weird show they had come to see.

Our throats were choked with dirt and sand that had shot up over us. I tried to get the peasants to go for water, but they all stood around shouting to each other but doing nothing. The chief of pilots from Alicante and his mechanic, however, started off on the dead run.

As each minute passed, the injured mechanic, who had been sitting in the rear cockpit with his knees interlocked in mine, grew weaker and weaker and his face began to puff up. Both eyes were swollen completely shut. As the gasoline had emptied out on the sand by then and the danger of an explosion had been removed, I stretched him out in the shade of one of the smashed wings.

The drifting smoke from a pile of blazing faggots gave wind direction to the other pilot, landing to rescue us.

For the first five minutes or so after the crash I felt no effects from it whatever except that I was covered with a layer of dirt from head to foot. Apparently none of my bones was broken and I was not cut. I had been too busy vainly trying to do something for my less fortunate companions, to think of anything else. But now that the crowd had gathered around and the other two airmen had gone off in search of water, things began to swim before my eyes and I crumpled up a bit. My heart was pounding like a trip-hammer, and aches and pains were springing up all over my body.

Despite these bruises and aches, I felt a curious glow of exhilaration. I was hilarious and wanted to laugh, to laugh in that idiotic way I had on another occasion, when a dose of gas knocked me out on the Italian Front during the World War. And when I looked at the plane and saw how completely wrecked it was, I wanted to do a Highland Fling for joy. It seemed too good to be true that any of us could have been in that smash-up and climbed out of that crumpled-up pile of wood and metal alive.

PROVIDENCE certainly had smiled benignly on us, for our escape was about as miraculous as any escape could be. Our smash was of the kind that had snuffed out the lights for so many airmen ever since man first learned to fly. When you go into a nose-dive at *300 feet* above the earth, there is no chance in the world of straightening out your plane, and in nine cases out of ten you are in for it.

The Alicante mechanic, with his big bandanna handkerchief tied over his head like an Arab sheik, arrived in a little while carrying an earthen jug full of water. We poured some of it down the throat of the wounded mechanic, who had become unconscious. Then a motherly Spanish peasant woman moistened her apron and held it against his throbbing forehead and washed off the blood that covered his face.

Tony Cabooch (Chester Gruber) is putting the mazuma away—and how! Here he is below, being handed a velvet-lined contract by Sponsor President August Busch. And Phil Dewey, right, the tenor Adonis who sets feminine hearts a-flutter, puts 57% of his money into stocks and bonds—good ones, recommended by an investment service.

Preparing for

By Evans E. Plummer

OH FOR the life of a Radio star! Why? Well, it's this way. If figures don't lie—and the statistician isn't a prevaricator—I have it doped out this way:

That Radio stars save 60 per cent of what they make. Play that on your midget receiver and worry not over the declining days of those who amuse you via the loud speaker. I know because I asked them. And the answers also showed that the savings are split in this fashion:

Buying homes, 16.6 per cent of income; other real estate, 1.64 per cent; insurance, 7.5 per cent; annuities (this British habit hasn't become popular here yet), 0.4 per cent; other savings not itemized, 8.4 per cent.

Not being an expert trust officer or budget designer, I really can't say whether the above spread is just the way it should be. But as a financially irresponsible magazine writer who has to depend on his poor wife to guard and guide his editorial revenues, I find myself really unable to choose strong enough words to express my amazement at such thrift and providence.

When assigned to the nosey title of this yarn, "What Do They Do with Their Money?", I began to get worried over the advancing ages of some of the air's best wisecrackers and what was to become of them. However, after taking such a sock on the button as this 60% savings news, I have stopped my anguish. Radio stars are taking care of the future. I see very plainly that I will have to tread the primrose (?) path toward becoming a luminary of the ether, that is, I'll have to if ever I am to achieve a lifelong ambition of having the president of the bank (that now tolerates me) snap into it every time I enter or leave his polished brass stronghold and humbly shout across the marble to me, "How'd'ya do Mr. Plumber," or "Come again, Mr. Plummer," as the case may be.

Well, the averages are very interesting. Still, I have a catty idea that the figures some of the airshots gave me are ideals rather than facts. In other words, they gave me the kind of a budget they were TRYING to keep, rather than the one they really WERE keeping. Even so, their intentions are good. Good intentions—hmm, what is that proverb about good intentions? Well, never mind about that right now.

BUT back to the monetary battle. Now, after saving 60 per cent of their money, how do you suppose the big mail-pullers toss away the remaining 48.8 per cent of their coin? What's that? You say 60 and 48.8 per cent equals 108.8 per cent which is 8.8 per cent more than the average income? Yes, I know, but that is the way the average figured out, so I suppose some of the boys have incomes or something they haven't told Deke Aylesworth or Bill Paley about. Probably holding out on them—or the wife.

Anyway, clothes take 7.7 per cent; rent (for the non-home buyers), 12.6 per cent; food, 15 per cent; transportation, 3.2 per cent; recreation, 1 per cent (so you see they are so hard at work they don't have time to spend anything); extension of education, 2 per cent; church and charities, 7.4 per cent.

Another interruption, sorry. You and Rosie O'Grady know that no soprano or contralto can get along with only 7.7 per cent of her income spent on clothes. You are right. The ladies were a little careless about giving me detailed information. The figures are averaged from answers to questions put to married and [illegible] males who sparkle in the ether. T[illegible] ladies, while they admitted they lik[illegible] figures and work hard to get an[illegible] them, plus the awesome info tha[illegible] spend a "terrible" lot on clothes, [illegible] and facials, refused to get person[illegible] name definite per cents spent hith[illegible] thither, here and yon, on this and th[illegible]

And get a living room full of t[illegible] told you I was worried about the [illegible] of the crooners, announcers, balla[illegible] radactresses and batoneers. I was s[illegible] ried that I asked them what they th[illegible] the "popularity life" of a Radio sta[illegible] and what the same was for an air [illegible] pal not starred. Guesses on the ste[illegible] ran from two to ten years and ave[illegible] 4.25 years. Guesses on the prin[illegible] span of working years varied from [illegible]

The Three Bakers, below, are so smart they might be called the three wise men—Baker Pratt, is putting it away with a P, Baker Sherman is Socking it in the bank with an S, and Baker Rudolph is Repeating their tactics with an R. And Mary Hopple, left, took out voice insurance and is saving dimes besides.

e'd have to spend hours over our
A & A told me, "to give you an
ed budget, but anyway, here is the plan. We try to live modestly and both of us spend a great deal of time at home, as you know.

"We try to save as much as we can, and fortunately for us, we believe we started our plan of saving properly. Our savings are distributed over government bonds, common stocks, insurance, annuities and trust funds. All investments are endorsed by one of the largest banks in Chicago, which bank is our advisor, and all are made in reliable companies who are the leaders in their respective fields."

Now for the wisdom and consultation of the Three Doctors—pardon me—the Three Bakers of CBS who have been tickling you since the first of the year, but have kept grin wrinkles on the faces of Chicagoans for half a dozen years. How about it, Baker Rans Sherman?

"Life is short. Get it while you can. And put it in the sock!" quoth Baker Sherman meaningly, for Sherman a year and a half ago happened to have his money in the wrong bank—the one I borrowed from—and it crashed. of course.

What Do They Do With Their Money?—

They Bank 60 per cent of their Income, they say, because they Think the Average Working Life of a Radio headliner is only Eight and a Half Years!

"What do I spend for clothes? Very little," he added. "Maybe seven per cent, which includes a fur coat for the wife."

"In several years, if necessary," kidded Baker Pratt, "I can go back to 'plumbing'. I lived before the advent of Radio and can do so again if the bubble ever bursts—which I hope it doesn't."

And Baker Rudolph simply answered, "My plans for a 'rainy day'? Holding onto it while I get it."

"Pratt, in his jovial dumbness," Rans Sherman spoke for the trio of funsters, "spoke of his days of plumbing ere Radio took him to its bosom. Joe Rudolph has always been a musician and can depend on that, and I always have been in the insurance business, so I guess I can go back to that in a big way, I guess.

"Is broadcasting a safe business? Will it last? To the first question I answer: It's safer than a helluva lot of other businesses Pratt and I have seen go up in smoke. To the second: Radio is one of the soundest and promises to be one of the longest lasting businesses ever developed. If it goes sour on us, we can always, as a unit, go vaudeville for at least a year, and the dough (not speaking as a baker) would be excellent.

"However, we all three are socking it away. Personally, I keep myself so tied up with mortgages, and keep buying good securities on time, that my best friend couldn't borrow five bucks from me. I never have that much to spare!! It is my own ambition to take my wife and family (of one) to Europe and travel for a few

years before we get so aged and wobbly we won't be able to enjoy Paris or climb the Alps. You'll find that of those artists in Radio today that were on the stage yesterday, many will continue their lax, easy come, easy go ways, but then they never could realize that there might be a rainy day in their lives."

Cryptically replying to my questions, the clever author and actor of Sunday at Seth Parker's and Uncle Abe and David —Phillips H. Lord—showed the exact average of sixty per cent going into savings. Of this, buying a home takes 20 per cent of Lord's income, stocks take ten per cent, insurance ten per cent, and other savings total twenty per cent.

"I believe," Lord said, "that the preparation for a 'rainy day' is all important, because if it is not prepared for, it always hangs over one like a gloomy fog."

Here's what another comedian—or perhaps I should say philosopher—believes about saving. You know him—Tony Cabooch of Anheuser-Busch, whose right name is Chester Gruber.

"You ask me, what I do with my money? Well, I've provided my family with a nice cozy bungalow furnished to a king's taste, bought ample insurance, and expect to offer my daughter Florence (recently graduated from high school) a college education.

"By applying the gifts that God has so kindly blessed me with, I am receiving a princely compensation for my Radio work, and, you bet, I am getting a real kick out of life by helping my less fortunate brothers and sisters. Charity has always been my middle name, for I had many a hard knock in boyhood and know just how it is.

"After all, I would rather help someone else than amass more material things than I really need. One of the most enjoyable pieces of work I ever did was broadcasting for the St. Louis Star Clothing Relief Fund last Christmas to get clothing, shoes, food and fuel for the poor.

"Retire? Why I *never* expect to quit. When a man retires he doesn't live any more! The inspiration and cheer that I get from my fan mail keeps me in condition physically and mentally, and you can tell the world that 'Tony Cabooch' will keep 'pooshing 'em up' as long as they make Radios—and when a fellow receives over 3,000 letters in one day, well, would you quit?"

No sir, Mr. Gruber, I certainly would not quit, especially if I was paid $1,500 a week, no sir!

If your set pulls in the 50,000-watters, especially WENR, you know Mike and Herman, the Irish-German giggle squad represented out of the studio as Arthur Wellington and Jimmie Murray. One of the few budget reports I didn't tabulate was theirs. Upon adding up Mike's I found he was spending 265 per cent of his income and that Herman was doing Mike about one hundred per cent better. Not being so good at higher mathematics, I couldn't reach those figures.

However, Mike replied seriously, "When a man has reached my age, the thought uppermost in his mind is 'What is to become of me in my old age?'. The answer is to save your money, and you won't have to depend on charity or relatives—so little Arthur is saving, but, at the same time, giving a little."

And his partner, Herman, said, "Every now and then Herman buys an umbrella for the 'rainy day', and he already has quite a jardiniere full of them—if his friends haven't borrowed them and forgot to return them."

Enough of the comedians, philosophers and males. What about the lovely ladies? Let's ask Jessica Dragonette, prima donna of the NBC Cities Service Concert, and reported to be the highest paid in e... iness. How about it Jessica?

"I don't own a home and am templating buying one soon. My circumstances are more conduc... 'chasing rainbows'. I think I am ... aggerating when I tell you that ... cent of my salary goes into study ... I consider excellent investment ... better work and fresh performan... stantly.

r answer to my money problem," Jack Smart, "was put on the air he masquerade of Joe's troubles ecember. If you remember, Joe got reformed of poker because he shirt. There was a lot of truth that fiction. But if I was thrifty, ould I do with the lucre? I don't what I'd put it in because bonds l estate are just names to me, but worried about that because I never y money to spare anyway."

fellow! He'll have to learn the om Amos 'n' Andy. But how about mit's—Frank and Julia (Sander- of CBS and NBC?

h Julia, "Would save my money, ink I would, if the fashions didn't so often. So instead of stocks, I cash in (buying) stockings, and of bonds and banks, it goes into es, powders, paints and pins." While and Radio partner, Frank, said, "I r about a week after every new Why? Oh, just to buy beer when es back. Seriously, however, the outgoes into various things— real estate, savings and insurance. se, I don't worry about my checks ulia can meet the mail man first."

ONE more family—the By the time this article appears t I hear rumors that the "Smith " of WENR will possibly have hain. The family is a big one, dad and author, Harry Lawrence, ifferent slant on "rainy days,". Af- laining that he is unmarried, let's m philosophize:

"Thrift's a habit like cigarets or pee-wee golf. Nurse it till it becomes a habit and it's practically painless. A pocketbook with a double chin is the nicest kind of upholstery against socks of a 'crool' world.

"I'm no authority on saving. By accident I once saved, but the bank's blonde cashier got another job, and I haven't saved a nickel since. Save your pennies until you have a dollar and then go out and spend the dollar. There are no pockets in shrouds, as Conan Doyle used not to say. The road to the hereafter carries passengers but no freight. Why save it and have the agony of leaving it here? Who's going to simonize your tombstone with tears because you've left them a thousand or two in your will?

"Save for your old age? Heh, heh, I'm leffing. You can't eat caviar with china grinders. You can't see Ziegfeld's cuticle cuties with glass eyes. You can't make whoopee on crutches. Spend it now and have a lot of fun along with making the country prosper."

After listening to Lawrence, I'm inclined to elect him to the post of chief advertising copywriter and propagandist for the "Buy It Now—Give Men Work" campaign. But here's a fellow who won't let you forget about the moist days in the future—Phil Dewey, NBC vocalist. What does a tenor do with his money?

Well, Dewey puts about 7 per cent into real estate, 57 per cent into stocks and bonds, and 5 per cent into insurance; a total of 69 per cent of his income. The rest of his budget shows: education, 4 per cent; recreation, 3 per cent; clothes, 4 per cent; rent, 6 per cent; food, 5 per cent; transportation, 4 per cent, and charities, 5 per cent.

"MY plan, endorsed by an investment service, may never make a rich man of me," said Dewey, "but at least I won't die in the poorhouse. A bank president some months ago said to me, 'What a splendid opportunity you have for building up a solid estate and a steady income for yourself and family. Why, when I was your age, my salary was ——.' He didn't consider that when I reach his age, my singing days will be *finis*. However, he was right in that I have a chance to build up a variety of investments for that inevitable 'rainy day', and that is what I am doing—building an income."

Another minstrel of old-time songs, folk and hill, is Bradley Kincaid of WLW, WLS and NBC. Kincaid shows about 60 per cent savings and replied to me thus:

"Being of Scotch ancestry, I am a great believer in the principle of saving—building an estate. No one is fair to himself or those dependent upon him, who spends all he makes. The more he makes, the more he can spend—and should save. Plenty of insurance is in my estimation a mighty good investment, but I have all I can carry,—agents not wanted.

Now let's look over a few announcers. Here's Jean Paul King, of the Chicago NBC staff, and an up-and-comer or I'm no prophet. Said he:

"I'm saving my money for a home—an English cottage which I'm going to have one of these days. I know one can't last forever. Some of these days I want to retire and when, or if, I do, I want to try to write the 'great American novel'. Radio is a young man's business—we all grow old—so I save."

HERE'S a voice you know—Bill (W. G.) Hay, the chap who starts and ends Pepsodent's Amos 'n' Andy skit six nights a week over three different chains of NBC stations. Having known Bill for years on end, way back from the time he began trilling the world and his r's from Hastings, Nebr., I know he's not rolling in wealth. Several eastern newspapers reported he was cut in on the fabulous A&A income, one paper even saying he drew a third. He doesn't. In fact he gets not one red cent from Pepsodent, A&A or NBC. Hear his reply:

"The report on my income is vastly exaggerated. I use my money to pay my bills so that I can look my creditors in the face. Of course, I expect Mrs. Hay to outlive me, so I carry plenty of insurance. I said *plenty*, and that means that solicitors need not apply.

"I don't own an automobile, but do try to contribute my share to the charities. What is a Radio star's 'life'? Just as long as he can shine and scintillate."

But don't worry about Wayne King. There's a lad who has it all "figgered" out. You see, King is a business man as well as a baton waver. He was handed a C. P. A. certificate by Valparaiso University, and before playing the notes, he used to count and add them. The only chance Wayne has of going broke is possibly in having made a mistake in his arithmetic. No C. P. A.'s ever do that.

Who could be more appropriate to conclude this message of thrift than Lowell Thomas, the Literary Digest newscaster, who has a habit himself of ending his nightly mike appearances with a "punch line" or trick story? Thomas, America's most interesting lecturer, world famous adventurer and story finder, usually takes the vast fortunes he has earned and throws them back into the next uncertain but alluring exploration.

The game is exciting but costly. Sometimes the returns are good; sometimes not nearly equal to the investment. But listen to the globe trotter himself tell you:

"I hope to keep rambling along until I go for my last trek to explore the Far Country whence no traveler ever returns. In the meantime I'm trying to sock it away. But I've tried that before—and I'm a rank duffer at saving.

"As for the 'life' of a Radio star, I haven't the remotest idea, but I like to think they all ought to be at their best when they are between sixty and eighty like Chauncey Depew, Voltaire, and hosts of others who are famous in history."

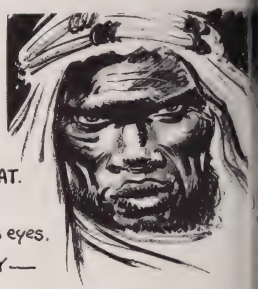
You Can Believe It O

says Robert L. (*Rip*) Ripley

BELIEVE it or not, RADIO is not a new word. The word was pronounced and defined RADIO nearly two thousand years ago. The word goes back into the archives of ancient history and is to be found in the Talmud, the literal translation reading: "Radio . . . a voice that goes from one end of the world to the other".

The ancients' prophecy has come true with the Radio now reaching far out to the end of the world, entertaining and enlightening millions of persons of the two hemispheres.

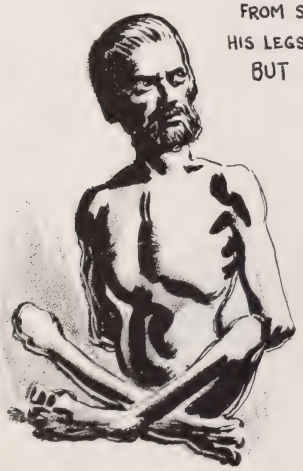
To me the Radio is a most important medium for reaching the followers of the "Believe It or Not" drawings; a vital factor in imparting a wealth of interesting information brought down from the shelf of time and history.



Radio audiences today demand accuracy and reality of their performers. So in gathering material for the "Believe It or Not" programs, I have had to wander to the far ends of the earth in a relentless search for oddities of an unbelievable nature. My travels have already taken me through seventy-nine different countries, and there are still many foreign lands to be conquered.

Crashing through to the remote corners of the two hemispheres, my wanderings have brought me face to face with the Ever-Standing Men of Benares, the Human Inch Worms, the Hindu Faquir who held his hand aloft for fourteen years until birds built a nest in his palm; the Moroccan emperor, Moulai, who had 83 brothers, 124 sisters, 2,000 wives, and 888 children; nail-men whose nails grow until they pierce their palms; and sky-facers, who hold their faces rigidly upwards until unable to bend them back.

GETTING off the main highways of Greece, we find the "City of No Women", a city of 7,000 where no woman has ever set foot; we find the city in which the people have been wearing mourning for 600 years in memory of one man, and the town of 25,000 people confined in a single house. And then some bystander reminds us that there is a curious Greek custom decreeing that men shall wear skirts and women [illegible] And we have some material for a [illegible] It or Not" broadcast.



Among the South Sea Islands [illegible] of Queen Vaekhuha, the Cleop[illegible] Helen of Troy of her country ro[illegible] one, who evidently believed in tr[illegible] riages. The South Pacific queen [illegible] no less than 400 husbands. Som[illegible] lates the story of the Sultan of t[illegible] vidians, the only person in his [illegible] privileged to become obese, a[illegible] subject growing fat risking in[illegible] execution.

In Switzerland we find that the [illegible] was a Swiss Navy, one of the [illegible] navies, which navigated on the la[illegible] ering three frontiers, and that t[illegible] yet several retired Swiss admiral[illegible]

Famous Cartoonist Tells How He Collects "Queeriosities" For The Radio Audience

(Written especially for Radio Digest)

I TRAVELED through seventy-nine different countries . . .

I SAW the city of 7,000 where no woman has ever set foot

I PRESENTED to the Radio audience the female Floyd Gibbons, who talks 8½ words per second, without stuttering

I SAW the nail-men whose [illegible] grow through their palm[illegible]

I PROVED that Wash[illegible] was not first president [illegible] United States

I RECEIVED a 47-word [illegible] sage with an address ... [illegible] back of a two cent stamp

All over the world Robert L. Ripley pulled out his pencil, rested on the nearest trunk and drew "queeriosities."

her disillusionment. I find that I will
to explode the story of William Tell
ugh the microphone, because we dis-
r that there were never any apple
s in the state where Tell lived.

p through sunny France to its great
ropolis we find that the original name
Paris was Mudlands, so they called
French "Frogs". More air-chatter for
weekly broadcasts on "Believe It or
".

By DELVING into the
s of history I have been able to gather
eriosities for Radio fans. And some
he real facts of history tell us that
umbus never set foot on North or
th America; his name was not Colum-
but Colon; he was a Spaniard and not
Italian, and never wrote a word of
ian in his life so far as records and his
y are concerned. Turning a few pages
find that the Declaration of Indepen-
ce was not signed on July 4th; that John Hancock was not the author; that Massachusetts is not a state, and that there are only 44 states in the Union.

One of the pet American illusions was shattered over the air only after long research—that Washington was not the first President of the United States. The traditional story may be all right but John Hanson, of Maryland, was the first President. Although there had been meetings of the Continental Congress from 1774 on, it was not until 1781, when Maryland signed the Articles of Confederation that a union of all the original thirteen states became an actuality. John Hanson, who signed for Maryland, was then elected President of the United States in the Congress assembled in 1781. George Washington himself addressed Hanson as "President of the United States" in reply to the latter's message of thanks upon the occasion of the victory of Yorktown.

When I told a Radio audience some time ago that baked beans did not originate in New England, that they had baked beans in Egypt thousands of years ago, that King Tut-Ankh-Amen issued his admonition to his priests forbidding them to eat baked beans under pain of death, it seemed that the entire population of Boston and environs swarmed down on me angrily, besieging me with rebuking letters, demanding proof. And once again the truth is far stranger than fiction. The same sort of thing happened when I went on the air and stated that John Paul Jones was not an American citizen, that his name was not Jones and that he never commanded an American ship. The lull in a storm of indignant letters came only after adequate proof had been sent out.

Of the interesting personalities presented on the "Believe It or Not" Hour, Cygna Conly, only rival of Floyd Gibbons, exponent of rapidity in speech, brought down the house. She spoke at the phenomenal rate of 8 and ½ words a second, reading Lincoln's Gettysburg Address in 32 seconds.

Zaro Agha, the 156-year-old Turk, whom I discovered several years ago in my travels, was brought before the microphone and with wild gestures in the affirmative showed no signs of Radio fright.

Fan mail arrives at the "Believe It or Not" office at the rate of 2500 letters a day and more than one million letters, from every nook and corner of the two hemispheres, arrived during the past year.

They came in batches and alone—from newspapers carrying the "Believe It or Not" drawings, from Radio fans, from the diamond mines of South Africa, from the jungle fastnesses of Brazil, from all the great cities of the world, from towns, villages and hamlets. They poured in from lonely squatters and settlers in the remote corners of the earth, from the European countries, the Far East, the lands of the South Seas, and from the length and breadth of the United States.

Mail arrived from towns of almost unbelievable names and addressed in all sorts of ways. A letter postmarked Santa Claus, Indiana, slipped through the mail one cold December morning and almost broke up the equilibrium of the office, while others with the stamp of Hell, Norway, and Darn, Ohio, received their share of comment.

Recently a Radio fan sent in a 47-word message with an address, all written on the back of a two-cent stamp. It came through the mail from San Francisco to New York in regular order, without an envelope. This is the smallest letter I have ever received.

The Radio letters that arrive every day come from people in all walks of life. Early morning strap-hangers and commuters as well as retired business men write in. Government officials, politicians, and business executives as well as the laboring man send in letters.

Most of the mail is inspired by questions of a "Believe It or Not" nature, aroused by the declaration each week of oddities and strange phenomena over the air. They send in their queries, thousands arriving every week. Simple little puzzles and conundrums receive much attention.

Is a Comedian Funn

MRS. FRED STON

Opinion o

WHAT'S Fred Stone like at home?

On the stage he is a bubbling, irresistible boy, full of pranks and acrobatic tricks. A flash of his smile and the audience succumbs. From coast to coast, in small hick towns as well as sophisticated, blasé Broadway, he enjoys magical popularity.

Comedians have a reputation for being tragedians at their own fireside. Morose. Temperamental and bad tempered. Their gayety and laughter is a mask for the world. Their wives and children know a different story.

But five minutes with Mrs. Fred Stone dispels this legend so far as her famous husband is concerned. Fred Stone is a happy, warm-hearted man on and off the stage, in and out of the calcium's radiant glare. He is adored by his wife and children just as much as he is by his audiences.

When Mrs. Stone speaks of her husband, there is an affectionate look in her eyes. The look of a woman who not only deeply loves her husband, but is deeply loved in return. She does not say it in so many words, but it is evident that she feels she is married to one of the finest and kindliest men in the world and that her marriage is a fairy tale come true—the kind in which the Prince and Princess marry "and live happily ever after."

Certainly the hand of Destiny was in their meeting. Both of them grew up in Denver. She, as Allene Crater, was the daughter of one of the most prominent business men in town. She knew nothing of Fred Stone, born in a log cabin on the outskirts of Denver. Each traveled a different path in life—but both had their eyes on the theatrical firmament from their earliest childhood.

Then, when Fred Stone was starring with Dave Montgomery in *The Wizard of Oz*, it so happened that he had considerable trouble with the part of the leading woman. He had to engage, in succession, seven young women. The director offered the part twice to Allene Crater and she refused it. The third time she accepted it, and when she stepped into the show as the eighth leading woman, she little dreamed that the shuttle of fate was flying fast, weaving a glittering fabric of her life.

When Fred Stone learned her name, he immediately remembered her as the pretty blonde girl who used to drive a pony cart in Denver. They talked about home and the old ranch life. That night he invited her out and it wasn't long before they found that they thought and felt about each other in very much the same way.

Certainly if Fred Stone had traveled the world round, he could not have chosen a more ideal mate. Mrs. Stone is a charming, cultured woman, with a tolerant mind, and a nimble sense of humor. S is modern and progressive in her i but yet she has an old-fashioned vie marriage. She possesses a high sens responsibility toward her nuptial v She has never hesitated to place her band and children before any other i

est in life, even when it meant curt ment of her career.

One can readily believe her, theref when she quietly states that there rarely been a word of dispute or alte tion in their home. That her husband she are just as eager to be together they were in the first year of their m riage.

"Fred Stone is an intrinsically gener man," she said when discussing the r sons for their marital harmony. "It especially true where money matters concerned. There is nothing so hur iating for a woman as to have her husb dole out money to her in bits. To qu

red has an easy-going disposition and ally lots of fun. The children adore with him. There is always some- doing when he's around. In all the I've been married to him, I've never chance to become bored. The great inventive ability that he exhibits in his plays is just as facile off the stage. He's always thinking of things to do. He's never quiet. If he isn't absorbed in something definite, he becomes restless. That's why he always has a dozen hobbies in which he's interested."

Sometimes these hobbies prove to be expensive propositions for the family purse. For example, at one time Fred Stone was imbued with the idea of raising polo ponies. He bought 2300 acres of land, a whole carload of Texas mares, and a stable of full-blooded Arabians. This came to grief, through misplaced confidence, and the next thing that engaged his mind was a tree nursery. He wanted to plant a forest of pine trees and let them grow on his 2300 acres of land. He ordered five thousand trees and for once in his life nearly bored his family to tears by quoting tree catalogs. Long before it was necessary, he hired a man to dig five thousand holes where he wanted the trees planted.

"Naturally, after weeks of talk," related Mrs. Stone, "we were agog to see these five thousand trees, and we all lined up on the ranch to await their arrival. You can imagine how shocked we were to see someone bring in only a bundle of little switches."

Mr. Stone likes sports of any kind, and he enjoys going on hunting and fishing trips, usually with Rex Beach, his brother-in-law. When he returns he has great tales of adventures with which to regale his family. At one time he chartered a boat for the coast of Greenland and he brought back enough bear skins for every room of the house.

DURING these trips Mrs. Stone goes to the country or the seashore with the girls. Whereas other wives might harbor a grievance at being left alone, Mrs. Stone encourages her husband to takes these jaunts. She believes it is refreshing for his mind and spirit to be able to go off with other men and forget the routine of life.

"I don't think any husband and wife should see each other every day of the year," she said. "Each should have a brief vacation to enjoy alone and when they return, to tell each other their experiences. Constant association can frequently smother a marriage to death."

Fred Stone was keenly disappointed that he didn't have three sons instead of three daughters. He had planned a wild and woolly ranch life for them. But today he thanks whatever gods there be

that he has three daughters. He's petted and lavished with care by them. They even baby him. Since he met with his airplane accident he has never been alone. At present he's on the road with *Ripples*, and since Mrs. Stone is at home with the youngest daughter, Dorothy and Paula take turns in staying with him. Neither will ever leave him alone.

He's brought his girls up, however, as though they were sons. From their earliest days, they were taught to ride and to swim. Out on the ranch they were rough Tomboys and wore boys' clothes. But once they were in the home, they changed to frilly dresses, assumed their manners, and became ladies. With such daughters, Fred Stone is satisfied all around.

He has always loved to play make-believe with the girls. At one time, at the instigation of Douglas Fairbanks, they all became Knights of the Round Table. Mr. Stone was King Arthur and Mrs. Stone was Queen Guinevere. They addressed each other in old English and wrote their letters on parchment. While Mr. Stone was on the road, the children held "the forte" for him. When he returned home, his knights, together with the neighbor's children, prepared to give him a royal welcome. The expensive French dining-room was turned into a gloomy banquet hall, lighted by candles in beer bottles. With swords held aloft in their hands, the knights sang the *Battle Hymn of the Republic*. Fred Stone, as King Arthur, entered with solemn dignity. He was arrayed in pajamas and a high top hat. On his feet were huge rubber boots. There was a rubber dagger in his belt and his chest was bedecked with medals.

The knights did not giggle at this sight, but the Queen had a strange muffled expression on her face. When called upon for a speech, she could only issue strange sounds.

THIS, of course, was long ago, but there is always a game of some kind going on in the Stone menage. Their world of make-believe does not end with the falling of the stage curtain. They live in it all the time.

Fred Stone has never scolded or disciplined the children. He may try to reason with them; but he usually prefers to let Mrs. Stone handle the job. They have always been given everything they want, therefore, if Mrs. Stone refuses them anything, they know there must be a good reason for it.

They all make it a point to be together at dinner hour. Conversation is always kept general and light. No problems are discussed. No arguing or bickering is permitted.

"Many people," Mrs. Stone told me, "bring their worries and grievances to the table. Every meal is a scene of sad discord. But our family has made it an unwritten law never to discuss anything disagreeable at the table. The result is that our dinner hour together is the big occasion in the day. I know that I will always look back to those hours as the most delightful ones in my life."

MR. STONE had not wanted Dorothy to go on the stage. She was a frail creature and he thought that the life would be too hard for her. But from the time she could walk, she danced.

As a baby, she traveled with her parents on the road. Mrs. Stone would place her on a high chair in her dressing-room, up her golden curls, and give her make-up box to play with. She ado experimenting with grease paint on face. As she grew older, she would st in the wings and watch her parents p After the performance she would them with questions.

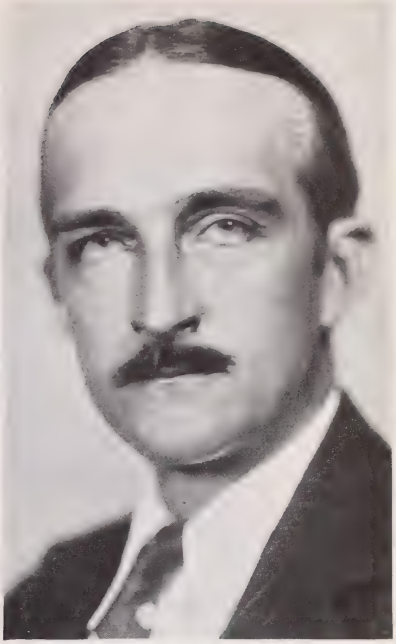
One day, when she was eight years she put on a red shirt, a pair of trous an old pair of shoes and blackened front teeth. She came into the breakf room, where her father was eating, gave an imitation of him. There w tears in Fred Stone's eyes as he watc his tiny daughter. He knew then t he could not deprive her of a stage ca and from that day on he took her in h and gave her the best that his years experience had to offer.

Everyone knows how Dorothy t Broadway by storm on the day of debut. She is now a star in her o right and while she has receiv dazzling offers to head her o company, she will not consi anything that will part her fr her Dad. However, with Pau the second daughter in the c and Carol, the youngest, im tiently awaiting her turn, it inevitable that Dorothy will h to go on her way alone.

The three girls are very g chums. Mrs. Stone is v proud of that. For she wo rather they would quarrel w anyone else, if necessary, t with each other. Dorothy a Paula have many beaux, but t are never so delighted as wh they can persuade their Dad get into a dress suit and ta them out.

"Fred Stone loves to see the feminine members of his family well-dressed and pays bills without a murmur"—what a husband to have!

"FRED isn't terested in social life," M Stone said. "He likes to ent tain a few friends in his o home, or spend his leisure o doors. When we're in New Yo he enjoys going to see the oth shows. But that's all. He's man with simple tastes and leads a very simple life. I doesn't care for anything ost tatious in his home. He dislik formal, elaborate meals. O menus are always plain, h wholesome ones."



Another thing he dislikes is shop. The very thought of g ing into a dry goods store, ter fies him. Once in, he wou rather purchase anything t salesman offered, than gainsa him. That's why anybody c sell him anything. He wou like to buy a dozen suits, all t same material and color, and l them do for a year. But M Stone wisely begs to go with hi

Front Centre For Radio Drama

Putting The Spotlight on Vernon Radcliffe, Who'd Rather Starve in Dramatics Than Feast in Business

By Harriet Menken

Vernon Radcliffe, power behind the scenes of *The Radio Guild.*

MANY people I meet turn deaf ears, not to mention dials, to Radio drama, so that being a flag waver in this field tates a crusading spirit. I think egative reaction has two fundaa causes. The first is the nature vironment of the particular inds I contact in this dizzy medium l living. They are sophisticated Yorkers who, with a shrug of the r, an incredulous lift of the eyeknow that after the last liqueur en quaffed, they may bend their ps to the legitimate theatre at oor. And so Radio drama is for a boring or non-existent factor. en when they become Radio-wise the theatre of the air will only an accessory for these individuals.

I do not hold with tle clan of serRadio thinkers enthusiasm peoI corners of the with success for drama. In large we do not need rt to the air for peare and Shaw, rry and O'Neill. o one who has ad the millions ers from fans or d through the h of the coun- knows what Radio drama means to the people well on sunlit hills, in quiet dales, id tropics, in desert spaces, in leafy . in struggling hamlets, in mining and Main Streets where their only and Camilles must come to them he theatre of the air where the ce may listen to their drama while buttons on baby's dress or smokeir evening pipes, without fee, at n of the dial.

other reason for the attitude of thumbs down on Radio drama is, I think, the lack of knowledge possessed by cocktail-drinking, jazz-loving New Yorkers of what is really on the air. Radio is a new art and much of its drama is unspeakably poor, perhaps even a mite worse than the weak sisters in plays the legitimate stage gives us. Most plays, books, and movies fall below our desires, and the same may be said of the infant, Radio drama, but it has this advantage, that it is an infant and not too young to learn.

While there are several dramatic hours on the air worthy of mention, the outstanding figure today, I think, in this field is Vernon Radcliffe. Mr. Radcliffe has given you two hours: *The Radio Guild* on Friday afternoons at WJZ, in New York, and the network of the National Broadcasting Company, and the *Shakespeare Hour,* Sunday nights, also over the National Broadcasting Company Chain.

HARRIET MENKEN, *Author of this article, is an outstanding figure in the New York Radio world. She conducts a weekly Theatre Column at Station WOR, and is on the staff of the Evening World. Haunts the studios, has interviewed almost any Radio star you can name.*

He has given you in the *Radio Guild* such plays as: *The Climbers, The Importance of Being Earnest, The Romantic Age, Cyrano de Bergerac, An Ideal Husband, Michael and His Lost Angel, She Stoops to Conquer, The Sea Woman's Cloak, Mr. Pim Passes By, The Green Goddess, Hedda Gabler, The Doll's House,* and dozens of others; such playwrights as Ibsen, A. A. Milne, Oscar Wilde, Pinero, Clyde Fitch, Dunsany, and St. John Ervine. In his *Shakespeare* program you've heard *Romeo and Juliet, Macbeth, The Tempest, Twelfth Night, Hamlet, Richard III,* and *The Merchant of Venice.* Whoever you are reading this article and almost wherever you are, you may tune in twice this week and hear theatre at its best.

For Mr. Radcliffe gives it to you that way. When I've attended rehearsals I've watched him direct with a certain spiritual, rarified quality—a trace of idealism —a spark of life—a hint of romance, that makes his theatre of the air glowing and alive, and gives other directors on Broadway and off something to emulate.

Vernon Radcliffe is tall, with acquiline features, a sensitive face and a smile that illumines an otherwise serious mien. He was born in Brooklyn in 1889 where, at Adelphi Academy, when only fifteen, he was chosen to play E. H. Sothern's rôle in the senior class play, and he continued his theatrical proclivities at Amherst College, where he became president of the Dramatic Association. On leaving college Mr. Radcliffe took a Broadway engagement as an actor in *Life,* a Brady production. Belasco subsequently offered the young aspirant a rôle, but the war thundered along and he joined the Signal Corps. When peace was declared, Mr. Radcliffe entered his lucrative period financially. He went in the advertising business and became successful, but the theatre beckoned, and when the Neighborhood Playhouse offered him a rôle he couldn't resist. Then began a period in which the now ether director decided to

(*Continued on page 96*)

Radio Rallies Nation to

BETTER TIMES

Rich and Poor Answer Call to Fight Hosts of Fear—Millions for Defense

LATELY America has witnessed a rebound of her invincible war time spirit. The Enemy has been put to rout mainly by the aid of the most powerful weapon the world has even known.

We were invaded. The silent hosts of Fear swept over the land from city to city. Markets retreated to the trenches. No markets, no production. No production, no work. No work, no pay. No pay—destitution, eviction, hunger and the End.

Into the night of this tragic scene crawled the Red Worms of Russia spreading their poison slime of hate and conflict.

Brave men and brave women picked up the faltering banners. Rich men and poor men stood shoulder to shoulder and bent to the fray. Employers pledged to keep their payrolls intact. Many launched vast new enterprises to give employment to additional thousands. Workers tithed their wages for months to come to share their earnings with those who had no work. "Buy now" became a battle cry to sweep the lines of merchandise into action.

And what was the greatest weapon in the hands of the righteous?

Radio. It knocked at every door, put courage in every heart, filled the war chest with ammunition and turned the breadlines into wagelines.

The Emergency Aid Committee organized the country with quotas to be raised. Broadcast time was volunteered right and left to sound the call "to arms". The largest cities were the ones toward which the unemployed flocked. New York was asked to raise $8,000,000.

Almost at the first call came an answer from the aged philanthropist, John D. Rockefeller and his son John D., Jr. They turned over a check for $1,000,000 cold cash. Then other large donations were received. The women were asked to raise $500,000. Women of wealth and personally untouched by the pressure of the times gave freely not only of their money but of their own personal efforts.

In the final drive Mrs. Vincent Astor stepped to the NBC microphone and spoke as follows:

Mrs. Vincent Astor, who appealed to Radio audience for aid to the unemployed in New York area.

By Mrs. Vincent Astor

IT IS a privilege for me to speak in behalf of the wonderful undertaking of the Emergency Employment Committee, particularly from the point of view of the thousands of women and children whose husbands, long out of jobs for no fault of their own, today have some reason for smiling in the face of the widespread economic depression.

To those of us who have been following the daily papers, there [illegible] a tendency to think of the situation [illegible] terms of unemployed men. We for[get] perhaps, that the hardest battle aga[inst] poverty, under present conditions, is b[eing] fought by the women in the homes [of] destitute by the inability of the bre[ad] winners to get work.

It is not difficult to imagine what th[e] women are up against. While their men [go] out each morning to search for work, [the] mothers must sit at home, caring [for] babies and small children, nursing [the] rapidly diminishing stock of food wh[ich] stands between them and starvation, [or] cating the demands of the landlord [for] the long overdue rent.

But even more serious than the phy[si]cal needs is the mental strain which t[hey] must suffer. While their men at le[ast] have the activity involved in their sea[rch] for work, these mothers spend hours [of] the day in feverish anticipation of [the] news the night will bring. Will John [or] Jim, when he returns in the evening, [re]port that he has a job? Or will he co[me] into the impoverished home with [the] same despondent look on his face wh[ich] can mean only one thing—another fru[it]less search?

Put yourself in such a woman's pla[ce]. Isn't there the possibility that you, l[ike] her, might gradually tend to place t[he] fault for undernourished, ill-clothed ch[il]dren upon your husband, rather th[an] upon the economic situation that l[as]made him jobless for many months [in] spite of himself?

Put yourself in the husband's pla[ce]. After tramping the streets day after da[y] without success, you'd hardly feel li[ke] returning nights to a home where yo[ur] appearance would mean repetition of [the] story of discouragement and hopele[ss]ness—where all you could see would [be] the faces of your children and wife gro[w]ing more wan each day for lack of foo[d]. Empty stomachs, heatless rooms, illne[ss] despondency—these are the facts yo[u] would face. It is in the undermining [of] the family morale, as much as in t[he] physical want, that the tragedy of unem[-]ployment lies. It is in the strugg[le] against both that thousands of depen[d]ent women today are bearing the greate[st] burden.

There is another person who cannot be disregarded in this present unemploy[-]

men are not receiving "charity",

but are working their way. They are sober, industrious individuals who, in the present unfortunate situation, do not want alms but only an opportunity to earn honestly enough money to tide them and their families over the cruel winter months when unemployment is most serious. In creating jobs for these men, and paying them for the work they do out of the fund now being sought, the Emergency Employment Committee is providing directly for the relief of thousands of women and children.

I appeal particularly for support of the Emergency Employment Committee's effort for $8,000,000 in behalf of the women and children who will be benefited by the provision of jobs for their husbands and fathers—in behalf of the mothers who see their children becoming undernourished and ill for lack of food, warm clothes and heat—in behalf of the children who, at a time when they should be receiving wholesome food essential to their growth and childhood happiness, are hungry and cold.

* * *

Mrs. Astor's talk was eminently successful for the money poured in immediately after. In about three days New York had passed the $8,000,000 quota and the sum reached $8,250,000 from that momentum. Both of the two great chain systems gave $100,000 each in time to the drive. Following is the statement of the National Broadcasting Company to RADIO DIGEST:

"IF THE time on the air which the National Broadcasting Company and its vast network of associated stations have donated to agencies seeking to relieve the distress of the unemployed had been sold commercially the total would be almost $100,000, NBC officials estimate. Talks by men and women who spoke under the auspices of President Hoover's Emergency Employment Committee, the Women's Emergency Aid Committee and the Salvation Army Committee which was responsible for the game between the Army and Navy football teams have been heard in broadcasts which were presented gratis by NBC. Manufacturers of Philco batteries paid

the Salvation Army committee a huge sum for the privilege of sponsoring this broadcast.

"The roster of speakers who have been heard in these efforts to alleviate the lot of the unemployed includes the names of people who are nationally prominent. Ex-Governor Alfred E. Smith, Owen D. Young, Seward Prosser, Arthur H. Lehman, Colonel Arthur Woods, Thomas W. Lamont, His Eminence Patrick Cardinal Hayes, Grantland Rice, George Gordon Battle, Lady Baldwin, Mrs. Franklin D. Roosevelt, Gerard Swope and numerous others have spoken.

* * *

Similarly the Columbia Broadcasting System reports as follows:

"BROADCASTING time worth approximately $100,000 has been contributed to the cause of unemployment relief by WABC and associated stations of the Columbia Broadcasting System during the last two months, it is revealed by a survey of this voluntary service just completed.

"A total of nearly ten hours of Columbia's most valuable periods on the air, ranging in installments from the three and a half hours devoted to the coast-to-coast broadcast of the Army-Navy football game for the Citizens' Committee of the Salvation Army to five-minute periods used by local relief agencies, has been donated by the system to help the unemployed since the national drive to better conditions started.

"Men and women of national prominence have been enabled to voice appeals for aid for the cause through the cooperation of Columbia, among them Secretary of War Hurley, Secretary of the Navy Adams, former Governor Alfred E. Smith, Mrs. August Belmont, Senator Dwight W. Morrow and many others."

* * *

In Chicago practically all stations contributed liberally with time and talent. One of the first reports received by RADIO DIGEST *was from WLS, the Prairie Farmer station. It reads as follows:*

"A CHARITY Radio circus and barn dance for the relief of Chicago's unemployed was staged by WLS, the *Prairie Farmer* station to an overflow crowd, at the International Livestock Show amphitheater, in Chicago's stockyard district.

"Because a Radio station like WLS serves not only the rural people, but the city folks as well, *Prairie Farmer* has launched this type of benefit show to relieve a metropolitan situation," stated Edgar L. Bill, director of WLS. "In past years with certain critical periods of suffering among the people of the midwest, WLS has turned its facilities entirely to the task of securing help from those individuals more fortunate.

"A total of more than $365,000 has been raised by this station during such work. This has been turned to the relief not only of such national emergencies as the Mississippi flood, but also to local conditions."

Seats for more than 15,000 spectators were available in the giant amphitheater. An admission charge of 25 cents was made, all the proceeds going to charity.

Beginning at eight o'clock the parade of talent before the audience and the WLS microphones brought some twelve staff acts, a male octet, two quartets, two old-time dance bands, a girls' trio, and a brass band. Among the popular Radio stars appearing during the entertainment were Hiram and Henry, comedy songsters; the Maple City Four quartet, Rube Tronson and cowboy fiddlers, Arkansas Woodchopper, yodler; Renfro Valley Boys, instrumental duo; Doc Hopkins, old-time ballad singer; the Cumberland Ridge Runners, fiddle band; the Little German Band, Hal O'Halloran, barn dance announcer; Swift Rangers, Ralph Emerson, organist; John Brown, pianist; Steve Cisler, chief announcer; Marching Men, male octet; Charley Stookey, farm program announcer; the Chicagoettes, girls' trio; and Eddie Allan, harmonica player.

In the center of the big arena a stand was erected for the broadcasting. Decorated with shocks of corn, bales of hay, and farm machinery it lent atmosphere to the barn dance setting. This stand was flanked on either side by two large wooden dance floors where eight picked couples performed the old square dances. A loud speaker system was hooked up to carry the music and talk to every spectator.

* * *

Our Chicago correspondent investigated the leading stations in that city and found that all were on the firing line. Radio Station WENR contributed both cash and time. It delivered $7,000 in cash to the relief of unemployed and time equivalent to $5,400, making a total of $12,400. The Daily News station, WMAQ, in a series of 15 day and night programs contributed time rated at $12,000. Stations WIBO, WGN, WBBM, KYW with others have put the total well over $100,000.

In Detroit Mr. B. G. Clare writes as follows:

"MORE than $22,500 worth of broadcast time has been donated by the five Detroit Radio broadcast stations in the interests of aiding unemployment, it has been revealed by a close check.

"Station WMBC, owned and operated by the Michigan Broadcasting Company, leads the field with approximately $15,000 worth of time donated during the past 18 months. Relief of unemployment was the aim and ideal of the late "Jerry" Buckley, whose nightly broadcasts and political comments are said to have caused his death at the hands of unknown g... The WMBC fund is known as th... Buckley memorial, presided over by ... Frank Murphy and two promine... troit business men. According ... Clark, station manager, approx... $10,000 in cash has been receive... the Christmas holidays, and mo... $20,000 worth of food and clothi... in to aid the cause.

"WJR, the Goodwill station of D... during the past few weeks has ... about eight hours of time on the a... value of $700 per hour. A m... broadcast was given on Wednesda... cember 17th, with an appeal for f... be directed to the station. Mor... $2,100 was pledged by the listeners. ... gether, close to $2,500 has been c... uted by followers of WJR."

* * *

One of the most optimistic respo... the RADIO DIGEST'S *line of in... came from E. H. Gammons, vice-pr... of the Northwestern Broadcastin... WCCO, Minneapolis. He writes:*

"WE ARE very ha... say that as yet it has been unnecess... WCCO to make any particular app... relief for the unemployed, for th... ditions in Minneapolis are probab... best of any point in the country as ... unemployment and actual poverty a... cerned. Our Community Fund ... which takes care of all charities here ... over its mark this fall by more than ... 000. Business is good out here a... aren't crying."

* * *

Reports from WGAR, WJAY, W... and WHK, Cleveland, and WLW-... Cincinnati, indicate that this and ... Ohio city broadcasting stations have ... on the alert and actively engaged i... tressing that sector.

The same may be said of the St. ... area where Harry L. Ford says th... stations are contributing time and ... as well as cash. Tony Cabooch, w... heard nationally, from KMOX, ha... only been broadcasting but driving a... the city picking up bundles for the... One thousand KWK listeners were ... shalled to provide assistance to one ... sand needy persons—that was a real ... army.

On the Pacific Coast our Dr. Ral... Power says that broadcasting has ... about $100,000 for the unemployed. ... reports that conditions are apparentl... so severe as in the East. All stations ... Seattle to San Diego, however, are ... donating time or have offered their ... ices.

Thus the greatest weapon for pea... for war has gone through the first ti... its power fulfilling all and more tha... fondest expectations of its friends. I... is "doing its bit".

Eva Le Gallienne

MISS LE GALLIENNE is the director and founder of the Civic Repertory Theatre in New York City and frequently is heard in notable dramatic broadcasts over the chain systems. You may remember her best as Nora in "The Doll's House" over NBC.

Mary Smith

THERE'S a name for you! But there's only ONE Mary Smith like this Mary on the dramatic staff at WLW, Cincinnati. Wait until you see her on your televisacle. She's getting ready to make her bow visually over the air in the very near future, so just be a little patient.

Patricia Bowm

Blue Monday

CHECK and triple checkers for Al (Silas Solomon) Pearce as he shoves William (Prof. Hamburg) Wright into a corner during the Blue Monday Jamboree at KFRC, San Francisco. And there's Pedro (Eugene Hawes), Lord Bilgewater (Monroe Upton) and Edna O'Keefe with two double dark blue shadows, Tommy (Lem) Monroe and Arnold (Lafe) McGuire, for color effect.

Margaret Kappler

YOU just have to, that is, you really do have to hand it to old WEAO of Ohio State U. for being the true collegiate broadcaster. And the drama —the Scarlet Mask series, we mean— it's excruciating and everything. Peggy, you know, Margaret Kappler, is the sweetheart and the boys all rave about her. Here she is as Violet Shadrowe.

Russell Pratt

RUSSELL PRATT besides being a Radio comedian of the first rank is also a very popular story-teller to the little Topsy-Turvians of WMAQ, Chicago. Wonder what he's explaining to little Beth and Jim?

David W. Guiom

WHEN he sat down to the piano, ırew his high-heeled boots under the ıddle, and cocked back his big Stet— ɔbody laughed. They knew Dave ·uiom could ride them keys from ıapsodies to ragtime like nobody's usiness. You hear him frequent on ıe NBC range—he's a real cowboy.

YOU can't keep a goo
man cooped up in opera. S
they took Mr. Tibbett and mad
a Rogue out of him in the sin
ing pictures—and now he h
traveled a step farther, wit
mike, to become one of th
Radio clan over the NBC—an
how the ladies love him!

Lawrence Tibbett

...nna Kaskas

EVERY time she sings this fair-haired Lithuanian lady of WTIC, Hartford, Conn., scores a new triumph. She left a successful concert career in Europe to win America. She has been featured a number of times over the Columbia system—have you heard her?

Richard Gordon

QUICK Watson—here he is, Sherlock Holmes in person. You who have heard his voice over the NBC during the series of Sherlock Holmes adventures have doubtless wondered many times about the personal appearance of the famous sleuth—here he is!

Lorraine, Erma and Thelma Ashley

YOU may know these three charming sisters as Sally, Irene ar Mary at WGN, Chicago. Once they were known as the Prair Daisies at WLS. They are admirably suited for trio singing and pla ing—and they write and take part in moving pictures too.

Romeo Greene

YOU hear this full blooded Tuscarora Indian regularly over the CBS on the Carborundum program. His name comes from an ancestor known as Green Blanket because when he came to trade furs at Fort Niagara he always chose a green blanket for compensation.

The Mikado

WHEN KHJ at Los Angeles presented "The Mikado" recently they selected costumes to make the artists feel the parts they represented. They appear here—Kenneth Niles, as "Nanki Poo"; Gogo Delys, as "Yum Yum" and Lindsay MacHarris, as "Ko Ko".

Martha, Connie and Vet Boswell

THESE three sisters are high-lights in Pacific Vagabonds, on the NBC Pacific work. They sing in sparkling tempo and e acquired an audience that manifests self through the mail enthusiastically.

Sandy MacTavish

THIS bewhiskered gentleman of the heather- is one of the most popular features of WCHI, ago. Sandy MacTavish has the real burr that denotes a broadcasting Scotchman.

Thora
Martens

ONE of the Western stations has thrown a challenge to all th other broadcasting stations, claiming it has the best looking as we as the best sound producing feminine artists in America. In Chicag WENR answers the challenge with Thora Martens, their Heaven Blues singer, as a starter in the contest.

NOT many great manufacturers are fortunate enough to have their wives get out and boost their products. E. H. Maytag of the Maytag company is the exception. Mrs. Maytag graciously steps up to the microphone and tells lady listeners as one woman to another how to make a pleasure out of wash day.

UNMASKING

The Ne'er Do Well

The Mystery Man of KROW! Who Is He? Where Does He Come From and What is His Name? He is—but Read the Story

By HELEN SPAULDING

LEARN how to be the life of the party in ten lessons. Be Popular!"—so read the alluring advertisements, but—

"Ne'er Do Well," that mysterious gentleman of Radio Station V, Oakland, California—that lazy mentalist and soothing crooner, never music lesson in his life, and yet lashed across the Radio world of acific Coast in a most astonishing r. In less than a year and a half the microphone he is probably one e most popular of the young inal Radio entertainers.

croons, he soothes, he sentimentalizes ll but hypnotizes his auditors. He many programs of his own comns! He fingers the keys softly he talks consolingly to someone uble, or sends a cheery birthday g, or maybe bucks up someone written him while blue and downd, and then, when his listeners are t the right mood, he trails off into r of those tunefully caressing melodand, well—he's just about saved y for at least a couple of folks and everal thousand others off, feeling with the world.

"Ne'er Do Well" is probably one e most mysterious of Radio stars. e knows his name. He comes and quietly to the studio, chats a bit, cheerily in a way that sends little ing thrills up and down the spines e girls in the office—for he is and "awfully good looking" they Then he goes into the studio, and the door!

locked studio—deep shadows and uggled up intimately with "Mike" here you have the setting for the r Do Well." When he plays and it's alone—not a soul in the room t's understood around the studio.

"Ne'er Do Well" first heard about , me, when he was in the sixth grade schools of Minneapolis, Minn., his home town. The things that could be done with music intrigued him at once.

"It took me three weeks to pick out a tune on the piano," he said. "I nearly drove the family wild, but I finally got it. Then Dad and Mother took a hand and helped me out with other tunes. You see, my folks were musical. Mother used to sing in choirs and Dad played for country dances. Sometimes he was the whole orchestra. He could pound out some pretty good music on the fiddle, accordion or piano. After I learned that first tune, picking out music came easier and I soon began to play quite a bit. Then they put on programs at church and school entertainments and discovered I could carry a tune pretty well, so sometimes I'd be on for a song, and sometimes I'd be perched up on a couple of big books, so I could reach as high as the keys, and I would play some little ditty!"

In the meantime—to go on with the career of this amazing young fellow—time passed, to use a trite phrase—and we find that he's completed a year at prep school and is ready for a business career. Just about then the Panama Pacific Exposition was being held in San Francisco, so the "Ne'er Do Well" went West and captured second prize in the National Typing Contest, doing something like 132 words per minute. He also cornered a job and did court reporting, stenographic work and became private secretary to quite an important personage.

"When the War broke out I enlisted," he said, "to go to France for big adventure. Somebody found out I could do some fancy typing, so I was assigned to duty with the General Army Headquarters in San Francisco."

Someone else found out he could sing, and night after night he (you see he was not known as the "Ne'er Do Well" in those days) was sent to theatres in a radius of several hundred miles to sing. He made a great appeal, this good-looking youngster in his soldier uniform, and he sang his audiences into a high patriotic pitch. Thus he did double duty.

"BUT they couldn't let me go across," he adds shamefacedly about his War career.

Until a year and a half ago the "Ne'er Do Well" had never been in a Radio station. He didn't even own a Radio. One night a friend asked him to pinch-hit on a program. The "Ne'er Do Well" demurred. The idea of playing before the microphone and to an unseen audience appalled him. He was persuaded, however, and, to tell it in his own words—

"It really wasn't so bad. I just forgot there was an audience. I sort of lose myself when I play anyway. It was really

(*Continued on page 101*)

A CHALLENGE!

TURN to page 67 and take a good look at the pulchritude that adorns KROW in Oakland.

It is an open challenge, and no stations are barred. RADIO DIGEST will be glad to receive the answers to the challenge and publish them

STRIKES—*Luck* *of* B. A. Rolfe

THE MAN Who's Been Havin' His Ups and Havin' His Downs—From Millionaire Down to Rock Bottom And Up Again To Successful Orchestra Leader

YOU know Benjamin Albert Rolfe as a jolly, amiable fellow who doesn't worry about counting his calories and who does a mighty good job of directing a most unusual jazz orchestra.

But if you haven't heard his story from beginning to end it will amaze you to know how many different kinds of pies the adventurous "B. A." has had those celebrated short, pudgy little fingers in. And what he still dreams of doing.

It reads like a Horatio Alger story. Let's begin at the beginning and not put the cart before the horse. Picture "B. A." himself, sitting back with the inevitable cigar in his mouth. (Of course, it really *should* be a Lucky Strike!)

And picture him looking very much like a beaming Santa Claus ready to shower the world with a particularly happy present. No matter how busy he gets he seldom loses that Kris Kringle beam. His story should be told as he told it—with his head back and a reminiscing look in his eyes. He began:

"I was born in Brasher Falls, N. Y. in 1879. That makes me fifty-one, you see. Not so young. Not so young! Oh, well. You don't have much sense till you're fifty, anyway. Especially sense as to the value of money, which I have had much of and lost. Maybe I'll learn from now on."

THAT musingly. Then:

"My father was Albert Benjamin Rolfe—my name reversed if you'll notice—and he was a musician too. So was mother. I was educated between high school in my home town and a Catholic convent. I am not a Catholic, however.

"My school days were very much broken up by the fact that I was one of those pesky little nuisances known as a child prodigy. Believe it or not, but I was only six when I gave my first concert on an alto horn before I was large enough for a cornet—it was in Chippewa Falls, Wis.

"It is strange that the outstanding memory of that eventful night at the skating rink where I made my debut is that on the table beside me were hot gas lights.

"I was just short enough to get the full benefit of the heat and I f... though I were scorching. ... came so naturally to me, ho... that I had the usual childis... of self-consciousness and mi... well have been tooting my h... the parlor back in Brasher ... so far as stage fright was ... cerned."

In 1885, at six years of age, little Benjamin Arthur Rolfe was alto horn player in his father's band.

Here Rolfe stopped, and s...

"Father had the skating ri... chestra. At six and a half ... the alto horn player in H... Independent Band. I must ... looked like the band masco... was father's organization t... played with the band three ...

"Then father decided to ya... around the country. He wa... leader of the band and orc... with John Sparks Circus. ... those were the days! Imagin... that would delight the heart ... small boy. And those wer... days when circus trouping w... cus trouping.

"WE TOURE... Pennsylvania mining towns ... other places. Such adve... Life! Sometimes even yet ... homesick for the smells o... circus and life in the tents a... rickety wagons.

"In 1891, at the age o... father took me to England ... Hardie and Von Lear's Fr... Drama. I gave concerts in E... too. The frontier show made ... hit in England because it ... novelty.

"The only other thing E... had seen at all like it was B... Bill. The show carried an I... Band of eighteen as a specia... elty. I remember that they ... make more noise than a white ... of fifty. Father got along ... with the Indians. He is an honorary ... ber of the Mohawk tribe today.

"After we had played in Engl... year the folks decided little 'B. A.' ... do with a little more schooling. So ... brought me back to Brasher F...

. can get hold of some of those old stills
hand you a laugh! In summer I ran
siness in New York and in winter in

California. I was active in pictures five years, letting my musical career slide entirely by.

"Then I proved fundamentally a good musician by resigning. There is something about a musician that makes him love to resign. I threw it up because the company consolidated with Metro and I got mad! That's always an excellent excuse for resigning—getting sore about something."

It was here that "B. A." admitted he made a fortune in pictures. He grinned and took us into his confidence:

"I made plenty of money—goodness knows! A mint of it—and lost it. I had no money when I left California and pictures and decided to try England and pictures. No doubt you've heard of unfortunate marriages where the girl married a man because she thought he had money—and the man married the girl because he thought she had a fortune.

"Well, truthfully, that's what happened in England. I bluffed these people into thinking I was affluent and they played the same game on me. When it came to a show-down we made the fatal discovery that neither of us could float a picture financially. You can't promote a big company on a shoe-string. I found that out!

"I NEVER could hang on to money. I was so interested in the producing angle dollars meant nothing. They didn't even interest me. As I said before, you have to be at least fifty in some cases before the value of a dollar begins to sink in.

"Real showmen are always gamblers, anyway. I've never known a really artistic person to be saving. And if I hadn't joined that foolish army of independent producers I wouldn't have gone under in 1920. I was busted higher than a kite when I came back to New York from merry old England. It didn't look so merry then. But luck comes and goes."

It was from a friend a little later that we picked up a thread of the Rolfe career that he withheld during the long confab about his life. It was that he "made a fortune and lost his shirt during the Florida real estate boom."

PLUNGING into it with the same gusto he plunged into movies and music, again he was the artist and couldn't hang on to his money. He could take a dollar and make five out of it. But—keep it, never!

After that lesson the still undaunted "B. A." decided to "promote myself for a change."

It was then that he had the courage to start a jazz band in a Chinese restaurant in New York—The Palais d'Or. He not only put over the restaurant but got on the air and started "making an effort to make a name for myself by trying to be different."

In telling of this, the jovial gentleman opined:

"And, of course when you start trying to put yourself over people suspect that you are after notoriety. Funny, isn't it?"

There is no doubt it took a lot of courage for the artistic Rolfe to mix in the atmosphere it became necessary for him to mix in in order to "make good." But, he pulled the restaurant up by the boot straps with him. Both became celebrated. And, letters began pouring in from Radio fans. Lucky Strike tried scores of orchestras before selecting Rolfe.

As happy looking as appears the famous director he is really discontented and like a fish out of water. He said so himself—then explained with his hearty laugh:

"You know about the fellow who said he'd look up a steady job if his boss would let him off long enough. Well, that's me!"

The Rolfe life dream is:

"I want to found a native American school of music. Something typically American. Oh, of course that is out of order and sounds like a foolish dream. I enjoy my jazz orchestra of course and I wouldn't want to give it up. But it is fundamentally, an altogether different kind of musician. Or, perhaps I should say I am two kinds of musician.

"I realize that it took the old masters 1600 years to develop Bach. I realize America could do the same job in fewer years. And Radio is the one medium. The only really native American music we have developed are Gershwin with one little phrase and Cadman with his American Indian music."

Rolfe grew a little wistful:

"I guess, at that, it would take me years to do it even a fountain and I'd be a centenarian by the time. But, the medium of radio it could be done. So I have no conception of our musical expression is."

"B. A." has another dream. As a dreamer, he has the ideal he'd like to have a whole flock of juvenile orchestras in larger cities in the United States. His reason is very interesting one. In his own words:

"This racketeer business is beginning to alarm me. Such babies as these to be growing into outlaws! The undoubtedly, the small boy's love of showing off. Turn his energy and this desire into safe channels and you are a hero.

"Now, a small boy loves to toot a horn. Why shouldn't he toot a saxophone or cornet—make his noise on a musical instrument. My idea is to round up the bad boy gangs from the street corners and turn their desire to make a noise to attract attention into a jazz orchestra. Give them a public place and the right light to show off in."

AND Mr. Rolfe may be right at that. It sounds rather reasonable. If you can't make the little rascals stop and turn them into symphony conductors—make B. A. Rolfes out of 'em.

There may be those among you who feel, however, that the rat-tat-tat of a machine gun couldn't possibly be any worse than the toot-toot-toot of a saxophone.

Rolfe is one of the most interesting directors at NBC to watch in the studio. I have never seen him use a baton.

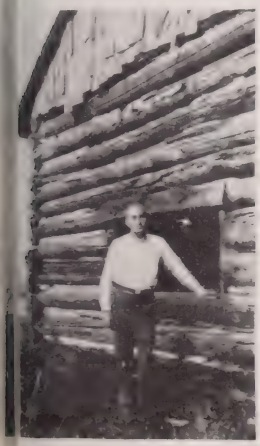
(*Continued on page 105*)

Rolfe's Independent Band in 1885. The leader in the big shako, at the left, is A. B. Rolfe, Sr. Next to him stands A. B. Rolfe, Jr., cornetist, brother of the famous leader. Fourth is Mrs. Rolfe, mother and clarinet player, and fourth from the right appears little Benjamin, dignified by the title of alto horn player.

The Magic Carpet of the OZARKS

By Alice Curtice Moyer-Wing

Alice Curtice Moyer-Wing



s do come true—sometimes. And so ches. That is why the cities are with eager-eyed boys and girls, men omen who have deserted the isolation n and mountain cabin to make their last to the City of Youthful Dreams ometimes—disillusionment. But to housands who have been banished to n the wilderness by force of necessity choice has come the fulfillment of too. Radio has wrought the miracle. tter reproduced below paints a vivid of what Radio means to one lonely in a remote place of the world.

MAYBE you would like to know how an Ozark native feels about the Radio, and just what it means to the far-removed of the hill country.

ong my earliest recollections are s of an Ozark homestead, where a young father cleared the land and ly young mother kept our rough

The Gobbler Hunter

An Ozark Settler's Cabin

plank house shining and homey for us.

The clearing was the playground for my brother and me. We watched its growth with keenest interest, the forest crowding back little by little and day by day, under the constant warfare waged against it in the homemaking of a pioneer family.

We did not venture beyond the clearing in our play. The scream of the panther and the howl of the wolf told us in plain terms just who it was that still claimed the forest and we did not dispute with them. We even loved the sound of their voices and the shivery feeling it gave us evenings when gathered safely in the light of the big blaze in the fireplace and listened to the review of the day and the stories father told us: Tales of his trip to the city, 200 miles away; stories of his boyhood home in an Eastern state where he hoped to take us to visit some day. And the fairy tales that nobody has told so well since. When he had told us all he knew, he told them over again, often adding little thrilling episodes from his own imagination. The idea of the magic carpet appealed to us most, and while we listened with squeals of delight each time he told it, with or without additional frills, we told it to each other just as often, for of all things wished for, a magic carpet stood at the head of the list. Indeed, it frequently had the list all to itself.

A magic carpet! Just wish to go some place—and there you were. Think of it! We would visit all the cities we had heard about. We would see New York.

Oh, for a magic carpet!

It took many an earnest assurance from our parents to convince us that it was a fairy tale, so vivid a thing had it become to us. Indeed, I think we had to outgrow it, and even then it was something half hoped for.

I was a studious girl, growing up. I wanted to hear great lectures, see great plays, hear good music. If only I had a magic carpet—but of course that was a babyhood tale. Still——

Time went along. Life took me to different points of the globe and finally turned me once more to the hills of my native country. Not to the spot of the old home of my childhood which had become too sophisticated for my partner in the change, but to another portion as wild and remote as the old home site had been.

And it is here that my wish has come true. I have the magic carpet. I turn on my Radio and the music and the beauty I wished for in my young girlhood are brought to the fireside of my backwoods cabin—the sermons I had dreamed of, the lectures I had hoped to hear, the songs I had longed for, except that the terms are reversed. I do not

Star-Gazing *for* Graham

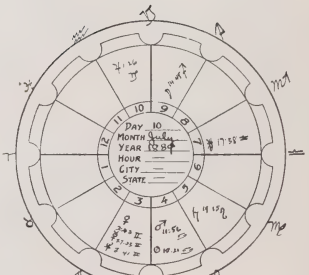
Graham McNamee

Astrologer Finds The Firmament Gives Dean of Elite Announcers A Break—He's Lazy but Lucky

By Peggy Hull

FOLKS, meet Graham McNamee! Yes, I know you think this introduction is superfluous but just wait a minute before you turn the page, for I am going to tell you some things about him that he doesn't even know himself!

He's lazy.



Now don't get mad and bury me beneath a ton of protests. Graham just can't help being indolent. His Sun is in the sign Cancer and in this position, vitality is at its lowest ebb. If he had to do something very strenuous to get before the public, it is safe to say he would be content to remain unknown, but Fate was kind to him. Radio was discovered just in time to give Graham McNamee a break. Anyone knows the easiest and most pleasant job in life is talking, and for Graham it was made doubly easy with three planets in the sign of Gemini.

Gemini rules speech and words. Its influence makes men and women better conversationalists, better writers and when Mercury occupies this position, it gives extreme fluency.

It makes a person fond of travel, of change, of new things, and everyone knows that Graham McNamee flits back and forth across the continent like a flea. You can be certain, there is nothing he likes better than an assignment at the opposite end of the United States.

Remember how many people held back when Radio was first announced? Well, Graham McNamee wasn't one of them. No sir, he stepped right up and learned all about it from the very beginning. It was his Mercury in Gemini which caused him to do this. All his life he will be investigating anything new which makes its appearance in our world.

While Astrology isn't new, it is having its re-birth and if Graham hasn't taken it up yet, he'll be sure to investigate it some time, for his mind is a broad one and he isn't influenced by the opinions of others and neither has he any preconceived notions about a subject. He approaches any investigation with a wide open mind and he possesses such a shrewd and penetrating judgment that he knows he does not have to rely upon others for advice.

His moon in Saggitarius gives him that alert and active personality with which he is associated in everyone's mind who has heard him over the air. And it has a lot to do with the short, crisp way he has of presenting a topic. It makes him fond of animals, especially horses and dogs. It increases his love for sports. As a matter of fact, his success in life depends chiefly upon his association with sporting events and if you stop to recall some of the highlights of his career, you will remember that he first became well known for his broadcasts of baseball and football games.

Graham can also tell you about a horse race with such skill and vivid detail that, although you are a thousand miles from the track, your heart will beat faster, your hair stand on end and you will hover over the Radio literally seeing the horses come down the home stretch.

Saggitarius rules distance and with the Moon posited therein it is no wonder that his public extends wherever the Radio waves go. This position also tends to create the feeling in people that they know him, once they have listened to him, and further strengthens the influence of Venus, N and Mercury mini. As rules brother sisters and nication, he erally a great who feel for h same warm a which harm kin have fo other.

Venus in gives him the for words make his talks disting for precision in describing a sit When Graham gets through tellin about a fast play on the gridiro have a good mental picture of wh taken place. This position of Ve also responsible for the even and nent affection of his Radio auc Unlike Rudy Vallee, whose stars that people either love or hate Graham does not suffer from bitte uncalled for criticism. If people particularly like him, this feelin not take an active form in inve they merely turn the dial and forge but there is no such indifference w comes to Vallee.

NEPTUNE, the spi planet, posited in Gemini, gives G unusual mental faculties and a amount of genius. It makes him sen to the finer intuitional and inspira vibrations and gives the gift of o and unusual literary ability. There field of endeavor where mental inge is required in which Graham coul excel.

His Sun conjuncting Mars in C

him fond of lively places. That is is fond of sports and horse races lains the public's interest in him his connection with them. Just d Gibbons' horoscope, with the Mars in Cancer, showed that he ecome distinguished through rev- and wars, so Graham's indicates through sports and the air.

writing is hard work. It means relentless plugging every day and has no disposition for such labor. ld take a tremendous amount of scipline on Graham's part, more believe he's got, but if he did whip into shape . . . what stories he rite!

t Payson Terhune, who has long he title in the dog story world soon run for cover. Grantland d some of the other topnotchers the sporting writers would be eye- ir crowns anxiously, for, if there hing in Astrology, Graham could ngs around them while he was half

Such, dear readers, is the gift nets have bestowed upon a man esn't need it.

ppears that Graham hasn't been g the best of health lately. His stars would indicate that he has suffered from a lack of nervous energy; that he tires easily and when he is working, finds getting on the job a trial. These conditions will pass as the planets move on but in the meantime he must guard against accidents of all kinds and should take no chances with his life or limbs. His bump of curiosity could easily lead him into an unpleasant encounter with a new invention and this is no time for Graham to test out a new airplane or play with electrical devices.

The aspects which have been holding him back during the past year will have been dissipated in 1931 and when his Sun conjuncts Jupiter all of his affairs will take on new life. He will feel better, too, and respond to opportunities with the old enthusiasm. The year 1932, however, is the one which will bring him the most pronounced benefits. And some of the good things which come to him in the next twelve or fifteen months will be only the outriders of the greater fortune on the way.

Many people lose their friends when under bad aspects, and they have to travel the road of adversity alone and uncomforted. But not Graham McNamee. He has a buoyant quality which makes it possible for him to conceal from even his intimates his real feelings. He is not the kind who would let his troubles cast a shadow over his associates.

He has quick sympathy for others in distress and is always ready to help, but he can't be fooled. His intuition is too sharp for that. It would be worse than useless for a man to step up to Graham with a hard luck tale, made up out of whole cloth, and expect him to believe it. He can hear tin drop in a proposition a mile away. But he is seldom prejudiced.

VENUS in conjunction with Neptune makes him fond of music, the arts and drama. Beauty in all forms appeals to him strongly and this aspect also increases his popularity with friends and associates. It makes him thoughtful of other people's happiness, polite, full of kindness and sympathy and inclines to bring benefits from large combines and successful corporations.

With Venus coming to a conjunction with the Sun in Cancer it is safe to forecast an even greater popularity in the future for Graham McNamee than he has yet known. He will be carried on a wave of affection from the public in general to heights he has little dreamed he would scale.

HE WILL have ups and downs throughout his life, but there are none after this particular period through which he is passing at present, which will give him much trouble.

* * *

ASTROLOGY, one of the oldest of professions, has made gigantic strides since it has become better known through broadcasting. Read Peggy Hull's monthly horoscopes of your favorite Radio stars. Next month she will tell you what the forces of the sky had to do with the success of Amos 'n' Andy. Don't miss your March RADIO DIGEST.

Precision in announcing is Graham's middle name—that's the way the stars made him.

Turn About's Fair Play! Radio Listeners Become Playwrights and Fashion Thrilling Dramas for Detroit Broadcasts.

It Actually Happened

By B. G. CLARE

HAVE you a little drama stored in your brain cells? Out in Detroit there are two important public servitors who believe everyone has a story to tell. They are making it possible for readers and listeners to turn about and become writers and playwrights.

The two agents who are gratifying the literary ambitions of a good slice of Michigan's populace are Broadcasting Station WXYZ and The Free Press. The newspaper started the ball rolling by running a contest which they have christened, *It Actually Happened.* It invites housewives, business men, "doctors, lawyers, Indian chiefs, rich men, poor men"—even ice men—to participate by submitting a true incident which they have experienced or witnessed. A $5.00 prize is given daily for each story accepted and printed.

Then Fred Roche, Publicity Director of WXYZ, stepped in. He offers an additional prize of $25 for the best story published each week. This thriller, or sad or comic incident, as the case may be, is adapted for Radio production by James Jewell, dramatic director of the Radio station; and under his supervision it is presented over the air by members of the Civic Theatre Stock Company.

How did Fred Roche's fertile brain conceive the idea of this novel contest? When interviewed, he refused to commit himself, but we suspect that he had a real idea back of his head. Perhaps he was by the wiseacres who write to managers and say that they "c better themselves with only half fort". Maybe he said to himself, believe this particular kicker cou let's give them all a chance."

ONE of the most ful of the *It Actually Happene* dramas was written by Robert D of Detroit. This amateur made only in the columns of a daily ne and over the air, but he also had t of seeing his play accepted for a t run as a "curtain-raiser" before th offering of the Civic Theatre Sto pany.

Mr. Donaldson placed his true in France, in the days when v rampant and every mother knew t edy of seeing her son wrenched f side. It is called *Vive La France!*

The Radio audience, snugly en in arm chairs, sees in its mind's

er and the sad Marie, and join in
prayers for the deliverance of Henri.

Supper is over, and the subdued duo of visitors depart, leaving the widow alone. A cough and a scraping of feet come from a dark corner of the other room, which serves as sleeping chamber. A light reveals a man's figure, clad in muddy, blood-stained rags.

Madame Bertrand peered into the man's face. "Henri," she screamed. "My Henri has come back to me. God has answered my prayers and sent you to comfort me. But why did you not write and tell me you were coming?"

The man does not answer, and she suddenly gasps with realization, "Oh, Henri, what have you done? You have run away from your regiment—you have brought shame to the name of Bertrand, a name respected in France for centuries."

Mumbled pleas for sympathy, with reference to brutes of officers, from the deserter, brought only a resolution from the mother to send her son back if she had to drag him herself.

A noise outside. Madame Bertrand shoves Henri into the cupboard that the neighbors may not be witness to her disgrace. She opens the door, to admit—an officer and four soldiers!

"Madame Bertrand, I regret that duty compels me to inform you that your son deserted his regiment ten days ago, and I must demand permission to search your home to find the deserter."

"Surely, Monsieur Lieutenant," answers the mother, "search if you must, but I tell you Henri is not here."

THROUGH the house and the barns the soldiers peered, and at last returned to the room where Madame Bertrand has hidden Henri. "What is in that cupboard?" asks the lieutenant.

"Nothing but—some old clothes," stammers the old mother.

The lieutenant disbelieved her and made as if to open the door.

"I tell you there is nothing in there that concerns you," she cries. "See, I will prove it to you." Grabbing the loaded gun from above the fireplace, she pointed it at the cupboard and fired all five bullets through the door.

When the opened cupboard reveals a dying Henri, the mother who has killed her son to save him from a deserter's death, prays, "Forgive me, God—Forgive me, Jacques and Pierre—It was for France—Vive La France."

A vivid, realistic play, torn from the war memories of a man who now listens to his Radio in the peace of home. Maybe you, too, have an interesting story, waiting only for encouragement to reveal it. Maybe some Radio station near your home will wake up to this opportunity to bring out hidden talent—who can tell?

Sir Arthur Eddington, who as one of the world's leading astronomers, is eminently fitted to speak for science.

Science and Religion

Must They Conflict? A Great Physicist Gives His Answer...

Sir Arthur Eddingtc

I AM speaking on the subject from the standpoint of those interested in physical science, and I should like first to convey the setting in which the problem arises. If you will look up at the sky in the direction of the constellation Andromeda and stand for a few moments scrutinizing the faintest star you see, you will notice one that is not a sharp point of light like the rest but has a hazy appearance.

This star is unique and barely visible to the naked eye. It is not properly a star. We might rather describe it as a universe. It teaches us that when we have taken together the sun and those stars we can see with the naked eye and the hundreds of millions of telescopic stars, we have not yet reached the end of things. We have explored only one island, one oasis in the desert of space. In the far distance we discern another island which is that hazy patch of light in Andromeda.

With the help of the telescope, we can make out a great many more; in fact, a whole archipelago of islands stretching away one behind another until our sight fails. That speck of light which anyone may see is a sample of one of these islands. It is a world not only remote in space but remote in time. Long before the dawn of history, the light now entering our eyes started on its journey across the great gulf between the islands. When you look at it, you are looking back nine hundred thousand years into the past.

Amid this profusion of worlds in space and time, where do we come in? Our home, the earth, is the fifth or sixth largest planet belonging to an inconspicuous little star in one of the numerous islands in the archipelago. Doubtless there are other globes which are or have been of similar nature to ourselves, but we have some reason to think that such globes are uncommon. The majority of the heavenly bodies seem to be big lumps of matter with terrifically high temperature. Not often has there been the formation of small, cool globes fit for habitation, though it has happened occasionally by a rare accident. Nature seems to have been intent on a vast scheme of evolution of fiery globes, an epic of millions of years.

As for man, he might be treated only as an unfortunate incident, just a trifling incident not of very serious consequence to the universe. No need to be always raking up against Nature her one little inadvertence. To realize the insignificance of our race amid the majesty of the universe is probably helpful, for it brings to us a chastening force, but man is the typical custodian, which makes a great difference to the significance of things. He displays purpose. He can represent truth, righteousness, sacrifice—for a few brief years a spark from the Divine Spirit.

It may possibly be going too far to say that our bodies are pieces of matter which by a contingency not sufficiently guarded against have taken advantage of the low temperature to assume human shape and perform a series of strange antics which we call life. While I do not combat this view, I am unwillin base philosophy or religion on the ass tion that it must necessarily break d but alongside this there is another look.

Science is an attempt to set out facts of experience. Everyone will that it has met with wonderful su but does not start quite at the begin of the problem of experience.

The first question asked about or theories such as I have been des ing is, Are they true? I want to phasize that even more significant the astronomical results themselves is fact that this question about them urgently arises. The question, I true? seems to me to change the plexion of the world of experience because it is asked about the world because it is asked in the world.

If we go right back to the begin the first thing we must recognize in world is something intent on truth, s thing to which it matters intensely th thing shall be true.

If in its survey of the universe, phy science rediscovers the presence of an ingredient as truth, well and good. not, the ingredient remains none the essential, for otherwise the whole q tion is stultified.

WHAT is the t about ourselves? We may incline various answers: We are complic physical machinery; we are reflection a celestial glass; we are puppets on stage of life moved by the hand of which turns the handle beneath.

Responsibility towards truth is attribute of our nature. It is thr our spiritual nature, of which respons ity for truth is a typical manifestat

we first come into the world of ex- nce. Our entry via the physical rse is a re-entry. The strange asso- n of soul and body, of responsibility ruth with a bit of stellar matter— ter given to us by accident or not— roblem in which we cannot but feel tense interest, an anxious interest, ough the existence and significance e spiritual side of experience were ng in the balance.

e solution must fit the data. We t alter the data to fit the alleged on. I do not regard the phenom- of living matter, in so far as it be treated apart from the phe- non of consciousness, as necessarily le the scope of physics and chem- It may happen that some day e will be able to show how, from cience of physics, creatures might been formed which are counterparts rselves even to the point of being ved with life, but scientists will per- point out the nervous mechanism s creature, its powers of emotion, of h, of reproduction, and end by say- That is you." But, remember, the pable test is: Is it concerned with in any way that I am? Then I cknowledge that it is indeed myself. are demanding something more consciousness. The scientist might to motions in the brain and say these really mean sensations, emo- thoughts.

en if we accept this rather inade- substitute for consciousness as we ately know it, while you may have us a creature which thinks and es, you have not shown us a crea- to whom it matters in any non- rian sense what it thinks and be- .

BUT having disowned our sed doubles, we can say to the list, "If you will hand over this who pretends to be me and let it lled with the attribute at present g and perhaps other spiritual at- es which I claim are similar on ndisputable grounds, we may arrive mething that is indeed me."

interesting point is that the recent utionary changes of science have this kind of cooperative solution of roblems of experience more prac- e than it used to be. That really is one excuse for taking part in this e, the one side of our complex prob- n which we have recently had some light.

few years ago, the suggestion of tak- he physically constructed man and wing him with a spiritual nature by lly adding something would have a mere figure of speech, a veritable ing over insuperable difficulties, in the same way we thought of build- robot and then breathing life into But we could not do this with a te piece of mechanism designed to walk mechanically. To adapt him for anything else would involve wholesale re-construction.

Now, to be able to put anything in you must have a vacuum, and such a material body would not be hollow enough to be a receptacle of spiritual nature.

I know that our conception of the material universe must be very puzzling to most people, but I have no time to explain or define it. I will only say that any of the young theoretical physicists of today will tell you that the basis of all the phenomena that come within their province is a scheme of symbols connected by mathematical equations. That is what the physical universe boils down to when probed by the methods which a physicist can apply.

A skeleton scheme of symbols is hollow enough to hold almost anything. It can be filled with something to transform it from skeleton into being, from shadow into actuality, from symbols into the interpretation of the symbols.

It seems to me that the time has come when scientists can no longer be able to point to the result and say, "That is you." We will say rather, "That is how I symbolize you in my description and explanation of those of your properties which I can observe. If you claim any deeper insight into your own nature, any knowledge of what it is that these symbols symbolize, you can rest assured that I have no other interpretation of the symbols to propose."

The skeleton is the whole contribution of physics to the solution of the problem of experience. From the clothing of the skeleton it stands aloof. The scientific conception of the world has come to differ more and more from the commonplace conception until we have been forced to ask ourselves—what really is the aim of this scientific transformation? The doctrine that things are not what they seem is all very well in moderation but it has now proceeded so far that we have to remind ourselves that the world of appearances is the one we have actually to adjust our lives to. That was not always so.

FIRST, the progress of scientific thought consisted in correcting gross errors in the commonplace conceptions. We learned, for example, that the earth was spherical, not flat. That does not refer to some abstract scientific earth but to the earth we know so well, with all its color, beauty and homeliness. For my own part, when I think of a tennis match in Australia, I cannot help picturing it upside down, so much has the roundness of the earth become part of a familiar conception!

Then we learned that the earth was rotating. For the most part we give an intellectual assent to this without attempting to weave it into our familiar conception, but we can picture it if we try.

In Rosetti's poem, the Blessed Damozel looks down from the balcony of heaven on "The void as low as where this earth spins like a fretful midge," and perfect truth alone can enter her mind.

Now let us try something fairly modern. In Einstein's theory, the earth, like other matter, is a curvature in space-time. What is commonly called the spin of the earth is a ratio of the two components.

I am not sure that it would be derogatory to an angel to accuse him of not understanding the Einstein theory. My objection is more serious. So long as physics, tinkering with the familiar world, was able to retain those aspects which concern the esthetic side of our nature, it might with some show of reason claim to cover the whole of experience, and those who claimed that there was another side to experience had no support to their claim.

This picture omits so much that is obviously essential there is no suggestion that it is the whole truth about experience. To make such a claim would be offensive not only to those religiously inclined but to all who recognize that man is not merely a scientific measuring machine.

If it were necessary, I would at this point turn aside to defend the scientist for pursuing the development of a highly specialized solution of one side of the problem of experience and ignoring the rest, but I will content myself with reminding you that it is through his efforts in this direction that my voice is now being heard by you. At any rate, there is method in his madness.

Another striking change of scientific views is in regard to determinism, the

(*Continued on page 104*)

When From The Human Heart The Cry Goes Out

WHAT IS IT ALL ABOUT?

Must the man of science give answer to the man in the street . . . "It is a universe of atoms and chaos?" A great British astronomer and physicist disagrees. He says that beyond the physical side of the matter we find "a spirit in which truth has its shrine".

It is the privilege of RADIO DIGEST to present his views, as set forth in a talk broadcast recently over the British network and the Columbia Broadcasting System.

Who Knows—But YOUR CHILD May Be One of The CARUSOS *of Tomorrow*

Here's How To Save Him From The Fate of The Window Cleaner With the Glorious Voice Who Couldn't Make Good in Opera

By FRANK LA FORGE

THEY will come from homes that dot the four corners of this broad land—our future Carusos and Pattis. They will fill the ranks of the Metropolitan and other opera companies, and the Radio will give their voices wings.

But a beautiful voice in itself is no more the open sesame to operatic stardom than a beautiful face is to dramatic stardom. It is only the beginning. Whether its guardian will ever reach the bright lights and the plaudits, depends very largely upon the musical training that has gone before, training that can best be given during childhood,—and therein lies the tragedy of the American singer.

In this country there is current a romantic supposition to the effect that a voice is "discovered", after which the lucky possessor has little else to do but trip gaily up the brightly studded ladder to stardom. This legend probably originated in the fertile imagination of some press agent seeking colorful copy for his prima donna client.

A story is told of our American Ambassador to Great Britain, Charles W. Dawes, whose home is in Chicago where he is one of the directors of the Chicago Civic Opera Company. He was walking down Michigan Boulevard one day when he heard a voice of great power and sweetness. The Ambassador paused, for be it understood, as a composer, patron of opera and instrumentalist, he prided himself on knowing a voice when he heard one, and assuredly this was one. He looked about to discover from whence such golden tones were being freely dispensed. Ah, yes, unmistakably, they were coming from a young Italian who was engaged in briskly swabbing off a large front window. Ambassador Dawes became all attention. The fellow certainly had a voice. He engaged him in conversation.

Yes, window cleaning was his regular job; no, he had never studied music. He sang because of a full heart. In fact, he had always sung. It was pent up inside of him and he had to get it out, so he sang.

Ambassador Dawes felt that here was a real find and had visions of being hailed as the discoverer of a future opera idol, so he took the young fellow in hand and began a somewhat intensive musical education which he sponsored. He even so far as to bring about the erst window washer's début as the Du *Rigoletto*. Alas, the resplendent was soon back at his old job again, ing windows and singing while he wo perhaps a trifle wistfully.

No doubt he did have a glorious and one of exceptional promise. He even have been famous today. If lad's mother had insisted on piano tice, when he was a boy, his story have been vastly different.

I have heard hundreds of beau voices, but voices unsupported by quate preparation in the simple rudim Some of them were indeed exquisite their possessors did not even know to read music at sight or keep time erly, two cardinal principles of prep ness that are so essential, they are for granted. Assuredly no busy cond nowadays will stop a costly rehearsal enough to point out such elementary ters.

Moreover, should a singer decid overcome this handicap at all costs will certainly need an iron determina He would feel like an adult who is starting to school to learn his num and letters. These are matters to oc the child mind, not that of the g person. The results produced are less handicaps, tears, heartaches and failures.

Thus you may see why more than is needed to accomplish the unusual. us consider some further points—the of the requirements of a singing ca When he first appeared at the Metr itan, Lawrence Tibbett, with his glor

More TOWN CRIER TALES

Have You Heard This One?—About The Princeton Grad and the Good Samaritan?

LAST autumn I sent several old wives' tales onto the air —the story of the ning lady, for in- , and the story of the man in the subway. I faced each with a on. Each story had told to me as true. it? The question genuine. It was not readbare device of ny broadcaster try- o whip up interest e whips up an ome- I honestly wanted ow. I cannot con- of asking a question ny other reason.

ell, the answers came ng in like pigeons ng to their comfort n — the Public Li-

From all the cities and towns on art of the Atlantic seaboard, from y in Massachusetts and Metuchen w Jersey and Timonium in Mary- the answers came in. This would air sample:

"Dear Mr. Woollcott:

"I heard your story of the murdered n the subway. I am a school teacher don't usually write fan letters like ne. I don't like the way you pro- e words and I think you talk much ast, and I would much rather hear rockett Mountaineers. But I felt d to answer the question you asked ther night. You wanted to know story about the murdered man in bway was true. I happen to know it is true, Mr. Woollcott, but you ome of the details wrong. It didn't n in the subway last winter. It ned in a trolley car in Salt Lake four years ago. I know, because pened to a friend of a cousin of I have written out to my cousin to e exact date and the name of his for you and will let you know as soon as I hear. I hope you won't think me a silly little thing if I ask you to send me a photograph of yourself. Cordially and sincerely yours,

Henrietta Peewee.'

"Well, that's Henrietta's letter. And if that is a fan letter, I'm Rudy Vallee. I need hardly add that Henrietta's cousin in Salt Lake City never came across with the details and that I never heard again from Henrietta.

"THE story I am going to tell next is one that has come to me in twenty different forms from as many different sources in the past two years. The last person to tell it and the one who told it in much the same form I am using tonight is Colonel Ralph Isham of London and Glen Head. Colonel Isham is that eagle of collectors who, under the hooked and irate noses of all the great dealers in autographs, recently carried off the greatest prize of our time, 'The Boswell Papers', which are now being published a volume at a time. You can run down to Macy's and buy them by the dozen, if you want to. They are only $50.00 a volume. Colonel Isham used to be a newspaperman himself. In his salad days he used to be known as the millionaire reporter of *The New York World*. He is, to my notion, the most expert and engaging raconteur now audible at the dinner tables of this latter-day Babylon. Like myself, his specialty is twice-told tales—at least twice told. It is his supreme gift to pick up a bit of American folklore and so sharpen and enhance it that it emerges a gem. Speaking of twice-told tales, I have been at once flattered and perplexed by the recurrence of one request in the Town Crier's mail bag. From sundry and scattered listeners-in, I have been receiving a suggestion that we celebrate Halloween next fall by retelling the ghost story called "Full Fathom Five" which I spun over the air amid the ducking apples and the grinning pumpkins last fall. I wish there was some way I could determine how many of my audience of a year ago would be infuriated by my telling the story again.

"However, to get back to Colonel Isham's yarn, it's a story about a watch. In a panic, I seem to hear a large part of my audience beginning to growl suspiciously. Your Radio addict can smell propaganda with a gas mask two miles off. I can hear a lot of you cagey old birds saying 'If the Town Crier had been engaged by the Camel people, this story would be about a cigarette.' My answer to that is: 'You lie in your teeth.' This story *is* about a watch. It begins with a young Princeton alumnus telephoning from his room at the Princeton club in New York

Station KHJ Successfully Performs The Noble Experiment—"On With The Show" Brings Sound Pictures To The Air

TORTURED with stereotyped Radio presentations, western listeners have at last discovered something new in what KHJ labels *On With The Show*, which is given each Wednesday at 7 P. M., Pacific time, from Los Angeles.

Several of these have taken an entire talkie feature, cut and revised, and brought out in a Radio version which, somehow or other, never seems to lose any of the lustre of the original production even though the time element has been considerably curtailed.

Besides the talkie productions, the station has also put on light operas, musical comedies and operettas during this *On With The Show* series which is billed to run for a full fifty-two weeks.

The Love Parade, Chevalier's noted vehicle, was the initial attempt. In its original film version this production readily lent itself to numerous characters and many scene changes. But of course the Radio adaptation reduces both the number of people in the cast and the number of scene shifts.

The picture at your neighborhood theatre showed some twenty-two speaking parts. But the Radio version, cutting and doubling, reduced this to exactly ten.

Then again, the original picture script called for ten sequences, while the adapted Radio script culled this to only four. The screen showing viewed exactly 329 scenes, but only fourteen of these found their way into the broadcast program.

All in all, the cutters and adapters, musicians and continuity men, pick out a few definite "shots" and these are protrayed by music, dialogue and sound effects.

The Love Parade went over in a large-sized way. Impersonating Maurice Chevalier was one Charlie Carter. That's the boy's name, although some of the press insist on dubbing him "Charles Cartier", to create an impression of French atmosphere.

A San Francisco lad of sixteen, his father is a well known physician up in the San Francisco Bay region. He manages his youthful son and heir. For *The Love Parade* young Carter did both the lines and songs of Chevalier, although in some of the KHJ Radio-talkies it was found necessary to use two separate and distinct casts . . . one for lines and the other for singing.

The boy's impersonation of Chevalier was a knock-out. So far his Radio work has been confined to this one piece of acting. But he does it well and with plenty of snap and verve.

The major portion of the score and dramatic action of *The Love Parade* was left intact. Yet a tremendous amount of unique labor and ingenuity were demanded of the staff in order to give the ear that which the screen feeds to the eye.

This included the writing and arranging of motifs and incidental music, the skillful weaving of musical themes into the entrance and exit of the leading char[a]cters, the placing of melodic symbols so[that] the listener can easily orient his im[agina]tion. Under the stimulus of a mere [phra]se of dialogue, and a few strains of [mu]sic, the imagination of the listener c[on]structs within him the scene which, on the s[creen] appears concretely before the eye.

Ted White is another KHJ staff member who has had singing roles in Radio talkies.

THEN there was the [com]plete Radio version of *The Rogue* [Song]*,* but, instead of Lawrence Tibbett, [Cali]fornia's proverbial playboy, the lea[d] taken by Pietro Gentile, young I[talian] baritone, who was Tibbett's under[study] during the filming of the productio[n].

Twenty-five years old in April, G[entile] was born in Foggia, Italy. His f[ather] was a dilettante musician and his m[other] a noted sportswoman who was [also] decorated for bravery by King Em[manu]uel of Italy, a signal honor.

Pietro Gentile was the swagger and dashing baritone hero of *The Rogue Song*, produced in Los Angeles by KHJ.

TALKIES

Power

...le in his teens, Gentile pulled away ...parental ties and landed this side of ...atue of Liberty with a magnificent ...ue, a natural in voice, youthful fire, ...on . . . but no money.

...ro took a fling at the boxing game ...while and then followed it up with ... singing. Thus some people knew ...s the boxing-baritone. He became ...orite singer in society circles and ...hall wonder that he worked out the ...nation on the front doors of some ... bigger and better families in Wash... and New York.

... Broadway young Gentile did the ...ile lead in Eddie Cantor's *Whoopee*. ... now doing some picture work in ...ern California. Not so long ago he ...t many distinguished colds while ... for famous artists who delighted ... perfection of his particular style ...chitecture.

... KHJ's second talkie production, *The Rogue Song*, also went over quite big, the staff launched out on an ambitious undertaking of talkies, operettas and other similar features for the coming year.

For instance, there was the studio offering of Balfe's *The Bohemian Girl*, which starred Fred Scott . . . one-time Radio singer who seems to have made good with a vengeance in the movie world.

Young Scott's excellent voice and fine dramatic ability helped him to rise from the ranks of Radio entertainment to starring parts on the silver screen and talkies.

While *The Bohemian Girl* was grand opera, the Radio story was so ably reconstructed that it became more understandable, more plausible . . . sort of losing the grand opera curse.

Then they tried the talkie of *Sweeties*, that screamingly funny story of a boys' school right next door to a girls' school. Station Announcer Kenneth Niles did the role which Oakie had in the original. Rita Bell did the Helen Kane lines. Elvia Allman enacted the role of *Miss Twill;* Ted White as *Bigg;* Lindsay MacHarrie as *Prof. Austin.*

Although the three previous Radio-talkies had used some outstanding guest artist, they did *Sweeties* as an all-studio cast and everybody acquitted themselves pretty well.

PRACTICALLY all of the sound work for these Radio productions comes from the fertile brain of Charles Forsythe. Not content with the ordinary wind machine, he makes one to operate on an electric motor that does the wind storm in several shades and tones, to say nothing of sundry rain, hail and snow side-lines by way of variety.

This new Radio-talkie idea was evolved by Raymond Paige, KHJ musical director, as he was riding on top of a bus out in the wilds of effete Hollywood in search of ideas.

Assisting him was the station arranger, Frederick Stark, German violinist, with practical experience in music arranging for theatres on both the east and west coasts. He did the musical adaptation and wrote new music atmosphere to fit in here and there.

Production Manager Lindsay MacHarrie, one-time assistant student manager at the University of Washington, collaborated in revising the script to fit the limitations of Radio and adapting the talkie to the air production.

Dick Creedon, feature director, and Ted Osborne, erstwhile news-hound, now on the continuity staff, are diligently burning the midnight oil in search of brand new material to keep the series humming along through 1931.

Charlie Carter (left), who played the lead in *The Love Parade* for KHJ and does Maurice Chevalier impersonations, is only sixteen. Kenneth Niles (right), regular KHJ announcer who did a song and some tap dancing in *Sweeties*.

Broadcasting fro

Radio Censorship

WITH the passing of every month the discussion about Radio censorship is growing in volume and in the number of factors involved. As matters now stand, the Federal Radio Commission is definitely limited in its powers to obscenity, blasphemy, treason and the like, although it may fail to renew the license of any station which, in its judgment, is not serving the public interests effectively. As a practical matter, this means that the Federal Radio Commission can exercise little or no censorship over individual Radio programs insofar as they contain objectionable quantities and types of advertising, and involve statements which border close to, or actually constitute misrepresentation. Such censorship today comes under the sole jurisdiction of the chain or individual station accepting a given program.

Certain prominent personages have been clamoring for Radio censorship and there is no doubting that as time goes on this will become as much of a muted subject as it has already become in the fields of book publishing and moving picture production. Experience teaches that in matters of this kind censorship must be either official, which means via some governmental agency, or unofficial, which means via some voluntary agency. Experience also teaches that of the two methods the voluntary plan is infinitely preferable.

Many of the individual stations and all of the leading chains are exercising a type of censorship which is highly commendable and which, in fact, often leans over backwards. Nevertheless, there are a few stations that are very lax in this matter of censorship and, like rotten apples in barrels of good ones, their practices are tending to lower the high plane on which broadcasting as a whole stands today. With a view to studying this situation and also the subject of voluntary censorship as a whole, the Editors of RADIO DIGEST suggest that a Board of Investigation be created under the auspices of the National Association of Broadcasters which shall report its findings on this matter.

Perhaps voluntary censorship is desirable; perhaps it is not. Perhaps no form of censorship is needed; perhaps it is. The whole question should be approached with strictly open minds and the Board of Investigation should include a representative group. In addition to adequate representation from the chains, the large local stations and the small local stations, there should also be at least one well selected individual representing each of the following: Advertising agencies, national advertisers, the Federal Radio Co sion, the American Federation of Advertising an National Better Business Bureau. All of these factors had extensive experience with regard to the practical of censoring advertising copy, and it is probably o phase that the most important questions arise as to mis sentation. On the other hand, it would also be w include individuals well versed in the evolution of c ship as applied to moving pictures, books, vaudevill the theatre.

It may be difficult to organize such a Board of Inve tion and particularly to have it function effectively. will depend upon the selection of an able chairman least the effort seems justified because it is important f broadcasting industry to know just why censorship i desirable and unnecessary, if such is the case. Again, if sort of voluntary censorship seems desirable, it is v important to see that it takes form along lines tha sound and fair to all parties involved. It is quite po that a code can be devised which stations can ratify ind ually on a voluntary basis, and it is also quite po that those stations ratifying such a code will win g approval with the Federal Radio Commission, with who originate and spend advertising appropriations with the American public. Such a code would be re from year to year as intelligent and extensive study indi is advisable, and in this manner the need for actual ce or boards of censorship might be permanently eliminat

Electrical Transcriptions

RECENTLY the President of the National Broad ing Company came out flat-footed against elect transcriptions. The policy followed by other b casting chains and by many of the leading individual tions indicates a similar attitude toward this metho broadcasting programs. Meanwhile, however, the nu of stations equipped to use electrical transcriptions is b steadily increased and the character of such equip steadily improved. Also, articles are appearing in the d press describing the progress which has been made in the art of making electrical transcriptions and in extent of their use.

The answer to all this seems quite obvious. Electr transcriptions are here to stay and no doubt the chara of programs offered through this method will be gradu improved to a point where they will be hard to distingu

he Editor's Chair

rograms presented by talent in person. In reducing of sustaining programs over local stations during hours; in supplying salable programs to a certain r of local advertisers, and as a means of enabling national advertisers to syndicate programs on a stag- basis insofar as the time schedule is concerned—elec- ranscriptions have a field. Also, the use of electrical iptions by national advertisers may be due in certain o the fact that chains of stations cannot be lined up ven program at an identical hour.

rtheless, and in spite of these things which insure ure of electrical transcriptions beyond question of it is quite apparent that talent-in-person will always the premier role from the standpoints of importance blic acceptance. The American people have demon- time and time again their ability to feel personalities t before them via the microphone, and much of the r success of broadcasting is attributable to this inti- f relations which has been created between the artists ir audience. Even moving pictures do not have this e virtue of personal contact. There is also the highly ant factor of timeliness and, of course, electrical iptions can never be recorded and delivered to the simultaneous with an actual occurrence.

ur humble judgment electrical transcriptions will run a bad second to direct broadcasting in their and intensity of appeal. In other words, they can part of the stage but never dominate the stage—and reason presentations-in-person must ever be the bul- of reputation and fame for broadcasting. Both ls have their place, but no one should fail to distin- etween their relative positions and respective limita-

dget
dio Sets

HE world wide decline in commodity prices and in manufactured goods and the lowered purchasing power which accompanied the general business de- n of 1930 caused many business concerns to aim at a narket for their success. There are many examples re the public has been offered new types of products r prices, and of where the quality of usefulness has n seriously affected by the reduced prices. There are cases where price reductions have been effected at the expense of quality and utility.

fices of this sort do not pay in the long run because dissatisfied customers sooner or later fly back against the manufacturer. Midget Radio sets to a considerable degree fall in this category. While there are a few small size sets that are excellently made that sell at lower prices than those encased in larger and more costly cabinets, the fact remains that many of the midget sets which have been put on the market during the past few months fail to offer worth while values to the public. In other words, the dollar saving which they seem to offer is in truth a false economy.

In buying Radio sets we caution and advise our readers to investigate intensively before deciding on which set to buy. We make this suggestion in order that no one will make the unforgivable mistake of buying a set which does not do justice to modern Radio broadcasting. The many, many millions of dollars which are being spent to bring outstanding talent and great programs before the American public are largely wasted if they reach the listener through receiving sets that distort and ruin the actual programs. Hence, we say be sure to shop carefully and, if necessary, spend the extra dollars asked to insure a quality result as contrasted with a mangled result.

RADIOGRAPHS

Intimate Personality Notes Gleaned from the Radio Family of New York's Great Key Stations

By Rosemary Drachman

EVERY Friday morning *Collier's* Magazine appears on the newsstands.

Every Sunday night *Collier's* appears on the air.

The Radio hour is under the direction of John B. Kennedy, Associate Editor.

John B. Kennedy

Who's Who says that he was born in Canada in 1894. That makes him thirty-seven. Which is pretty young to have done all the things that *Who's Who* reports him to have done. For instance, to have been a newspaper man in Montreal, Toronto, St. Louis, Chicago, New York, and London. To have been a correspondent during the World War. To have been associated with Herbert Hoover in relief work in Europe. To have founded and edited in 1921 the magazine *Columbia*. To have been for the past few years editor and Radio director of *Collier's*.

Other facts culled from *Who's Who* are that he came from Canada to the United States in 1909, that he attended St. Louis University, where he specialized in philosophy, that he married in 1916, that he has two children, that he has been decorated by the French and Belgian governments.

And grateful am I to *Who's Who*, for after my few moments talk with him snatched at the end of one of *Collier's* Radio hours, I found that I had a great many facts about the program but almost none about John B. Kennedy.

Of course I started him off by asking the very practical question: "Are you getting lots more subscriptions to your magazine because of the broadcast?"

"Well," he replied, "it's rather strange. We have had a tremendous increase in circulation, but we find that *Collier's* has grown as rapidly during the summer months when we are not on the air as during the months when we are. It must be the excellence of the book itself that sells it.

"We're in Radio broadcasting to entertain people, not to sell them. Our readers pay a nickel and they get from us two interesting shows a week, one for the mind—through the *eye*, and one for the mind through the *ear*. The good will established by *Collier's* Hour is an intangible thing. It cannot be measured by a yardstick. But from the piles of letters that come into my office, from the thousands of people who have attended this theatre to watch our performances, I'm convinced the yardstick would have to be a very large one."

And then just as I was going to ask him about his favorite hobbies, et cetera, he had to dash off to a previous engagement.

But that doesn't prevent me from saying something about the way *Collier's* Hour is presented. It is the only program I know where you can both eat your cake and have it, too—meaning that you watch the performers as they act, sing, or talk behind a great glass curtain which separates the stage from the audience, and from a loud speaker you hear the program just exactly as it is going out on the air.

Microphone technique, with its necessity for lowering the voice, is such that most programs are spoiled for the lis who hears them in the studio. Oft is impossible to hear what is being or sung into the microphone althoug performers are but a few feet away *Collier's* Hour one both sees and hea

The program has been on the ai over three years and since March 1930, its performances have been b cast from the stage of the Amste Theatre every Sunday night at e fifteen, Eastern Standard time. To o seats one must write to Collier's, b popular is the program that all seats been spoken for for weeks ahead.

Audrey Marsh

THE race is to the swift. And race is to the young. At leas seems so with this group of Radio people. Bert Lown, twenty-six, L Wall, twenty or so, John Kennedy, th seven, and here's Miss Audrey M soprano for the Columbia Broadca

Lucille Wall

ILLE WALL, who delights listeners the Love Story Girl in *Collier's* on every Sunday night over NBC, was born not so many years ago in Chicago. She didn't intend to have a dramatic career. At fourteen or fifteen she had made up her mind to be a nun. But her ideas changed and she decided to train herself as a pianiste. Then she heard Paderewski give a recital. The Polish genius so overwhelmed her that she gave up all ambition for a musical career.

The stage intrigued her next and to this idea she brought a determination that eventually brought her to Jane Cowl's company for a three-year engagement. Last year she was on Broadway in *Little Accident* and in *The Ladder.*

She tells an interesting story about her early stage experiences. She was applying at the offices of various theatrical agents asking for work. Finally one agent called her up and told her an actress was needed in such and such a play. She thanked him and naively said she'd let him know about it in two or three days. "All right," said the agent, and slammed up the receiver. Taking him literally, that it was "all right," she appeared in three days to say she'd take the job. "Lady," said the weary-eyed agent, "the girl who took that part has already opened in it." Yet, nevertheless, she eventually got a part from him, and made good at it.

Radio was just a happenstance. Over three years ago some friends told her of the *Collier's* Hour and of its need for someone to take parts in the dramatizations of its short stories. She tried out. was accepted, and has been with *Collier's* ever since. A year ago she began the "Polly Preston" rôle, which is a popular feature over NBC on Tuesday nights.

She is a tall girl, but with a sparkle and vivacity that is rare in the statuesque type. The microphone has enabled her to take the kind of parts she prefers to play—the gay young parts—which on the stage are denied to her because of her height.

"Glamourous?" She repeated the word I applied to her career. "Yes, I suppose it looks so from the outside, but it seems to me that all I do is to work and go home to rest. There is no life like the dramatic one for demanding energy and vitality. There may be some professions where one can burn the candle at both ends and still do good work. but acting is not one of them.

"Yes, I have a great deal of leisure, but it is leisure cut up into little bits. I never can look ahead a week at a time. I can't even plan a hair-dressing engagement."

Collier's Radio Hour is broadcast from the New Amsterdam Theatre with an audience on the other side of the glass curtain.

"At first this audience was terribly disconcerting," Miss Wall said. "I wanted to play to it and not to the microphone. Now, of course, I am used to it and it doesn't bother me. But at the beginning it required an effort of will to keep my mind on my Radio audience instead of the theatrical one! Now I find it easy."

Bert Lown

"A MILLION dollars, and then what?" That was the question I asked Bert Lown as I sat across the tea table from him in the supper room of the Hotel Biltmore.

For Bert Lown, leader of the Hotel Biltmore Orchestra, and heard regularly over WABC and the Columbia network. has admitted his ambition is "a million dollars."

The slender blonde young man. who looks like nothing so much as a youngster just out of college, quirked up a corner of his mouth. Said he, "I'm going to buy an island in the South Seas."

I thought that was just his pleasant way of telling me it was none of my business. So I said facetiously, "Where you will sit and sit and sit, and rest yourself, b'gosh.' "

"No. I'll probably be working as hard as I am now, but it will all be constructive work. Fifty per cent of my energy won't be devoted to fighting competition—as it is in this game, or in any business in the modern world. I want to build something with my own hands, to make

Bert Lown

something out of nothing. I don't know exactly what it will be. But something" —he wrinkled his brow—"well, the sort of thing Jim Dole did with his Hawaiian pineapples."

It began to dawn upon me that this young man was serious.

"But you don't like business, cities, the hustle and bustle of modern life."

"Cities? I hate 'em. But they're

MARCELLA

Little Bird Knows All—Tells All—Ask Her about the Stars You Admire

MY DEARS your Marcella is still almost overwhelmed with the affair of the month—and there have been so many things this season of the year. Passing along from the quite doggy doings aboard the Club Leviathan under the auspices of the RKO-NBC my idea of the real old home week was the Sunday night opening of WMCA atop the Hammerstein theatre. Very swank for a family gathering. And my previous peep at the guest list convinced me that everyone who was lucky enough to get a bid simply could not afford to miss it.

* * *

YOU may know that WMCA has been growing up. There are two floors of studios and the very finest of talent. It is without doubt the most progressive independent station in New York. All due of course to the energetic enterprise of Mr. Donald Flamm, owner and manager. The opening was due to the formal presentation of the new transmitter capable of spreading a program over half the continent or better. Guest artists were summoned from every quarter. Many of the leading celebrities of the air made their start in Radio at the old WMCA. They call it their alma mater.

WMCA Television Theatre, New York

* * *

MR. AND MRS. GEORGE W. JOHNSTONE, representing Mr. Aylesworth of NBC, were in the audience of the little theatre shepherding a flock of lambs from the National group. Among these were Rudy Vallee, Alwyn Bach, Lucille Wall and Baby Rose Marie. Ted Husing and Norman Brokenshire mastered some of the ceremonies as representatives from the Columbia fold. Then there was the exquisite Bernadine Hayes who was crowned Radio Queen, formerly of Columbia and more recently of NBC. (She is leaving New York as these lines are written with a trainload of talkie people for pictures to be taken in Hollywood—dear me, I've forgotten whether it was Warner Brothers or First National.) Then there were N. T. G., sometimes known as Nils T. Granlund, proprietor of the Hollywood Night Club and other notable ceremonial masters. Beautiful Nancy Carroll sat right beside me. And you can just bet RADIO DIGEST was represented by four members of its editorial staff (and escorts). It was an all night party, dear friends, with much chatter and small talk as well as entertainment from the stage. I think it was about 2 a.m. when Mr. Brokenshire broke into a song which sounded much like *"Three cheers for WMCA—long be its wave."* Over it all flowed the blessings of a Methodist preacher, Catholic priest and Jewish rabbi—who participated in the program.

Bernadine Hayes

* * *

HERE'S a long overdue reply to a letter from Mr. R. L. McEachun who wrote from Fort Valley, Ga., on the general tendency to biased reporting of sports by broadcasters. He picks out Mr. G. McNamee at the time of the World Series and says there was a change in Graham's voice indicating something or other when Jimmie Fox hit a homer. Quoth Mr. McNamee to me apropos [illegible] there was a change in my voice, [illegible] than the natural reactions to the [illegible] periods of excitement I was not awa[illegible] it. Certainly I was not rooting fo[illegible] Louis any more than I was for Phi[illegible] phia. The Radio announcer always [illegible] it coming and going after any big [illegible] The losing side always accuses th[illegible] nouncer of favoring the opposition. [illegible] matter of fact I consider that I am [illegible] ing to the whole United States. M[illegible] thusiasm is for the good plays whe[illegible] they are."

* * *

IT WAS over a lunche[illegible] one of the women's clubh[illegible] on East 57th Street th[illegible] made the acquaintance of [illegible] Petch. She is a short, [illegible] getic woman—just ful[illegible] American pep—although [illegible] is English. And the rer[illegible] able thing about her is [illegible] she was the first woma[illegible] broadcast from Norwa[illegible] America. You must hav[illegible] heard her here in the U[illegible] States for she was and [illegible] ably still is, on a tour o[illegible] United States stations, de[illegible] ing educational talks on va[illegible] subjects. She is very m[illegible] about her work and wh[illegible] referred to the great se[illegible] she was giving to human [illegible] she said, "Marcie," that' [illegible] short affectionate term for Marcell[illegible] don't like to be thought of as one of [illegible] dignified educators—I just love life[illegible] I love the way it's lived in America—[illegible] its enthusiasm, its verve." And as we sipped the last drop of tea, Mrs. Petch hurried away to catch a train to Toledo.

IOST every day Marcella receives s for more about Reynold Evans. ... of Akron says, "He surely is one mbia's best announcers. I believe if you asked 'Reyn' in a real nice way he would give you a picture without the Sheik's garb." Mary E. K. of Tonawanda, N. Y., asks for his photo; and E. E. D. of Buffalo wants a photo of Reyn for her scrap book. Well, here is Reynold Evans —and without any of the fol-de-rols which he wears in Arabesque. Reyn got the fundamentals of readin', writin' and 'rithmetic at Hopkins Grammar School in New Haven. But the wanderlust seized him and he ran away to join a New York Stock company. He says he was terrible in the part that he took, but it could not have been that as this role started him in his theatrical career. Both of his eyes appear to be quite healthy, but he almost lost one of them in a duel with Walter Hampden during the first act of *Cyrano de Bergerac*. Reyn also played with Cyril Maude and with Jane Cowl so he has an excellent dramatic background for his Radio career.

* * *

EDYTHE J. MESERANDE in the Press Relations Department of the NBC writes to RADIO DIGEST and says, "This is for your little bird that knows all." Please page Mrs. A. M. B. of Earlville, N. Y. James Wallington, or Jimmy as he is known to everyone, is only 22 and hails from Rochester. For three years he studied at the University of Rochester —that is, he attended, anyway. He always had a charming voice, as his neighbors commented, and like most Radio announcers, he began his public career as a singer. It was at WGY, Schenectady that he sprouted up into a full-fledged announcer,

Upper: Harry Vonzell, Brad Browne
Lower: Reynold Evans, Al Llewelyn

writing continuities and directing the plays. Came the day—(last summer) he met Miss Stanislawa Butkiewicz, or the future Mrs. Wallington, which is much easier to pronounce, and they sailed off upon their honeymoon on an airplane trip through Canada. Jimmy looks a bit older than his twenty-two years. He is over six feet tall, has blue eyes, light brown hair and a close-clipped mustache. Our Imperturbable Printer must have shaved off the mustache in the process of reproduction here.

James Wallington

Ford Bond

THIS too, is for Mrs. A. M. B. Good evening, Ladies and —Ford Bond speaking. In a Chicago medical college where his parents urged him to go, Ford preferred studying music to dissecting cats. That's where parents err—of course, this column is not for the purpose of disciplining parents—but when a lad has a singing voice, why send him to a medical college? When he was twenty-two he directed the community chorus and church choir at Alexandria, La., but sooner or later, Radio "gets" any ambitious person, and beginning at WHAS, Louisville, as announcer, then director of studios, music and general programs, he won his way to New York and hied himself over the NBC. Fifteen churches in New York invited him to sing but he accepted finally the offer of the Marble Collegiate Church to become a member of their choir and sing to the congregation.

* * *

CHUBBY PARKER is not on WLS any more, Mel. R. He is living in Chicago, with his family, but is not connected with any station. Bob Boulton is back at college, probably deeply immersed in higher math, Greek, literature and the like. Steve Cisler—says that Bob was a live wire around the studios and quite popular with the ladies on his famous Town Crier Cooking school. Very young and unmarried. Eddie Allan is the Dixie Harmonica King of WLS. He has six hundred tunes packed in his mouth harp. Married! More of WLS in March. Marcella hopes. Bradley Kincaid is dividing his time between WLW and WLS. Even Steven himself has turned Buckeye and joined WGAR at Cleveland.

Roger Bower

BRAD BROWNE of Nit Wit Fame—and did you know, Norman, that Harry C. Browne, director of Hank Simmons' *Show Boat* which has seen its *seventh* hundred performance on CBS, is Brad's brother? And would you think that this stirrer of mirth and giggles once studied law at Georgetown University and has an LL.B.? But he didn't want to practise law—he wanted to practise on the banjo—and he's some banjo strummer. Of course, it's all in the family—for the father is quite at home with this instrument—and in the good old days—the people would gather around in the Browne homestead and all would dance to the merry tum-tums of the banjo. Brad went overseas with the 101st regiment and as personnel corporal, he had leisure to write army songs and entertain his buddies. As a matter of fact, Brad is so popular, that his picture is on the Coming and Going page. I think I snatched the better picture, don't you?

Vida Sutton

* * *

THINGS looked awfully black—and it wasn't in Pittsburgh, either—when Al Llewelyn's steel foundry—that is he was the production manager—burned to the ground. But he picked up odds and ends here and there and managed to calm the landlady on Saturdays with enough money to stay for another week. At the same boarding house lived none other than Brad Browne—and the only one, probably who didn't enjoy the merriment was the landlady—because the other guests never got to bed with these two comedians around—and there was the candlelight bill to be paid. It was at a Newark station where Brad and Al won public acclaim and as Newark isn't far from New York, they came to this city and broadcast their *Cellar Knights, Tramp, Tramp, Tramp,* and other comical sketches over the CBS. They now have other programs including the Pertussin Playboys which they broadcast daily at 8:15 in the morning. His success is not confined to Radio for his golf score is in the low nineties.

* * *

ANY time that Marcella herself is so busy that she can't see the Columbia stars personally, she calls up Gilbert Cant and asks frinstance, in her very chirping voice—How old is Guy Lombardo—and off rushes Mr. Cant to Guy Lombardo, takes a peek at his birth certificate—rushes back to the telephone—28 years. Are any of his brothers married—and off he rushes again to the four brothers—and asks each one of them if he is in bondage to the matrimonial vow—hurries back to the telephone and says—"No, they're not married yet!" Leonore C. of Oil Springs, Ontario wants to know if Carmen Lombardo wrote *Until We Meet Again.* Did he, Mr. Cant? Mr. Cant says, yes. They're all four brothers—and they make some quartet, don't they, Christine? Christine of Kenosha says that there is a resemblance between Victor Lombardo and the Prince of Wales.

* * *

BETTY of Stamford writes, "I think Roger Bower of WOR is great—he's a humorous announcer—what I like".

Here he is just as happy as ever. George Roger Bower is his full name, but for some reason or other he dislikes the name George. Well, George, I mean Roger, is a native of Gotham and even attended the universities here—N. Y. U., and City College. He's had his finger in everything—farm hand, desk hand, logger, etc. He is even a Spanish interpreter. WMCA is his alma mater also. Here he worked for several months as a fight announcer, but he is now thriving at WOR and seems to be quite happy both from his picture and his voice over the telephone.

* * *

AND here comes Ford Rush. And here is a partial list of people who have asked about him: Eddie of Peoria; Mrs. Daisy R. of Emporia; and Rosalind T. of Detroit. Ford calls himself the "Pal of the Air" and he certainly proves himself to be that judging from the hundreds of letters he receives from all types of people in different parts of the country. He is now at KMOX "tenoring" away, writes Miss Junkin, program director, "and has such a likable disposition that he is quite irresistible."

Upper: Carmen and Guy Lombardo
Lower: Lebert and Victor Lombardo

Such Pulchritude!
KROW *Issues*
CHALLENGE

HERE'S a station that thinks it has the most beautiful staff of feminine entertainers of any broadcaster in the United States. They're KROW-ing so vigorously about it that RADIO DIGEST thought it only fair to beat television to it and let everyone else have a look at the fair staff of the Oakland station.

They offer plenty of variety—blondes, brunettes, titian-haired entertainers ranging the gamut from the soulful, dreamy type to peppy, jazzy girls.

And so they issue a challenge to the incorporated Radio Stations of the broad, wide, U. S. A., to submit photos of their staff members to the searching eye of publicity. We'll then appoint you Radio listeners and readers as a nation-wide jury to pick the most beautiful staff.

Other broadcasters will have to go a long way to beat this array of gorgeous talent. All of the young ladies are actively associated with the station—there are no "imported" beauties, and all of them are well and favorably known to Pacific Coast listeners.

top row, left to right—June Gilman, the girl with a smile in her voice, receptionist, has been with KROW since its opening. Jean Ardath—she's the titian-haired one!—the station's jazz and concert pianist. Mildred Lewis, next, passes on your request numbers to the musical director when you call—she's called "half-pint" 'cause her height is just five feet. Madeline Sivyer, the Bohemian Violinist is just nineteen, and a real artist.

Left, reading downward—Betty The Shopper, fashion dictator, who knows what to buy, what to wear and—important—how to get it for the least money! Helen Benson, the Banjo Girl, is very, very blond and the dreamy sort of person a banjoist should be. Lillian Boyd, ravishing brunette, is 21 and has double barrelled talents—a soft contralto voice and piano fingers.

Right, reading downward—Maybelle Gleeson, winsome blond wife of Bill Gleeson, general manager of KROW. Beth Chase—isn't she too demure? No, looks are deceiving, for Beth is the Oakland station's blues-singer and jazz baby—tap-dancer, too. Nola Starr has Irish eyes—is a daughter of Erin who can bring tears to your eyes with her tender, rich contralto voice.

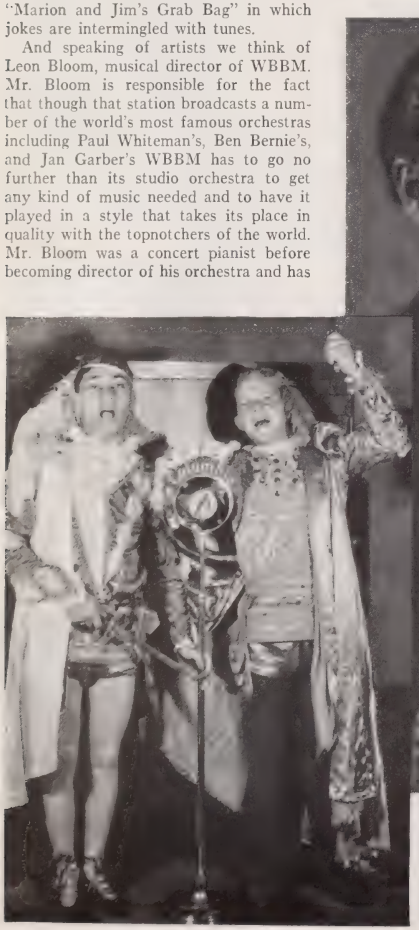
Mingling with Mid-Westerne

By

BETTY McGEE

Chicago Correspondent

OVER in the Civic Opera House we find a very versatile couple—Marion and Jim Jordan . . . they bring to mind the truism that versatility is a necessary requirement for every Radio artist. This harmony team of WENR, formerly of the vaudeville stage, have a repertoire of four or five different kinds of Radio acts. First, they are both members of the cast of the "Smith Family", well known comedy sketch. Then, they sing duets together. When they solo, Marion is a specialist in character songs, while Jim is frequently heard in the ballad type of composition. Last, they present a short comedy and musical sketch known as "Marion and Jim's Grab Bag" in which jokes are intermingled with tunes.



And speaking of artists we think of Leon Bloom, musical director of WBBM. Mr. Bloom is responsible for the fact that though that station broadcasts a number of the world's most famous orchestras including Paul Whiteman's, Ben Bernie's, and Jan Garber's WBBM has to go no further than its studio orchestra to get any kind of music needed and to have it played in a style that takes its place in quality with the topnotchers of the world. Mr. Bloom was a concert pianist before becoming director of his orchestra and has played in the leading cities of both Europe and America.

And still talking music and musicians, Jules Herbeveaux is quite a character. He combines a polished and dignified exterior with the impulses of the incorrigible clown. Strange as it may seem Jules studied to be an engineer. However, it was over in France that he first picked up a saxophone and he has never laid it down; and probably never can, now that his syncopations are a regular feature over at KYW. His two greatest i are his lovely suburban home, an tion . . . and folks at the studio ready putting in bids for rides plane he hopes to buy soon.

* * *

BILLY DOYLE, who is Rudolph WCFL team of Adolph and R tells a funny story about his partn Becker. Years ago they drifted t in Chicago and decided to work vaudeville act, which was to "Dutch" dialect and jokes, and "hoofing". Billy was a dancer, b wasn't, so a pair of wooden sho bought for the inexperienced mem the team and he was set to work cl

After a week or so of practice boys decided their act, including th ging (now they call it tap-dancing) pass muster, so they got a job in a a-day down in Paducah, Ky. Billy danced, and all was well. Then i Ned's turn, but he stood there abs paralyzed . . . he had forgotten eve that Billy had taught him! Afte seemed like an eternity, they le stage, packed their properties, an to sneak out of the back door. E manager caught sight of them an enthusiastically—"Boys, you save show; the part where Ned makes he forgot his dance was a wow!" was with them . . . after six we Paducah they earned a good rep

They're all good, but Bobby Dukes, on Stan Lee Broza's shoulder, is the youngest and cleverest of the WCAU Kiddies.

Four-Year-Old Is Star of WCAU "Kiddies"

By KENNETH W. STOWMAN

AS RIPLEY would say, "Believe It or Not"—Bobby Dukes has appeared on the stage, screen and Radio and is not yet four. He is chief attraction on the WCAU Sunday Children's Hour.

About two years ago, Stan Lee Broza of Station WCAU conceived the idea of broadcasting a children's program. Within three weeks more than a hundred kiddies were awaiting their turn to broadcast and it became necessary to set a time for auditions to weed out poor material and to develop those which showed promise. The broadcasting time is Sunday morning, with auditions on Saturday, open to everyone. Thus in a nutshell the WCAU Children's Hour had its origin. So popular has this broadcast become that motion picture and stage stars await their Philadelphia arrival so that they may entertain these kiddies.

Last summer nine of the best kiddies, headed by Bobby Dukes, made their first stage appearance at the Fox Theatre in Philadelphia, where in one week they established an all-time house record for midsummer. They played later in Newark, N. J., Wildwood, N. J., Ocean City, N. J., and closed their run at Wilmington, Del., where they filled the house to capacity, a record for child entertainers.

Tackling the biggest band instrument of all —the Jumbo Sousaphone—doesn't scare Alfreda Hagen, KSTP blues singer.

THE Sunshine Coffee Boys departed from KFAB in Yankton, and then they came back. Eddie Dean, the baritone of that harmony team, can also twang a guitar, while Jimmy Dean, the tenor, is a "harmonica-ist" too . . . Myron Woten of the same South Dakota station, is six years old, assists Daddy and Gladys Woten on their program, and lays claim to being the youngest announcer on the air . . . Earl Williams is another old-time WNAX'er who came back after a year spent with other stations.

Nashville, Tennessee, is her home, an likes the South, says Justine Dumm, s soprano of Station WSM.

THE dramatic sketches *Abroad* *The Lockharts*, heard from W in Baltimore, are written by Gene hart and his wife, Kathleen, who the roles of Mr. and Mrs. Lockhart, in real life and for the microphone.

Gene Lockhart is well known as a poser, one of his most popular son being *The World Is Waiting for the rise*. Kathleen Lockhart is also a cian of note and has appeared in a ber of stage productions in London New York, as well as on the Radio

IT'S an extraordinary saw that Joe Lenzer plays at WLW. Made of the finest steel, copper plated, its handle of polished wood is decorated with ivory medallions studded with brilliants. That's a record, even for a musical saw.

Everett M. Strout Roamed From Spain to Singapore to KSTP

IT ISN'T often that a youngster selected to be a future president of the United States turns out to be a deep-sea diver—but that's what almost happened to Everett M. Strout, erstwhile diver, sailor, Radio technician, cook, and what not, who is now a member of the engineering staff of KSTP.

Proud of her young son, his mother boasted that some day she would be the mother of a President. "But I turned out to be a deep-sea diver," Strout related. At the age of thirteen years he ran away from home to start his career as a sailor. That step was the beginning of hazardous experiences and hair-raising adventures which ended not so long ago with his marriage to Miss Catherine Schoop of Oak Park, Illinois.

His stories concern: The weird music of Calcutta with its mysterious dark doorways, and how he spent a night in jail there for talking back to the captain of his ship; the alluring beauty of the women of Spain, and particularly Valencia, the most interesting of all the places which he visited; how his hair prematurely turned gray in the first storm that he encountered at sea; how his diving partner was killed while with him at Detroit; the thrills he experienced as he witnessed a cobra and mongoose fight at Singapore; and how he was stranded at Lake Superior with the propeller shaft of the ship broken and how his S O S calls brought ships to the rescue.

In 1923 Strout constructed one of the first Radio stations in Illinois, a 20-watt station at La Salle. Today he is employed by one of the largest Radio stations in the Northwest, KSTP in St. Paul, where he is known as somewhat of a magician or genius for his remarkable success on the technical side of broadcasting.

eventeen members of the Aristocrats at WTMJ, Milwaukee, boast among their instruments everything from an accordion to a harp.

Quin Ryan, veteran WGN announcer, introducing Senator-elect James Hamilton Lewis in one of his recent Radio speeches.

Harry Seymour, genial announcer o WSMB Sunday night Frolics, is losing of his hair, it seems!

WTIC claims that "Tiny" Berman, 270 pounder, is the biggest Radio musician. But his big bass viol dwarfs him!

(Below) Jimmy Boyer, staff organist of WKBF in Indianapolis, is popular with folks in the Hoosier country.

Broadcast Artists Wind Up WSMB Sunday Night Frolic With Coffee

By Moise M. Block

Way down yonder in New Orleans Sunday nights bring to Radio fans an inimitable array of local and foreign artists. Banjoes strum—sopranos sing—pianists assail the melodious ivories—dramatists declaim—a real hot band burns up the ether waves—harmonica players wheeze sweet notes of love—and the WSMB Sunday night frolic is on.

At 9:30 thousands of Radio sets reach far into the air and bring in the voice of Harry Seymour, WSMB announcer: "Your favorite station, WSMB in New Orleans, now brings to you its regular Sunday night Frolic" and the show begins. Harry, as he is known around the studio, is one of the station's biggest favorites. To tens of thousands of Radio fans he is known as "The Gloomchaser", and he and his wife, the former Mina Cunard, motion picture player, sing together and are known as "Mr. and Mrs. Gloomchaser".

Harold M. Wheelahan, business manager of WSMB and in charge of all activities, is always on hand at these Sunday night Frolics, for he broadcasts, too. He specializes in duets with his brother Ed, a singer of note in New Orleans.

Those listening in on these St night Frolics miss only one thing sandwiches and the piping-hot coffee is served in a small room near the studios. The artists on the bill, some of the guests, make the sanc table their "hangout" and a bee-li the usual order for things after on given vent to the talent.

Old Fiddler at KFEQ Used Broom for Bow

By Ada Lyon

Before he was five years old John Holder, the "old fiddler" of KFEQ in St. Joseph, began to play a dollar violin which his father gave him for Christmas. He played for his first dance when he was seven years old, for a dollar and a half. The refreshments were a wash boiler full of wienies and a keg of beer and the dance ended in a fight.

He soon learned that dances and fights went together and that the best policy during hostilities was to sit in a corner where he could dodge pop bottles. Once his bow was broken by a beer bottle and then the fight began in earnest, for the dancers all said that they had been cheated. There was no music and they wanted their money back. The next time, many years later, when the same disastrous accident was repeated, Holder was grown up and equal to the emergency. He used a broomstick for a bow and the dance proceeded.

For ten years he almost deserted his faithful instrument. He became a railroad man, but he lost more sleep railroading than playing for dances, so he has fidoled over the radio for the past four years. He is now broadcasting daily over KFEQ.

John Holder, the Old Fiddler at KFEQ, carries one thousand tunes in his head and has won hundreds of "scrapin' " contests.

The Senoritas string trio at KGER (below). Left to right, Elsie Montgomery, Marie Waters, Helene Smith—fair ones all.

Tuneful Topics

"Know Your Songs"

A Monthly Department In Which The Famous Leader Picks The Song Hits of The Month and Analyzes Them

1.—99 Out Of A Hundred

IN MY Radio announcements I have referred to this song as a statistical number. It is obviously the setting of an oft-repeated statistical slogan to song, and the mathematical thought is lost in the romantic one that is conveyed to the listener. The two boys who wrote it, Al Sherman and Al Lewis, have been classified in my mind for some time as writers more of *quantity* than *quality*. They have turned out songs the way a factory turns out a product; they have always had five or ten songs to demonstrate every time they have had the opportunity to display their wares. Not that I am opposed to the prolific writing of songs, but I do believe that if song-writers became more critical of their own efforts, discarding and rejecting until they were satisfied they had something really worth while, there would be less "just good" songs on the counters than there are today.

I have also reproached many of the publishers for being too lax in their selection. "Just good" songs hardly sell enough to justify their publication, but one manager of a publishing house replied to my attack by saying, "We must have a catalogue." Personally, if I were the judge of tunes for a publishing house, I would rather that we did not publish even one song for the current month, than have three or four *mediocre* tunes, and in that way I believe that I would do away with the salesmanship so necessary to convince orchestra leaders and the public that the songs are good.

Of course, the weak point in my contention is the fact that no one can quite seem to agree on what is a *good* or *bad* song, and many a song has been turned down and condemned by one publisher as being bad, and has become a hit in the hands of another one who worked on it more. Natural songs like *Yes, We Have No Bananas; Dardanella; The Stein Song*, and many others of that type, that became hits through their own momentum and the fact that they stood out, are the kind which I believe one should look for.

One of the main reasons that I was pleased to associate myself with the firm of Leo Feist as a staff writer after I had come to New York and organized the Connecticut Yankees, was that fact that I had come to regard the publishing house of Leo Feist as one that published only real hits. In fact, the slogan "You can't go wrong with a Feist song" was gospel truth to me. I had formed this opinion ever since my high school days, and there could be only one thing responsible for this belief and that was the unerring judgment of one Phil Kornheiser, who, for twenty years, had selected their songs. But the point was that the only Feist songs that came to my attention were the hit songs, and I have since found that Feist, like all other publishers, must include in their catalogue many tunes that they firmly believe will be hits, although I and many others call them "doggy" tunes.

I was very pleased, when meeting Mr. Sherman and Mr. Lewis again as they demonstrated *99 Out Of A Hundred* to me, to find that they were now spending much more time and effort to get one good song than they were in turning out songs by the waste-basket full, and I believe they have a natural hit here, providing that it is, in the jargon of Tin Pan Alley, "plugged" by the various bands that we listen to on our Radios and phonographs.

The few Radio presentations that we have given it have brought a response, not as great, but comparable to that of the *Stein Song*. That is, my barber, the doorman, and others who tune in on our programs have remarked about it, and even a young society girl continued to rave about the number long after I met her a few evenings ago.

It is lilting, catchy, and tuneful; the thought is good and different; there is nothing sickening or disgusting about it, and the thought *99 Out Of A Hundred* flows easily from the mouth. I look for big things from this

It is published by the R Music Corp. and must be briskly and snappily in order it justice.

2.—Hurt

ONE night between shows, in my ing room suite at the Brooklyn mount, as I lay there relaxing, I h Radio tuned in to a program of organ being played by the "Poet of the O Jesse Crawford. To my mind he greatest of all organists, at least of who broadcast, and, too, I believe th nothing more restful than the broadc a well-played organ. Suddenly th nouncer told us of the appearance first time on any program of a new called *Hurt*. The title was so odd t brought me to attention, and I lis very carefully while Paul Small, o my Paramount confrères, did full j to the song.

My first reaction was disappoi but upon hearing it again and ag learned to like it more and more. I discovered that it was written by men whom I know and count amon friends. Al Piantadosi, one of the Piantadosi brothers who have given lives and their musical minds to the lishing of songs, needs no introducti your father or mother. He gave such songs as *That's How I Need When You're Playing the Game of L Baby Shoes; On the Shores of Italy Curse Of An Aching Heart*, which used to sing in the days of the beer dens and when Al Smith was jus assemblyman.

Although Al Piantadosi has been for some time, he seems to be ir stride again, and is writing quite quently and collaborating with an young man, Harold Solomon, who been kind enough to assist me in th vision and transcription of several o songs. Solomon is responsible for melody of *Hurt*.

Not only do I play the song bec I like it and because I enjoy their fr

3.—When Your Hair Has Turned to Silver

THERE are so many of the Tobias family that they get in your hair! There is Charles, and Harry, and Henry, and they are all song-writers. Charles, I believe, is the one who has been on the stage as a wisecracker, M.C., and many other things for years; at least, I remember him when he came to a New Haven theatre to bolster up its waning trade for a while. His younger brothers, Henry and Harry, had much to do with *Miss You,* one of my early recordings, and a beautiful song. From time to time they bring forth fine examples of the art of song-writing; in fact I could almost say that two out of four songs seem to have one of the Tobias brothers as a contributor.

In the case of this song, Charles was the contributor of the thought whereby Peter de Rose was able to express to his sweetheart of the air, May Singhi Breen, this promise of undying devotion. Anyone who knows Peter de Rose and May Singhi Breen knows that they constitute not only one of the finest teams on Radio, but two of the sweetest personalities, very happy together and never apart, that one could wish to see.

While the melody is reminiscent of *The Blue Danube,* yet no one could hold that against Peter de Rose, because there is nothing new under the sun, and it is quite possible to tear apart any song and show a similarity between its various phrases and the phrases of other songs. The thought is very simply and sweetly expressed, and it fits the melody admirably. I had the pleasure of recording it a few weeks ago and I think the record will be a good one.

This song is published by the firm that sponsored and brought to hitdom *Carolina Moon,* namely Joe Morris, Inc., whose manager, Archie Fletcher, is responsible for its appearance. We play it as a medium tempo waltz.

4.—My Temptation

THE few months I spent in Boston after my graduation from Yale, before I came to New York to seek my fortune, saw me playing with several Boston orchestras. The big number in vogue then, the Fall of 1927, was *Dancing Tambourine,* written by one W. C. Polla, whose name I had seen as an arranger of various songs. Mr. Polla's main function in Tin Pan Alley life is to make orchestrations for dance orchestras and bands of the various song hits, but he is also the composer of these various novelty songs such as *Dancing Tambourine, Bohemia,* and *Gondolier,* but *Dancing Tam-*

bourine was his biggest and most well-known. I believe that this 6/8 song, *My Temptation*, stands every chance of becoming just as popular if the bands will only play it.

Most bands fight shy of the 6/8 songs due to the fact that the younger generation does not care to dance to them, but I believe that orchestras should remember that Radio broadcasts are not dedicated to a dancing public but to a listening public. I picture most of my Radio listeners as reclining on a couch, a divan, or a chair, in a position of relaxation, listening to the program in comfort, and to be soothed, and such numbers as *My Temptation* and *99 Out Of A Hundred* form a good stimulus throughout the course of an otherwise slow-moving and monotonous program.

My Temptation is very reminiscent of *Valencia*. In fact, Mr. Polla intended it to have that same continental flavor, that European air that we have come to associate with the *Valencia* type of song, and he certainly was successful! The song is very lilting and just as good lyrically as it is musically.

Our Victor record of it is due to appear on the market any day now, and is one of the best things we have ever done. You need only hear the song to like it, and the response to our theatre presentation of it and our few broadcasts has been very wonderful. It is published by Harms, Inc., and we play it briskly.

5.—Blue Again

JACK ROBBINS, who brought the firm of Robbins, Inc., up to a place of great prominence in Tin Pan Alley, deserves credit for having picked a very danceable and singable tune in *Blue Again*. It was originally featured in the *Vanderbilt Revue*, which unfortunately, like the Arabs, folded up and stole away almost over night. The song, however, like any good thing, refused to be kept down and persisted on long after its sponsor had gone to the musty warehouse.

It is gaining popularity every day, not only through the cleverness of its music, but for its lyric thought. It remained for Miss Helen Groody to show me that it was a good song through her presentation of it nightly at the Villa Vallée. In my first presentation of it I played it much too fast to do justice to it. Properly tempoed, the number provides, as a theatrical writer calls it, "great dansapation." The song was written by Dorothy Fields and Jimmy McHugh, and you probably hear it a great deal on your Radio. We do it now at about thirty-five measures per minute.

6.—Would You Like to Take a Walk?

THE daring revue, *Sweet and Low* seems to be a breeder of dark horses. Not only will it bring to light a young lady who should have come to public attention in a big way long before this—I mean Miss Hannah Williams—but it will bring to light one of the most delightful songs that she sings in the course of the revue. In fact, I think it is one of the best things she does.

Harry Warren, Billy Rose, and Mort Dixon collaborated on a cute little thought, typically musical comedy in vein, and yet bordering on the commercial* in the dark horse song *Would You Like to Take a Walk?* A very tricky verse precedes the chorus, and the main charm of the chorus lies in the first three notes of every phrase; these are to be hummed, that is, "Mm-Mm-Mm, Would You Like to Take a Walk?"

Then it goes on to ask the young lady, assuming that it is the boy who sings it, if she would like a sarsaparilla, and if she isn't tired of the talkies as he prefers the walkies.

Done in schottische tempo it becomes very danceable, and you will find your feet, in spite of yourself, tapping and yearning to dance.

Remick, the publishers of it, originally did not intend to orchestrate the tune for dance orchestras, but several of us have made our own orchestrations and have presented it on the air, which in turn will create such a demand for it that Remick will probably be forced to feature the song in a big way. In fact, one of their directors has already told me that they are about to do so. Within the next month you will hear it done plentifully on the air, and its freshness and charm will captivate you as it has me.

I am doing it this particular week at the Brooklyn Paramount, singing it in musical comedy style to Miss Groody, and then dancing with her to a chorus of it, and it gets a very fine hand. We play it at about thirty-five measures per minute.

The original key of E flat is a little tiring on the voice; if you can transpose I would suggest that you sing it in D.

*—popular, i. e. liked by the great masses of people.

7.—My Ideal

HERE is another song which seems even more admirably fitted than *Would You Like to Take a Walk?* for the schottische tempo. The sheet copies are written the way we play it, but the first orchestration we received from the publisher made it very long and drawn out. My natural reaction was to play it as it was on the sheet copies, which meant that the band played two measures where there was only one in the orchestration. We call this "doubling up", and we get through the song in half the time it would normally take. I believe that the publisher has since put out orchestrations in the shorter way, which makes the piece seem much more cheerful and lilting. It seems to be over almost before you know it, but it makes an extremely danceable tune, and the thought is out of the ordinary.

While it is a trite expression, and the general trend of the idea has been done many times, yet the writers have handled it extremely well. One of the writers of the music, Newell Chase, is an o[ld] ton pianist and fraternity bro[ther] mine, and Dick Whiting has had h[is] on more songs than you can shake [a] at. I met Leo Robin, the writer [of] lyrics, in the Paramount Studio[s] I was making my picture. He w[as] collaborating with Whiting on a [song] *Sweetie*, and he certainly dese[rves] much praise as the other two boys [in] ducing this very cute song.

You will find that your sheet co[py] tains only fifteen measures, and [if] the right swing you should take [only] thirty seconds to play these fifteen [meas]ures. It is published by the [Leo] Music Corp.

8.—Little Spanish Dance[r]

THERE are few songs today th[at] boast of having been written [exclusively] by women. However, *Little S[pan]ish Dancer* is the work of two female w[riters] of Tin Pan Alley. Mabel Wayn[e], a young lady who composed *Ramona*, *a Little Spanish Town*, seems to h[ave a] flair for writing melodies in a S[pan]ish vein, and has contributed another [to] her lyrical collaborator called *Little S[pan]ish Dancer*. Tots Seymour, who w[rote] the words, was one of Tin Pan [Alley's] most prolific writers years ago. S[he] tired from the game for a while, [came] back again, and her first song aft[er her] return was the hit of last summer, *[Sit]ting in a Hammock*. I know it seem[s odd] for a woman to write songs, but [Tots] Seymour, like Miss Wayne, know[s the] business, and they are both to be [con]gratulated on this song.

It tells the story of the Spanish [girl] who dances her way in and out [of the] hero's heart. It is a cute song [when] properly played, and one that must [be] done slowly, at about thirty-two me[asures] per minute.

The owner of the Villa Vallée com[mented] ed on it last night, and peculiarly e[nough] Miss Wayne was seated at one o[f the] tables with two gentlemen, having [made] the trip specially to thank me for m[y] dition of it on several of our pr[evious] broadcasts. I feel it is unnecessary [to be] thanked for doing a song that I [like] doing, and one that I know people [like] hearing, and this is a good example.

It is published by Leo Feist, Inc.

9.—Cigarette Lady

I RARELY like to bring myself [into] these pages if I can help it, due [to the] criticism which is leveled at me by [other] individuals, but since I am writing [and] collaborating with others who have [also] questioned writing ability, it is neces[sary] that I speak impartially of my own [work].

Back in the summer of 1924 I [was] playing throughout the society resor[ts of] Maine with a Boston orchestra, and [we] had as our pianist a very wonderful [man], Carroll Gibbons, who had been p[icked] out of a local movie theatre in a [small] suburb of Boston by Billy Losez, [who]

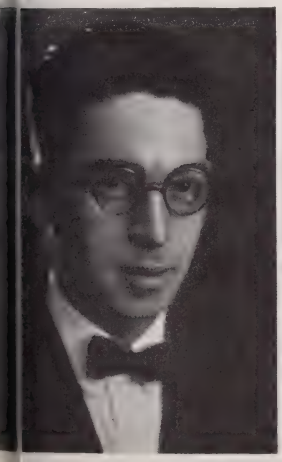
Mexican Station Broadcasts In English and Spanish

of the few truly bi-lingual stations ned its doors not so long ago. Its ers are XED, located at Reynosa, Mexico, not far from Brownsville, Its slogan is "The Voice of the epublics" and since it has 10,000 ower, RADIO DIGEST readers all e United States have been able to on its broadcasts. L. D. Martinez, irector, put over a novel stunt for gural program.

The station remained on the air for a period of one hundred hours—four days, four nights, and four hours for good measure. Entertainers from Mexico and the United States participated and announcements were made in English and Spanish. The studio orchestra, known as the Border Charros, under the direction of Eulalio Sanchez, kept things going a good part of the time, and guest artists from many near-by stations co-operated. Malcolm Todd of WBAP, Fort Worth, and Curtis Leon Farrington of KPRC, Houston, were guest announcers. Tom Noel, formerly of KVOO, also officiated—and liked it so well in Mexico that he was prevailed upon to remain as advertising manager of the new station.



* * *

ANOTHER unique station broadcast in the annals of Radiodom was the contribution of WIOD of Miami, Fla. Eighty broadcasters in the United States joined in giving a "Miami Radio Party", dedicating part of their programs to the Sunshine city, and WIOD in turn took its listeners on a tour of the United States, with stops at all of the cities from which Miami programs emanated.

* * *

THE Station that came back—that title has been given to KJR, Seattle, Wash., whose hard fight against the wolf at the door was described in a recent issue of RADIO DIGEST. Its most recent triumph was Federal confirmation of license to broadcast on 5,000 watts.

AND talking about uphill struggles to prominence, Station KWK of St. Louis deserves a pat on the back. Founded in 1927 by Thomas Patrick Convey, it started out with one small office, a transmitter room, a studio and three employees. The president himself, Mr. Convey, carried on all duties from office boy to announcer. The total income of the station for the first year was barely $10,000—which certainly stretched elastically to cover rent, operating expenses, talent and salaries. Today, only three years later, it reports a 1930 income of over $200,000 and an operating force of thirty-three, with a 5,000-watt transmitter in Kirkwood, Mo.

artinez, Studio Director and Station ager of XED in Reynosa, Mexico.

Classical Music Simplified

A Monthly Feature By

William Braid White
Doctor of Music

Dr. William Braid White

Dr. White will answer readers' inquiries on musical questions in his columns. Address him in care of the Editor, 420 Lexington Avenue, New York.

A FEW weeks ago from New York the Philharmonic-Symphony under the direction of Toscanini played one of those programs which delight the heart of the listener. Its two principal items were Schubert's *Unfinished Symphony* and the *Erocia Symphony* of Beethoven. For reasons which my readers will, I hope, soon discover to be sufficient, and even perhaps admirable, I shall say something here about these two pieces of music.

It would probably be fair to say that the so-called *Unfinished Symphony* by Franz Schubert is the best known, by name at least, among all large orchestral works. The reasons are numerous. Schubert wrote a great many songs and small piano pieces, and among these are several which almost everybody has heard and has liked. One only has to remember the *Serenade*, the *Hark, Hark the Lark* and the *Ave Maria*. Everybody no doubt remembers that very successful operetta *Blossom Time*, which toured the whole country a few years ago and which was built around the story of Schubert's life and of his music. What turned out to be by all means the most popular and catchy of the tunes in this charming little musical play was nothing more than a slightly modified form of the second theme from the first movement of the famous *Unfinished Symphony*. When I add that the modification by no means improves the theme, which, as one might expect, is much more delightful and melodious in the shape in which Schubert first wrote it down, the reader will understand how it is that the *Unfinished* provides probably the very best of all introductions to the beauties of symphonic music which can be found by any uninstructed seeker after beauty.

I shall therefore venture to join here the great army of those who during the last seventy-five years have united in a universal paean of praise for this lovely piece of inspired work. There may be a few readers who will like to hear about it from my point of view; and indeed there may even be some to whom it will come as actual news. So here goes.

It was just twenty-seven years ago that I first heard the *Unfinished*. It was during that year (1903) when the Philharmonic Society in New York, not yet turned over to a group of rich guarantors but still a democratic association run by the players themselves, had made up its mind to experiment with a group of guest conductors. So it invited Colonne from Paris, Sir Henry Wood from London, Weingaertner from Munich, Kegel from Frankfort, Victor Herbert from Pittsburgh, Gericke from Boston, Theodore Thomas from Chicago and Safonoff from Moscow. Each was to conduct one concert and at the end of the season we the audiences were to compare one with the other. Poor Theodore Thomas died just before his concert, and Weingaertner, I think it was, took his place. Victor Herbert came from the Pittsburgh orchestra, which he was then conducting, for one concert, and he took the *Unfinished* for his principal item. I was only a youngster, of course, and the music came to me, I have to say, as if it were manna from heaven. If I live to be a hundred years old, I shall never forget the thrill I got from it.

To this day I remember that some one had told me to be very careful not to miss this special piece, and I can see myself again poring over the program notes from my seat high up in the balcony of Carnegie Hall, reading how poor Schubert wrote the glorious music as a token of gratitude for having been elected to some little footling musical society in a second-rate Austrian town; and how then he put it aside after two movements had completed, how he never took it up never sent any of it to its intende tination and, even more astonishing, heard it played!

He was only twenty-five years old he wrote down the two movement then laid the lovely thing aside ne take it up again. That was in Shelley died that year, another fa of the gods, drowned off the Italian Six years later Schubert too was partly of fever, but more of unde ishment. Poor Schubert! He pr never had so much money as twent lars in his possession at any one His total effects at his death we praised as worth the equivalent of twelve dollars and fifty cents, inclu "miscellaneous lot of old music". A the scattered sheets of this music afterwards discovered, by the hands of Mendelssohn, the immortal of the *Unfinished*.

The Sheer Delight of the Unfi Symphony

There never has been any satisfa explanation of Schubert's putting his work after he had completed on of its presumably four movements. ing music was to him no task at all wrote down notes as you or I would a letter to a friend. He wrote *Hark the Lark* on the back of a card at a tavern, and *The Erlki* much the same unceremonious way much the same dizzy speed. Music from him as water from a fountain was quite capable of writing dow first two movements of his symphon the next day forgetting that he had written anything of the kind. Quite sibly that is just what happened.

We today are more fortunate. W also more appreciative than his cont raries, who let him die at thirty-o

ition, just one year after that Titan

from the inspired playing of the Philadelphia Orchestra under Stokowski.

The Musicians vs. The Engineers

I have been listening again to broadcast music from the New York Philharmonic, the Roxy, the Curtis Institute and other symphony orchestras. It would be all wrong to deny to the broadcasting art the merit of excellent intention, but only a gross flatterer would say that the results are perfect. The truth is that the conductors of orchestras and the broadcasting engineers are still standing apart from each other. This indeed is a great pity, for broadcasting is already the biggest and most important factor in contemporary musical activity. That is to say, apart from any other consideration, the most important, the most active and by far the biggest factor in the practical enterprise of making music and of getting it heard is being done by the broadcasting interests. For that very obvious reason then, the men who have in their charge the great orchestras which are coming more and more into the orbit of broadcasting, ought to be getting themselves into the closest possible relations with this new means of extending music to their audiences.

After all. that is what it comes to. Broadcasting expands the size of the audience to which the musician plays. Ernest Schelling, for instance, is one of the most hard-worked conductors of orchestras that this world knows. Last year his children's concerts, in New York, Boston and Philadelphia attracted some 90,000 young people of all ages from five to twenty years. Now 90,000 young people are a great many, yet they are but a handful compared with the vast audience which broadcasting furnishes, an audience potentially of millions.

Yet the fact remains that when this remarkable man broadcasts he reaches young people by the hundreds of thousands, and does something, at least, to teach them that early love of beautiful music which is one of the finest accomplishments any human being can have, or can acquire. This indeed is true. in one degree or another, of all the famous orchestral conductors who weekly during the season guide their great armies of highly trained musical artists through the measures of great music. All these gentlemen with their orchestras either now are, or soon will be, broadcasting regularly. My point is that there is nevertheless something more to broadcasting than the mere bringing of an orchestra into a studio with instruments and notes. The whole process, from the actual playing by the instruments under the conductor's baton. to the hearing of the result at the loud speaker end of each among tens of thousands of Radio sets scattered over half the country, is in reality a single continuous process. Unfortunately, the present way of doing things tends to break it up into two parts. The orchestra plays. It is supposed only to play. On the other hand the transmission of its music to the unseen Radio audience involves a vast and elaborately organized series of electrical engineering processes, which, very naturally. have been designed by, and are under the control of, engineers. The musicians tend to think that they have done their part when they have, so to speak, put the music into the microphones. The rest is left to the engineers.

Technical Improvement in Broadcasting Is Needed

Now there is a mistake here, and a big one. The thing ought not to be quite so simple. It is not quite the same thing as telephone engineering. Telephone engineers are dealing with human speech, and they design apparatus to transmit that speech over long distances. They wisely do not even try to teach the telephone user to speak correctly, for that would be both impertinent and impossible. They therefore confine themselves to discovering what speech sounds are and then they design telephone systems to do the best

(*Continued on page 102*)

Toronto Symphony Orchestra, which broadcasts on the Canadian National Railways Chain each Sunday afternoon, is glad of the opportunity to doff formal concert attire and dress for the mike in shirt sleeves. Dr. Luigi von Kunits, conductor, stands in front center.

Ruth Nichols, beautiful aviatrix and record-holder.

Ladies

says RUTH

Skimming The Winds In A Plane
—Is Easier Than Fighting Traffic
In A Motor Car

An Interview By

ANNE B. LAZAR

"EVERY woman should learn to fly!"

This is the opinion of one of the foremost pioneer women pilots in America—Ruth Nichols—who breaks flight records with as much ease as she presides over one of those fashionable teas that are open only to members of the Junior League.

And what is the Junior League? It is a closed society in every sense of those two words. And you can't even buy your way in—no, not even in these days when buying is so much in demand. This exclusive organization of society's younger set occasionally produces persons who leave their dances, fancy balls and sports long enough to take an active interest in public affairs—but never has it yielded quite as resolute and determined a character as Ruth Nichols.

It seems almost incredible that the hands which directed the powerful airplane across mountains and lakes from one border of our continent to the other in a record-breaking flight belong to a young society girl!

It was with a desire to learn what part the ubiquitous Radio played in this flight that I went to seek this youthful champion of the air.

The interview was arranged by Mr. Trenholm, Public Relations Counsel for Miss Nichols. The time set was for one o'clock. At ten of one I was still at the office answering telephone calls, but the merciless minute hand ruthlessly swept away the time—and before I knew it, there were only three slender minutes left.

Now, figured I, it generally takes me a quarter of an hour to wade through the mass of scurrying train-bent beings in the Grand Central Station. I have only three minutes. Could I break my own record and make it in three? It had to be done! I was to meet a speed record-breaker and I was going to be no sluggard myself.

I puffed and fumed and fought through the crowds and after many hair-raising thrills and narrow escapes from collisions with travelers and suitcases, and at the dot of one, I found myself in the presence of Ruth Nichols.

TWO champions meet face to face—Ruth Nichols—and your humble servant; one, the noble conqueror of the air who almost reconciled the Atlantic and Pacific Coasts—leaving only a slight difference of a few hours—and the other, modest victor of New York's cro

The freshness of the high-blown w was still in Miss Nichols' cheeks as smiled from those kind, deep-set, g blue eyes of hers. Wavy wisps of brown hair peeked from her little b hat. Her pretty silk frock betraye evidence of masculinity which migh associated with one learned in the chanics of aviation—and there was the tiniest hint of jewels.

AND what a handclasp! I not surprised that the powerful airp was reduced to a mere servitor u that commanding, skillful grasp. there is that same commanding ex sion in her whole face. It does not to be a wonder that the part of this ness of annihilating distances should fallen to the lot of this girl with individual feminine charm! But wo or not, it was she who outraced the pr inent air navigators of the day— Lindbergh and Capt. Turner. She in rose to conquer, and although she at utes much of her success to the mo Pegasus which was loaned to her by Powell Crosley, Jr., of WLW, it was tirely her own mastery and adeptness drove her winged steed through the safely and surely from ocean to o with such amazing rapidity.

There is even the slightest sembl of a Lindberghian expression in her f And like a shadow it is very evasive— I can't seem to remember whether i in her smile or the gleam in her eyes maybe after all it is only the skyw glance that seems characteristic of

Must FLY

NICHOLS

Underwood & Underwood Photo

Perched on the wing of the Crosley Radio plane in which she made the record. Miss Nichols is one of the few women pilots competent to fly this huge racing ship.

n humans who learn to ride the . But there is this much Lindbergh r she refers to her flight as "we" s and "we" doing that.

urse, the first question I asked—ugh I was interested in knowing part in this new drama of the "Is it safe?" Back in my mind e sharp remembrance of my first e at an automobile wheel. We izzing through the mild summer fty—and then the—well, fortuny instructor was a Radio star—person could have such presence

ore, the safety of aviation o me to be the most important be settled for those eager, would- That point settled, and the rest easy.

Nichols has her Five Points of Of course, there may be other eld by other people, but that's e point. There is, for instance, er page of this magazine a pic- savage holding to his points by n them.

ck to Miss Nichols and her Pen--these points should be followed e who aspires to fly. They are: ays fly only in good weather. reports can always be obtained ports. (I would strongly advise relying on newspaper thermome-

over established airlines only. ese regular air routes emergency fields are located at different points within a few miles of each other.

3. You must fly only in standard equipment. Leave experimental planes to experienced aviators.

4. Airplanes must be daily inspected by some thoroughly reliable person in whom you have absolute confidence. They should also be frequently subjected to government examination.

5. Be sure your pilot is both experienced and conservative. Not all experienced pilots are conservative.

These points followed and flying is just as safe and less tiresome than driving.

"I PREFER flying to driving any time. It is tiresome to drive for any length of time through traffic," declared Miss Nichols, "and I should say that flying is safer. Now let me tell you how Radio helped me in this flight.

"It proved itself indispensable in two ways," continued Miss Nichols, "first, in receiving weather reports," she nodded her head with a twinkle in her eye. "You know that weather is mentioned in one of the Five Points I just gave you; second, with respect to direction and wind velocity.

"There were three instances when I received Radio weather reports which were critically important. First, between Columbus and St. Louis when I encountered three heavy, blinding snowstorms which I knew nothing about when I started. I had to bring my plane down almost to the treetops. When weather is against you like that, without a knowledge of what is ahead, one is uncertain about going ahead or turning back. But I got a report that clear weather was ahead, and knowing this, I was able to withstand the rigors of the storm.

"The second time when a Radio report helped me occurred on my way from Los Angeles to Arizona. The earlier weather report had indicated clear weather with slight cloudiness over Arizona. But I found very thick, instead of slight, cloudiness. But, assured by my Radio, I pressed through because I knew that clear weather was ahead of me.

"When I left Wichita for New York. I received pretty good weather reports, but I encountered terrific rainfalls between Wichita and St. Louis. Again the realization of clear weather ahead (from Radio reports) encouraged me to push through.

"Now, with regard to direction and velocity," continued Miss Nichols, "I learned over the Radio whether I should fly at three, five or nine thousand feet high. This advice was exceedingly helpful because if I wanted a tail wind to blow directly behind me, I had to fly at a certain altitude.

(*Continued on page 105*)

Your Kitchen

By Ruth Witson

A LIST of daily home-making jobs is an appalling sight to meet three hundred and sixty-five times a year. To the new home-maker even a carefully scheduled day is quite enough to be frightening, but if you were to write me a list indicating time spent on jobs at home according to your present methods, the analysis would be startling. I venture to say, that without knowing it, you are losing valuable time, money and pleasure simply because you have not been able to get your housework down to a business basis and because you are not taking advantage of labor saving devices on the market. I hope some morning, you will drop in at the National Radio Home-Makers' Club in New York and watch the way we run our kitchen and why we tell listeners on the Columbia network how we have made it one of the most efficient in the country.

The first outline made for a working schedule, should be a rough one. List the things that must be done at a specific time and then build the rest of the day's work around these items. For example, at certain periods every morning, when we are broadcasting, it is impossible for any kind of work to be going on in the kitchen. Consequently, we have planned that water be put in the radiator covers, windows dusted, flowers watered and other jobs that must be done in a short time. The heavy work is apportioned to different days. Thursday, the door-knobs are polished, Friday, the door in the kitchen is waxed and on Saturday the silver is cleaned and polished and the refrigerator gets a thorough cleaning. Such a system is like the old rule of, Monday wash day, Tuesday ironing and so on; but no matter how ancient the law, it is still a wise one to follow. If the work is allowed to pile up to the end of the week, it makes a rushed day or two, or, if by chance you are prevented from doing the work that particular day, the whole routine for the next week, is out of line.

Along with planning the day's work, we have allotted time to ordering, purchasing and storing the foods that we keep on hand. Our order list corresponds to your market list.

A spotless kitchen is possible even immediately after cooking preparations

TWICE a week, we go over the programs for the next three days and order accordingly. You should consult your menu schedule three days in advance and buy enough provisions to last for that length of time. Modern equipment and machines make this labor saving plan possible. With the advent of the electric refrigerator, it is now possible even to add easily perishable foods to the supply of easily preserved foods. This ease in marketing, incidentally, makes for cheaper food bills and better health. Foods are kept and small bits of left-overs can be u to advantage. After the supplies a ceived, the storing becomes a mat importance. Package products s be arranged on shelves in orderly putting the large boxes toward the Vegetables such as celery, parsley lettuce should be washed and put covered container with a little in the refrigerator. We have fo an excellent to prepare vegetables beans, carro peas, ready cooking and to keep thes small amou water in th frigerator. course, this saver is appl only when have some ki mechanical erator at you mand.

During the days, we k juice cock either tomat combinatio several fruit made up, pa frozen in th frigerator. practice as you of alway ing some app on hand to up lazy app Because a everyone li sandwich or cooky to nibble durin morning or afternoon, we also k the refrigerator, several jars of san filling mixed to just the right consi and ready to spread on bread; or a refrigerator cookies all ready to sli bake at a moment's notice. makers can follow these before preparation rules. Briefly, this ex why, no matter how many guests the Radio Home-Makers' Club, w always ready to serve them with thing delicious to eat. There are reasons for this preparation; first, a very gracious way of entertainin second, if we do have interruption rest of our work does not suffer.

I remember one cold afternoon i cember when the kitchen laborator

GLIMPSE into National Home-Makers' Kitchen Reveals Latest Housekeeping Methods, But Good Old-Fashioned Schedule Is Here to Stay

Ice water that is kept studio, is placed in covered ugs. Many guests have asked kitchen is an efficient one be- are experts in this particular ll, partly; but the greatest factor e have up-to-the-minute kitchen t.

WHAT we have in our aboratory, every housewife can ier home kitchen.* No matter l of equipment you are buying, one point in mind,—buy prod- are best suited to your needs, t will give you the best service that will be easy for you to Too often, home-makers are ided by the decisions of their Equipment that will stand up wear and tear of small family y be entirely unsuited for large rvice.

n as a new gadget is placed on et, we make a thorough investi- find if that particular product time and labor saver to us in en laboratory work. If the t proves satisfactory, it wins ent place on the shelf or in the rawer. Besides the new tricky ve have complete sets of bowls, pans suited to every need, spoons and cups, so that at we are ready to make all dif- ferent types of food dishes. The equipment is so arranged that there are no wasted minutes looking for anything. We have made a place for everything and everything is kept in its place. The equipment is so arranged that it is really a pleasure to work in the kitchen, for a well organized kitchen lifts housework and cooking out of the drudgery class.

THE method we use in determining the equipment best suited to our needs, can be carried out in the home. The machines are fairly light and easy to operate yet durable enough to stand up under long wear. The original price should be considered, the price of operation and service or replacement of parts that may be necessary. Sometimes the selling price may be a little higher than other similar machines on the market, but in time the more expensive equipment may actually save you more money in operation service charges or food bills.

The one important feature that practically every manufacturer is taking into consideration is the bending over necessary to run the equipment. This item is illustrated by the fact that within recent years, the designs in kitchen furniture have undergone drastic changes. Stoves have ovens placed at the side with a side swinging door, so that there is no need to bend over to look at the pie or cake. Refrigerators have cold controls and machinery at the top so that adjustments can be made without bending over. Shelves are arranged so that foods can be stored according to the most scientific laws. Shelves are adjustable to accommodate a number of different types of foods. The new machines are easy to clean. The outer surfaces are washable compositions, the corners rounded with a flat top which can be converted into an extra shelf,—a point not to be overlooked in this era of kitchenettes. The inside of refrigerators also have rounded corners. This means that there are no cracks or crevices for crumbs to hide in. Other equipment such as tables, sink tubs or service tables should be the correct height so that the housewife will be at ease while working and can accomplish her tasks without bending over.

Some tables and stools, some stoves, washing machines and ironing boards, can be raised by nailing or placing wooden blocks under the legs. True, equipment such as sinks cannot be raised, but you can raise the dishpan. You can have made, or still better, make for yourself, a wooden rack that will support and raise the dishpan to the proper height.

Every home-maker has a right to have sunlight and fresh air in the kitchen. The smaller windows have replaced the larger ones and now windows are hung with gay thin curtains that let in light, sun and air. If you are not fortunate enough to have plenty of windows in the kitchen, you should have some kind of light provided. A center light is almost indispensable. There should be side lights, one over the sink and a second by the kitchen cabinet to give a bright light for close work. The modern home-maker

Heavy kitchen utensils are concealed in lower cupboard

has found that in her home her kitchen is, in reality, her laboratory and workshop. That is why she has demanded improvements that were once considered luxuries.

Every home should have a kitchen library including standard books on cooking, laundry, interior decorating, child care and entertaining. With new equipment and research service everyone can have an attractive home.

* Mrs. Allen will be pleased to help you make your choice in household equipment. If you will address your requests to her in care of RADIO DIGEST, 420 Lexington Avenue, New York City.—*Editor.*

Are AMERICAN WOMEN LAX in Politics?

Mary Agnes Hamilton, M. P., and English political leade
She hopes for bigger and better things from our wom

"Our Women Have Gone Further than Yours," Says Feminine Member of English Parliament. But She Admits They Lag in Business.

By Mary Agnes Hamilton
Member of Parliament

(From transatlantic broadcast over the stations of the Columbia Broadcasting System)

I SHOULD like to begin by saying how real and deep is the pleasure it gives me to have this opportunity of being in a kind of contact with my many friends on your side of the water, realizing how much our people have in common, how much the whole world depends on our working hand in hand.

In the common cause of woman the will to service can be realized if a new body of fully effective citizens can be created which is in the power of anyone, quite regardless of sex.

So far as women are concerned in both countries, they are waking up very fast and taking a larger and larger share in the business of citizenship. It may be merely a national illusion on this one point, but I think the women of Britain have an advantage over you. Our women have gone further in politics than yours yet have. When I say this I am not forgetting the women sitting in Congress or the Senate or the women doing administrative work like Miss Perkins, or educational or opinion-building work like Miss Addams, Mrs. Catt, Miss Morgan, to name only a very few.

I yet venture to say although your women got the vote on equal terms earlier than ours did, we have done rather more with it. Let me remind you how it is with us today. Our House of Commons includes now fifteen women, after hotly contested elections, elections in which, as you know, both men and women have to cast their votes direct for the party candidate.

AT OUR General Election seventy tried to get elected and fourteen succeeded. One woman — an English peeress—once a conservative worker, now a Labor member, was the fourth of those to sit on the benches of the House of Commons, the other three being Conservatives—Lady Astor, Lady Iveagh and the Duchess of Atholl.

At the 1918 election only one woman was returned. Everybody has forgotten her. Nearly everybody asked, "Who was the first woman to be elected to the British House of Commons?" would say it was one of your countrywomen, Astor! but as a matter of fact it w Irish woman elected in 1918. She, ever, did not take her seat as she Sinn Feiner. As a result, the first w M. P. is forgotten. Such is fate.

Now the women are treated exact though they were men. We hang u hats and coats and deposit our umb in a common cloakroom. We stand the Chamber happens to be full in d Our points of view are entirely i backgrounds.

Our sex in 1929 had ten in the L Party, three Conservatives and on dependent. I don't think it is an dent that the Labor Party has twi many women M. P.'s as the others together. Labor, after all, was the political party of our country to tre women absolutely on an equality wi men. It is the party, too, whic equal franchise on its party prog Labor led the way in admitting wo to parties.

who believe you can't get men to work under a woman. You can; you do. The two greatest administers of the Departments of Labor and Health are working under women and are doing it with complete content because their chiefs are competent persons. The women are doing their share in putting through the House of Commons some of the biggest and most difficult bills which the Labor Government has introduced.

IN THE case of the Unemployment Insurance Act, Margaret Bondfield was responsible for it. She was backed up in regard to the Pensions and Housing Bill, and everyone, I think, admits that in both cases the work was done with complete efficiency and perfect control over the Parliamentary instrument.

I now come back to the question which I ventured in the beginning. Why is it that women have been able to go further with politics with us than with you? I am assuming, of course, that I am right in thinking that they really have done so, that in politics, at any rate, our women have gone ahead of yours. I think the answer to this question is difficult.

I get the impression when I am in the States that politics do not stand too high in public estimation with you; that, on the contrary, a great many people who have a very keen public conscience, if I may call it that, keep out of active politics. Well, it is not so with us. With us it is broadly true that any woman or man who wants to get a thing done and dreams, seeks according to the measure of his or her ability to help make those dreams come true. Anyone with that sort of idea, I should think, feels the way to do it is to get it done. If they want to get their dreams realized, they make their way sooner or later into the House of Commons. That is with us the royal road to effective citizenship.

Representative Ruth Bryan Owen of Florida, daughter of the famous William Jennings Bryan and famous in her own right.

From time to time, of course, you will hear wails about political life not being what it once was. People will talk loudly of their personal disillusion and will ask you, "How can you stand it?" But although we see lots of things in our life and party organization that want alteration, our notion in Britain about how to make public life better, how to make Parliament more effective, and improve things generally, is to take active part in the political battle. If the decent people, the people who see the faults and failings that, of course, exist,—if they keep out, they fail, so we feel, in that duty.

Women here are particularly strong. It is not only that they are priggish (some of us are priggish and try to hide it) but we have an idea we have something to contribute or feel sort of moral. We feel that we ought to go in, to take our share of the rough and tumble, take the rough with the smooth, and do what we can to make things better.

WOMEN with us took longer to start going into politics and prove themselves there than they did in the arts or professions, or medicine. In business, of course, I admit we still lag behind you. Just because Britain tends to put politics so high we expect greatly of it.

That women are out there in public life, is counted, with us, as the present sign of the fact that the general ideas

(*Continued on page 104*)

Frances Joyce of Earl Carroll Fame Refuses to Let Haste Rob Her of Her Beauty

High Cost of HASTE

Have You Read the Story about Mrs. Thompson—the Woman Who Never Hurried? And It's Not a Fable Either!

By FRANCES INGRAM

Consultant on the Care of the Skin
Heard on NBC every Tuesday Morning

IT MAY be true that there are less than half a dozen people in the world who understand Einstein's theory of relativity. I remember reading such a statement in one of the New York newspapers when Einstein came to this country last December. I do not remember the names of the very few people who were reputed to understand the famous theory of time and space, but I do know that the women who write to me have very curious theories of their own on the problem of time.

"I haven't time to do the things which you suggest. I am busy every minute of the day and I have to hurry all the time to do the necessary things of life. I have no time to be attractive." So one woman wrote me recently, and so a great many women seem to feel. If I were not sorry for these women, I would be impatient with them. For, of course, every single one of them is going to suffer from the high cost of haste.

Strangely enough, lack of time is always one of the results of the high cost of haste. Women tell me that they have no time to be attractive. They give me long lists of reasons and I might believe some of these reasons if I did not know Mrs. Thompson.

Mrs. Thompson is ninety-two years old. When she was a young girl, she married a widower with eight children. They lived on a large farm and she had none of the conveniences which are taken for granted today by the women who write to me. Mrs. Thompson managed a large house, eight stepchildren, and later, two of her own—and not one of these ten children ever saw her with a shiny nose, or a soiled or rumpled dress, or—and I think this is especially remarkable—with her hair out of curl. And there were no permanent waves sixty or seventy years ago, either! I do not know of any woman in this generation who has as few comforts, as few conveniences, as few necessities, if you like, as Mrs. Thompson had when she was raising a family of ten in a dilapidated farm house. Yet Mrs. Thompson always had time for her appearance.

Free booklets on the care of the Skin by Frances Ingram, will be mailed to readers of RADIO DIGEST. *Send your request to Miss Ingram, in care of* RADIO DIGEST, *420 Lexington Avenue, New York.—Editor.*

Another remarkable thing about this remarkable old lady is the fact that, according to her children and her grand-children, she was never in a hurry. And never being in a hurry, she had time for everything worthwhile. Haste has always made waste, of course, but perhaps never so much as in our modern civilization. We are all victims of haste. We hurry doing every one of the thousands of useless things that clutter up our lives. We hurry just as much about non-essentials as we do about essentials. Few of us have developed sufficient serenity to detach ourselves and to see things with a clear sense of values. This was brought home to me several years ago when my father visited me. He arrived in New York at the P sylvania Station. I met him there a taxi and dashed him across town to apartment. All the way over I wa the edge of the seat, urging the driver to exercise more ingenuity getting through the traffic. I di realize how much nervous energy I expending or how foolish my atti was until after we had reached the ap ment and my father asked, "What you have for me to do that it was important to save those few min coming across town?" Well, I nothing in particular for him to do I felt that his question was a just c mentary on my silly striving for haste

Too often haste does not advance in our efforts nearly so fast as we lik think it is doing. C sider Lewis Carr Alice in her hur trip with the Queen. You rem ber that the Red Qu and Alice were runn hand in hand and t it was all Alice co do to keep up with the Queen who k crying, "Faster, faster," as they skimm through the air, hardly touching ground with their feet. Just as Alice thoroughly exhausted, they stopped the Queen propped Alice up against a t —the same tree they had been under whole time. For all their racing they h not progressed a single step.

A good deal of our modern haste g us just as far as Alice's famous flight w the Red Queen—and not a step further

Why do we hurry? We hurry beca we worry and worry arises from fear

SOCK ON THE NOSE

ener Minstrels on WENR:—
ne: Say, Ray, is your brother hav-
y trouble?
y: Not lately, but one time he was
cher in a butcher shop and while
as cutting some meat the knife
d and cut off his toe and while he
d down to get his toe he cut his
off.
ne: What trouble does he have?
y: When he picked up his toe and
he was so excited he put his nose
s foot and his toe on his face and
he has to take off his shoe every time he wants to blow his nose.—*Armando Govni, 222 Willow Ave., Joliet, Ill.*

The telegram read: "Baby girl born this morning. Both mother and daughter doing well." And in the corner was a sticker which read: "When you want a boy, ring Western Union." Direct male advertising?—Philadelphia Ledger.

WHAT MARRIAGE WILL DO TO ANNOUNCERS

Robert Brown, WLW:—"The next number is one you will always remember. It is a number you will always cherish—it will stay with you. The title is '*Forgotten.*' Perhaps Mr. Brown can be excused for that one, as he had just been married a few evenings before.—*Hull Bronson, 2220 Reading Road, Cincinnati, Ohio.*

TONGUE TWISTER

Say it fast:—"Is this a zither"—three times. Now you'll appreciate the trouble a Columbia announcer had the other afternoon. He tried three times without success—*Mrs. Horace P. Cook, 412 W. 11th St., Anderson, Ind.*

The tablewds (apol. to W. Winchell) don't seem to get much gravy from Radio Stars. No murders, divorces, shooting matches—they don't seem to have such good press agents. But when it comes to the movies:—

Phil Cook: "I see nearly all movie actresses have long slender fingers. I suppose it comes from the wedding rings—slipping them on and off so often."—*Carl Horn, 532 S. Lime St., Lancaster, Pa.*

Lady in antique shop:—Can you show me something in an antique Radio, circa 1921, with original cat's whiskers and crystal?

POEM AND LAFFUSTRATIONS
by
DON DICKERMAN
(FROM THE WALLS OF THE BLUE HORSE NIGHT CLUB)

IN A FARAWAY LAND CALLED WHONOESWHE

He looks like a Human with
A trick Head of Hair
He runs around Naked and
He roars liked a Bear.

He gets up in the morning and
He starts a little Fight,
And he doesn't stop Fighting till
He goes to bed at Night.

They're very fond of Hunting and
They wield a Wicked Spear,
Killing oftentimes with Single Thrus
A herd of Twenty Deer.

That's where the Jazz Originates,
They play it Day and Night,
And where they sing the Dizzy Blues
And Shake the Shimmy Right.

The Men go to Market and
They don't need any Dough.
For they eat up One Another when
The Food runs Low.

The Whiskey Fruit is full of Punch
The woods are full of Sprees,
You'll find your Steamer Baskets
Growing right upon the Trees.

GOSSIP SHOP

Two visitors on a personally-conducted tour barged into the studio at Columbia the other night just before Toscha Seidel's concert was to begin. Only one person was in the room.

"This is where Toscha Seidel is going to broadcast, isn't it?" one of the guests asked.

"Yeah, this is the joint," said the man in the room. "But take a tip from me buddy: lay off of that program, it's a lot of dizzy classical stuff!"

The speaker was Seidel himself!

* * *

Guy Lombardo got a fan telegram after his broadcast the other day. It came from a neighbor living in the same house with him. Here it is:—

GUY LOMBARDO
ROOSEVELT HOTEL
NEW YORK CITY

YOU SOUND MUCH BETTER OVER THE RADIO AT TEN THAN OVER MY HEAD AT FOUR PM

OLIVE SMYTHE

* * *

Josef Hofmann, the famous pianist, tells one on himself. It seems he was giving a concert and was disturbed by the laughter and mumblings of a man in the third row front.

"You'll have to come and get your money back," the usher firmly proclaimed.

"All right," was the answer, "but why'm'I bein' kicked out?"

"You're drunk," said the usher.

"Of course I am," was the retort, "if I wuz shober d'ya think I'd be at a conshert?"

* * *

When George Beuchler, WABC staff announcer, takes time off between programs to have dinner, he takes his stopwatch with him. Mr. Beuchler has learned to calculate to a second how much time will be occupied by each dish. If you sit next to him at dinner, you hear him mumbling to himself:

"Soup, two and a half minutes; salad, three minutes; grilled steak, eleven minutes . . ."

DIDN'T KNOW HIS OWN BIRTHPLACE

The Mirthquakers, NBC:—

"By the way, Brother Macey, where did you get that black eye?"

"That's a birth mark, Brother Brokenshire."

"A birth mark? What do you mean by that, Brother Macey?"

"Well, Brother Brokenshire, I was coming back from Chicago the other night and I got into the wrong berth!"

—*Haydon Peterson, 1723-12th St., Des Moines, Ia.*

ABSURDITY

Say, Indi-Gest, to kill some time
I Thought I'd write a Jingle,
On Radio celebrities,
The Folks with whom I mingle.

Ray Perkins hands me quite a laugh,
Phil Cook is also funny,
But count me out on Cheerio
E'en though it cost me money.

So many bands have tried to ape
"B.A." Lombardo Vallee,"
I wish someone would dump the bur
In some deserted alley.

I'd like to sing a line of praise
For Pete and Aline Dixon,
Their "Raising Junior" is one act
My dial is always fixed-on.

And here's three cheers for Arabesq
And Frontier Days are fair,
Then add a long huzzah! for
Billy Jones and Ernie Hare.

Whoa Indi-Gest, I'd better stop
While I still have my health
Before some reader throws a brick
And ends my trek toward wealth.

"STEW"

Indi-Gest assures you that "Stew" not the Old Soak. He is none oth than Leonard *Stewart* Smith, popu RADIO DIGEST author.

A RADANECDOTE

over WLW:—Several years ago
e, Edison, Ford and Burroughs
uring through Cincinnati. A
their car went bad, and they
at a little crossroad store. Mr.
ent into the store.
t kind of automobile lights do
e?" asked Ford.
on," replied the merchant.
ake one," said Ford. "And by
, you might be interested to
at Mr. Edison is out in my car."
' said the merchant.
the light was put in it was
hat a new tire was needed, so
ent back into the store and
hat kind of tires they had.
stone," was the reply.
he way, you may be interested
that Mr. Firestone is out there
ar and I am Mr. Ford—Henry

"So?" said the merchant.

While the tire was being put on, Burroughs, with his white whiskers, leaned out of the car and said to the merchant, "Good mornin', sir."

The merchant looked at him with a sarcastic grin and said: "If you try to tell me you're Santa Claus I'll crown you with this wrench."—*Imp, Grosse Isle, Mich.*

LAUGH, CLOWN, LAUGH

The Interwoven Pair:—

Billy Jones: Have you ever heard my favorite piece, Lohengrin?

Ernie Hare: No, but I've heard Minnehaha.—*Harold F. Baker, 401 College Ave., Winfield, Kans.*

Now, isn't it a pity that Gigli, the tenor, doesn't say his name the way it looks, instead of in good old Italian, "Zhili" (not a G in it)—so we could have put him in that one. Well, now go ahead and get giggly over this one:—

Something for Everyone (CBS):—

"I never thought I'd pull through. First I got angina pectoris, followed by arteriosclerosis. Just as I was recovering, I got tuberculosis and aphasia."

"Good heavens, you don't look much the worse for it."

"I wasn't ill, you idiot! I was in a spelling bee."—*Florence Haist, Box 157, Lindenwold, N. J.*

SLIPS THAT PASS THRU THE MIKE

On November 30th, Mrs. Ruth Bryan Owen was introduced to us
By John B. Kennedy on Collier's Hour thus:
(He placed the cart before the horse,
And introduced her as) Mrs. Ruth Owen Bryan, of course.
Mrs. M. J. Swan, 12 Northern Ave., Northampton, Mass.

CAUSED BY PATRIOTISM:—Winnipeg's CKY in Canada introduced an orchestra rendition of *It Happened in Monterey* with the solemn statement that the harmony boys would next play *It Happened in Montreal.*—*J. P. Leith, University Station, Grand Forks, N. D.*

REPORTED FROM THE STUDIO ITSELF:—WTIC in Hartford made a mistake in switching programs one night. The announcer pushed the button which connects the Hartford station with the NBC Red network instead of the local studio. Upon hearing a strange voice discussing spiritualism, he quickly pushed the right button—but too late—here was the result of his mistake. WTIC Announcer:—"Our next feature, the Travelers' Hour, is introduced by Mr. Paul Lucas (NBC:—) in a hypnotic trance."

LOWELL THOMAS MAKES A MISTAKE. To quote him:—"A person could go into a drug store and buy either epizootic or asafetida." (In case you don't know it, epizootic is a disease peculiar to animals—why buy it at all?)—*Edith C. Woodbridge, 2417 Sunnyside Ave., Chicago, Ill.*

ANNOUNCER PUTS ON RUDY VALLEE RECORD. We hear, "Click—scratch, scratch, scratch, click! Scratch, scratch, scratch, click—" Silence. "Rudy Vallee is cracked!" piped a young female voice. Followed by, announcer: "With due apologies, the young lady says she was referring to the record!"—*Edwin V. St. John, 25 Whiting Ave., Dedham, Mass.*

NOTHING BUT THE TRUTH in this news broadcast from WEEI. Announcer: "This large corporation has been operating on a strictly *profiteering* basis for twelve months—a procedure that has been eminently satisfactory but that has produced no profits to the shareholders." He didn't even correct his mistake.—*William W. Sanders, "Birchbrow," Haverhill, Mass.*

Voice of th

RAH FOR HAPPY HOLLOW!

HERE are a few lines I would very much like to see in print in V.O.L. But I know that what I write is never eligible for anything like that (*No!—Editor*). There is one station and especially one program here in the Middle West that I admire—KMBC, Kansas City, Mo., and the program is "Happy Hollow", written and presented under the direction of Ted Malone.

Happy Hollow is the typical small town, with the general store, little red school, depot where a train comes through once a week, and everything else that makes a "one-horse" town. —The Pestication Pest (Marguerite), Higginsville, Mo.

* * *

WE REFUSE TO PLEAD GUILTY

I WAS first introduced to your excellent magazine with the September issue and now I come back for more every month. "Somebody or other", who stated in V.O.L. that most of the news and articles in RADIO DIGEST were about Radio artists of the South and West is crazy—at least as far as the West is concerned. I haven't seen much as yet about the stations I usually listen to—especially about KFRC, my favorite station.—J. R., Sacramento, Cal.

Not guilty this time. December, 1930, issue contained a story and pictures of the KFRC Blue Monday Jamboree—rotogravure section this month displays a fine picture.—EDITOR.

* * *

JIMMIE GREEN STORY COMING SOON

I AM a Jimmie Green fan, and wonder why he isn't given the publicity in RADIO DIGEST that he rightly deserves. And Frankie Aquins, one of the featured vocalists in Jimmie's orchestra, possesses the finest, and I think, the sweetest voice I have heard. I have listened to both of them over WENR, WTMJ, and have now followed them, via the Radio, of course, to WGY.—Lucille MacLeod, 5726 Erie Avenue, Hammond, Ind.

* * *

FOR RADIO CLUB FANS

I STARTED reading RADIO DIGEST with the October issue and I find it to be the best Radio magazine I have ever seen. I especially enjoy reading the V.O.L. I have become affiliated with two Radio clubs through reading this column and I would like to join several more. If anybody who reads this letter happens to be at the head of any Radio club will they please send me an application card and any other information necessary to join.—Stanley J. Fredrickson, 816 Macon Street, Brooklyn, N. Y.

* * *

MR. ARNOLD'S letter gave me an idea. Why not publish the names of people who would like to interchange information on Radio reception and all the "whys" and "wherefores" of Radio?

I would like to receive letters from listeners about the distant stations they can get and the different programs their local stations have—or anything about Radio!

I will gladly answer any letters.—Mr. L. J. Goulette, Route No. 2, Plummer, Idaho.

* * *

WANTS "CHEERIO" TO REMAIN INCOGNITO

IN ANSWER to Mrs. Servior Mitchell in the December DIGEST, I want to disagree with her about "Cheerio" taking the wrong attitude in remaining "incog."

When you hear a Radio artist every day for several years can't you just picture how he looks? I can, and sometimes when I finally see his picture—— Oh! how disappointed and disillusioned I am. Imagine how many thousands of folks have their own conception of just how "Cheerio" looks,—and they *can't all* be right. So think what would happen if suddenly some paper came out with the picture of a short fat man labeled "This is Cheerio" and nine thousand nine hundred and ninety-nine people had pictured him as a tall thin man! I would rather keep my own mental vision of him. How about the rest of the "Circle"?

Here's to RADIO DIGEST—may it always be as good as it is today.—Mrs. W. H. Stiles, Stone Harbor, N. J.

* * *

HE STILL BELIEVES IN SANTA CLAUS

IN YOUR December issue you have a very interesting article about some of the Radio artists and what they want for Christmas. Should Santy Claus make inquiries as to what some of the listeners want, will you please tell him if we find an announcement, in our socks on Christmas morning, of Floyd Gibbons in his nightly broadcasts of news flashes, he will make the whole world happy. Thank you.—A Listener, Dayton, Ohio.

* * *

CHEERIO STILL ON NBC AND WDAF AT 9:30 CENTRAL TIME, LITTLE JACK LITTLE ON NBC AND WREN 12:45 SUNDAY

WE USED to get "Cheerio" through WDAF, Kansas City, but can't locate them now. Are they off the air? If not, what chain are they on and what station?

Is Little Jack Little still on the air, and if so, from what stations does he broadcast?—B. R. Coggeshall, Solomon, Kans.

* * *

WHERE IS "APOSTOLIC CHURCH OF PENTECOST" BROADCASTING OVER 1040 KILOCYCLE STATION?

ABOUT December 1st (9:00 o'clock mountain standard time) we heard a religious service being broadcast from a station using a frequency of about 1040 kilocycles. KNX, Hollywood was on one side, while our local was on the other side. Can any one tell me where this church is located? We would like to communicate with it. We are pretty sure it was the Apostolic Church of Pentecost. If possible, we'd like to know the Evangelist's name, too.—David Donaldson, 1355 McTavish Street, Regina, Sask., Canada.

* * *

RECIPE BROADCASTERS, PLEASE TALK SLOWLY AND GIVE MRS. HOUSE-WIFE TIME TO WRITE

IT IS rather disheartening to a housewife who has listened intently to the discussion of a new dish to find, after she has dashed around looking for a pencil and paper (and found them), that the lady at the other end of the Radio connection is talking so fast that it is not possible to take down the recipe or instructions.

The speed at which the average cooking broadcaster delivers her recipes makes it quite difficult for many of the housewives to take down all the information given in long hand.

Of course, the writer is taking into consideration that the time is limited in which the broadcaster is obliged to dictate her recipes, but would it not be better if the dictator gave fewer recipes, enabling the housewife to make a success of these, than to distribute many recipes, which through lack of time allowed are incompleted by the housewife and, as a consequence, unusable.

Incompleted recipes for dishes which cooks are anxious to serve means lost sales of ingredients comprising them, reacting against the manufacturer sponsoring the broadcast.

Is it not essential, therefore, that proper promotion of sales the whole distributor advertising the various pr through the medium of the cookery talk it that recipe dictation is standardiz time? Bessie A. Crotty, 1 Jacobus Pla York, N. Y.

* * *

P. S.—NELLIE SAYS DON'T BROA RECIPES AT ALL

I WISH some station or magazine wou a movement to abolish recipes fr Radio. Not one person in a thousand pencil and writes 'one teaspoonful salt flour' " and the rest of the rubbish one pelled to listen to regardless of how mu pays for a Radio.

If it is boresome and nerve-racking for to have to listen to a flock of unint recipes, how irritating and exasperating be to men.

If "Good English" supplanted the programs" we might all profit with t which is now wasted.

If we can't afford a cook, in this day a we eat in restaurants. PLEASE begin s ment to eliminate "recipes" and replac with music or "Good English."—Nell Black, Miami, Florida.

* * *

GUESS YOURS IS "MINORITY OPI ON LITTLE JACK LITTLE—HE NOW ON NBC

I HAVE been reading your RADIO DIG some time and am interested in lette your readers upon various phases of programs. I like to see friendly critici not daggers thrust at each other throu magazine! I think each listener has a r his or her opinion, and to have likes a likes.

Now I wonder just what readers th "Little Jack Little"? There has been a deal of discussion about him and many criticisms of his line of Radio broadcast WLW. One may have a pretty accura of the man from hearing him just once. me and all my family and many frien could be left off the Radio entirely and missed—much! He is a natural born pi believe, but if he would only play and n to talk or sing! I simply can't stand hi of conceit and egotism and self esteem.

We like good poetry over the air but ge of it suitable for broadcasting. W "Tony's Scrap Book" now over the CB "Buck and Alice" over NBC, and so others. The fine pipe organ program WLW, WGN, WENR and other statio so good—so are the School of the Air an Cook and "Cheerio"—over the big chai don't know what we would do witho Radio. I enjoy reading about the prograr different characters in the RADIO DIGE is fine!—M. F. L. C., Indiana.

E POOR ANNOUNCER—HE IS MED FOR WHAT MAY BE THE SPONSOR'S FAULT

THE public, have our favorite an-
ncers as well as our favorite stations.
critical—we are super-critical—why
we be when we are daily enjoying
ur hours of free entertainment?
e in ten thousand of us knows an an-
by sight, but we know his voice and
is picture for our mind's gallery from
e a good-looking man, rather under
e, in evening clothes. He is standing
galaxy of entertainers in velvet and
is the Master of Ceremonies, a per-

announcer helps a poor program. A
nouncer hurts a good program. A good
r, to our mind, is one who is not
who does not over-air his knowledge.
our announcer to use good English
which is free from accent. We be-
he should use a few descriptive ad-
out we do not want our announcer to
cheap wit. We are fastidious.
not always *turn to something else* dur-
advertising of the sponsor's wares.
e only two reasons why we do not;
we don't want to miss the beginning
ogram; the second, we are *interested*.
ccess of a station depends on how well
uncer holds our interest—will we ask
mer's Toothpaste when we stand
e druggist's display-case? If the an-
has told us in as many words as
(and no more) "Gummer, the manu-
of the wonderful Gummer's Tooth-
ich is so well recommended by all
has the pleasure of presenting——,"
ask for Gummer's Toothpaste. We
lp asking for it because the name,
r's" stands out.

"Music soothes the savage breast." Granted. But a heavenly choir would fail to soothe us during some of the long-winded and disjointed preambles to some of the programs.

Some day a thinking sponsor will explain to his wordy announcer that the Radio has brought out another phase in selling-psychology. He may call it appreciation—it doesn't matter; whatever he calls it, it is a sale made by his program in the way the tailor's extra care in the fitting of an altered coat brings the man back for a new suit.

General Napier announced the capture of Scinde and the end of a campaign by the one word, "*peccavi*"; meaning, I have sinned. O for the day when we shall hear, "This is Station BLAH *Napier* is your announcer."

Will the writer of this letter please communicate with the *Editor?*

* * *

MORE WHAS PICTURES, PLEASE!

I AM a regular reader of the RADIO DIGEST and like it immensely. I have only one objection—there are never pictures and write-ups on WHAS artists or announcers, where other stations have them two or three times a year. I hope we will hear a little about them soon.—Miss S. Glenn, Louisville, Ky.

See the picture and story about Jack Turner, pianist of WHAS on page 72 of this issue and other pictures in the Sept. issue—EDITOR.

* * *

SPECIAL DEPARTMENT—VOICE OF THE "RUDY" LISTENER

WE PUT it to a vote in the V.O.L. columns—this question of the most popular orchestra leader—we'll let you in to count the ballots—here they are:—

UNTIL I found your column in the magazine I did not know the Radio listener was supposed to have a voice. I thought we had to take everything they wanted to hand us and not squawk. If you doubt this statement try to find a good program Sunday morning or afternoon. I think that if they put Rudy Vallee on the air Sunday afternoon, even you ducks that are razzing him would welcome him with open arms.—A. Curnow, Detroit, Mich. . . . Is the V.O.L. intended to be the humor department? Whatever the intention, it has succeeded in being the funniest spot in the magazine since I have been reading it. These bombastics about Rudy Vallee started by the eminent Mrs. Johnson are the source of the amusement.—R. M. Kenworthy, Chicago, Ill. . . . I'll bet most of these people who do the "panning" listen to his programs.—Bea Trumble, Saginaw, Mich. . . . I am always, like all other young people, willing and anxious to read anything that Mr. Vallee writes.—Margaret M. Long, Chicago, Ill. . . .

* * *

WHEN we studied about Rome in School, we learned that Roman youths used to take mud baths to make them more gorgeous (A tip for Rudy and these mud-slingers).—Another "heigh-ho" fan, Grass Lake, Mich. . . . He has worked very hard to put himself and his orchestra where they are today and deserves every bit of praise he receives. Come on, you Vallee fans, fifty-million of us can't be wrong.—Carlita M. Halford, East Hartford, Conn. . . . If some girls want to picture him as their dream lover, well isn't that their own affair? Heaven knows it's harmless enough.—C. L., Augusta, Maine. . . .

OH! IT'S a "Beauty Contest" now—well, I'll raise your two cents and have my say. Ugly features, unattractive and homely face (as Rudy's was called) never kept any good man down. How about Abraham Lincoln? And coming back to Radio, would you call Graham McNamee handsome?—Ruth Ramsay, Petersburg, Ill. . . . Razz Rudy? Not while I'm around. His musicians got their instruments at some place other than the 25c to $1.00 store, as they certainly are not tin panny. —Mrs. R. Whaley, Detroit, Mich. . . . To me he is a mythical knight, and his voice sends me all a-twitter and a-twitch.—Virtinia K. Henderson, St. Joseph, Mo. . . . A million girls in love with him? Why not? Hasn't a person who has gained a foothold for himself on the ladder of fame some sort of right to expect applause? Hasn't his voice that certain something that weaves romance—its' so—so—oh, what shall I say?—J. M. Swanson, Ludington, Mich. . . .

Etc., etc., etc., from many, many more, in cluding M. E. Brown, Waterbury, Conn., Mr. R. M. Hubert, Cincinnati, Ohio . . . Valeria Bache . . . D. B. Morris, Huntington, L. I. . . . and so on, and so on, ad infinitum.

* * *

ONE VOTE FOR "JIMMIE" GREEN AND "SOL" WAGNER

POOR Rudy. It really is amusing the way Mrs. Johnson has all the Rudy Vallee fans up in arms. To be perfectly frank I don't care for him myself.

The best orchestra in the country, in my opinion, is "Jimmie" Green. If you haven't heard him, well, you've missed a lot.

And I must not forget to mention "Sol" Wagner. Tune in on WENR Chicago and if you're blue, you won't be for long.—"Tiny," Washington, Pa.

* * *

MORE VOTES FOR LOMBARDO AND COON-SANDERS

I AM writing this in favor of Guy Lombardo and Coon-Sanders. I don't see how a perfectly good magazine like yours can harp so much on Rudy Vallee.

Lombardo and Coon-Sanders have bands that really work together to put over the whole orchestration, not just a few pretty choruses of a good number. Guy Lombardo's band and Coon-Sanders' must rate far above Vallee because of their higher and more complicated type of music.—Warren J. Hanson, Northfield, Minn.

* * *

THERE seems to be so much discussion in the Voice of the Listener about Rudy Vallee and Guy Lombardo, I will have to "speak my piece". The Royal Canadians have more rhythm and individuality than any orchestra I have ever heard.

Of course, I know the men have been accused of being jealous of Rudy but does that sound reasonable? If that were true, we would be jealous of the Lombardo boys, too. All three of them are good looking and I know of no one that can imitate Carmen's singing. My vote goes for the Lombardos.—George F. Kunze, U. S. Veteran's Hospital, Oteen, N. C.

* * *

ONE VOTE ISN'T ENOUGH FOR HIM—HE TAKES TEN

THIS is my arrangement of the ten best orchestras. Johnny Hamp, Earl Burtnett, Paul Whiteman, Isham Jones, Jack Denny, Ben Bernie, Gus Arnheim, George Olsen, Wayne King, Ted Weems.—O. J. J., Melrose, Wis.

* * *

WHERE IS ROY INGRAHAM'S BAND?

IF I were to name the five best orchestras on the air I would mention—Coon-Sanders, Guy Lombardo, Wayne King, Roy Ingraham and Art Kassel.

By the way, can anyone tell me what has happened to Roy Ingraham? We haven't heard him in this part of the country, since last spring.—Geraldine Schuman, Milwaukee, Wis.

Scientific Progress

By Howard Edgar Rhodes, Technical Editor

Synchronization of Stations

Synchronization is a subject of fundamental importance to Radio listeners since it may have very far reaching effects on broadcasting. By means of synchronization it is possible to operate on a single wave length any number of stations transmitting the same program. Just what synchronization is, and the effect it will have, are described here

THE next few years may see the operation of entire chains of broadcasting stations on the same wave length if the proposed experimental operation of WTIC, Hartford, on the same wave length as WEAF; and WBAL, Baltimore, on the same wave length as WJZ, proves successful. Normally if two stations located quite close together are operated on the same wave length, serious interference is produced, but if their operation is synchronized, it has been determined from experiments made by engineers of the NBC, no interference is created. In fact, it appears that the synchronized operation of two or more stations on the same wave length has the effect of improving reception for listeners located midway between the two stations and normally receiving rather weak signals. Such listeners will, when the stations are synchronized, receive a combined signal from both stations which will make the reception louder and decrease fading.

It is to test the practicability of synchronized operation under ordinary broadcasting conditions that the National Broadcasting Company has requested permission of the Federal Radio Commission to permit the operation of WTIC and WBAL on the same frequencies as WEAF and WJZ respectively. At present WTIC and WBAL share time on 1060 kc. and operate on alternate days; when synchronized both stations will be on the air full time. WBAL will operate half time on 1060 kc. and half time synchronized with WJZ on 760 kc.; WTIC will operate half time on 1060 kc. and half time synchronized with WEAF on 660 kc. This synchronizing arrangement, giving both WBAL and WTIC full time broadcasting schedules, will bring many new NBC features to the listeners in Baltimore and Hartford areas.

Though these experiments prove entirely successful it would not be possible to extend such operation to all the stations on the networks. For example, KYW, Chicago, operating on 1020 kc., now carries a number of NBC programs. But if this station were to be synchronized with the key station, WJZ, on 760 kc., serious interference would be produced in Chicago because the synchronized operation of KYW on 760 kc. would place it too close to 770 kc. assigned to WBBM, Chicago. The only conclusion one can reach is that the general adoption of synchronized operation of chain stations probably require the reallocation of broadcasting stations. Obviously, the frequency assignments of a large number of stations must be changed to make available a clear channel throughout the entire country on which a group of synchronized stations could be operated.

The final set-up after the necessary reallocation of stations, would be the assignment of one wave length to each chain and all the stations associated with a particular network would operate on this common wave length. Whereas a group of thirty stations now require some thirty different wave lengths, when synchronized only one wave length would be required, releasing the other twenty-nine wave lengths for other programs. This is an important advantage of synchronization; it makes more efficient our use of the limited number of broadcast channels.

Many of the chain broadcasting stations are not in favor of synchronization, for as soon as they operate on a common wave length they lose their individual identity. The chain broadcasting companies will therefore be compelled to purchase and operate their own stations or to take full time leases on stations which can readily be changed over for synchronized operation. To buy new stations or lease existing stations and change their wave lengths involves the expenditure of millions of dollars. Synchronization, without doubt, is something that cannot be accomplished over night.

So far as the Radio listener is concerned, what are the advantages of synchronization that would warrant the expenditure of millions of dollars? In what way does synchronization result in improved Radio reception for the listener? It seems to us that synchronization yields the foll advantages.

First, the entire country could be ted" with a number of high-po broadcasting stations so located as t ply a good strong signal to all list Since all these stations would us same wave length, there would be terference between them.

Second, listeners throughout the co could have available full time rec of chain programs.

Third, reception would be imp since listeners now so located as to r a rather poor signal would, in most receive stronger signals under synchr operation.

Four, tuning in the chain pr would be simplified since all the pro of a particular network would alwa received at the same point on the dial of the Radio receiver.

Synchronization will also result i release of a number of wave length used in the transmission of chain pro and these wave lengths could then b to give additional programs to th tener. Channels would also be left if in the process of setting up a syn nized network certain transmitters purchased, thereby possibly leaving the frequency assignments formerly by these stations. If this occurs seriously doubt the ultimate use. of chronization), and such frequencie released, they should certainly be ass to organizations who can afford to and maintain high-powered station ganizations willing to spend time money to put good programs on th

THE notes on synchr tion given on this page obviously the picture far into the future. Syn nization must be brought about by e tionary rather than revolutionary ch in our present methods of broadcastin

Meanwhile if the proposed experi with WBAL and WTIC are succ there is no reason why such operati dual wave lengths cannot be appli many other stations so located that operation could be undertaken wi causing interference with station neighboring channels. In this m many stations now operating part will be enabled to operate full time.

of the Radio Arts

Latest Developments in Television

THE last few weeks of 1930 brought forth a number of important developments in television. During December an important ence was held by all engineers work- o television problems. This confer- lled by the Federal Radio Commis- d held in their offices at Washing- C., discussed various technical s concerned with the experimental ssion of television programs. As a f the conference a number of as- ts were changed and the engineers definite resolutions regarding the ent of licenses and the setting aside tional bands for further experi- work.

g the television conference, P. T. rth, associated with Television ories of California as its Technical r, somewhat startled his co- by stating that he had done some ul work with 700 line television and that by special processes and e transmission band required for ictures was no greater than that by an ordinary broadcasting sta- the transmission of voice and One of the major problems on he progress of television depends ge extent is that it ordinarily re- the use of very wide bands of cy and the transmission and recep- these wide bands creates problems to overcome.

NOW if a method can be to make it unnecessary to use such ands, television would probably come a practical reality. It is ood that Mr. Farnsworth expects onstrate his system in New York me during the early part of 1931. s to say everyone is looking for- ith much interest to this.

rts have reached the Department merce of a successful demonstra- Paris by M. Barthelemy, a well French experimenter, of a tele- evice which works successfully on nary broadcast receiving set. A from the trade Commissioner in ated that figures were produced in lief and in colors, the images were red and facial features were suf- distinct to permit easy recognition iduals. It is understood that M. emy claims his apparatus attains tion thus far not reached in other countries. When asked if he could televise an entire scene he replied in the affirmative.

With the closing weeks of 1930 there was brought to light some data on experiments made by engineers of the National Broadcasting Company in the transmission and reception of television images on

Mr. D. E. Replogle, of the Jenkins Television Corp., a pioneer who has probably done more than any other man to aid the advance of practical television apparatus.

short wave lengths. These tests were conducted in the heart of New York City and it was found that the Radio waves acted very much like light waves—being easily absorbed, reflected and refracted. In other words they literally bounced around among the steel buildings in New York.

Reflected waves caused the television receivers to show two or even many images instead of just one. We suppose that in an extreme case a lone pretty girl doing a dance would look like a whole chorus!

With these short wave lengths many "dead spots" were found where little or no signal could be received, these areas of poor reception being due evidently to the absorption of the Radio waves by steel structures. The shorter the wave length, the more severe are such dead spots, although they were not uncommon in the broadcast band, especially in the early days of broadcasting before stations began to use high power.

Dr. Herbert E. Ives of the Bell Laboratories, and one of the most prominent engineers associated with the art of television, has done considerable work on the transmission of television images in natural color. Color transmission without the use of extremely wide bands of frequency has been perfected and color values in the case of ordinary black and white images have been improved.

In the television demonstration given by Dr. Ives during the early part of 1930, the subject was illuminated with blue light and the photo-cells were of the type sensitive chiefly to light in the blue part of the spectrum. Blue light was used, since the eye is comparatively insensitive to this color and the face of the person being televised can therefore be illuminated with a very intense blue light without causing the discomfort which would be experienced if white lights of the same intensity were used.

THE effect of using blue light, however, was to make the yellow and red tints of the skin too dark. In order to produce a more natural gradation in color values a purple light is now used with additional photo-cells more sensitive to red light added to the system. Purple being a combination of red and blue, we are therefore in effect scanning the person's face with the aid of light at each end of the spectrum and as a result we obtain much more faithful reproduction.

These notes on television make it apparent that a tremendous amount of engineering thought is being devoted to the subject. What this year holds in store in the way of further television developments no one knows, but there is little doubt that tremendous advances will be made. Farnsworth's revolutionary system, about which no details have been divulged, may prove to be practical and television would then be "just around the corner." Readers of RADIO DIGEST may be sure that the editors of this magazine will keep in close touch with all television developments and report them in these pages, as rapidly as possible.

Stations Alphabetically Liste
